SSLC SURE A+ NOTES

H1. HUMANISM

1.What are the characteristic features of the changes that took place in Europe from the 14 th Century onwards

•Spread of secular values• Growth of urban life• Monetary economy • Progress of trade • Importance gained by regional languages

2.The Renaissance in Europe first began in Italy/Cities in Italy were different from the rest in Europe.Give reasons **(First Term Model)**

They were more independent, wealthy, and dynamic .Traders in these cities were well aware about banking and insurance. Some of them had expertise in technical matters of trade, such as bookkeeping. Many of them had become extremely wealthy through trade

3.Italian cities were wealthier compared to other European cities. Describe the circumstances that led to this. (Role of Crusades)

• The Crusades facilitated cultural exchange between the East and the West. • Italian cities got acquainted with the cultures, cities etc in the Eastern world. This accelerated the growth of Italian cities.•Through trade with the Islamic Empire and the Byzantine (Eastern Roman) Empire, enormous wealth flowed into the Italian cities. • Merchants in Italian cities gained monopoly in the trade between the East and the West.

4.Discuss the impact brought about by the outbreak of the Bubonic Plague in the mid- 14th century in various fields in Europe ? **(First Term Exam)**

• Declined medieval feudalism. • It was heavily depended on the agricultural sector. • Emergence of middle class. •When ancient medicines failed People began to explore the medical sciences of ancient Greece and Rome. • Human beings to contemplate the fleeting nature of life, seek wellness, and focus on their own well – being. • Emergence of humanism.

5.Assess the impact of the conquest of Constantinople by the Turks on the intellectual landscape of Italy. **(First Term Model)**

The Ottoman conquest of Constantinople in 1453 had a profound and transformative impact on the intellectual landscape of Italy. Byzantine scholars and intellectuals migrated to

Sure A Plus

Italy. They brought invaluable classical Greek manuscripts . It facilitated the study of classical philosophy, literature, and science.Wealth and political freedom created a fertile ground for artistic innovation and cultural experimentation. • Novel ideas began to emerge in the cultural and intellectual spheres.

6.Difference between scholasticism and Humanism

Or

What is Scholasticism? Analyse the shift from Scholasticism to the concept of Humanism. **(First Term Exam)**

Scholasticism-Scholasticism is a Philosophy, which was deeply rooted in Christian theology.• It encouraged knowledge and research.• It prioritised the divine and the afterlife.

Humanism-Humanism emerged as a departure from Christian theology.• Emphasis on human experience, worldly life and rational inquiry.• It encourages the uniqueness, emotions, capabilities, literary expression, and communication skills.

7.How did the emergence of humanism impact the course of world history?

• People began to read ancient Greco-Roman works. • Humanists produced works in regional languages. • Created paintings and sculptures in the Greco-Roman style. • Greco-Roman art depicted Gods, the wealthy, and the powerful in all its beauty and splendour. • Humanism brought changes across various spheres, including painting, architecture, literature, politics, history.

8.What were the features of Renaissance Paintings

OR

Renaissance is the shift from the divine centred outlook to the human centred outlook. Substantiate the statement by evaluating the renaissance painting. **(SCERT Model)**

 • Landscape • The use of colour to illustrate light and spatial depth • Realistic depiction of the human body • The use of oil paint.

9.Renaissance painters,Works its characteristic features **(SCERT Model)**

Masaccio-Wall paintings-Round in shape.Protrude from the surface. Showcased human figures engaging in everyday life experiences.

Leonardo da Vinci-The Last Supper and Mona Lisa-'Last Supper,' emotions like surprise, fear and guilt of Christ's disciples are vividly etched as Christ reveals that one of them betray him.The enigmatic expressions of Mona Lisa conceals many unanswered questions

Sure A Plus

Michelangelo-The paintings done on the ceiling of the Sistine Chapel ,The Last Judgment-His works predominantly feature powerful and graceful human forms.

Titian and Raphael-Raphael portrayed humans as wise, moderate, and dignified. In their paintings, beauty and ideas were given equal importance.

10.Important Sculptors and Sculptures **(SCERT Model) (First Term model)**

Donatello-.David,Gattamelata-He liberated the art of sculpture from the medieval Gothic style, giving his works greater power and individuality

Michelangelo-.Pietà; portrays Virgin Mary, with Jesus Christ on her lap.David-He depicted Gods in human forms, deviated significantly from the traditional ancient Greco-Roman style

11.Features of Architecture in Renaissance period

Filippo Brunelleschi set a new style in architecture. Completely different from the Gothic architectural style. Influence of ancient Greco-Roman style is evident in the Cathedral he built in Florence. The lofty towers found in Gothic style, were replaced with domes (Dumo). Later, in the St. Peter's Basilica, built Under the supervision of Michelangelo and Bramante, this style is more evident.

12.Characteristics of Renaissance Literature ?

Renaissance writers gave importance to individual liberty and secular values. The basic characteristic of Renaissance literature was its breaking away from the scholasticism . Although influenced by ancient Greco-Roman culture, most Renaissance writers wrote in regional languages. Prose literature gained prominence

13.Literature in Renaissance period **(First Term Exam)**

Dante-The Divine Comedy-Imagined pilgrimage through Hell, Purgatory and Paradise.Reflects human emotions, patriotism, fascination for natural phenomena

Petrarch-Sonnets-Leading exponent of humanism.His sonnets addressing Laura reflected a bold and unique style

Boccaccio-Decameron

Niccolò Machiavelli-The Prince-Ruler must maintain the authority and security of the state.He should remain impartial and avoid showing favouritism to specific groups among the subject

Some women lived in Italy, recognizing the importance (First Term Model)

Sure A PLUS

Cassandra Fedele-She earned a name through her writings and speeches.Emphasised the importance of providing higher education to women

14.Complete the table renaissance writers in the other countries **(First Term Model)**

Writers	Works	Country
Erasmus	In Praise of folly	Netherland
Geoffrey Chaucer	Canterbury tales	England
Thomas More	Utopia	England
Miguel de Cervantes	Don Quixote	Spain
Francois abelais	Gargantua and Pantagruel	France

15.What were the influence of the printing press on the society of that period ?

Do you think printing played a significant role in popularising Renaissance literary works?

(First Term Model)

• Spread of Ideas and Knowledge • Increased Literacy and Education• Social Transformation• Progress in literacy• Cultural and Intellectual Growth

16.Elucidate the role of Renaissance in making historiography scientific ?

(SCERT Model) (First Term Exam)

During the Middle Ages, the prevailing notion was that historical events were divinely ordained and the course of history was governed by supernatural powers. This perspective lost its relevance.Instead, human-centered explanations and interpretations gained recognition. Importance of archaeological evidence and relics.Critical thinking gained significance in history. Scientific enquiry and studies replaced stories and myths. The contributions of Machiavelli to Renaissance historiography are noteworthy.

17.Discuss the contribution made by Renaissance science to the progress of modern society ?

(First Term Model)

• Until the 16 th century, the belief that the earth was the centre of the universe prevailed.• Galileo, who challenged and negated the geocentric belief. • Remarkable transformations took place in the field of astronomy.

• Scientists put forward a view that planetary motions are governed

Sure A Plus

by material forces. • The geocentric model of Ptolemy,challenged by Nicolaus Copernicus. • He argued the centre of the universe is not the Earth, but the Sun. Copernicus demonstrated that the Earth and the other planets revolve around the Sun. • Galileo Galilei and Johannes Kepler expanded it • Renaissance also witnessed significant advancements in the field of medicine, particularly anatomy. • Paracelsus Conducted research on the causes of diseases and its remedies. Andreas Vesalius conducted human anatomy related study

18.The influence of humanism became the reason for Reformation, justify this statement ? **(First Term Exam) (First Term Model)**

• The influence of the Renaissance extended to the realm of religion • Humanists protests against certain practices and beliefs within the Church • One contentious issue was the sale of indulgences, where the Church would collect money. • Johann Tetzel, a Dominican monk, arrived in Germany to promote the sale of indulgences.• Martin Luther, a priest, pasted his famous 'Ninety-Five Theses' on the doors of the Wittenberg Cathedral. • This pivotal event marked the beginning of the Protestant Reformation. The universities of Germany played an important role

Leaders Of Reformation- $ Huldrych Zwingli and John Calvin in Switzerland $ King Henry VIII in England

19.The Counter Reformation was both a reaction against the reformation and an. effort to reform itself. Evaluate the statement based on the initiatives taken by the Catholic church. **(First Term Exam)**

Following the Reformation, the Catholic Church initiated efforts to reform itself, a movement known as the Counter-Reformation.The Church leadership convened the Council (Synod). It tried to correct erroneous tendencies within the Church,and to implement reforms. As a result, the sale of indulgence was banned. A list of books (The Index) that should not be read by the believers, was published. The court of inquisition was reinstituted.'The Society of Jesus, ' set up by Ignatius Loyola ,also played a prominent part in Counter Reformation. Its members were bound to observe strict discipline and unquestioned obedience. They tried to establish the authority of the Catholic Church by setting up schools and engaging in active missionary work. Counter Reformation succeeded in eliminating a number of wrong tendencies.

Sure A Plus

20.Compare the painting styles of Middle Ages and Renaissance period **(Second Term Exam)**

 Landscape . The use of colour to illustrate light and spatial depth. Realistic depiction of the human body .The use of oil paint .Portraits

Middle Ages and Renaissance period-Religious Subject Matter .Bright, Symbolic Colors .Devotional Purpose.Lack of perspective

21.Substantiate the importance of Dante's "The Divine Comedy' based on the Renaissance values. **(Second Term Exam)**

The Divine Comedy-Imagined pilgrimage through Hell, Purgatory and Paradise.Reflects human emotions, patriotism, fascination for natural phenomena .Renaissance values like Crticism,rational thinking,humanism are reflected in it.

22.Whether Renaissance is the revival of the ancient period or the negation of the medieval period? State your arguments by analysing the background of the Renaissance. **(SCERT Model)**

Influence of Greco Roman culture-Greco Roman style -Roman Law -Latin language -Constantinople -Conquest of Turks - scholasticism- Humanism -Rational thinking -Secular values- regional languages -change in art and science -trade progress – negation of fuedalism (These ideas should be explained)

23.Renaissance is the shift from the divine centred outlook to the human centred outlook. Substantiate the statement by evaluating the renaissance painting. **(SCERT Model)**

Human forms – accuracy – clarity human anatomy – rationalism – emotions – values of this world - precise – realistic - Giotto – human figures engaging in everyday life experiences – Leonardo da Vinci – Mona Lisa – the Last Supper – Michelangelo – The Last Judgement – Powerful and graceful human forms – Titian – Raphael

How does the responsibility of the administrator as 'presented by Machiavelli through his work 'The Prince' differ from the traditional medieval feudal administrators? **(First Term Exam)**

Ruler must maintain the authority and security of the state.He should remain impartial and avoid showing favouritism to specific groups among the subject.In his work, The Prince, Machiavelli breaks from the traditional medieval Thomas Moreview of a ruler,

Sure A Plus

which was often tied to divine right.To him paramount responsibility of a ruler is to maintain the authority and security of the state.

Which of' the following were the mam factors that led to the Renaissance? **(First Term Model)**

Commercial growth and independent nature of Italian c1t1es..Cultural exchange between Europe and Eastern countries.. The Black Death (plague) epidemic .in the mid-fourteenth century.

H2. LIBERTY, EQUALITY, FRATERNITY

1.Causes of the French Revolution ?

*Autocratic Rule of Borbon rulers *Social Inequality *Economic Crisis *Influence of Thinkers

2.Autocratic Rule of Bourbon rulers-

OR

Why did the Bourbon regime in France become an anti-people regime? **(SCERT Model)**

All the rulers were despotic. They believed in the divine right of rulers.Bourbon kings Louis XIV declared, "I am the State."His Corruption, extravagance and continuous wars put the country and its people in misery. To find money for his extravagance he imposed new taxes . Louis XVI, who came to power later did not pay much heed to governance. The king pretended not to see the queen's extravagance.

3."Nobles fight, Priests pray,and-the Commons pay" Elucidate Socio-Economic Inequalities in France Court Oath?. **(First Term Model)**

OR

Why did the third estate in France opposed the rule of the Bourbon Kings while the first and second estates supported them. **(SCERT Model)**

OR

Analyse the social system in 18th century France and prepare a note.(First Term Model)

Sure A Plus

For more Resources visit: BIO-VISION

First Estate • The Clergy Formed The First Estate.The Catholic Church in France was very powerful and wealthy. The church owned a large tracts of land. Both clergy and Nobility exempted from all types of taxes. Moreover, they levied a tax called the tithe on the peasants.

Second Estate • The Nobility Formed The Second Estate.The nobles held the highest positions in government and in the army. They were landowners as well. They lived luxuriously, collected various taxes.

Third Estate •The third estate in France comprised of the middle class, workers and peasants.They were obliged to pay various taxes to the king, the church and the nobles. They had to perform services that were unpaid and compulsory like military service,construction service etc.

4 .How far did the emergence and growth /The rise and discontent of the middle class decisively influenced the French revolution **(First Term Model)**

The progress in the agricultural and industrial sectors led to the rise of the middle class. The major ports and cities were under the control of these middle class. • The middle class thus formed also included doctors, lawyers and bankers. •They had to pay taxes to the government and the nobility.They didnt get deserved status in the administration and the army.

5.Economic Crisis of France- Due to a decrease in production agricultural sector faced a severe crisis in the 1770s .It raised the price of cereals and bread. As a result of the trade agreement with Britain the French market was flooded with British products . Thus made native artisans became unemployed.Dissatisfied farmers, artisans, and other workers struggled against Monarchy

6.Evaluate the role of thinkers in inspiring the people to protest against the injustice existed in France. **(First Term Exam)**

Voltaire- philosopher, historian, satirist, and a philanthropist. He was not an atheist, criticised the clergy . He was expelled from France .

Rousseau- His work, The Social Contract, defined the relationship between the citizen and the state.Importance of Freedom. His ideas were based on naturalism.

Sure A Plus

“Man Is Born Free But Everywhere He Is In Chains”.He argued that, "good laws create good citizens."His ideas were based on naturalism

Montesquieu-criticised the evils of the church and the tyranny of the state. He advocated limited monarchy • Suggested Division Of Powers Of The Government In To Legislature ,Executive And Judiciary.His famous work The Spirit of Laws, analyses the principles of government and the evolution of law and the constitution.

John Locke-His famous work, ‘”Two Treatises of Government”.He rejected the divine right and tyranny of the king.

Turgot and Necker-conceived many plans to improve the economic situation of France.These economic policies reflected the interests of the middle class.Encouragement of agriculture and free trade of food items were important among them.

7.Briefly explain the Course of the French Revolution

A) The Estates General Meets

Like society Estates General was divided into three Expalin- **(First Term Model)**

To overcome the Economic crisis, to levy new taxes upon commoners, Louis XVI summoned the States General, the legislative assembly of the representatives from all the three estates, in 1789. The French society also had three Estate. The first two estate argued for estate wise single voting system. • While 3rd estate (commons) demanded individual vote for each member of all three estates.King Louis XVI did not make any preparation to resolve these problems.

B) The Tennis Court Oath

How did the structure of the French parliament called Estates General lead to the Tennis Court Oath? Elucidate. **(SCERT Model)**

Third Estate declared themselves the real representatives of the people of France and called their assembly the French National Assembly. They declared that they would not leave until they draft a constitution for France. This was later known as the Tennis Court Oath. Leaders - Jean-Sylvian Bailly, Abbé Sieyés, and Mirabeau.This

Sure A Plus

session of the National Assembly later came to be known in history as the 'Tennis Court Assembly

C) The Fall of Bastille and the Beginning of the Revolution-

Evaluate the fall of the Bastille, the beginning of the revolution **(First Term Model)**

King Louis XVI dismissed his advisor Necker and ordered him to leave Paris.Provoked mob seized the granaries and bakeries in Paris.They amassed weapons and stormed the Bastille, the symbol of Bourbon despotism, on July 14, 1789

8.Women and the French Revolution **(First Term Exam)**

Food shortage and the policies of Louis XVI forced women to join the struggle. Thousands of women marched to the Versailles palace in Paris, the residence of the Bourbon kings, carrying brooms, swords, spears, and guns.Olympia de Gouche stood for a social structure in which women had equal power and rights like men.

Madame Jeanne Rolland stood for women's equality. The right to property and the right to divorce were some of the achievements they gained through the women's rights movement.

9.Fearing the wrath of the people,Louis XVI approved the laws passed by the National Assembly. Which are they ? **(First Term Model)**

• Abolition of slavery • Taking away the special powers vested on the nobility • Abolished the tax the people had to pay to the Catholic Church • Cancellation of additional taxes

10.Examine the main ideas in the Declaration of Human Rights of France in 1789 ? **(Second Term Exam)**

Men are born and remain free and equal rights. The aim of all political associations is the preservation of the natural and indivisible right of man. These rights are liberty property,security,and resistance to oppression. The principle of all sovereignty resides essentially in the nation. Liberty consists in the freedom to do everything which injures no one else.

Sure A Plus

11.List out the reforms implemented in social, economic, and political spheres of France by National Assembly ? **(First Term Exam)**

Implemented a unified constitution . Issued a new paper currency called 'Assignat' .Confiscated the properties controlled by religious leaders .Declared complete religious tolerance Clergy became salaried government employees.

12.Reign of Terror and the September Massacre-Explain

In July,1793 a committee of Public Safety was constituted to control the internal affairs of France. Robespierre led the committee Danton, Hébert, Marat were included. Using guillotine they did mass executions of suspected enemies. Thousands of nobles,priests, and supporters of the king,were branded traitors and imprisoned.When the prisons overcrowded, about one thousand and five hundred peoplewere killed. This is known as the infamous 'September Massacre.'At last Robespierre was also executed .The reign lasted until july 1794 and is known as the Reign of Terror.

13.Consequences (Result/Impact) of the French Revolution

OR

Do you agree with the statement that the French revolution had decisively influenced the subsequent history of the world? Elucidate. **(SCERT Model)**

End of feudal system .The land owned by the church became the property of the middle class.Introduction of unified system of weights and measures ended the inaccuracy in weights and measures .The French Revolution also influenced the struggles for national independence that took place in Asia and Africa .Contributed the idea of the sovereignty of the people .The contributions of the French philosophers to the world .Women's participation in achieving rights

14.Napoleon's administrative reforms laid the foundation of modern France. Write admin1strative reforms Napoleon. ? **(First Term Model)**

OR

It was the interests of the middle class that reflected in the reforms of Napoleon. Substantiate the statement. **(SCERT Model) (First Term Exam)**

Sure A Plus

Reforms	Changes
Legal reforms	.By Napolenic code .Feudal laws were abolished and equality and religious freedom were recognised
Concordat	.As per the agreement with the Pope, the freedom of the catholic church was restored.Other religious groups were also granted freedom.
Educational reforms	Steps were taken to universalise education. Government-run schools called lycee were established. The goal of this was to produce educated people for government service and the army. A national university system called the University of France was established. Through this system, the state controlled the country's education.
Economic reforms	.Established The Bank of france and implemented a unified currency system
Military reforms	.The army was recognised into several battalions

15.What do meant by Continental System' ?

Or

What are the continental system that Napoleon devised to destroy Britain? Why did it fail? **(First Term Model)**

Napoleon's arch enemy was Britain. •He was sure he couldn't defeat Britain.Because they had well established naval power.He devised plans to destroy Britain economically. • For this Purpose,he formulated a Plan.that is called Continental system. • According to this, countries that were under the control of France or the friendly nations of France were banned from trading with Britain.

16The map of Europe has been redrawn after the defeat of Napoleon. Evaluate the statement based on the major decisions of. the Congress of Vienna **(First Term Exam)**

Sure A Plus

For more Resources visit: BIO-VISION

After Napoleon's defeat, the countries in Europe met in Vienna in 1815 under the leadership of Austrian Chancellor Metternich.It took some important decisions. This is known as the Congress of Vienna.

Major Decisions of the Congress of Vienna

• Restore the monarchies in European contries like Bourbon monarchy in France.• Recognise Britain's naval supremacy and Russia's dominance in Eastern Europe. • Recognise Austria's dominance in Central Europe

17.The defeat of Napoleon in the Battle of Waterloo in 1815.

3. SOCIAL ANALYSIS: THROUGH SOCIOLOGICAL IMAGINATION

1.How does Individuals try to understand the reasons for personal problems?

Through Superficial reasoning, Personal experiences,Social interaction,Socialisation process

2.What is Commonsense Knowledge ?

Commonsense Knowledge is the direct understanding individuals acquire about the world through personal experiences, social interactions and cultural knowledge.

3.What are the features of Commonsense Knowledge?

This is not normal & scientific .These are informal knowledge. Rather they are assumption or even everyday practical knowledge. They are stereotypes

4.What are the ways in which Commonsense knowledge develope?

Commonsense knowledge developes through personal experiences, Through general observations,Social interactions,Cultural practices and Socialisation

5.Name the social factors influence the personal problems?

Social factors like Family,Religion,Education,Culture,Media etc influence the personal problems.

5.Elucidate Commonsense Knowledge and Social Analysis

Sure A Plus

Commonsense Knowledge is formed based on norms, practices, beliefs and personal experiences which are not often examined. Now think about the reasons why a person experiences poverty. People may also think that poverty is due to a person's laziness or disinterest in work. Many people think that personal failure is the only reason for poverty. Such perceptions are formed through common- sense knowledge.

6.What are the Limitations of Commonsense Knowledge? **(SCERT Model)**

Relies on speculations or practices,Bases itself on stereotypes,Provides only partial knowledge,Complex social problems cannot be understood

7.What do you mean by Social analysis ?

Social analysis is the process of examining how social relationships, social institutions, social structures and social problems affect individuals and society. Social analysis, helps us to develop a deeper understanding of the factors that influence various social situations and provide suggestions for their improvement.

8.Note the statement that humans are not responsible for climate change .What are the problems caused on earth due to climate change?

• Global warming •Rising Temperatures •Melting glaciers •Sea level rise

9.List human actions that cause global warming

Burning Fossil Fuels,Burning of plastic,Deforestation and Land Use Changes,Industrialization and deforestation

10.A high score can only be achieved by studying for a longer time. Is it the same for everyone? Do individual learning methods and styles affect learning? What can be done along with this to achieve academic excellence?

•Group learning •Taking regular intervals and proper rest while studying •Prioritize and Manage Time Effectively

11.Individual problems or complex social problems cannot to be understood properly by using commonsense knowledge. Substantiate the statement based on the problems of housing **(Second Term Exam)**

Financial instability,Unemployment,Income Inequality,High Construction Costs.But we try to see the problems of housing on the basis of commonsense

Sure A Plus

knowledge it is difficult to find solutions.Because commonsense knowledge is normal & scientific .Financial,Environment,Administrative, Geographical disparities are other factors that can contribute to one's problems

12.There many other factors that can contribute to one's problems?

Or

Anu couldn't take care of her studies nowadays. Is it merely an individual problem ? What other factors might have influenced her? **(First Term Exam)**

No. Financial, Social, Environmental, Administrative, Political, Geographical disparities, Cultural factors might have influenced her studies/ an individual problem.

13. Briefly explain Sociological imagination

Sociological imagination is the skill to identify and analyse how individual problems are related to broader social structures. The sociological imagination envisages a way of identifying individual problems and their causes and explaining them by subjecting them to wider observation and analysis.

14.Who introduced the concept of sociological imagination through the book The Sociological Imagination (1959) – American Sociologist Charles Wright Mills.

(First Term model)

15.What are the importance/ of Sociological Imagination ?

The social causes behind all personal problems can be identified through sociological imagination. It helps us to understand how social structures influence our lives and that of others. It also enables individuals to move beyond their life situations and view their experiences and personal problems in the context of broader social structure

16.Examine the characteristics of sociological imagination ?

Or

Sociological imagination becomes a powerful tool, skill and approach that enriches social life. **(SCERT Model)**

Sure A Plus

For more Resources visit: BIO-VISION

. Broadens individual perspective -Sociological imagination helps to identify how other social factors influence individual problems and thus broaden the individual's perspective.

. Understanding social issues in depth

Or

One of the features of sociological imagination is to understand social problems in depth. Explain this feature of sociological imagination on the basis of gender status **(First Term Model)**

While common sense often blames a lack of individual initiative for women's low workforce participation, the **sociological imagination** reveals systemic barriers. Gender norms often dictate that men are providers while women are confined to domestic caretaking, directly limiting their economic opportunities. Furthermore, unequal access to education stunts women's professional growth. By analyzing these **cultural, economic, and educational structures**, we can understand that the gender gap in labor is a result of societal design rather than personal choice.

. Enables self reflection

What do you mean by self-reflexivity? Elucidate the importance of self-refiexiviy in sociological imagination. **(Second Term Exam)**

Sociological imagination bridges the gap between personal experience and social structures by fostering **self-reflexivity**. By evaluating one's own thoughts and actions through a critical lens, individuals can move beyond limited "commonsense" perspectives to identify the broader **social forces** driving personal challenges. Ultimately, this analytical approach benefits both the individual and society by fostering deeper self-awareness and a systemic understanding of human issues.

. Develops empathy and tolerance-By understanding the social context behind the experiences of others, individuals can approach them from diverse perspectives. Empathy and tolerance can be developed through this.

. Develops critical thinking -Critical thinking based on sociological imagination helps individuals to understand how various social factors influence their lives

Sure A Plus

. Questioning negative social norms-Social factors behind individual problems need to be identified.

17.How Commonsense knowledge and Sociological imagination differ in analysing social problems **(First Term Exam)**

Commonsense Knowledge Approach	**Sociological imagination Approach**
Limited to personal views and experiences	Its scope is broad as it connects individual experiences to larger social structures
Often provides only a superficial explanation based on stereotypes	Analyses deeply the impact of social factors on individuals
Social realities and problems are not approached through critical thinking	Encourages critical thinking about interrelationships between personal experiences and social structures

18.Teenagers are always rebellious and irresponsible. Elucidate how this statement can be an example for stereotype. **(First Term Exam)**

It is a general statement to make that teenagers are always rebellious and irresponsible. Such general statements, beliefs or ideas are referred to stereotype. When observed in this way, it can be seen that the statement about teenagers is a stereotype. Such stereotype creates misconception about teenagers. Teenagers are indeed a heterogeneous group, usually showing responsibility and mutual respect. But such stereotypical statements lead to a lack of trust in teenagers. Moreover it results in misplaced assumptions about their behaviour.

19.Anu is unable to get a better job despite having higher education. Evaluate Anu's problem through the sociological imagination approach and commonsense knowledge approach. **(SCERT Model)**

Unemployment (through commonsense	Unemployment (through sociological

Sure A Plus

knowledge)	Imagination)
• Laziness • Lack of skills • Personal failure	• Economic policy • Population growth • Social inequality

G1. WEATHER AND CLIMATE

1.Weather-Atmospheric conditions such as temperature, pressure, wind, humidity and precipitation experienced for a shorter period of time in a region are termed as Weather.Temperature, pressure, wind, humidity and precipitation called elements of weather.

2.The average weather condition experienced for a longer period over a larger area is termed as the Climate.The climate of a place is determined by considering the weather conditions of about 35 to 40 years

3.Insolation-The amount of sun's rays reaching the earth's surface as short waves.

4.Processes of heat transfer in the atmosphere-

Conduction : Heat is transferred to the lower part of the atmosphere which is directly in contact with the surface of the earth.

Convection: As the heated air expands and rises up, heat is transferred to higher reaches of the atmosphere.

Advection: Heat is transferred horizontally through wind.

Radiation: Emission of energy in the form of long waves after the earth's surface gets heated up.

5.Terrestrial radiation-The re-radiation of energy in the form of long waves from the earth's surface.

6.Heat Budget of the Earth **(First Term model)**

Almost entire energy reaching the earth as insolation is radiated back. Thus the surface temperature of the earth remains balanced.

Sure A Plus

7.Diurnal range of temperature-Is the difference between the maximum temperature and the minimum temperature of a day. Diurnal Range = Maximum temperature - Minimum temperature

8.Daily mean temperature.The average temperature of a day is called as Daily mean temperature. **(SCERT Model)**

Daily mean temperature = $\frac{\text{Maximum temperature + Minimum temperature}}{2}$

What is meant by the diurnal range of temperature? Calculate the diurnal range of temperature and the mean daily temperature if the maximum temperature is 32°C and the minimum temperature is 17°C recorded at a place -15 °c

Diurnal Range- 24.5^{0}C

Which city experiences a lower diurnal range of temperature: Thiruvananthapuram or Kanpur? Why?

Thiruvananthapuram; Thiruvananthapuram experiences less diurnal range of temperature because it is located close to the sea. But Kanpur is located far from the ocean. Since it is not close to the ocean the diurnal range of temperature will be greater.

9.Isotherms-The imaginary lines drawn connecting the places having equal temperature are called Isotherms.

10.Factors influencing the distribution of temperature **(First Term model)**

Latitude-Very high temperature is experienced along the equatorial regions where the incidence of sun's rays is almost vertical.Thus the temperature gradually decreases towards both the poles.Torrid zones between 0^0 & 23 1/2 ^{0} North and South, Temperate zone between 23 1/2^0 & 66 1/2 ^{0} North and South ,Frigid zone between 66 1/2 ^{0} & 90 ^{0} North and South are formed basis of availability of Temperature.

Sure A Plus

Altitude- **(SCERT Model)**

Atmospheric temperature decreases with increase in altitude. Atmospheric temperature decreases at the rate of 6.4° C per kilometre of altitude. The phenomenon is termed as Normal Lapse Rate.

* In the atmospheric layer that lies closest to the Earth, the temperature decreases with

height.

a. Name the phenomenon- Normal Lapse Rate

b. Name the layer of the atmosphere that the phenomenon happens-Troposphere

c. If the atmospheric temperature at sea level is 30° C, what would be the temperature at the altitude of 2 km- 30- 12.8= 17.2°C

d. Why is low temperature experienced at Ooty and Munnar-In the troposphere, as altitude increases, the atmospheric

temperature decreases.

Since places like Ooty and Munnar are high-altitude regions, the atmospheric temperature is lower in these areas.

Differential Heating of Land and Sea-Land gets heated and cooled quickly. Thus the land areas experience higher summer temperature and lower winter temperature.

Distance from the Sea **(SCERT Model)**

The winds blowing from land to sea and vice versa help to moderate the temperature along coastal areas.

Ocean Currents-The temperature along the coastal regions is raised or lowered by the warm currents and cold currents respectively as they pass by. North Atlantic Current & Labrador cold current saves from severe cold from Western European countries and Canada respectively.

Topography (Relief) -Depending on the topography, the availability of sunlight differs from one place to another.Due to this difference, the mountain slopes facing the sun experience higher tem perature and opposite slopes experience lower temperature.

Sure A Plus

11.Atmospheric Pressure-The weight exerted by the atmospheric air over the earth's surface. Barometer is the instrument used to measure atmospheric pressure.

12.Factors affecting atmospheric pressure **(First Term model)**

Temperature-Atmospheric air expands on getting heated and rises up due to less density.Thus low pressure regions are formed.

Altitude-Atmospheric pressure decreases with altitude at the rate of 1 millibar per an altitude of 10 mtr

Humidity - Quantity of water presents in the atmosphere is called humidity.Temperature, Altitude, Humidity and atmospheric pressure are inversely proportional.

13.Isobar- Isobars are the imaginary lines connecting places having the equal atmospheric pressure.

14.How global pressure belts are formed? Explain **(First Term Exam) (First Term model)**

Temperature is inversely proportional to pressure. Thus the lowest atmospheric pressure might be experienced in the equatorial region and the highest might be in the polar regions. The pressure should therefore increase from the equator towards the poles. But actually this is not the case. Distinct pressure conditions prevail at certain specific zones due to the influence of the rotation of the earth. Different pressure belts are formed along certain specific latitudinal zones. The atmospheric pressure is uniform between certain latitudes.These are called Global Pressure Belts.

Due to the apparent movement of the sun ,Global pressure belts may shift to about 5° to 10° northwards during summer season and shift southward during winter season.

Equatorial Low Pressure Belt- The expansion and rising up of air due to high temperature in the equatorial region is the cause for the formation of Equatorial Low Pressure Belt.Being the windless zone, This pressure belt is also known as Doldrum.

Sub Tropical High Pressure Belts-ituated to the 30° North and South latitudes.The rising warm air along the equatorial region moves as upper air winds which gradually cool and subside at the Sub Tropical zone.

Sure A Plus

Sub Polar Low Pressure Belts- Situated to the 60° North South latitudes. The colder air is throwing up along these regions due to the rotation of the earth.

Polar High Pressure Belts- Polar High Pressure Belts are formed as a result of the contraction and subsidence of cold air along the poles.

15.Winds- Winds are the horizontal movements of air from high pressure areas to low pressure areas. Anemometer is the instrument used to measure the speed of wind.Wind Vane is the instrument which indicates the direction of wind.

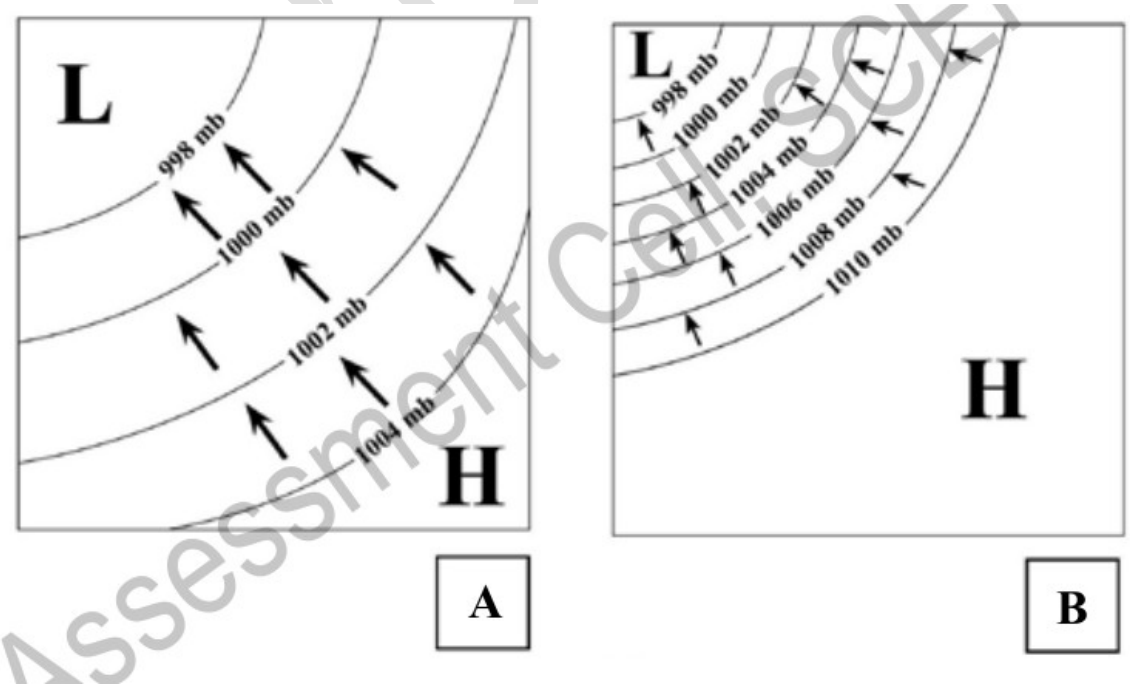

16.Coriolis Force **(SCERT Model)**

One of the major factors influencing the direction of winds is the Coriolis Force.Owing to the Coriolis effect, the winds will deflect towards the right direction in the Northern Hemisphere and towards the left in the Southern Hemisphere.

17.Factors influencing the speed of wind- Pressure gradient & Force Frictional Force

Pressure gradient Force is the change in pressure over a horizontal distance.If there is considerable change in pressure between nearby places, it indicates high pressure gradient.If there is no considerable difference of pressure, pressure gradient is said to be low.The places where pressure gradient is high, the speed of wind will be higher.

$ Analyse the diagram and answer the following questions. **(SCERT Model)**

SCERT A PLUS Assessment Cell

For more Resources visit: BIO-VISION

Explain how wind is related to atmospheric pressure- The changes in atmospheric pressure that we experience are caused by the movement of air.

The horizontal movement of air from high-pressure areas to

low-pressure areas is called wind.

Which of these two places in diagram A and B has a low pressure gradient? Why- Place A has a low-pressure gradient. The pressure difference with nearby areas is relatively low, so the isobars are widely spaced. This indicates that the pressure gradient in A is relatively low.

At which of these places speed of the wind is high? Why- At place B, the wind speed is higher. This is because the pressure gradient is high in B, and the pressure difference with nearby areas is higher. Therefore, the isobars are closely spaced, indicating a high- pressure gradient. Since the pressure gradient is high, the wind speed is also high.

Frictional Force- The friction caused by hills, mountains, forests and man-made structures will obstruct the free flow of winds.Winds are comparatively stronger over oceans surfaces than over continents as the friction is less in the oceans surfaces

18.Different types of winds- . Permanent Winds . Variable Winds . Periodic Winds . Local Winds

19.Permanent Winds- **(First Term Exam)**

The winds blowing constantly over a particular direction throughout the year.These winds are also known as prevailing winds and planetary winds. These winds blow between global pressure belts.Major permanent winds are,

Trade winds-From the Sub tropical high pressure belts to the equatorial low pressure belt.Due to coriolis force, Trade winds blow North East direction in the Northern Hemisphere and are South East direction in the Southern Hemisphere.

Westerlies-From the Sub tropical high pressure belts to the Sub polar low pressure belt. Westerlies are comparatively stronger in the Southern Hemisphere than in the Northern Hemisphere due to the expansion of oceans.

Sure A Plus

Polar winds-Polar high pressure belt to the Sub polar low pressure belt.

20.Periodic Winds-Winds subjected to the periodic reversal of their direction. Two types of Periodic Winds;Diurnal Periodic winds and Seasonal periodic winds.

Diurnal Periodic winds:Land & sea breezes, mountain & valley breezes.

Sea breeze-During the day time the land gets heated quickly. This leads to the formation of low pressure over the land and high pressure over the sea. As a result cooler air from the sea blow to the land.

Land breeze-As the land cools faster than the sea during the night. It would be high pressure over the land and low pressure over the sea. This results in the movement of air from the land to sea.

Mountain Breezes- During night, air along the mountain slopes cools, contracts and moves down slope. Valley breezes-During the day time, the air above the mountain slopes gets heated and rises up by sunlight. As a result, the wind blows up slope from the valley

Monsoon Winds-Monsoon is the seasonal reversal of wind system.

OR

A Monsoons are the seasonal reversal of wind system. Do you think that Monsoon winds change direction as the name implies? Elucidate. **(First Term model)**

Answer Yes. SE trade wind deflects into northern direction due to coriolis effect when crossing equator then it blows from SW direction.During the October november SW monsoon changes its direction and blows as NE Monsoon wind due to the changes in the Atmospheric pressure.

Southwest monsoon

(First Term Exam) (First Term model)

During summer the South Asian land masses, especially the Indian Sub Continent, gets heated up intensely and severe low pressure develops. Wind blows towards the land mass from the Indian Ocean where comparatively high pressure prevails. These winds blowing as South West winds due to Coriolis effect causes widespread rainfall on entering the land. The western parts of Tamil Nadu receive

Sure A Plus

scanty rainfall while Kerala receives heavy rainfall from South West Monsoon.Because Tamilnad is rain shadow region.

Northeast monsoon-**(First Term model)**

During winter, as the northern land masses get severely cooled, high pressure develops over North India. This causes the winds to blow continuously from the land towards the Indian Ocean as north east winds. These winds which are generally dry in nature

21.Local Winds-Local winds are winds formed as a result of local differences in temperature and pressure.**(First Term model)**

Loo - North Indian plains - Hot wind

Chinook - Slopes of Rocky mountain in North America - Dry Hot wind

Foehn - Slopes of Alps Moutain in Europe -Dry Hot wind

Harmattan - Sahara Desert in Africa - Relief to Intense heat

22.Variable Winds-Winds of short duration, of which the intensity or direction cannot be predicted are called variable winds. Eg: Cyclones and Anticyclones.**(Second Term Exam)**

Cyclones are low pressure systems towards which winds whirl from the surroundings. Cyclones are anticlockwise in the Northern Hemisphere and clockwise in the Southern Hemisphere.Cyclones are two types

a)Tropical cyclones-Tropical cyclones originate over tropical oceans. Tropical cyclones are comparatively lesser in diameter.The tropical cyclones moving in north-west direction over the oceans, get dissipated on hitting the lands. Different temperature conditions prevailing on land and also the friction causes the dissipation of cyclones on entering land.The tropical cyclones cause intense rainfall and strong whirlwinds along the coasts.They are known by different names in different parts of the world such as Hurricanes, Typhoons, Willy Willies, Tornadoes etc

b)Temperate cyclones-Temperate cyclones are formed in temperate regions where warm and cold air masses meet.Temperate cyclones are larger in diameter.They are

Sure A Plus

less devastative.Unlike the tropical cyclones, Temperate cyclones can move over land also

Anticyclones-Anticyclones are high pressure system from which winds whirl outwards. These are not destructive.Anticyclones is clockwise in the Northern Hemisphere and anticlockwise in the Southern Hemisphere. **(Second Term Exam)**

23.Humidity-Due to evaporation Water vapour remains invisible in the atmosphere. The invisible water content in the atmosphere is called Humidity. Hygrometer is the instrument used to measure atmospheric humidity.

24.Absolute humidity-Actual amount of water vapour present per unit volume of atmosphere is called Absolute humidity.

25.Relative Humidity-The ratio between the actual amount of water present in the atmosphere and the total water- holding capacity of atmosphere at that particular temperature is referred to as Relative Humidity.It is expressed in percentage.Relative humidity can be estimated using wet & dry bulb thermometers.

26.Saturation level- The state at which the atmosphere is fully saturated with moisture/water vapour is known as saturation level.At the saturation level, the relative humidity in 100%.When the atmosphere is fully saturated with water vapour, condensation begins.

27.Saturation point-The temperature at which atmosphere is fully saturated.

Condensation.The process by which water vapour in the air is changed into liquid water. The atmospheric moisture is visible only when the water vapour condenses to form tiny droplets of water.

28.Forms of Condensation -**(First Term model)**

Dew,Frost, Mist and Fog , Cloud

Dew-During the night, as the earth's surface cools down, the atmosphere close to the earth's surface also cools. The water vapour condenses to form tiny droplets of water which may cling on to the grass tips, leaf blades as well as other cold surfaces. These are called Dew.

Sure A Plus

Frost-Whenever the atmospheric temperature falls below 0o Celsius, especially during nights, tiny crystals of ice are formed instead of dew.

Mist and Fog-Fog or mist is formed as a result of condensation of water vapour around tiny dust particles in the lower atmosphere. Fog and mist can be distinguished based on the range of visibility through them.

Clouds- Clouds are formed as a result of condensation around the tiny dust particles in the atmosphere. The water droplets thus formed are less than 0.001 cm in diameter. This is why, they remain suspended in the atmosphere

29.Different types of clouds-Cirrus . Stratus . Cumulus . Nimbus **(First Term Exam)**

Cirrus clouds-Thin, delicate, feather-like very high altitudes clouds .

Stratus clouds- Thick-layered clouds formed in the lower atmosphere.

Cumulus Cloud- Cotton wool-like clouds formed as a result of intense convection currents. These clouds have great vertical development.

Nimbus clouds-Dark rain-bearing clouds, lower part of the atmosphere. The thick concentration of water droplets which does not allow light to penetrate through them.

30.Precipitation-As a result of continuous condensation in clouds, the size of water droplets increases.As the size of water droplets grows beyond the limit of resistance against gravity, water droplets will be released from the clouds and may fall on earth in various forms.

Forms of precipitation:- Rainfall. Snow fall. Hailstones .Snow fall

Snowfall- Temperature falls below 0° Celsius in cold climatic regions as well as in temperate

regions during winter. Precipitation occurs in the form of tiny crystals of ice.

Hailstones-The water droplets released from the clouds are subjected to repeated condensation at different levels of atmosphere. It reaches the earth in the form layered ice pellets.

Sure A Plus

31.Types of Rainfall **(SCERT Model)**

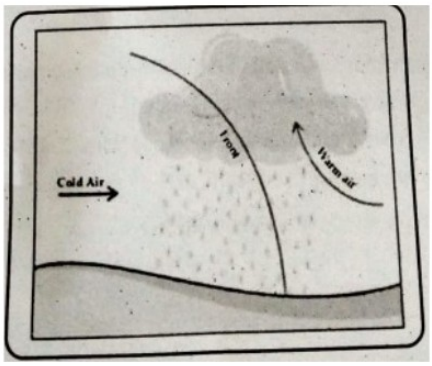

(a) Orographic rainfall or Relief rainfall

Moisture-laden winds from the sea, enter the land and will be raised along the mountain slopes.This leads to condensation and formation of rain clouds along the windward slopes of mountains. While the windward slopes of mountains get more rainfall, the descending dry air makes the leeward side rainless. Such regions are called Rain Shadow Regions.

(b) Convectional Rainfall-Rainfall occurring in afternoon during summer season through Convection process.As the convectional rainfall commonly occurs during afternoons, it is also called 4 O'Clock rains.

(c) Cyclonic Rainfall **(Second Term Exam)**

In cyclonic systems where warm and cold air meet, the warm air will be raised up to cause condensation and rainfall. This type of rainfall is called Cyclonic Rainfall. As the boundary lines between warm and cold air meet are known as "fronts". This type of rainfall are also called "Frontal Rainfall".

G2. Climatic region and Climate change

1.What is a climatic region?

A climatic region is an extensive geographical area in which similar climate characteristics are observed.Each climatic region has its own unique climate, and flora and fauna developed according to it. Human life of the respective climatic region is also moulded according to the geographical features.The major climatic regions of the world that are

 *Equatorial climatic region*Monsoon climatic region *Savanna climatic region * Hot deserts

Sure A Plus

 *Temperate grasslands *Mediterranean climatic region *Taiga region *Tundra region

2.Equatorial climatic region **(First Term Model)**

Extends up to 10° North and South of the equator. This is region characterised by high temperatures and high rainfall. This region is hotter because sun's rays fall almost vertically throughout the year. This results in higher air convection and convectional precipitation. These areas receive rainfall every day in the afternoon. Evergreen forests are abundant in the equatorial climatic region due to high temperatures and high rainfall.

3.Monsoon climatic region**(First Term Model)**

This region is known as monsoon climatic region, because of the decisive influence of monsoon winds.Monsoon climate is characterised by long and humid summer and short dry winter. In monsoon climatic regions, diurnal range of temperature is very low in coastal areas and very high in the interiors.Depending on the factors like physiography, direction of wind, and distance from the coast, rainfall distribution also varies in the monsoon regions. Regions with as little as 50 cm of rainfall to areas receiving over 1000 cm of annual rainfall can be found in this region.

4.Natural vegetation in Monsoon climatic region-Luxuriant growth of vegetation and dense forests due to due to the high temperature and rainfall. Evergreen and deciduous trees are found here. However deciduous trees are more common. Monsoon forests also known as tropical deciduous forests have a mixture of different types of trees depending on the amount of rainfall .

5."Monsoon region is one of the most densely populated areas in the world" - Elucidate the statement

High rainfall and availability of labour keeps monsoon climatic region an important agricultural region. Tropical crops like rice, sugarcane, jute, cotton, tea and coffee. are cultivated here. Intensive subsistence agriculture, is prevailing in this region. In rare areas, shifting cultivation, a primitive subsistence agriculture also exists.Shifting cultivation has different names in different countries.

Sure A Plus

6.Savanna Climatic Region (Tropical grasslands) **(SCERT Model) (First Term Exam) (First Term Model)**

Savannas are tropical grasslands found between 10° and 30° latitudes in both the hemispheres. These grasslands are known by different names in different regions.Savanna in Africa, Campos in Southern Brazil and Llanos in Venezuela.

7.Climate in Tropical grasslands **(SCERT Model) (First Term Exam)**

Hot and humid summers, and cool and dry winters. The annual average temperature here is between 21° C and 32° C and also receives annual rainfall of 25 cm to 125 cm.

8.Flora and Fauna of Tropical grasslands **(SCERT Model) (First Term Exam)**

Deciduous trees and tall grasses are the dominant vegetation of this region. As we move closer to the deserts, short bushes and thorny forests are seen. The forests and grasslands here provide a favourable habitat for wild animals. Herbivorous animals like giraffes and zebras abound in these grasslands. Carnivorous animals like lion and tiger are also found here.When we approach the western margins of tropical grasslands, height of the trees gradually decreases with the decrease in rainfall.

9.Human life in Tropical grasslands **(SCERT Model) (First Term Exam)**

Although soil found here is relatively fertile, due to low rainfall, 'dry farming' that requires less amount of water is adopted. Animal husbandry and agriculture are the means of livelihood. Population density is generally low . Maasai, an indigenous tribe of the African savanna **(First Term Exam)** leads a pastoral life. Cash crops are cultivated extensively in the savanna areas of former European colonies. Cotton cultivation in Sudan and coffee cultivation in Brazil are examples.

10.Hot deserts **(SCERT Model)**

Western margins of continents between 15° and 30° latitudes.Hot deserts are regions with very little rainfall.(e.g., Sahara, Kalahari, Atacama, Australian deserts)

11.Climate of Hot deserts **(SCERT Model)**

Sure A Plus

Extremely high temperatures .Average temperature 30°C, up to 58°C in Sahara.Very low rainfall less than 25 cm annually, sometimes no rain for years. High diurnal temperature range makes desert climate very difficult

12.Why hot deserts are located mostly on the western margins of continents ? **(First Term Exam)**

As the trade winds travel across the continents and reach the western margins, the wind loss its moisture and become dry. Therefore the western margins of continents remain dry throughout the year. This is the main reason for the formation of deserts on the western margins of continents.

13.Natural vegetation in hot deserts- Plants adapted to low rainfall climate such as cactus, shrubs and palms are mostly found here.

14.Hot deserts climatic regions are sparsely populated .Explain?

Hot deserts climatic regions are sparsely populated due to Unfavourable climate and other factors. However there are indigenous tribal communities, who have adapted to the adverse conditions in most of the desert regions. The Bushmen of Kalahari Desert **(First Term Exam)**

15.Human Activities in Hot deserts climatic region-Agriculture and animal husbandry are the main means of livelihood in deserts.The presence of economically valuable minerals promotes human life. Gold mining in Australia and copper in Atacama Desert.Discovery of petroleum deposits and the starting of oil mining in the Sahara and Arabian deserts, have changed the very face of these regions.

16.Climatic regions in the temperate zone are Mediterranean Climatic Region,Temperate Grasslands,Taiga Region, Tundra region

17.Mediterranean Climatic Region-The areas around this sea are the Mediterranean region.Some other regions lying between 30° and 45° latitudes also experience the same climate. All these regions are collectively known as the Mediterranean climatic regions.

18.Climate in Mediterranean Climatic Region **(First Term model)**

Sure A Plus

It is a region that experiences dry summers and humid winters. Temperature of around 20-25° C is experienced in summer. Highest temperature during winter is 10° C to 16° C. Winter rainfall of 30 to 75 cm distinguishes this region from other climatic regions. Rains during the winter are beneficial to the winter crops.Westerlies are responsible for winter rainfall in the Mediterranean region

19.Natural vegetation in the Mediterranean Climatic Region-Dense forests are not found due to low rainfall.

Tall evergreen trees such as oak and sequoia, evergreen conifers such as pine and fir, and shrubs are found here

20.Agriculture / Which things which make the Mediterranean region an area of great economic importance ? **(SCERT Model)**

Agricultural practices developed according to the climate conditions and related activities. Fruits and vegetables are the major produces of this region. Cereals and pulses are also cultivated .The Vine Yard in Mediterranean countries are the world's leading producers of wine. About 70 precent of citrus fruit export comes from here.

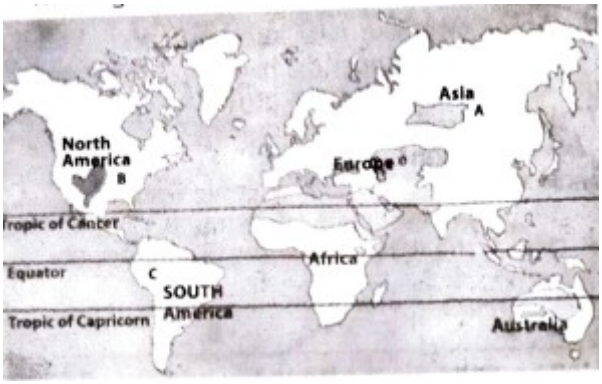

21.Temperate Grasslands **(First Term Model)**

Which climatic region includes grasslands known as steppes? Mention the salient features of this climatic region. List the grasslands found in other part of the World (SCERT Model)

Steppes-Temperate Grasslands (Europe)

As in the tropics, in the interior of the subtropical zone, the maritime influence is minimal and treeless grasslands are found. Located in both the hemispheres at a latitudes between 40° and 50°. Known by different names in

different regions.

Sure A Plus

Grasslands	Continent
Priaries	North Amaerica
Pampas	South Amaerica
Veld	Africa
Downs	Australia

22.Climatic characteristics of Temperate Grasslands- **(SCERT Model)**

Short summers and long winters are the characteristics of the temperate grasslands. These regions experience high temperature in summer as they are located at the interior of the continents. Average winter temperature ranges from 2° to 13°C. Rainfall here ranges from 25 cm to 60 cm

23.Natural vegetation in the Temperate Grasslands- Fluctuations in the rainfall availability is reflected in vegetation also. Due to less rain, trees are also few. Varieties of grass are generally found

24.Human life in the Temperate Grasslands-Temperate grasslands are natural grazing lands, most of the inhabitants are shepherds. Nowadays grasslands are widely converted into agricultural lands. Commercial mechanised grain farming and animal husbandry are increasing day.

25.Why natural grazing lands, have been now converted into areasof agriculture and animal husbandry, practiced widely on industrial basis?

Part of the technological progress achieved over time, humans are changing the natural features of many areas.Efforts to utilize all possible areas of the world will continue as long as there is ever- increasing population and human needs.

26.Taiga Region- **(SCERT Model)**

It is a cold region located between latitudes of 55°N and 70°N. Short summers and long winters . Summer temperature is from 15° C to 20° C while winter

Sure A Plus

temperature drops up to -13° C to -25 ° C. Receives an annual rainfall of 50 cm to 70 cm. In winter, precipitation is in the form of snowfall.

Qn The Southern Hemisphere does not experience Taiga climate. Write the reason. (First Term Model)

Taiga climatic region is absent in Southern Hemisphere because the extent of landmass is generally less. This region is dominated by sub-Arctic coniferous evergreen trees. This region is named as Taiga because of the abundance of such coniferous trees. Coniferous trees such as pine, fir and spruce are found here.Cultivation is very less in this region. Lumbering and wool industry are the main economic activities. Lumbering industry is very popular in Canadian Taiga region.

27.Tundra region- is the extreme cold zone. Extending from north of the Arctic Circle in Alaska, Canada, Greenland, and the Arctic coasts of Europe and Asia. Here winter temperature ranges from -25°C to -40°C. Summer temperature rises up to 10°C . Precipitation is mainly in the form of snowfall. Only a few plants can survive in the harsh climatic conditions of the Tundra region. Plants grow only in summer. Due to the very short growing season available, short shrubs and mosses. Here Yakuts, Chuckch, Eskimo, and Lappas **(SCERT Model)** lead a semi nomadic life. Arctics are the regions with relatively little human intervention. Scientists and explorers are continuing their studies in this region in search of future possibilities for mankind.

28.Climate change-UN defines 'climate change' as a long-term shift in weather patterns and temperatures that is caused by human activity or natural variability. The timescale of climate change may range from a few years to millions of years. It affects ecosystems severely.Climate change results from the shift in quantity, distribution pattern, and seasonal pattern of these elements. It may affect a specific region or the whole world.

29.Along with the natural climate changes, human intervention also causes changes in the world climate.What the activities that cause climate change and classify them as natural and anthropogenic causes. **(First Term Exam)**

Sure A Plus

Natural causes.	Anthropogenic causes.
Volcanic eruption	Deforestation
Ocean currents	Oil mining
Cyclic climate changes	Burning of fossil fuels
Tsunami	Industrialization

30.How does climate change affect human life? **(First Term Model)**

Global Impacts:

.Sea level rise: 10–20 mm per year

.Polar ice cap shrinkage: From 7.5 million km² (1978) to 3.74 million km² (2019).

.Global temperature rise: 1.1°C increase from 1850–1900 to 2011–2020.

.Monsoon pattern shifts: From prolonged rains to torrential short bursts.

.Desertification: 135 million people at risk of displacement

Regional Impacts: **(First Term Model)**

Himalayas (Nepal): Glaciers melting at 12–20 m per year.

Maldives: Risk of submersion with a 2.5 m sea level rise.

Destabilization of climatic regions, affecting flora, fauna, and human livelihoods,adversely affect the ecological balance.

31.Greenhouse Effect and Global Warming

CO_2, N_2O are capable of trapping the solar energy (insolation) in the atmosphere. Greenhouse gases allow sunlight to pass into the earth's surface and keep the atmosphere warm by intercepting terrestrial radiation returning from the Earth's surface. This process is known as Greenhouse Effect .Burning of fossil fuels such as coal and petroleum, industrial effluents and solid waste are the sources of excess greenhouse gases in the atmosphere. Due to this atmosphere becomes stronger and the temperature increases. This increase in atmospheric temperature is called Global warming.. Global warming accelerates climate change.

SureA Plus

32.International Initiatives to Combat Climate Change **(SCERT Model)**

Initiative	Year	Place	Interventions
World Meteorological Organisation	1950	Geneva	Organizes climate conferences
Stockholm Conference	1972	Stockholm	Environmental conservation and development
Montreal Protocol	1987	Montreal	Reduces ozone-depleting substances
Earth Summit	1992	Rio de Janeiro	UN Agenda 21 for sustainable development
Kyoto Protocol	1997	Kyoto	Reduces greenhouse gas emissions
Paris Agreement	2015	Paris	Limits global warming, supports climate adaptation
G20 Summit	2023	New Delhi	Promotesgreen development and climate finance

33.Changes to be brought about in industrial and other development activities enabling sustainable resource utilisation?

Promotion of energy efficiency, protection of forests, change in technology, encouragement of the use of non conventional energy such of wind solar wave energy etc

Map Location

Identify the given geoinformation and mark them on the outline map of the world provided.

Set 1-**(SCERT Model)**

A.The largest hot desert in the world-Sahara

Sure A Plus

B.The climatic region found along the coast of the Mediterranean sea-Mediterranean climatic region

C.Temperate grass land in Asia- Steppe

D.The climatic region where the coniferous evergreen trees are found in abundance-Taiga

Set2 -**(SCERT Model)**

A. The hot desert located in India.-Thar desert

B. The climatic region located between latitudes of 55° and 70° in the Northern Hemisphere- Taiga

C. The tropical grasslands in Africa-Savanna

Set3 -**(SCERT Model)**

D. The hot desert located in South America- Atacama

A. The climatic region with the highest producer of citrus fruits- Mediterranean climatic region

B. Largest hot desert in the Southern Hemisphere.-Australian desert

C. A Climatice region in Asia where evergreen and tropical deciduous trees are more common-Monsoon climatic region

D. Temperate grassland in Africa- Savanna

Set 4 **(Second Term Exam)**

a.Atacama desert- S.America

cure A PLUS

b.Mediterranean climatic region in North America

c.Downs- Australia

d.Temperate grasslands in Asia.

Set 5 **(First Term Exam)**

a .Sahara b.Llanos c.Kalahari d.Prairies e.Arabian desert

Each climatic region has a substantial role in creating its own unique climate, flora ,fauna and also moulding the human life of the respective climatic region. Substantiate the statement (First Term Model)

Climatic regions are not just geographical classifications; they are the primary architects of the Earth's biological and cultural diversity. Each region's specific mix of temperature, precipitation, and seasonality dictates the survival strategies of plants and animals and defines the boundaries of human development.

Sure A Plus

G4.CONSUMER : RIGHTS AND PROTECTION

1.What are the factors that influence consumption?

Price ,Income ,Quality, Supply ,Demand ,Taste

2.**What is Consumer Satisfaction**- Customer satisfaction is the satisfaction that a customer gets from using goods and services.-Consumer satisfaction is the main objective of all economic activities.

3.Consumer satisfaction is difficult to measure mathematically (quantify). Why?

Customer satisfaction is subjective and depends on each person's mental state. That why the consumer satisfaction is difficult to measure mathematically.

4.**Alfred Marshall**-first economist to make an attempt to quantify consumer satisfaction. The satisfaction gained through consumption can be considered as the utility of goods and services.

5.**Explain Utility** **(First Term Model)**

Utility is the want-satisfying power of a commodity/ good. We can measure this utility by using the unit of utils.

6.**What is Cardinal Utility Theory**-It states that the satisfaction derived by the consumer through the consumption of goods and services can be quantified by using cardinal numbers.Changes in utility affects the choice and consumption behaviour.

7.**Define Total Utility (TU)**-total amount of utility that a person receives when he continuously

consumes several units of a particular commodity.

8.**Define Marginal utility (MU)** -The change in total utility that occurs when one additional unit of a commodity is consumed is called marginal utility.

9.Check the Marginal utility (MU) and Total Utility (TU) from the Consumption of oranges.Answer the following questions **(First Term Model)**

No. of Oranges	Total Utility (TU)	Marginal Utility (MU)
1	20	20
2	38	18
3	53	15
4	63	10
5	67	4
6	67	0
7	64	-3
8	57	-7

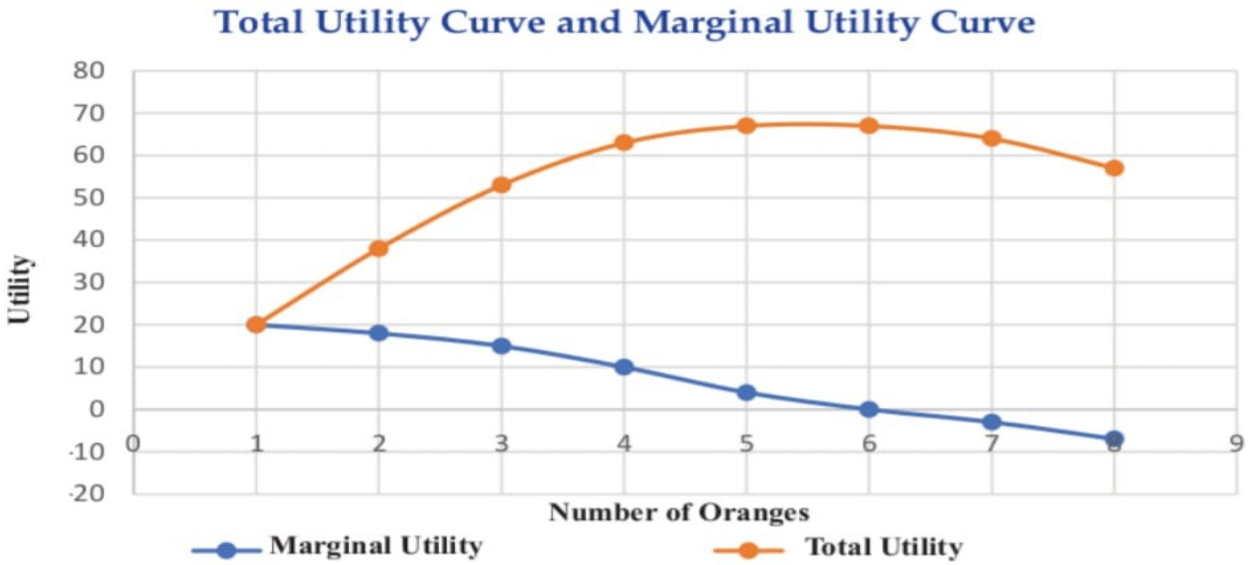

What happens to total utility when 1 to 5 units of oranges are consumed -Increase

What is the change in total utility after the consumption of the 6th unit—Constant (No change)

When a certain unit of oranges is consumed, the marginal utility is shown as zero. Which is it- 6

Why does the marginal utility become negative when 7 and 8 unit oranges are consumed-Decrease

10.Explain the relationship between total utility and marginal utility.

Marginal utility contributes to the total utility.As marginal utility decreases, total utility increases at a decreasing rate.Total utility reaches its maximum when marginal utility is zero.When marginal utility becomes negative, total utility decreases.

11.Assumptions and Limitations of Cardinal Utility Theory-All products must be of the same quality.The consumer's income and tastes do not change.

Limitations- **(First Term Model)**

The consumption must be continuous, that the use of other goods must be ascertained, and that the units must be of a fixed quantity and quality.-However, it is a fact that the utility obtained from a good decreases as additional units of it are consumed and it also generally influences consumption.

How does utilitv become individual - based? Elucidate with an example. **(Second Term Exam)**

Utility is individual-based. It may vary depending on place and time. For example, the utility provided by a fan to a person living in a hot climate may not be the same for a person in a cold climate. Any consumer would prefer to choose goods and services that provide the most utility. But we know that the price of goods and the income of the consumer often influence the choice of goods and services. Every consumer would like to have quality goods and services available at a reasonable price and in accurate measurement. It is also the right of the consumer

12.What are the Different types of goods and services ? **(SCERT Model) (First Term model)**

Free goods-Those that are abundant in nature and are freely available to everyone. They need not be paid for.Eg: Air, sunlight, sea water

Economic good-goods and services that are purchased and used for a price. They can often be manufactured or collected from nature.Eg: food, clothing, car goods and services that are purchased and used for a price.

Capital goods- Physical product which is used in the production of another product. Capital goods are goods that assist in the production process and are sometimes used as consumables.

Durable goods -are things that last for a long time. They can be reused.eg -House, Footwear

Non-durable goods -are items that can be used only for a short period of time.Eg Milk, Vegetables

13.What are the things a consumer should pay attention to while buying goods and services from markets? (Ninu was affected by food poisoning when she tasted a bread bought from a shop. When she checked the packet she could understand that it was an expired product. What all things have to be considered as a consumer while purchasing a product, in order to avoid such situations.) **(First Term model)**

Sure A Plus

Quality of the product,Expiry date,Product information, Quantity, Reliability, Warranty, Safety standards.

14.**What is consumer exploitation**-Consumers who do not have a clear understanding of product-related issues such as price, quality, warranty, and safety standards are sometimes duped(deceived). This can result in consumer exploitation.

15.The extent to which the goals of consumer protection movements are adequate in providing protection to the consumers. Critically evaluate. (Write the Objectives of Consumer Protection Movement) **(SCERT Model)**

The Consumer Protection Movement in India came into being with the formation of the Consumer Guidance Society of India in Mumbai in 1966.It is a social movement formed to protect the rights,and ensure the welfare of consumers. This movement is led by various consumer organizations and individuals who work against firms or institutions that cheat consumers.

16.What are the Objectives of Consumer Protection Movement **(SCERT Model)**

To protect consumer rights,To prevent frauds ,To empower consumers, To legislate,To ensure the credibility of advertisements

17.National Consumer Day

The Consumer Protection Act came into force in India on 24 December 1986, following the adoption of the 1985 United Nations Resolution containing guidelines on consumer protection.24th December is being observed as National Consumer Day.

18.Elucidate Consumer Protection Act 1986

Law passed by both the Houses of Parliament in 1986 to protect consumer rights.The Consumer Protection Act of 1986 clearly defined consumer rights and established a separate judicial system in India for consumer protection.

19.The Consumer Protection Act 2019 aims at empowering consumers and protecting their rights? Evaluate the statement in the light of current situation **(SCERT Model) (First Term Exam)**

This act Came into force on 20 July 2020.

Sure A Plus

Features of Consumer Protection Act 2019- Established The Central Consumer Protection Authority (CCPA) to protect and enforce the rights of consumers.Covers rules to prevent unfair trade practices by e-commerce platforms.Helps in simplifying the consumer dispute resolution process.Provides for punishment of those who manufacture or sell adulterated counterfeit goods.Prohibits the dissemination of misleading advertisements.Guarantees the right to consumer education.this act is sufficient to protect and empower the consumers.

20.List the Rights of the consumer ensured by laws

(Ajay purchased two shirts from s shop for his use. But it got damaged in the next week itself when he started using it as per the instructions given in it. Whom should he approach in order to get compensation for the damage occurred. What all rights of Ajay are violated here?) **(First Term model)**

As a consumer, one needs to be aware of ones rights and also able to avoid being cheated . What suggestions do you have to put forward to avoidb~ing cheated?

.Right to Safety-protections from those goods and services that pose a threat to life and property .Right to Choose goods and services at competitive prices. .Right to Know the quality, quantity, purity and price of goods to protect the consumer from unfair trade practices. .Rights to seek redressal from unfair trade practices and consumer exploitation. Right to Consumer Education -The right to acquire the knowledge and skills to be an informed consumer.

21.Explain Consumer Courts (Under which law, separate judicial system was established for consumer protection in India?) **(SCERT Model) (First Term Exam)**

Begins with the enactment of the Consumer Protection Act in India in 1986. With this, consumer courts were established and tribunals were formed for speedy resolution of complaints. Consumer courts are deployed at three levels.

Structure of Consumer Courts

*Supreme Court

Sure A Plus

*National Consumer Disputes Redressal Commission (Cases involving compensation exceeding Rs. 10 crore) NCDRC is the apex body of consumer protection in india.

↑

*State Consumer Disputes Redressal Commission (Cases involving compensation of Rs. 1 crore to Rs. 10 crore) There are 35 state commissions

↑

*District Consumer Disputes Redressal Commission (Cases involving compensation up to Rs. 1 crore) There are over 600 district forums

22.What are the Three-tier advisory committees under the Consumer Protection Act.

-District Consumer Protection Council -State Consumer Protection Council -National Consumer Protection Council.The role of these committees is to advise the respective governments on matters related to consumer rights.

23.What are the Various types of fraud and the institutions and methods to be approached to resolve them

*Frauds related to educational institutions-**(First Term Exam)**

Contact UGC, AICTE, State Board.Approach Consumer Forum.Lodge a complaint with the police. Contact the Ministry of Education

*Healthcare Frauds**(First Term Exam)**

File a complaint through the grievance portal of the State/National/Medical Council .Complain with a report to the Director of Health.File Public Interest Litigation (PIL) in the High Court and Supreme Court for serious health frauds. File a complaint through the Aarogya Setu app.

*Fraudulent offers of jobs abroad (Qn An institution promised a good job in abroad to Nandu. But on reaching abroad the job he got was not better enough to fulfill the promise. What steps can be taken to resolve such issues?) **(Second Term Exam)**

Can complain through the Protectorate of Emigrants (P0E).A case can be filed under IPC Section 420. If you were scammed after arriving at the foreign country, you can lodge a complaint with the Indian Embassy or High Commission.Can get in touch with at Pravasi Sahayata Kendra (PBSK) Toll No: 1800-11-3090

Sure A Plus

*Online Fraud (you.purchased online is of poor quality product.what can you do ?)

(First Term model)

Complain to Cyber Crime Cell at cybercrime. gov.in.Report to the CERT - IN portal (Indian Computer Emergency Response Team).Submit a complaint through the National Consumer Helpline or at info@cert.in.org.in

*Banking frauds-(When Raju clicked in a fake link that came to his mobile phone, he lost the entire amount from his bank account. What all solutions would you suggest Raju in order to get his money back?) **(First Term Model)**

Approach the Bank Grievance Redressal Mechanism (Branch Manager).If the bank does not respond within 30 days,you can approach the RBI Ombudsman.Banking Ombudsman cgmbank@rbi.org.in

24.How to file complaints if a consumer is cheated?

Can write a detailed complaint on a white paper and submit it directly to the consumer dispute redressal court, along with supporting documents as evidence.

25.Write a short note on Quality symbols

ISI mark--The Bureau of Indian Standards (BIS) issues the ISI mark to ensure that products meet certain quality standards.This mark can be found on industrial products such as cement, paper, paint, and gas cylinders.

AGMARK-Ensure the quality of agricultural and forestry products.

FSSAI-Food Safety and Standards Authority of IndiaEnsures food security.

26.Explain the importance of consumer education. Suggest the ways to implement consumer education in schools. **(SCERT Model)**

Educating consumers about their rights, responsibilities, choices of products and services, differences in markets and consumer laws.

Objectives-To protect consumer rights.To make consumers aware of their responsibilities.To ensure safety in trade, especially online trade.To identify ethics and regulations in the market

Sure A Plus

In schools we can include it as a topic in curriculum with practical experiences in classrooms online courses for consumer education. Consumer clubs in schools help raise awareness among students

27.The bicycle that Rahul's father bought him got damaged after a week and he could not use it. When he approached the shopkeeper, the shop keeper was not willing to replace it or repair it. As a customer, where should Rahul's father lodge a complaint? What are the things to be considered while lodging the complaint? **(SCERT Model)**

Rahul's father can file a complaint with the respective office or consumer courts. Persons with grievance can write a detailed complaint on a white paper and submit it directly to the consumer dispute redressal court, along with supporting documents as evidence like bills.

28.Deepa purchased a mobile phone. But it was damaged within its warranty period. She couldn't get it replaced as she didn't receive the bill. Analyse the objectives of consumer education based on this problem. **(First Term Exam)**

Here Objectives of consumer rights are Understanding Consumer Rights like right to be heard, the right to safety, and the right to seek redressal.

Importance of Documentation- Consumer education should emphasize the critical role of documents like bills, receipts, and warranty cards.

Navigating Consumer Grievance Redressal -A crucial objective is to inform consumers about the process of filing a complaint and seeking redressal. This includes knowing where to complain (e.g., consumer forums).

Making Informed Purchases-Educating consumers to make informed choices is another key objective. This includes advising them to check product details, terms and conditions, and warranty policies before making a purchase

29.As a consumer, one needs to be aware of ones rights and also able to avoid being cheated . What suggestions do you have to put forward to avoid being cheated? **(First Term Model)**

From The Rainy Forests to The Land of Permafrost

Equatorial Climatic Region

1.Answer the following questions

*Which continents does the Equatorial climatic region spread across?

Asia ,Africa,South America,Australia.

* Identify the places that belong to this climatic region?

South America - The Amazon Basin

Central Africa - the Congo Basin and Guinea coast in Africa

South East Asia- Indonesia, Malaysia, and the Philippines), and parts of Central America and Australia.

*To which heat zone does this climatic region belong ? Torrid Zone / Tropics

Identify the countries that are included in the equatorial climatic regions of continents like Asia, Africa, and South America

Continents	Countries
Africa	Gabon, Congo, Democratic Republic of Congo, Uganda, Kenya, Sao Tome and Principe, and Somalia
Asia	Indonesia, Maldives, Malaysia,Srilanka
South America	Brazil,Columbia,Peru,Veezuela

2.What are the features of Equatorial Climatic Region ?

One of the salient features of the equatorial climate is that the temperature remains more or less the same throughout the year

3.Elements of weather in Equatorial Climatic Region **(SCERT Model)**

Temperature -There is no significant variation in the annual and diurnal ranges of temperature. The mean monthly temperature and the mean annual temperature are both around 27°C. There is no winter in the equatorial climatic region. The high rate of insolation received here causes consistently high temperature., there is no distinct dry season in the equatorial climatic region. This is due to the abundant rainfall received in the equatorial region throughout the year

Winter- Because of this, the region does not experience winter.The mornings experience moderate temperature but as the day progresses, it increases considerably.

Sure A Plus

Convectional rainfall- This significant rise in temperature causes a high rate of evaporation, followed by heavy downpours of convectional rain in the afternoons

Rainfall- Rainfall is heavy and well-distributed throughout the year. The annual rainfal is between 175 cm and 250 cm. High temperature and high rate of evaporation are the reasons for the heavy rainfall. Along with convectional rainfall, orographic rainfall is also received in certain places. It is the mountainous areas of Indonesia and Africa where orographic rainfall is experienced.The atmospheric disturbances caused by the convergence of air currents in the Doldrums occasionally lead to intermittent rainfall of cyclonic origin.

4. How does convectional rainfall occur? What are the features of convectional rainfall? **(SCERT Model) (Second Term Model)**

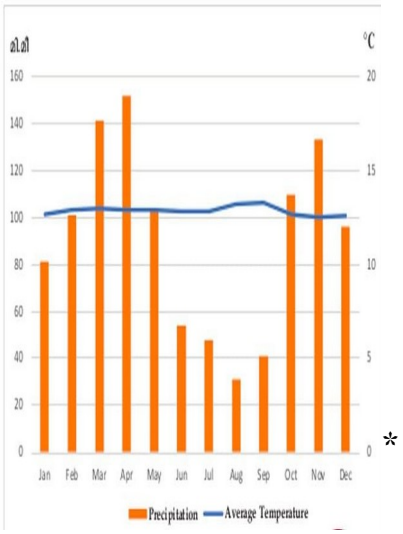

Due to high temperature, air gets heated and rises up. Cumulus clouds are formed by the cooling and condensation of rising warm air. Rainfall occurs with thunder and This rain, mostly occurring in the afternoon, does not last long. This type of rainfall is called convectional rainfall. This is a common phenomenon in the tropical regions during summer. As the convectional rainfall commonly occurs during afternoons, it is also called 4 O'Clock rains.

5.Does Kerala experience convectional rainfall, and in which months does this rainfall occur in Kerala? **(SCERT Model)**

Yes, Kerala does experience convectional rainfall, particularly during the pre-monsoon months of March to May.

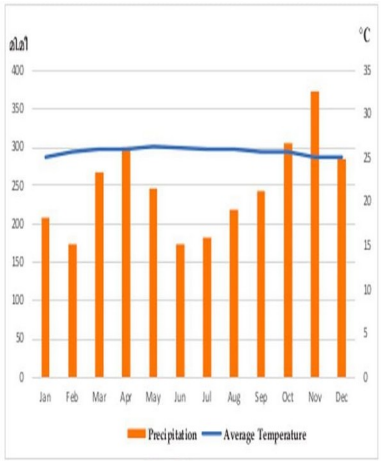

6.Analyse the diagrams and answer the questions that follow.

Month	Precipitation (mm)	Average Temperature (°C)
January	81	12.7
February	101	12.9
March	141	13
April	152	12.9
May	103	12.9
June	54	12.8
July	48	12.8
August	31	13.2
September	41	13.3
October	110	12.7
November	133	12.5
December	96	12.6

Month	Precipitation (mm)	Average Temperature (°C)
January	209	25.1
February	174	25.7
March	268	26
April	300	26.1
May	246	26.3
June	174	26.2
July	183	26.1
August	219	26
September	243	25.8
October	305	25.7
November	373	25.2
December	284	25.1

Source: Certificate Physical and Human Geography - Goh Chengleong

Kuala Lampur
Fig 3.4

Find the highest and the lowest mean monthly temperatures for each place-

Kuala Lampur

Highest mean monthly temperature : Approximately 26.3 ^{0} C (May)
Lowest mean monthly temperature : 25.1^0 C (Jan, Dec)

Bogota

Highest mean monthly temperature : Approximately 13.3 ^{0} C (Sep)
Lowest mean monthly temperature : 12.5 ^{0} C (Nov)

* What is the annual range of temperature at each place-Kuala Lampur Annual range of temperature : 26.3^0 C - 25.1^0 C = 1.2 ^{0} C

Bogota Annual range of temperature : 13.3 ^{0}C - 12.5 ^{0} C = 0.8 ^{0}C

* Is there any month that does not receive rainfall-Kuala Lampur No , every month receives rainfall. Bogota No , every month receives rainfall.

7.Why is Kilimanjaro snow-covered throughout the year ?

Kilimanjaro, the highest mountain peak in Africa in the equatorial climatic region, is snow-covered throughout the year.Primarily a result of the interplay between altitude, temperature, and precipitation.Temperature decreases with an increase in altitude.Its extreme high altitude of 5,895 meters.

8.How does coastal regions tend to be more populated ?

Excessive humidity, high rates of insolation and intense heat make the days in the equatorial climatic region quite oppressive. However, the moderating effect of winds blowing from the sea brings some relief along the coastal areas. As a result, coastal regions tend to be more populated.

Natural Vegetation

9.Diverse natural vegetation found in the equatorial climatic region, which plays a significant role in maintaining the global ecological balance. Evaluate the statement **(SCERT Model)**

Tropical rainforests, or equatorial evergreen forests, are found across the Amazon Basin (Selvas), West-Central Africa, and Southeast Asia. Characterized by a lack of distinct seasonal cycles, these forests remain green year-round as trees undergo biological processes continuously.They are defined by immense biodiversity, where hundreds of species—including hardwoods like mahogany and ebony, lianas, and epiphytes—coexist in dense proximity. Sunlight availability creates a stratified structure, resulting in distinct vegetation layers or canopies.Often called the "Lungs of the World," these forests play a critical global role in absorbing carbon dioxide and releasing oxygen. While human activity like shifting cultivation can lead to the growth of secondary forests (such as *belukar*), and coastal areas support mangroves, the primary rainforest remains a vital, complex ecosystem.

Sure APIS

10.Elucidate he diversity of fauna in the Equatorial Climatic Region .

The equatorial climatic region supports a rich diversity of wildlife, most of which are arboreal , meaning they live in trees. This is because the dense forest canopy prevents sufficient sunlight from reaching the forest floor, resulting in a lack of undergrowth. Due to the scarcity of undergrowth, herbivores that feed on it are not common, and consequently, carnivores that prey on these herbivores are also limited. The wildlife found here includes a variety of tree-dwelling creatures such as lemurs, chimpanzees, orangutans, and various reptiles. Additionally, you can find hippopotamuses and alligators near water sources, and a wide array of birds like parrots, toucans, and hornbills.

11.“The relationship between humans and their environment plays a crucial role in shaping human life” Evaluate the statement

Or Tribes **(SCERT Model)**

Or Analyse the agriculture in the Equatorial climatic Zone and write a note. **(Second Term Model)**

Human Life and Economy in the Equatorial Region

The harsh physical conditions of the equatorial climate result in sparse population densities. The region is primarily inhabited by indigenous groups, such as the **Pygmies (Africa), Amazonian tribes (South America), and Orang Asli (Malaysia)**, who sustain themselves through hunting, gathering, fishing, and shifting cultivation (slash-and-burn). In this traditional system, small forest plots are cleared and farmed until the soil is exhausted, at which point they are left to regenerate while the community moves to a new area.The introduction of European influence shifted the economic focus toward plantation agriculture. The consistent heat and rainfall are ideal for large-scale "cash crops," transforming the region into a global hub for industrial materials and food products:

12.Write a short note on construction of houses in the equatorial climatic region ?

Sure A Plus

Most of the natives in the equatorial climatic region are nomads. Most houses are built with locally available resources. Most of the people living in the equatorial climatic region are either primitive tribes or nomads, residing in houses built with wood and stones

13.Name the cities in the equatorial climatic region ?

On the contrary, there are many beautiful tourist destinations and modern cities here. Cities like Equitas , Quito Bogotá, Singapore, Jakarta, and Manaus and Belem cities of Amazon basin are a few examples. In Malaysia, Singapore, and Eastern Brazil, significant development has also been made through systematic planning and hard work.

14. Though the equatorial climatic region is blessed with rich forests, numerous rivers, abundant water, and scenic beauty, it encounters many challenges. Prepare a seminar paper

Or Although equatorial climatic regions are blessed with thick forests, commercial extraction remains challenging. Analyse. **(Second Term Exam)**

Or Why Disease and pest infestations are high in the equatorial climatic zone. **(Second Term Model)**

Or What is the situation regarding infrastructure development in the Equatorial climatic zone? Record your conclusion . **(Second Term Model)**

The hot and wet equatorial climate presents significant obstacles to human development and economic activity. High humidity and dense vegetation foster the spread of diseases and pests, which threaten both human health and agricultural productivity.

Infrastructure development is particularly difficult; the dense forests, swamps, and rapid regrowth of wild plants like Lalang make constructing roads and railways both expensive and physically challenging. Consequently, many regions remain isolated, relying almost entirely on river systems for transport.

Sure A Plus

15.The equatorial rainforests play a crucial role in making the world's climate sustainable. Explain

About one-third of the world's total forests are located in three regions: the Amazon Basin, the Congo Basin, and Southeast Asia. These forests, which play a significant role in influencing the world's climate, face numerous threats of deforestation in many ways.Another issue encountered by this region is human-induced forest deterioration. Human activities such as agriculture, construction, urbanization, and mining are alarmingly destroying these forests through fire and felling of trees.

Tundra Region

16.What features have you noticed in the Tundra Region that are different from those in the equatorial region?

. Snow fall . Extreme cold .Ice cap .low biodiversity.Fragile ecosystem.Lack of large trees

17.Longyearbyen --Longyearbyen is a town in the Norway in the Arctic sea .It is located in the tundra region.The northernmost settlement in the world.

18.Complete the table on Places on Tundra region and its Continents

Places	Continents
Siberia	Asia
Greenland	North America
Iceland	Europe
North Scandinavia	Europe
North Canada	North America
Alaska	North America

19.Write a short note on The Tundra region

The Tundra region is located to the north of the Taiga region. It spreads along the Arctic coasts of North America and Eurasia, and that of Greenland. The Tundra region can be categorized into Arctic Tundra and Alpine Tundra

(Second Term Exam)

SureAPlus

Arctic Tundra	Alpine Tundra
In parts located to the north of Taiga in Alaska, Northern Canada, Siberia, Greenland, Iceland, Scandinavia	In high mountainous regions (high altitude of the Ladakh)

20.The Tundra climatic region is also called the Arctic or Polar Climate. The polar climate is characterized by short summers and long winters. What are the other features of the climate prevailing in the Tundra climatic region ?

Or

Explain how the apparent movement of the sun affect the climatic characteristics of the Tundra region. **(SCERT Model)**

The climate of the Tundra is characterized by a very low mean annual temperature. In mid-winter, temperature falls between -25 and -35 degrees Celsius and the temperature in the interior parts of the Tundra falls still lower. Summers are short here during which, a few weeks have the temperature rising above 0 degrees Celsius. The sun never sets for weeks in the area between the Arctic Circle and the Pole. Likewise, the sun never rises for weeks in this area either.

21.Why does the North Pole experiences night for around six months ?

Or

.How regions north of the Arctic circle experiences longer night and longer days

(Second Term Model)

One of the features of this region is that during the period when the sun's apparent position is in the Northern Hemisphere, the North Pole experiences day for around six months. In contrast, during the period when the sun's apparent position is in the Southern Hemisphere, the North Pole experiences night for around six months

22.Answer the following questions

* In which months is the apparent position of the sun in the Northern Hemisphere- From 21 to September 23

Sure A Plus

* In which months is the apparent position of the sun in the Southern Hemisphere- From September 23 to March 2

* How long are the nights and days during these periods at the Poles- 6 months

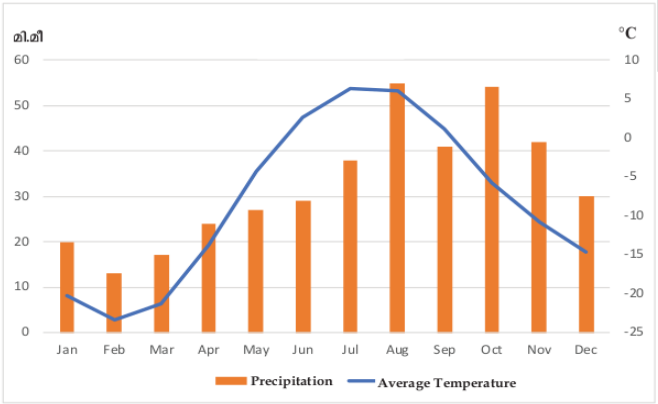

23.What are called blizzards ?

During winter the precipitation is in the form of snow. The coastal areas where cyclones are strong have much heavier rainfall. The strong snowstorms that blow over this region are called blizzards. They often cause heavier snowfall.

24.Analyse the diagram and answer the following questions

Month	Precipitation (mm)	Average Temperature (°C)
January	20	-20.2
February	13	-23.4
March	17	-21.3
April	24	-13.7
May	27	-4.3
June	29	2.6
July	38	6.4
August	55	6
September	41	1.2
October	54	-5.7
November	42	-10.8
December	30	-14.6

Source: Certificate Physical and Human Geography - Goh Chengleong

Upernavik in Greenland
Fig 3.29

* Month that receives the maximum rainfall = August
* Month that receives the minimum rainfall = February
* Month in which the maximum average temperature is recorded = July
* Month in which the minimum average temperature is recorded = -23.4°C
* The maximum average temperature and the minimum average temperature= 6.4
* The Annual range of temperature = 29°C

25.The natural vegetation and diversity of fauna is scanty in Tundra region. Why?

Due to insufficient in sunlight and long winters natural vegetation and diversity of fauna is also scanty in Tundra region.-Trees are normally absent in the Tundra region due to the challenges posed by the climate.Mosses, lichens, sedges, and bushes are commonly found here. Dwarf willows and stunted birches withstand the harsh climatic conditions and survive in certain places. Some hardy grasses grow in the coastal lowlands where favourable conditions

prevail. Herbivores like reindeer make survival possible here only by depending on these pastures

26.Animals found in Tundra region.

-Reindeer -Arctic foxes -wolves -polar bears -musk-oxen -arctic hares

27.Short note on Human life in the Tundra

The Tundra is a sparsely populated region. Human life in this region is largely confined to the coast. Plateaus and mountains are permanently snow-covered, making them uninhabitable. The Tundra is mainly inhabited by some nomadic tribes.

The different tribes in the tundra and the regions they belong to

Countries or Places	Tribes
Greenland, North Canada, Alaska	Eskimos or Inuit
North Finland, Scandinavia	Lapps
Siberia	Samoyeds
Lena Basin	Yakuts
North- Eastern Asia	Koryaks, Chuckchi

Human Life In Tundra region

28.Explain the major activities for subsistence by the people of the Tundra region

Hunting and fishing are the major activities for subsistence . Whales, seals, caribou, various kinds of fish, birds, and fur- bearing animals provide them with everything they need for food and clothing. Their bones and other parts are used as weapons, tools, and even utensils. The Polar Eskimos of Greenland still lead a primitive lifestyle, not very much different from their forefathers. During winter, they live in houses called igloos and in summer, they migrate to other places for hunting and fishing. During the summer season, they live by the side of streams in portable tents made of animal skin. There are Eskimos who hunt and feed on even polar bears.

29.prepare a note on the topic “In the last sixty years, the way of life of the Eskimos has undergone tremendous changes through their contact with Europeans” **(Second Term Exam)**

Changes in Eskimo Life and the Tundra -In the last sixty years, the way of life of the Eskimos has undergone tremendous changes through their contact with Europeans. In coastal villages, Eskimos now live in houses with modern amenities and use speedboats for fishing instead of kayaks. Fur-bearing animals are commercially reared. Schools have been established in some areas of Canada and Alaska for Eskimo children to enable them to live a modern

SURE A PLUS

life. In the Eurasian Tundra, most tribal groups lead a nomadic life, wandering with their reindeer herds. In the Siberian Tundra, large farms have been established for rearing fur-bearing animals, including reindeer. Mining in the Tundra region has led to new settlements. Cereals with a short growing season are also cultivated in certain areas of the Southern Tundra.

30.What the Challenges Posed by Climate Change in the Tundra Region?

Due to global warming, the permafrost in the Tundra melts considerably. This adversely affects the ecosystem and environmental equilibrium of the region.

Money and Economy

1.Define Money ?

Anything accepted in the exchange of goods and services can generally be called
money. It is money that made the exchange of goods and services faster and made specialization possible.

2.Money plays the various roles in the economy. What are Services that can be performed with money?

* Buy and sell goods and services. * Compare the prices of different goods and services. * Store the value of savings and assets. * Lend and borrow money.

2.List the general Functions of Money **(Second Term Model)**

@. **Medium of Exchange**- Goods and services can be sold for money, and the money can be used to purchase the goods and services that are needed

@. **Measure of value** -Money made it easy to compare the values of two goods. The
value of a good is the price that is assigned to it in the transaction process.

@. **Store of Value**- When money became something that was acceptable to everyone, it had become possible to store the value of any good in the form of money.

@. **Means of Deferred Payments**- In the modern times many business activities are carried out with ease because of the advantage of settling the financial transactions at a later date.

3.What are the general Characteristics of money ?

$ Generally accepted. $ Durable. $ Easy to handle. $ Portability, $ Limited supply

4.How does money work in the economy with an example?

Sure A Plus

Or Money stimulates the economic activities of the production, distribution and consumption and strengthens of the economy by making the transactions faster. Explain how this works with an example. **(SCERT Model)**

It is money that moves the economy and speeds up its functioning. Rice production is an economic activity in the primary sector. A farmer who produces rice may need fertilizers, seeds, pesticides, machinery, and labour. When money is spent on fertilizers and machinery, it becomes a source of income for the producers in the industrial sector. When the rice producers depend upon transportation facilities to get the rice to the market, it becomes a source of income for service providers. The money received as income by the industrial and service sectors is pumped back into the economy. In this way, each currency spent in the economy changes hands again and again

5.Elucidate the Velocity of Circulation of Money ?

Or Explain how the cyclical velocity of money affects economic growth. **(SCERT Model)**

Or What do you mean by velocity of circulation of money? How does it intiuence economic growth? **(Second Term Exam)**

The number of times a unit of money is exchanged in a given period of time is known as the velocity of circulation of money.An increase in the velocity of circulation money indicates an acceleration in economic growth, while decrease in the velocity of circulation money indicates a slow down in economic growth.In the economies where growth rate is high, producers and consumers have more chances to spend money and vice versa.

Money and the Central Bank

6.What is the source of currencies and coins in circulation in our country? Who is the ultimate authority of all this money?

In each country, the respective central banks will be the ultimate authority of this money. The Reserve Bank of India (RBI) is the central bank of India and it is headed by its Governor. It was established on 1 April 1935 in Kolkata under the Reserve Bank of India Act, 1934. In 1937, the headquarters was shifted to Mumbai. It was nationalized in 1949.

7.The central bank regulates and coordinates the activities of banks and non-banking financial institutions in the economy. Examine the major functions of the Reserve Bank of India.

. Printing and Issuing Currency. Bankers' Bank. Controls the supply of money and credit. Acts as the government's bank . Custodian of foreign exchange reserves. Publication of Reports.

SJC A Plus

Printing and Issuing Currency - As per the Reserve Bank of India Act 1934, only the Reserve Bank of India has the power to print and issue all currencies except coins and one rupee notes. The coins and one rupee notes are printed and issued by the Ministry of Finance, Government of India. The Reserve Bank of India is responsible for designing, incorporating the security features, printing, and distributing the currency. Currency notes are printed at the Government of India's printing presses at Nasik (Maharashtra) and Dewas (Madhya Pradesh). It is also printed at two presses at Mysore (Karnataka) and Salboni (West Bengal) by Bharatiya Reserve Bank Note Mudran Limited (BRBNML), owned by RBI. Coins are minted at the Government of India's mints at Mumbai, Hyderabad, Kolkata and Noida. Based on the government's instructions, the Reserve Bank of India can withdraw the currency notes in circulation. This is known as demonetization.

Bankers' Bank **(Second Term Exam)**

The Reserve Bank acts as the bankers' bank. It provides emergency loans to banks in the times of crisis, maintains the reserves of banks, and helps to settle transactions between banks.

Controls the supply of money and credit-When the supply of money increases and the production of goods and services does not increase proportionately, there arises a situation where there are fewer goods and services and more money in the economy. This causes the prices of goods and services to rise.

Inflation - **(Second Term Exam)**

An increase in the general price level of goods and services is known as inflation. Inflation in India is measured using the Consumer Price Index (CPI), which is prepared by the National Statistical Office under the Ministry of Statistics and Programme Implementation (MOSPI).If inflation increases without any control, it causes a decrease in the purchasing power of money. It adversely affects economic growth and production. Therefore, inflation must be controlled.

8.What are the reasons of inflation ?

* Increase in the quantity of money supply * Uncontrolled lending by banks leads to the increase in the money supply in the economy and also inflation

9.How does the Reserve Bank see the total amount of money in our economy ?

Reserve Bank sees otal amount of money in the form of M1, M2, M3 and M4.

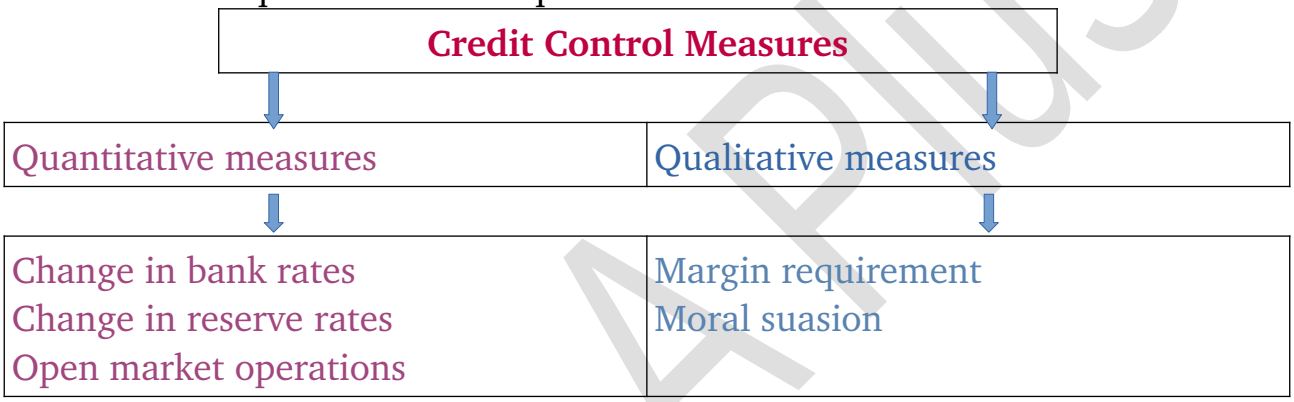

M1 = Coins and currency notes held by the public and the savings deposits in commercial banks

Sure A Plus

M1 = Coins and currency notes held by the public and the savings deposits in
commercial banks
M2 = M1 + savings deposits in post office savings banks
M3 = M1 + net fixed deposits in commercial banks
M4 = M3 + total deposits in post offices (excluding National Savings Certificates)
where M1 and M2 are known as narrow money and M3 and M4 are known as
broad money.

10.What are the credit control measures of RBI **(SCERT Model)**

RBI uses quantitative and qualitative measures to control credit.

11.Elucidate how inflation is controlled by changing bank rates and changing the reserve ratio, by RBI

Or Explain the role of Repo rates and Reverse Repo rates in controlling inflation. **(SCERT Model) (Second Term model)**

The important bank rates are the repo rate and the reverse repo.

@. **Repo Rate**- The rate of interest charged by the RBI on the loans taken by commercial banks from the RBI.

@. **Reverse Repo Rate**-The rate of interest given by the RBI on the deposits by the commercial banks.

When inflation increases unchecked, RBI increases repo rate and reverse repo rate. When RBI increases these rates, the commercial banks also change these rates. When these rates are increased, the money available with the commercial banks for lending fall because at a higher rate of interest the commercial banks will take less loans from RBI and deposit more in the RBI. In the same way the loan taken by the public will also be less. So the money available in the economy also would be less. When the rate of interest is high, people will prefer to save more money rather than spend. The money held by

Sure A Plus

the public flows to commercial banks and from there to the Reserve Bank. The amount of money in the economy decreases and the inflation comes under control.

12. What do you mean by Cash reserve ratio 0f Reserve Bank of India ? How it help to control inflation?

Cash reserve ratio is the amount of money the banks must keep as reserves with the Reserve Bank out of the money they receive as deposits.When the reserve ratio decreases, the amount of money available with banks to lend increases and the availability of credit increases.This increases the money available with the people.However, when the reserve ratio increases, amount of money available with banks to lend will decrease.This reduces the availability of credit and reduces the amount of money people have.

13.**Acts as the government's bank** **(Second Term Exam)**

The Reserve Bank of India is responsible for maintaining government accounts, providing banking services. It also advises the government on matters such as fiscal and monetary policy.

* Fiscal policy- Fiscal policy is the policy regarding taxation and government spending.

* Monetary policy - is the policy regarding the supply of money and the rate of interest.

14.**Custodian of foreign exchange reserves**

The sum total of foreign currencies and gold reserves are the foreign exchange reserves of our economy. RBI is the custodian of all these. Publication of Reports RBI publishes various reports at different periods such as Banking Trends in India,

Monetary Policy Reports, Consumer Surveys, RBI Bulletin and Statistical Supplements.

Banks and Non-Banking Financial Institutions

15.Briefly explain Banks and Non-Banking Financial Institutions

Banks and non-banking financial institutions are institutions that provide financial services to individuals, organizations, and businesses in the economy. Banks can be broadly classified into commercial banks and cooperative banks. While the operations of commercial banks are controlled by shareholders, the ownership of co operative banks is vested with the members of the co operative societies. Kerala Bank is an example of a co operative bank.

Sure A Plus

16.Write a short note on Commercial banks

Commercial banks are licensed by the RBI to provide banking services and are included in the Second Schedule of the RBI Act, 1934. Public sector banks, private sector banks, small finance banks, payment banks, specialized banks, regional rural banks, and foreign banks are some examples of commercial banks.

17.Define new generation banks ?

Commercial banks that were allowed to operate in India after the financial reforms of the 1990s are known as new generation banks. Examples include Axis Bank, Mahindra Bank, Yes Bank and Indus Bank

18.What are the Functions of Commercial Banks ?

Or Explain the difference in fixing interest by commercial bank for various deposits. **(SCERT Model) (Second Term Model)**

The main functions of commercial banks are to accept deposits from the public and to provide loans. Banks act as a safe haven for savings. They are able to convert the money deposited in banks into various types of loans and make them available to entrepreneurs.

Accepting Deposits and Lending Loans are the Functions of Commercial Banks.

Various types of deposit accounts offered to the public by commercial banks are offered to the public by commercial banks.

$ Savings Deposit: This is a deposit that instills the habit of saving in individuals and allows them to with draw money according to their needs. The depositor has the opportunity to withdraw money subject to restrictions. Banks often offer low interest rates on savings deposits.

$ Current account: is an account intended for business transactions.There is no limit to the number of transactions that can be made from such accounts in a single day. Banks do not pay interest on the money in this account.Overdraft facility is provided for this account.An overdraft is a system that allows you to withdraw more than the amount in the current account within a predetermined limit.

$ Term Deposit or Fixed Deposit Account: Money that is not needed to be withdrawn immediately can be deposited in such accounts.Banks pay more interest on such deposits than on money in a savings bank account. If money is withdrawn from these deposits before the maturity period, the interest rate may be reduced. The interest can be withdrawn upon maturity along with the deposits, or at various periods determined by the depositor.

$ Recurring Deposits: Rare deposits of a fixed amount of money at regular intervals for a specific period of time.Such deposits earn higher interest rates

Sure A Plus

than savings deposits. However, they are lower than the interest rates on fixed deposits.At the end of the tenure, the accumulated amount can be withdrawn along with interest.

Lending Loans

The Commercial banks that provide various loans to individuals and institutions. Banks keep a portion of the deposits received as reserves and lend the rest to entrepreneurs.

19.Define spread ? **(Second Term Exam)**

Or Explain how deposits and lending loans influence the operations of Commercial banks . **(SCERT Model)**

Commercial banks charge interest on the various loans they provide to their customers. The interest rate charged to borrowers is higher than the interest rate paid to depositors. The difference between the interest paid to depositors and the interest charged from borrowers is the income of banks. This is known as the spread.

20.List the various collaterals accept by Banks for providing loans

They accept gold, land documents, salary certificates, RC book etc.

21.List the other functions provided by banks **(Second Term Exam)**

Credit Card ,Debit Card,ATM Services, Locker Facility

22.Banking services that were available only at certain times and days are now available 365 days a year, anywhere in the world, due to the intervention of technology. Evaluate the statement

Or Technological advancement have helped increase the quality of bank transactions. Evaluate the statement. **(SCERT Model)**

*** National Electronic Fund Transfer System (NEFT)** **(Second Term Exam)**

This is a system introduced by the Reserve Bank of India to make bank transactions between account holders easier
and faster. Funds are transferred using the Indian Financial System Code (IFSC)

*** Real Time Gross Settlement (RTGS)** **(Second Term Exam)** RTGS is a system introduced by the RBI to transfer large amounts of money between account holders. The feature of this is that transactions can be completed in a very short time.

*** Core Banking** **(Second Term Model)**

Core banking is a system that enables an account holder of a bank to carry out financial transactions from any of its branches. There is no need to

SURE A PLUS

go to the specific branch where the customer holds the account for the bank transactions. It is
convenient for the customers.

*** Universal Payment Interface (UPI)** **(Second Term Model)** UPI is a payment system developed by the National Payments Corporation of India (NPCI). It enables real-time money transfers between bank accounts. Users can connect their various bank accounts through a mobile application and make simple and secure transactions. Some of the popular UPI apps are Google Pay, Paytm, Phone Pay, BIM UPI, and Amazon Pay.

Non-banking financial institutions

22.What do you mean by Non-banking financial institutions ?

These are financial institutions that operate in the banking sector but perform only some of the functions of a bank.Unlike banks, non-banking financial institutions cannot accept savings deposits from the public.Money cannot be withdrawn by using cheques from such financial institutions. Non-banking financial institutions are regulated by institutions such as the Reserve Bank of India (RBI), Securities and Exchange Board of India (SEBI), Insurance Regu latory and Development Authority of India (IRDA), and National Housing Bank (NHB)

23.List the Examples of Examples of non-banking financial institutions..

$ Insurance companies (Eg: LIC, GIC) $ Mutual fund companies (Eg: UTI)

$ Non-banking financial institutions (Eg: KSFE)

Sources of Credit in India

24.Credit can be considered as the main source for the financing of development activities. Elucidate the statement

Entrepreneurs need money to start new ventures, to expand existing ventures and to enable firms to adopt new technologies. A large percentage of this comes from banks and non-banking financial institutions.Sources of credit in India can be classified into formal and informal sources of credit. Formal sources of credit are the organized, institutionalized and regulated systems. Informal sources of credit are the unorganized and non-institutionalized systems. The mutual coexistence and operational success of both are necessary for the growth of the economy. RBI uses quantitative and qualitative measures to control credit.

Sources of Credit

SURE A PLUS

Formal Sources of Credit	Informal Sources of Credit
Banks Non-Banking Financial Institutions Self-Help Groups Microfinance Institutions	Local Money Lenders Friends, Relatives Other Methods

25.What is Credit Deposit Ratio ?

Credit Deposit Ratio measures the proportion of a bank's deposits that are used for loans. It is monitored by the RBI. A high credit deposit ratio indicates that banks have lent out a large portion of the deposits they have received.

Financial Inclusion

25.What do you mean by Finical inclusion What are the steps to taken by the government for this

Finical inclusion and inclusive economic growth accelerate when banking services reach the common man, the rural population and the marginalised people.

What are the steps to taken by the government for this:-

$ Nationalization of Banks **(SCERT Model)**

In order to bring the functioning of banks to different parts of the country and to more people, 14 banks were nationalized in 1969 and 6 banks, in 1980.

Objectives of bank nationalization are **(SCERT Model)**

* To expand banking facilities in rural areas. * To provide credit to farmers at lower rates. * To ensure equitable distribution of credit. *To prevent the concentration of economic power in a few people.

$ Co-operative Banking Systems

Co-operative banks play a crucial role in activating the rural economy by providing banking facilities to villagers and ordinary farmers. They operate on the principles of co-operation, self-help and mutual assistance.

The objectives of co-operative banks

@ To inculcate the habit of saving among the villagers. @ To protect the common people from private moneylenders. @ To provide low-cost loans to farmers and small businessmen.

$ Microfinance

Microfinance aims to provide financial services to low-income individuals, families, and businesses who do not have access to conventional banking

Sure A Plus

services. The Grameen Bank, founded by Professor Muhammad Yunus in Bangladesh in 1983, is a good example of microfinance. Kudumbashree in Kerala works on the concept of microfinance. These systems work by accepting small deposits through Neighborhood Groups and Self Help Groups (NHGS, SHGS) and by providing loans as per the need.

Goals of Microfinance

Poverty alleviation. # Empowerment of women and the marginalized. # Promotion of entrepreneurship. # Ensuring job creation. #Improvement of quality of life.

$ Jan Dhan Account

How effective are Jan Dhan accounts and a cashless economy in contemporary India? Justify your opinion. **(Second Term Model)**

The Prime Minister Jan Dhan Account is a scheme to open an account for all those who do not have a bank account in the country. Its aim is to bring all the people of the country under the ambit of banking services. Zero minimum balance account is the special feature of this scheme.

Aims of the Prime Minister Jan Dhan Account **(Second Term Model)**

< To provide financial services < To the low-income group, promote financial literacy < Inculcate the banking habit.

26.Briefly explain Digital currency

Digital currency has been the latest trend in financial transactions. <The government is also promoting Aadhaar-based payment system, e-wallet and National Finance Switch to reduce the use of physical currencies and increase the use of digital currencies, thus moving towards a cashless economy.

The Changing Earth

1.Why the Earth's surface has so many ups and downs?

The Earth's surface is constantly subjected to many changes. For millions of years, numerous movements and resulting processes have been occurring on the surface as well as within the Earth. Each and every landform on the Earth's surface is formed as a result of these movements and processes. Mountains, plateaus, valleys, rivers, and so on were all created due to these continuously occurring Earth movements and processes. The movements that cause the ups and downs on the surface of the Earth are called the Earth movenents.

SureA PLUS

2.The Earth movements can be categorized into two types based on the forces there are two types of Earth Movements and the forces that cause them. Explain? _**(SCERT Model)**

Endogenic Movements	Exogenic Movements
The processes that are caused by Exogenic Movements The processes that are caused by the forces within the Earth at varied intensities . Radioactivity within the Earth, primordial heat, the rotation of the Earth, variations in geothermal gradient, and convection currents.	The processes that are caused by external forces on the surface of the Earth at varied intensities Slope of the area, gravity, the pressure exerted on an object by another object, molecular stress due to temperature changes, running water, glaciers, wind, groundwater, and different chemical actions.

3.Write examples for endogenic movements

Earthquakes, volcanism, orogenic movements, epeirogenic movements, and plate tectonics are formed the result of endogenic movements.

4.Endogenic movements are classified into two . What are they? **(Second Term Exam)**

Slow movements (diastrophic movements)	Sudden movemnents
Epeirogenic Orogenic Processes	Earthquake,Volcanism

5.What are diastrophic movements? Classify diastrophic movements and write a note. **(Second Term model)**

Diastrophism- endogenic processes that move, elevate or build up of the Earth's crust come under diastrophism .

Diastrophic movements- The endogenic movements that move, elevate, build up portions of the Earth's crust are collectively known as diastrophic movements.

Sure A Plus

Epeirogenic movements -The processes that cause the upliftment of a large portion of the Earth's crust are called epeirogenic movements. These movements cause only minimal deformation on the Earth's surface,

Orogenic movements- The processes that cause the formation of mountains are called orogenic movements. We know that fold mountains are formed through the folding of crustal portions. These movements cause only minimal deformation on the Earth's surface, whereas in orogenic movements, the Earth's surface is severely deformed. The processes that cause the formation of mountains are called orogenic movements. We know that fold mountains are formed through the folding of crustal portions. In orogenic movements, the Earth's surface is severely deformed

Volcanism

6.What do you mean by lithosphere ?

The outermost layer of the Earth, called the crust, along with the uppermost portion of the mantle, together form the lithosphere with an average thickness of 100 kilometre.

7.Define Asthenosphere ? Why do. Lithosphere plates slide over Asthenosphere

A zone lying just below the solid lithosphere called the asthenosphere, where rocks exist in a partially molten (semi-liquid) state.Lithosphere plates slide over Asthenosphere due to above mentioned conditions.

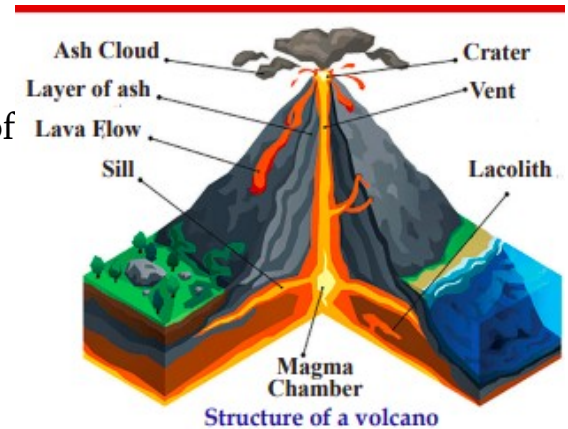

8.Prepare a short note on Volcanic eruption .

It is from asthenosphere that molten rock material, called magma, rises to the surface of the Earth through holes, cracks, and weaker portions of the lithosphere The openings in the lithosphere through which molten rock material, gases, ash, pyroclastic materials (rock fragments), dust, and water vapour erupt to the surface of the Earth are called volcanoes.

9. What is volcanic materials ?

The materials that erupt in this way are known as volcanic materials. The molten rock material present in the upper mantle is called magma. Once it starts moving towards the crust or reaches the surface, it is referred to as lava.

10.Prepare a note describing the structure of volcano

Structure of a volcano

SURE A PLUS

Magma Chamber: A large, underground reservoir or pool of magma (molten rock) beneath the volcano. This is where the molten material is stored before an eruption.

Vent: The opening at the Earth's surface through which magma, volcanic fragments, and/or gases are emitted. The main vent is usually located at the summit.

Crater: A bowl-shaped depression at the top of the volcano that surrounds the main vent.

Sill: It forms when magma (molten rock) cools and solidifies beneath the Earth's surface, meaning it never erupts as lava.

Laccolith-It is *a body of intrusive rock with a dome-shaped upper surface and a level base*,

11.The major volcanic zones are mainly located along major plate margins. Why is this so?

The two types of plate boundaries that are most likely to produce volcanic activity are divergent plate boundaries and convergent plate boundaries.

At a divergent boundary, tectonic plates move apart from one another.The Earth's crust is pulled apart to create a new pathway for rising hot magma to flow on to the surface .Eg Mid-Atlantic Ridge

At a convergent plate boundary, tectonic plates move toward one another and collide.Volcanoes form here in two settings where either oceanic plate descends below another oceanic plate or an oceanic plate descends below a continental plate. This process is called subduction and creates distinctive types of volcanoes

12.How does volcanic activities affect human life?

Negative Impacts and Hazards

Volcanic explosions near human settlements cause loss of lives and destruct properties. They disrupt economic activities and severely affect human life. The lava flow following a volcanic eruption adversely impacts both nature and human settlements. By destroying houses and land, it leaves many people homeless and jobless.

Sure A Plus

Gases like sulfur dioxide (SO2), carbon dioxide (CO2), and hydrogen sulfide (H2S) can be toxic.

Ash Inhalation can cause respiratory illnesses like bronchitis and chronic lung problems.Destruction of essential services like electricity, water, communications, and transport networks.

13.Volcanic places are suitable for agriculture and hence attract people to settle there.Elucidate the positive impacts and benefits
Or Though volcanoes are destructive, people live in volcanic regions. Why?
(Second Term Exam) (SCERT Model)

Or How Volcanoes are useful to humankind **(Second Term model)**

Fertile soil The most fertile soils on Earth, which are rich in minerals like potassium and magnesium.
The internal heat associated with young volcanic systems is harnessed for geothermal energy production.It creates rich deposits of metallic minerals such as copper, gold, silver, lead, and zinc.
Unique landscapes, such as hot springs, geysers, and striking geological formations, attract millions of tourists.
The geothermal energy released from volcanic regions is converted into electricity in certain areas and utilized for local purposes
14.Which is the only active volcano in India?
Barren Island, located in the Andaman Sea
15.Volcanic eruptions cause immeasurable damage in Indonesia ?

Around 36,000 people lost their lives due to the Krakatoa volcanic eruption in 1883. Most of Krakatoa Island, located between Java and Sumatra in Indonesia, collapsed into the sea after the eruption.
16.How can we foresee such geographic phenomena in advance and reduce the intensity of these disasters?

We can't prevent the eruption of volcanoes. However the intensity of it can be reduced by using scientific methods in identifying such areas and by taking precautionary measures. By avoiding the construction of houses in areas close to volcanoes, restricting tourism in such areas, continuously monitoring volcanic regions using scientific instruments and issuing early warnings, and constructing buildings capable of withstanding lava flow and ash fall after an eruption, the disasters caused by volcanic explosions can be mitigated to some extent.

SURE A PLUS

17.Why do lithospheric plates slide over the asthenosphere? **(Second Term Model)**

Lithospheric plates slide over the asthenosphere due to convection currents in the mantle and other forces like slab pull and ridge push. The intense heat from Earth's core creates these convection currents, causing the semi-fluid asthenosphere to move. This movement then pushes, pulls, and drags the rigid lithospheric plates along with it, resulting in plate tectonics.

Earthquakes

18.Friction between lithospheric plates is one of the reasons for Earthquakes. Evaluate the statement. **(Second Term Exam)**

When two lithospheric plates move past each other, friction is generated along their margins. This friction in a way restricts the movement of the plates, causing high tension to build up along the margins. As a result, energy gets concentrated in these areas. When the pressure of the plates to move overcomes the friction at the plate boundaries, a sudden movement or rupture occurs at the plate boundaries. This causes energy to be released abruptly. This energy travels to the surface as seismic waves, which are experienced as earthquakes.Such types of earthquakes are called tectonic earthquakes.

19.What is meant by the focus of an earthquake? Name the point on the Earth's surface that lies closest to the focus. Define the following terms related to Earthquake

Or With which geological process are the terms 'Epicen tre' and 'Focus' assOciated? Explain what each one is. **(Second Term model) (SCERT Model)**

.Focus or Hypocentre -The point inside the Earth from which the energy is released is called the focus or hypocentre.

.Epicentre- The point on the Earth's surface directly above the focus is called the epicentre. The epicentre is closest to the hypocentre, and it is this point that seismic waves reach first.

20.Earthquakes occur not only because of tectonic movements but also due to other reasons.What are the other reasons for earthquake **(Second Term Exam)**

*Collapse of mine roofs in intensive mining areas, and explosions.

*In places where large reservoirs are situated, minor tremors are often caused by faults in the bedrock due to the pressure exerted by the water on the bedrock.

21.The Himalayan regions are highly vulnerable or susceptible to earthquakes. Why?

Sure A Plus

The Himalayan regions are highly vulnerable to earthquakes because they are located at the boundary of the Indian and Eurasian tectonic plates, where the Indian plate is constantly colliding with the Eurasian plate. This ongoing collision builds up immense stress along fault lines, which is released periodically in the form of seismic activity and earthquakes. The region's young geological structure and unstable terrain further amplify this vulnerability, increasing the risk of landslides and other hazards as well

22.What are the possible disasters caused by earthquake.

.It affects lives of thousands of people .Destroys hundreds of buildings .The transportation and communication systems are shattered, and water distribution failed .The food supply will disrupt

The shortage of medicines .Rescue operations become difficult by landslides and fires.

23.We can mitigate the intensity of disasters caused by earthquakes by adopting precise preventive measures and by raising awareness. How to Face a Earthquake **(Second Term Model)**

Before the disaster	During the disaster	After the disaster
Preparation is key to staying safe.	Stay Safe	Be Prepared for Aftershocks
.Secure Your Space .Make a Plan .Prepare an Emergency Kit	.INDOORS: Drop, Cover, and Hold On	.Check for Hazards .Communicate & Stay Informed

Tsunami

24.What is Tsunami?

Or

Name the giant destructive waves? How are they formed? **(SCERT Model)**

Severe earthquakes that occur on the ocean floor cause giant waves, which can rise up to several metres. These giant waves are called tsunamis. The impact of volcanic eruptions on the ocean floor and the fall of meteors can also cause tsunamis. It is the coastal areas that mainly bear the brunt of tsunamis.

Sure A Plus

25.What can we do to safeguard ourselves from tsunamis?

If the sea level suddenly goes down by several metres, consider it a tsunami warning. Run away from the shore immediately and move to higher ground. If you are caught in a tsunami, try to save yourself by holding onto something that can float.Recession in sea level may be an indicator of Tsunami. If so, move on to safer locations.Take official warnings seriously. Don't arrive at self conclusion that the dangerous situation is over, wait for official declaration.

Exogenic movements

26.List the driving or causative forces of exogenic movements (Exogenic forces)

. Slope formed on the Earth's surface .Gravity .Solar energy .Exogenic agents/ Forces

27.What are the forces responsible for various processes that operate on the surface of the Earth?

Weathering, erosion, transportation, deposition, and mass wasting. These processes are collectively known as exogenic movements.

28.What do you mean by driving forces of exogenic movements ?

Each exogenic process derives its energy from different external forces, which are called the driving forces of exogenic movements. The nature and rate of these movements vary according to the climatic regions of the Earth.

29.The exogenic movements and their driving forces.

Exogenic Movements

.Weathering Gravitational force .Temperature changes .Molecular stresses .Bio-chemical actions	.Erosion .Transportation .Deposition . The kinetic energy of running water .Glaciers, wind and waves and the action of groundwater .Mass Wasting .Gravitational Force

30.Earth has different types of rocks, and that they have been subjected to various changes over a long period of time. What are they ? How ?

Because of certain exogenous forces, rocks are mechanically disintegrated or chemically decomposed. The processes that bring about these chemical and mechanical changes in rocks are called weathering.

Sure A Plus

31.Examine the different types of weathering?
Do human activities cause weathering?Substantiate your answer. What are these types **(Second Term Exam)**

Or Which types of weathering are caused by each of the following factors? Explain how. **(SCERT Model)**

Weathering

Physical Weathering	**Chemical Weathering**	**Biological Weathering**
Due to temperature changes, rock minerals expand and contract. Over a period of time, this leads to the disintegration of rocks. In addition, when water gets trapped inside the cracks of rocks and freezes into ice, it expands. This causes the cracks to widen and gradually breaks the rocks apart.	Oxygen, carbon dioxide, water, and other substances engage in chemical reactions with the minerals in rocks, leading to the chemical decomposition of rocks.	The protrusion of plant roots through the cracks in rocks, the burrowing of animals that make holes in rocks, and the decay of plant and animal remains also cause the disintegration of rocks.

32.Do human activities cause weathering? List the human activities that contribute to the weathering of rocks

. Mining .Quarrying .Construction .Deforestation, and Industrial pollution .Dams Constitution

33.Do humans get any benefits from the weathering of rocks? How can weathering be useful to us? **(Second Term model)**

.Weathering leads to the formation of soil .It helps to separate minerals from rocks .It causes mineral enrichment .It makes mining easier

Erosion, Transportation, Deposition

34.Define the following

Sure A Plus

Erosion_**(SCERT Model)** is the process where Earth's surface materials like soil and rock are worn away and moved from one location to another by natural forces such as wind, water, and glacier, under ground water, waves.

Depositional landforms-These movements create different depositional landforms on the Earth's surface.

35.Another type of earth movement that occurs on the surface of the Earth due to exogenic forces is mass wasting. Explain ?

Or

Which exogenic movements are caused by the direct influence of gravity? How do they differ from erosion? _**(SCERT Model)**

Mass wasting refers to the movement or fall of rock fragments or earth materials down a slope under the direct influence of gravitational pull. It ranges from very slow movements to rapid movements. Mass wasting can vary from the sliding of a very thin layer of soil to the fall of large quantities of earth materials.

36.Urulpottal' is a type of mass wasting. Elucidate

Or

Which type of exogenic movement does Urulpottal belong to? **(SCERT Model)**

The phenomenon of the fall or movement of rocks or topsoil from higher to lower areas under the direct influence of gravity is called mass wasting. Landfalls, rockfalls, landslides, debris f lows, and land subsidence are different types of mass wasting seen in our highlands. The sudden movement of rock debris and soil mixed with water down a steep slope under the direct influence of gravity is called a debris flow. The landslide refers to the downward sliding of a portion of a mountain slope under the force of gravity. In the hilly regions of Kerala, intense rainfall often triggers landslides or debris f lows. This phenomenon is often be highly destructive.

37.List the possible factors that can lead to 'Urulpottal' in an area. **(SCERT Model)**

Slope of the land, the depth and structure of the soil, land use, and the distribution of streams. Heavy rainfall, cloudbursts, and earthquakes are the main triggering factors for debris flow. In addition to these, unscientific rock quarrying during the monsoon season and the unscientific construction activities can also act as triggering factors. Areas with a slope of more than 22 degrees have a higher possibility of experiencing debris flow/landslide.

38.Find out the major causes of debris flow/landslide in Kerala, and complete the list.

SURE A PLUS

Both natural and human-induced activities as the major causes of debris flow and landslides

Human-induced causes-Unscientific construction of houses, roads etc on steep slopes, Interruption of the natural flow of streams,Indiscriminate quarrying and mining

Natural causes- Heavy rainfall,Unique soil and geology,Soil piping,Hilly terrain

39.It is difficult for us to predict natural hazards like debris f low and landslides.How we can mitigate their impact and intensity?

By identifying the areas prone to it in advance through scientific methods and by taking precautionary measures.Studies using tools like remote sensing and Geographic Information Systems (GIS) can help us identify areas that have a higher possibility of 'Urulpottal' (debris flow or landslide). Institutions such as the Geological Survey of India and the National Centre for Earth Science Studies (NCESS) prepare maps of each district showing landslide/debris flow–prone areas. These maps are available on the website of the Kerala State Disaster Management Authority.

40.Prepare a chart titled 'How to Face Urulpottal'.

Or

Do you agree with the statement that certain high-range areas of Kerala are prone to Urulpottal What measures can be adopted to mitigate the impact of Urulpottal ?

At the time of the disaster	After the disaster
.Stay calm and do not panic . .During Urulpottal, if you are inside your house, take shelter under a strong table or cot. .Get away from trees, poles, and power lines Stay away from exterior walls and windows	.Allow ambulances and other rescue vehicles to pass without obstruction . .Report immediately to the authorities if you notice any fallen electric lines in Urulpottal-affected regions. .Stay away from the area due to instability and the risk of further slides.

41.Measures adopted by the Government of Kerala to mitigate the impact of the recent Urulpottal (debris flow) incidents in the state.

The Government of Kerala has adopted a comprehensive, multi-faceted approach to mitigate the impact of urulpottal (debris flow/landslide) incidents, with a particular focus on the disastrous events in the Wayanad

SureAPUS

district in 2024. Measures include advanced early warning systems, rehabilitation for affected families, strict land-use policies, and strengthened disaster management planning.

42.Earthquakes are sudden movements, while plate movements are slow movements. Explain how they are interrelated. **(SCERT Model)**

The reason for the earth quakes is the friction between lithospheric plates. When two lithospheric plates moves part each other the friction is generated along their margins. This friction restricts the movements of the plates causing high tension along the margins. As a result energy gets concentrated and when the pressure of the plates to move overcomes the friction of the plate boundaries, a sudden movement or rupture occurs at the plate boundaries and this causes energy to be released abruptly. This energy travels to the surface as seismic waves which are experienced as earth quakes. This is how the diastrophic movements and sudden movements are interrelated.

WEALTH AND THE WORLD

1.Which are two significant events in the 15th century were instrumental in launching the geographical expeditions ?

* The conquest of Constantinople by the Turks in 1453.

* Arrival of the Portuguese at The Guinea Coast in Africa

2.What are the far-reaching effects of these events in the worldwide ?

After the Turks captured Constantinople, the primary trade route through which goods, including pepper from Asia, reached Europe was obstructed. As a result, Europeans began exploring new routes to access these valuable commodities and reached lands hitherto unknown to them

3. Name the European countries which embarked on expeditions that reshaped the world.

⊙Portugal and Spain were the first to embark on expeditions that reshaped the world. Soon after, other nations like the Netherlands, England, and France joined in the exploration and conquest of new territories

4.European countries are located along the Atlantic coast, a geographic advantage that greatly contributed to their involvement in global exploration. What are the other factors enabled these nations to undertake successful expeditions ?

$ The building of advanced ships capable of crossing vast oceans $ the invention of the compass and other navigational tools for determining

SURA Plus

direction $ patronage of the rulers. $ strong military power $ extensive experience in seafaring $ advances in cartography and astronomy .

5.European Expeditions to other Continents

Portuguese- Knowledge of the gold deposits in the Niger plains motivated Portugal to embark on such ventures.The Portuguese initiated their conquest of Africa in 1415 by capturing Ceuta, a city on the Moroccan coast. This city later became a vital granary for them. One of the early challenges for Portuguese explorers was crossing Cape Bojador.After successfully navigating a difficult cape in 1434, the Portuguese gained access to new regions along the African coast. This breakthrough allowed them to profit from the gold and slave trade, which funded further exploration. They also expanded agriculture and established colonies on Atlantic islands. These ventures in Africa and the Atlantic islands laid the groundwork for the ultimate goal of finding a sea route to Asia.

In 1488, Portuguese explorer Bartolomeu Dias reached the Cape of Good Hope but could not continue to India due to rough seas. Learning from this, the Portuguese built stronger ships. A decade later, in 1498, Vasco da Gama successfully sailed around the Cape, reaching Kozhikode, India. This voyage marked the beginning of European influence in India.

Spain-They too had long coast and the seafaring heritage just like the Portuguese. They received the patronage of King Ferdinand and Isabella. With the financial aid of Spain in 1492 Christopher Columbus, an Italian navigator, reached the Bahamas .This journey led to the discovery of a previously unknown continent for Europeans.

6.Important expeditions during this period **(Second Term model)**

Explorers	Expeditions
Bartolomeu Dias	Cape of Good Hope (Africa) 1488
Christopher Columbus	Bahamas Islands(North America) 1492
Vasco da Gama	Kappad 1498
Pedro Alvares Cabral	Brazil
Ferdinand Magellan	First to circumnavigate the globe through Oceans

7.Geographical explorations created several significant consequences. Justify the statement **(Second Term model)**

◎ The Atlantic coast emerged as the most important trade route, connecting Europe with the Americas, Asia, and Africa. ◎ Large parts of the Americas, Africa, and Asia came under European invasion and colonisation. ◎

SURE A PLUS

Europeans tried to monopolise the trade of pepper and other spices from Asia. ◎ Gold and silver were transported in large quantities from South America to Europe, with a portion of this wealth eventually reaching India. ◎ The development of the triangular trade system .

8.What is mercantilism? How did the policy help the European countries to increase their wealth **(Second Term Exam)**

Mercantilism is an economic policy where nations aimed to accumulate wealth, primarily gold and silver, through trade and other means.According to mercantilist policy, the wealth of a nation was measured by the amount of gold and silver it possessed.Countries that adopted this policy competed to accumulate wealth in the form of these precious metals. Colonial policies and strategies employed by colonial powers to extract wealth from their colonies.

9.Define Colonial policies ?

Colonial policies refer to the policies and strategies employed by colonial powers to extract wealth from their colonies. Portuguese colonial policy aimed to break the Asian spice trade monopoly of the Arabs and secure control over it.Trade in the colonies became a monopoly of the Portuguese king. The Portuguese sought to keep other European powers out of this trade.Non-Portuguese individuals were prevented from travelling on Portuguese ships.

10.'It is the effective utilisation of wealth that helped in the industrialisation of England.' Substantiate the statement. **(SCERT Model)**

Spain also governed its colonies directly under the authority of the king focused to extract as much gold and silver.Dutch and the English conducted their trade through joint-stock companies. used the wealth. Spanish and Portuguese spend profit to build and renovate palaces.England and the Netherlands reinvested their profits for infra structure developments and equipping machineries. This reinvestment substantially contributed to the growth of industries in England. It played a crucial role in its economic development.

11.Natives became Slaves,list out the other effects of colonisation: **(Second Term model)**

◎ Wealth was extracted from the colonies and flowed into European countries ◎ Natives lost their economic and political rights over their own regions ◎ Indigenous cultures in the colonies faced destruction ◎ Western lifestyles and practices spread across the colonies ◎ Christianity was propagated in colonised regions

12.Briefly expalin the following **(SCERT Model)**

SURAPUS

Merchant Capitalism- Individuals who had been involved in trade before the explorations became very wealthy and were referred to as merchant capitalists. This economic system was known as Merchant Capitalism.

Industrial capitalism- England started industries using the wealth gained through colonisation. Those who invested their wealth in this way became the owners of industries and made huge profits. With this, merchant capitalism gave way to
industrial capitalism.

Industrial Revolution -The introduction of machinery into the manufacturing sector brought about many changes.Such changes in the production process between 1780 and 1850 describes the Industrial Revolution.Industrial Revolution began in the textile industry.

13.List the major changes that took place as part of the Industrial Revolution.

⊙ Production was mechanised ⊙ Advancement in metallurgy leading to the production of better tools ⊙ Steam was used as a source of energy
⊙ Transport facilities developed ⊙ Production shifted from cottages to factories

14.The Industrial Revolution paved the way for both positive and negative changes(Merits & Demerits) **(Second Term model)**

Merits	Demerits
Rise of factories	Exploitation of labourers
Increase in production	Miserable life for labourers in cities due to Poverty, epidemics etc
New employment opportunities	Long working hours and low wages for women and children
Rise of cities , urbanisation and urban life	Rise of slums
Better living conditions	Busy and polluted cities

15."As a result of Industrial capitalist exploitation, various forms of resistance and ideologies emerged " Evaluate the statement

Socialism being one of the most significant among the ideologies emerged. The core principles of socialist ideologies were the equitable distribution of goods and resources, and the common ownership of the means of production. Karl Marx and Friedrich Engels played a pivotal role in transforming socialism from an early-stage dream or belief into a practical and scientific ideology.

Sure A Plus

16.Discuss how imperialism has transformed the economic policies of European countries ?

Industrial capitalists sought to maximise profits by increasing production while minimising wages. However, reducing wages decreased the purchasing power of workers, making it harder to sell goods domestically. This led industrialised nations to seek markets abroad. Colonies became both a source of raw materials and a market for European manufactured goods. European countries established political control over their colonies, which paved the way for imperialism.It made colonies poorer.

17.Analyse the causes of Word War

Or Why is the first world war considered as an imperialist war. Explain.

(SCERT Model)

The First World War, which lasted from 1914 to 1918. It was the first global war in which nearly every country participated, either directly or indirectly.

Imperialist Rivalry The new imperialist nations could expand their influence only by capturing territories controlled by the older imperialist powers .Germany's fast progress caused concern for France and England.Germany focused on Ottoman Empire .To achieve this, they planned the construction of the Berlin-Baghdad railway line. This project alarmed England, France, and Russia, as they feared it could threaten advocated for the the security of their territories England

Extreme nationalism was one of the causes that led to the First World War. How do you view extreme nationalism? **(Second Term model)**

Extreme nationalism is an intense devotion to one's nation, often involving its excessive glorification and belief in its superiority. This ideology, which can be linked to racism, was used to justify territorial expansion by arguing that certain regions belonged exclusively to a specific race. Such arguments were used by many nations to justify territorial expansion and conquest. In countries like Germany and Serbia, movements such as Pan-Slavism and Pan-Germanism promoted these extreme nationalist beliefs.

Formation of Military Alliances-The former reasons and the atmosphere of suspicion led to the formation of military alliances.Thereafter, two major alliances emerged: the Triple Alliance and *the Triple Entente.*

Triple Alliance	*Triple Entente*
Italy, Germany, Austria-Hungary	England , Russia, France

Immediate Cause-The assassination of Archduke Franz Ferdinand, the Austro-Hungarian heir, in Sarajevo by Serbian nationalist Gavrilo Princip served as

SURE A PLUS

the immediate cause of World War I. Austria-Hungary, blaming Serbia for the attack, declared war on July 28, 1914.1 This act triggered a chain reaction as nations in the opposing alliances mobilized, causing the conflict to escalate into a global war.

18.Aftermath of the First World War: (Results)

• millions of soldiers and civilians lost their lives • industrial and agricultural sectors were destroyed • marked the beginning of the decline of European global domination • freedom movements in Asia and Africa gained momentum • formation of the League of Nations • Italy, Germany, and Spain transitioned to totalitarian regimes

19.Totalitarianism was a threat to civil liberties and world peace. Discuss and make notes.

Or Evaluate the circumstances which paved the growth of Totalitarianism in Europe

Or Due to the economic and political instability created by the First World War in Europe, movements emphasising totalitarianism emerged in some countries.Analyse the features of totalitarianism. **(Second Term model)**

Economic and political instability paved way for growth of movements rooted in totalitarianism . Totalitarianism refers to a system where the state exerts complete control over all aspects of life, disregarding individual privacy and civil rights. This ideology glorifies the state above all else, forcing citizens to live solely for their nation.

*Key features of totalitarianism:

'Totalitarianism that emerged in the twentieth century was a challenge to human values'. Substantiate the statement. **(SCERT Model)**

• Rejection of democracy • opposition to socialism • supporting dictatorship • extreme nationalism • elimination of political opponents • glorification of war and violence.

20. Compare the totalitarian movements that came to power in Italy and Germany after the World War **(Second Term model)**

Italy	Germany
Fascism in Italy Founded by Benito Mussolini. •Rose to power following the March on Rome in 1922, using threats and terror •Formed a militia called the Blackshirts.	• Nazism in Germany Founded by Adolf Hitler • In 1923, Hitler led a march to Berlin and was imprisoned. • Initiated efforts to secure power through elections.

Sure A Plus

•Banned all non-Fascist political parties. Enmity towards socialists, labour, and peasant organisations.	• 'Established a militia known as the Brownshirts. • In the 1933 elections, he failed to win a majority but came to power through manipulations. • Initiated efforts to eliminate Communists, Socialists, Democrats and Jews. • Formed the Gestapo (secret police) to gather intelligence and suppress opposition. • Hitler's aggression led to World War II.

21.World War II **(Second Term model)**

Prepare a seminar paper on the background of this war which took place from 1939 to 1945.

Treaty of Versailles

The Treaty of Versailles was a peace treaty that Germany signed with the Allies after World War I. Germany lost its colonies and territories it held. Germany was disarmed and huge war reparations were imposed on Germany. In short, World War II was a German revolt against the Treaty of Versailles and its architects.

The Failure of League of Nations

The League of Nations formed after World War I was unable to resolve disputes or enforce international disarmament. The league failed to act when Japan, Italy, and Germany launched offensives.

Formation of Military Alliances

Axis power-- Italy,Germany,Japan

Allied powers-- England,China,France. Later USSR and USA joined with allied powers.

Policy of Appeasement

Analyse the historical background behind the Policy of Appeasement and the results it created, and write a note **(Second Term model)**

Western capitalist countries saw fascist aggression as a means of countering the spread of socialist ideas. The Munich Agreement is a prime example of Western appeasement. These appeasement policies gave Hitler confidence and he continued his offensives aggressively. World War 11 begins with Germany's invasion of Poland on September 1, 1939

22.List the Results of the war

⊙ Millions lost their lives ⊙ Famines and epidemics spread throughout the world ⊙ The European economy collapsed ⊙ Colonisation and imperialism

Sure A Plus

faced setbacks ⊙ Europe's hegemony came to an end ⊙ The United Nations Organization was formed ⊙ Colonies in Asia and Africa gained independence ⊙ The United States and the Soviet Union emerged as global power.

Post-War World

23.Briefly explain Cold war

By the end of World War II, the European powers had become irrelevant. The United States and the Soviet Union followed contrasting economic policies. While the United States adopted capitalist policies and the Soviet Union opted for socialist policies. Both countries were wary of each other and tried to spread their ideas throughout the world. This cold war between them lasted for about half a century. Cold war ended in 1991 with the disintegration of the Soviet Union.

24. Elucidate Neo Colonialism

The colonies, in Asia and Africa gained independence after second world war. With this, America followed capitalist ideas and adopted new ways to gain wealth. The USA funded the newly independent countries, which was a form of exploitation. This was a different kind of colonisation. This policy is known as Neo Colonialism. This new colonial
policy was implemented through finance capitalism.

25.What are impact of Finance capitalism in the third world countries (Newly independent countries of Asia and Africa)

Finance capitalism allows big corporates to exert influence beyond military power and war. Such companies invest in different countries with the aim of making huge profits. Common people and those involved in traditional occupations continued to suffer the consequences. They lose the resources they could have used freely and are controlled by capitalists. Uncontrolled exploitation of resources also leads to environmental problems.

PUBLIC OPINION IN DEMOCRACY

1.Do the authorities seek your opinions regarding the organisation of the school anniversary celebrations? How do you give your suggestions?

• Through school parliament • Through the class representative participating in organising committee meetings •Through Class Teacher

2.What do you mean by Public opinion?

It is the general opinion of the people about the issues affecting them. It can be the position or opinion generally held by a section of society on a particular issue.

SURE A PLUS

3. Explain the Characteristics/Features of public opinion ? **(Second Term Model)**

$ Public opinion reflects diverse opinions. $ Public opinion is not necessarily the views and opinions of the majority of people but, is the creation of a general consensus on a topic $ Public opinion may change with the circumstances, time and new knowledge. $ Public opinion is always formed not only on political matters but also in relation to Socio-economic and cultural matters.

4.What are the factors that influence public opinion ?

Social and cultural background of individuals, attitude, belief, preconceptions, leadership skills, education .

5.Agencies that shape public opinion-

Formation of public opinion is not an automatic, highly precise or perfectly timed process. Various sections of the society express their opinion and views whenever a common issue arises in the society. In this process some comments are very much welcomed and it emerges as the public opinion. Thus public opinion is formed through formal and informal processes.

6.The first stage of public opinion formation begins with families. Evaluate this statement and make a note. **(SCERT Model)**

Child's socialisation process starts from the family and the traditional beliefs and perceptions of the family, influences opinion formation. The child is a participant or a witness in the discussion held in the family in which politics, beliefs, religion, literature, etc. are all topics. In this way, the family has the first place in the formation of the child's opinion on various issues.

7.Briefly explain the role of Educational institutions in shaping and developing public opinion **(SCERT Model)**

It shapes and develops knowledge, rights, duties, scientific thinking, critical thinking etc in Children. All knowledge and skills are acquired by the child through educational institutions. The process of education helps a person to form an independent and rational opinion. Educational institutions play an important role in shaping children's understanding of various subjects. Activities in school such as school parliament, club activities etc act as a platform in opinion formation.

8.Explain the role of Peer groups in formulating public opinion - **(Second Term Model)**

Peer group members share almost common characteristics in terms of personality, attitudes and behaviour which are important factors influencing

SURE A PLUS

public opinion formation. They all share some common characteristics in their personal experiences and social influences. Peer group members can influence each other on the policies of the government, various social issues and political parties. Such peer group discussions are helpful in eliciting common opinions, correcting existing ones and arriving at correct opinions.

9.Role of different types of Media in shaping public opinion-

Media play an important role in shaping public opinion. News, discussions and advertising programmes available through traditional media and new media have a great influence on people. Media can bring an issue to public attention and shape public opinion on it.

Newspapers- play an important role in bringing all political and social events before the public. Newspapers are able to strengthen the democratic process by bringing current issues to the people and at the same time bring the opinion of the people to the government.

Radio & Television - Radio and television are serving as a mirror to social life. While the print media considers only the literate community, radio and television play an important role in forming the ideas and knowledge among the illiterate community. It shares the opinions and thoughts of the people in the society about various policies and programmes of the government.

10.What are the preventive measures that we should take against the spread of such fake news and messages?

• Finding the real source in order to find the validity of the news and messages. • If recognised as fake news and messages, do not share it with others. • Inform official system such as cyber cell.

11.Differentiate Media literacy and Digital literacy. Why are they essential in the modern age? **(Second Term Model) (SCERT Model)**

Or Today, traps such as fake news, financial fraud and privacy violations exist in the digital space. Evaluate the role of media literacy and digital literacy in making digital spaces safe. **(SCERT Model)**

Media literacy	Digital literacy
Ability to access, analyse, evaluate, create new messages and communicate the messages received through various forms of media. Content creation and the way it shapes our perceptions and how we critically interpret news and messages are all included in this.	Ability to find information from the digital world and evaluate them efficiently using digital equipment and technology. This includes basic computer knowledge, effective use of internet, navigation of digital platforms, critical evaluation of online content, cyber awareness, etc.

SURE A PLUS

12.Role of Political parties in mobilising public opinion -
Or Elucidate the role of opposition parties in shaping public opinion **(Second Term Exam)**

Both ruling and the opposition parties play a role in shaping public opinion. The main objective of political parties is to make the public think about common public issues politically.. Ruling parties try to propagate government policies in their favour. They also devise appropriate campaign strategies. On the other hand, the opposition parties bring the shortcomings and failures of the administration. They undertake campaigns and struggles that help in the formation of public opinion against the government. All political parties have an interest in promoting their own ideals during election stages. Every party tries to mobilise the people in its favour by presenting their views and ideas and makes them involved in public affairs and ensure participation in the electoral process. During the election campaign parties try to sway public opinion in their favour. When political parties go overboard and engage in personal attacks and negative propaganda, the election commission intervenes and controls them.

13.Various methods adopted by political parties to shape public opinion

Conference, demonstrations, rallies and seminars are all organised

Publishes journals, pamphlets, manifestos, posters, write ups etc.

14.Elucidate the role of Various social institutions and organisations in shaping public opinion-

Religious institutions, caste-religious organisations, student movements, youth movements, women's equality movements, trade unions, human rights movements, merchant associations, environmental organisation etc. play their own role in shaping public opinion.

15.Opinion polls and public opinion- Opinion polls are a very effective way to gather information about public attitudes and opinions on various social, cultural, political and economic issues. A sample of population is approached for their views regarding specific issues. By using the information public opinion can be formed. There are various professional agencies working to conduct opinion polls.

16.Art and literature of each era influence the formation of the public opinion of that time. Substantiate the statement with examples. **(Second Term Exam)**

Art, literature, cinema of each era influence the formation of the public opinion of the times. 'Patta Bakki', 'Adukkalayil Ninnu Arangathekku' and so on were some of the plays which had a significant role in changing the social

SureA Plus

life of Kerala. Literary works of Rabindranath Tagore, Subramania Bharathi and Vallathol Narayana Menon inspired Indian freedom movement. The art forms such as Ottanthullal, Chakyarkoothu, etc could form strong public opinion against the then existing social evils, customs and thereby ignite social revolution.

17.Factors that hinder the formation of public opinion in a society. **(Second Term Model)**

*Illiteracy - Illiterate people have only limited knowledge about public issues. They may not have the capacity to form rational opinions.

*Digital Divide - The digital divide is the gap in accessing modern information technology such as the internet, computer, and smartphone. This hinders the formation of effective public opinion.

*Poverty - Groups experiencing poverty are often isolated from public affairs. Hence, they are not able to participate in the formation of public opinion appropriately.

*Unhealthy political activity and lack of democracy in political parties - Partisanship in political activities and polarisation among the people are factors that hinder the formation of public opinion.

* Unhealthy practices during the election campaigns - Unhealthy practices that are used to influence voters during election times often hinder the formation of real public opinion.

MASS MOVEMENT FOR FREEDOM

Gandhi and Early Struggles

1.Prepare a note on changes brought about by the leadership of Mahatma Gandhi in the freedom movement of India

After Mahatma Gandhi had become the leader of the freedom movement, various sections of society, including peasants, workers, women, and students actively participated in the struggles. Gandhiji knew that the British Empire could only be fought against with the support of various sections of Indian society. He was able to unite everyone under a single umbrella and could become one of them.

2.Gandhiji, after having returned to India from South Africa, first turned his attention to local movements.Complete the table based on Champaran indigo struggle, Ahamedabad cotton mill strike and Peasant struggle in Kheda. **(SCERT Model)**

Indigo farmers in	Ahmadabad Cotton mill	Peasant struggle in

Sure A Plus

Champaran (1917)	strike (1918)	Kheda (1918)
In 1917, he was persuaded by Raj Kumar Shukla, to study issues faced by indigo cultivators in Champaran district, Bihar . They were exploited by European planters . As a result the British administration appointed a commission, with Gandhiji as a member, to investigate the grievances. Consequently, the issues of the peasants were largely resolved.	Gandhiji participated in the struggle of textile mill workers in Ahmedabad, Gujarat. The struggle demanded a wage hike. Gandhiji went on a fast, and subsequently the workers' wages were increased.	In 1918, Gandhiji fought for the peasants of Kheda in Gujarat. They unable to pay tax due to natural calamities. They launched a movement demanding tax remission. Gandhiji toured the villages and encouraged them. Eventually, the government agreed to grant tax remission who had lost their yield.

3.Write the results of early struggles of Mahatma Gandhi.

India witnessed the rise of a new national leader, Mahatma Gandhi through these three movements. Indians were familiarised with the political ideology of Mahatma Gandhi and his Satyagraha, based on non-violence, through these movements.

4.The First World War had severe economic impacts on India. How did this backdrop of hardship that Gandhiji assumed leadership of the Indian freedom movement ?

• Additional wartime taxes were levied on the people. • Huge quantities of food grains were exported for soldiers which led to a severe food shortage. • Crop losses and epidemics during that period worsened the situation. Many people died of famine.

Gandhi and National Movement

Sure A Plus

5.Briefly explain Rowlatt act of 1919 and Gandhi's response to it **(Second Term model)**

Or The struggle against Rowlatt act records to Mahatma Gandhi's growth as a national leader. Substantiate the statement. **(SCERT Model)**

The Rowlatt Act of 1919 was implemented as part of this effort. According to this law:

- Anyone could be arrested without a warrant.
- Anyone could be jailed without trial.

Gandhiji called for a national hartal on April 6, 1919, to protest this repressive law that curtailed fundamental rights. A 'Satyagraha Sabha' was formed to publicise the movement. There was a massive popular participation in the hartal. Gandhiji described this national hartal as the 'most wonderful spectacle.'

6.Write a short note about Jallianwala Bagh Massacre

Or The Jallianwala Bagh incident was the result of the British effort to suppress the freedom movement that was gathering momentum in India. Substantiate the statement. **(SCERT Model)**

The anti-Rowlatt agitation was very strong in Punjab and Lahore. Dr. Satyapal and Dr. Saifuddin Kitchlew, the popular leaders of Punjab, were arrested and imprisoned. Martial law was declared in Amritsar.On April 13, 1919, people gathered on a ground for a public meeting at Jallianwala Bagh in Amritsar to protest against the arrest of their leaders. Following the orders of General Reginald Dyer, the British police opened fire on the crowd . The ground had only one entrance. According to official records, 379 people were killed . However, actual casualties were likely much higher and thousands injured.

Towards a Mass Movement

7.Who were the leaders of Khilafat Movement ? What did Gandhi participate in the Khilafat Movement ?

The Khilafat movement in India was led by twobrothers, Muhammad Ali and Shaukat Ali. Gandhiji recognised the importance of extending the movement to rural areas as well. He also understood that Hindu-Muslim unity was essential for national solidarity. To achieve this, he took up the Khilafat issue.

7.A non-violent movement was launched under the joint leadership of the Khilafat Committee and the Indian National Congress.

Non Co-operation movement

Sure A Plus

8.'Boycott and Constructive Programmes as the core ideas of Non-Cooperation Movement.'
What are the methods of the Non-Cooperation Movement **(SCERT Model)**

• Returning titles of honours granted by the British government • Resigning from government jobs • Advocates boycotting British courts • Students boycotting British-run schools • Boycotting foreign goods • Boycotting legislative assemblies.

8.Non-cooperation movement was not mere boycotting ;what were the key programmes during the movement(Constructive Programmes)

Strengthening social harmony, promoting the use of national products, popularising khadi, and establishing national schools were also key programmes during the movement.Gandhiji and the Ali brothers toured the country, convening mass gatherings and promoting the message of the non-cooperation movement.

9. The non-cooperation movement gained widespread popularity in both rural and urban areas. Examine the participation of various sections of society in this movement. **(Second Term model)**

Women	Women participated in the movement by boycotting foreign goods, and collecting and burning foreign clothes.
Workers	Workers also responded actively to the Non-Cooperation Movement. Workers of the Buckingham Carnatic Mills in Madras, plantation labourers in Assam, and workers of the Assam-Bengal Railway, are among others who went on strike in support of the movement.
Students	Thousands of students boycotted government schools and colleges. They enrolled in national institutions to continue their studies. The Kashi Vidyapeeth in Banaras, Gujarat Vidyapeeth, and Jamia Millia Islamia in Aligarh were among the national institutions founded during this time.
Tribal People	The tribal communities participated in the movement by defying British-imposed forest laws. These laws had restricted access to forest resources.
Peasants	Peasants participated in the movement in large numbers. The 'Awadh Kisan Sabha' was formed under the leadership of Jawaharlal Nehru during this period. In Bengal, peasants boycotted jute cultivation. They chose to grow rice and cotton

SURE A PLUS

	instead of jute.

10.The main objectives behind the decision to grow rice and cotton instead of jute were as follows:

• To force British owners to close down their jute mills by curtailing the supply of jute • To ensure food security by expanding rice cultivation • To increase the use of khadi and generate khadi related job opportunities by making cotton available

11.What do you know about Chauri Chaura incident?

Or Do you think the Non-Cooperation Movement was Non-violent? Based on what facts did you reach your Conclusion? and write a note. **(Second Term model)**

On February 5, 1922, while the Non- Cooperation Movement was underway, tensions escalated between protesters and police at Chauri Chaura in Uttar Pradesh. An enraged mob set the police station on fire, resulting in the deaths of 22 policemen. Recognising that the agitation violated the principle of non-violence, Gandhiji decided to stop the movement. This decision surprised other leaders and Gandhiji faced severe criticism.

Subhas Chandra Bose later described this decision as a "national calamity.". (Second Term Exam)

12.How did the policies of the Swaraj Party differ from those of the Non-Cooperation Movement? **(SCERT Model)**

During the Non-Cooperation Movement, both elections and participation in legislative assemblies were boycotted. However, leaders such as C. R. Das and Motilal Nehru formed the Swaraj Party in 1923. Their aim was to utilise the legislative assemblies as forums to voice political dissent.They participated in the elections, became members of legislative assemblies, and criticised the government. Thus, the Swaraj Party could successfully expose the government's anti-public policies in the legislative assemblies.

14."Although the Non-Cooperation Movement was called off following the Chauri Chaura incident, the enthusiasm it created persisted among the people".Evaluate the statement?

Sure A Plus

Anti-British protests continued in various parts of the country. The tribal movement in Andhra Pradesh is known as Rampa Rebellion.It was led by Alluri Sitarama Raju. The tribals were driven to agitation by the British forest laws, which restricted their rights to graze their cattle in the forest, and the exploitation by moneylenders. Around 2,500 square miles of land area was under the control of the rebels. The rebellion was suppressed using military units.Alluri Sitarama Raju was killed during the agitation. Student and youth movements gained momentum during this period. Their goal was complete independence from British rule. Jawaharlal Nehru and Subhas Chandra Bose travelled and addressed students and young activists

15.Write a short note on the Anti-Simon Commission movement ?

The British government appointed the all-British Simon Commission (led by Sir John Simon) in 1927 to recommend constitutional reforms for India. Due to the exclusion of any Indian members, the Congress and other political parties boycotted the commission.When the commission arrived on February 3, 1928, a nationwide hartal (strike) was observed, with protests featuring the slogan "Simon Go Back." The protests turned tragic when Lala Lajpat Rai was fatally injured in a lathi charge in Lahore. In response to British claims that Indians were incapable of drafting constitutional reforms, various parties convened a conference in Pune. A committee, chaired by Motilal Nehru, subsequently drafted a proposal known as the Nehru Committee Report.This report later played a significant role in shaping the Constitution of India.

16.Briefly explain Bardoli peasants movement **(Second Term model)**

Bardoli peasants movement was held in 1928 in Gujarat . The movement was led by Sardar Vallabhbhai Patel. Abbas Tyabji and Vithalbhai Patel also played a major role . The main cause of the agitation was increase in tax. Peasants launched a protest, refusing to pay the tax. The government seized the peasants' lands, domestic animals, vehicles, and agricultural tools. Sardar Vallabhbhai Patel instructed the agitators: "Pull your carts to pieces and keep it different places." Gandhiji visited Bardoli and strongly supported the peasants. Finally, the government revoked the increased tax.

17.The Lahore Congress annual session of the Congress in December 1929 under the Chairmanship of Jawaharlal Nehru was significant in the history of India's freedom struggle for several reasons. What are they?

Or What made the Lahore Congress a milestone/a turning point in India's freedom struggle? **(SCERT Model)**

Or The Lahore Congress was significant in history of are reasons?

SURE A PLUS

The Congress demanded complete independence for the first time. • It entrusted Gandhiji with the responsibility to launch a mass movement to achieve this goal. • The tricolour flag was formally adopted.

18.Identify the mass movement for complete independence led by Mahatha Gandhi after Lahore Congress session ?

Civil disobedience movement for ensuring participation from all sections of society, Gandhiji decided to begin the movement by breaking the salt law.

19.What is meant by Dandi march, Salt march or Salt Satyagraha part of Civil Disobedience Movement.

Or Write an elaborate note on the features and significance of the Civil Disobedience Movement, explaining why Gandhiji chose to break the salt law. **(Second Term model)**

It was decided to break the salt law at Dandi Beach in Gujarat. For this, Gandhiji, along with 78 selected volunteers, marched to Dandi. Many foreign reporters also arrived to cover the 24-day-long walk. Gandhiji advised the people gathered along the route on the importance of cleanliness, the need to wear khadi, and fostering social harmony. On April 6, 1930, Gandhiji initiated the Civil Disobedience Movement by making salt on Dandi beach. Pamphlets explaining how to make salt were prepared and distributed to people.

20.Explain Civil Disobedience Movement in North western India

One of the major centres of the Civil Disobedience Movement. Khan Abdul Ghaffar Khan led the movement there. He was known as the 'Frontier Gandhi,' who led a volunteer force called the Khudai Khidmatgar.

21.Analyse how various sections of society participated in Civil Disobedience Movement **(SCERT Model) (Second Term Exam)**

Peasants	Peasants participated in the movement by refusing to pay tax to the government and rent to the landlords.
Labourers	Labourers in railways, ports, and mines participated in the movement. The labour strike at Sholapur (Maharashtra) turned violent
Tribal People	They went into the forests to collect resources defying forest laws.
Women	They actively participated in programmes of the movement, such as salt making, and picketing shops that sold foreign goods.
Traders and Industrialists	They refused to buy or sell imported products

SURE A PLUS

22.Prepare a short note on Round Table Conferences

The Civil Disobedience Movement convinced the British that it was inevitable to transfer at least some power to Indians. As a result, discussions known as the Round Table Conferences were held in London. The Congress boycotted the First Round Table Conference in 1930.

23.What do you know about Gandhi-Irwin Pact and its results ?

The British government started efforts to end the Civil Disobedience Movement and to include a Congress representative in the Second Round Table Conference. As part of this, Gandhi-Irwin Pact was signed. According to the pact signed on March 5, 1931

• The Civil Disobedience Movement was suspended. • Gandhiji participated in the Second Round Table Conference. But the Second Round Table Conference ended

The Path of Armed Struggle

24.What were the two key factors that influenced young Indians to adopt the path of revolution instead of Mahatma Gandhi's non-violent approach following the Non-Cooperation Movement?

Many people adopted different approaches to achieve the goal of freedom. Instead of Gandhiji's non-violent approach, some people adopted the path of revolution. Most of these revolutionaries were young. The success of the Russian Revolution and the sudden withdrawal of the Non-Cooperation Movement halfway were among the factors that led them to the path of revolution.

25.Along with the Gandhian method of struggle, other methods also influenced the freedom movement of India. Substantiate the statement based on the hints. " Revolutionary activities " Peasant movements. **(Second Term Exam)**

Hindustan Republican Association	HRA was formed in 1924. Some members attempted to rob the funds of the railway at Kakori in Uttar Pradesh to finance their activities, however, a few were arrested
Hindustan Socialist Republican Association	In 1928, Bhagat Singh and his associates founded the Hindustan Socialist Republican Association (HSRA). The two major actions carried out by the revolutionaries under Bhagat Singh's leadership were:

Sure A Plus

	• A police officer named Saunders, who had participated in the lathicharge that led to the death of Lala Lajpat Rai, was shot dead. • A bomb was thrown into the Central Legislative Assembly Hall. Following this, the brave revolutionaries Bhagat Singh, Rajguru, and Sukhdev, who were arrested, tried and executed on March 23, 1931.
The looting of the Chittagong armoury	Done by Surya Sen along with revolutionaries It shocked the government.The prominent women revolutionaries were Pritilata Waddedar, Kalpana Dutt and Bina Das.
Congress Socialist Party (CSP)	The success of the Russian Revolution in 1917 and the spread of socialist ideas led to the formation of the Congress Socialist Party (CSP). The CSP was formed by those within the Congress . Jayaprakash Narayan becameits first Secretary. The party aimed to establish a socialist society by countering capitalism and landlordism. CSP able to organise the workers and peasants, and addressed their concerns.

Peasant Movements

26.The major hardships faced by the farmers

• Excessive taxation • Exploitation by landlords • Eviction

27.Briefly explain the Peasant movements formed in India

Kisan sabhas	In the 1920s, farmers started organising themselves by forming "kisan sabhas."The movement in Awadh, Uttar Pradesh, during this

Sure A Plus

	period was known as the Eka Movement
The formation of the All India Kisan Sabha	Formed in 1936 .It marked a significant milestone in the history of the peasant movement
The Tebhaga Movement (1946–1947)	In Bengal
Telangana Movement (1946)	In Andhra

Labourers Getting Organised

28.List the key issues faced by labourers with the advent of modern industries

•Low wages • Excessive working hours • Exploitation of women and child labourers, etc

29.Name the the first labour organisation in India to be formed on a national basis in 1920.

The All India Trade Union Congress (AITUC)

30.Royal Indian Navy (RIN) Mutiny organised by labourers in Bombay ? **(SCERT Model)** 1946 18 Feb

Quit India Movement

30.What is meant by Quit India ?

Britain needed India's crucial support after the end of World War II, leading to the Cripps Mission by Sir Stafford Cripps. When Cripps failed to secure Indian cooperation, Gandhiji launched the final mass movement. This movement, which began with his address in Mumbai on August 8, 1942, was the Quit India Movement, which rapidly spread despite the imprisonment of all major leaders, including Gandhiji.

31.Although the Quit India Movement turned violent in several areas, Gandhiji did not condemn it.Examine the nature of the Quit India Movement after the main leadership was imprisoned?

Or Explain how the Quit India Movement become a mass movement even after the imprisonment of the main leaders including Mahatma Gandhi **(SCERT Model)**

• Students, youth, workers, and women all took up the struggle and carried it forward.• Post offices, telegraph offices, and railway stations were targeted. • Leaders like Jayaprakash Narayan, Ram Manohar Lohia, Aruna Asaf Ali, and Sucheta Kripalani led the struggle from hiding. They

SURE A PLUS

communicated with activists through Congress Radio, which operated secretly from Bombay. (Add points from Qn number 32)

32.Identify and briefly describe the significance of the emergence of 'parallel governments' in certain parts of India during the Quit India Movement (1942). **(SCERT Model)**

Ballia	In the 1920s, farmers started organising themselves by forming "kisan sabhas."In Ballia, Uttar Pradesh, a parallel government was established under Chittu Pandey.
Satara	The parallel government was formed under Nana Patil in Satara, Maharashtra, which lasted until 1945
Tamluk	The parallel government in Tamluk in Bengal lasted for a year. It operated effectively by allocating funds to schools, establishing courts, and distributing surplus grain to the poor.

33.Prepare a note on how the Quit India Movement differs from earlier movements.

Although the struggle turned violent in several areas, Gandhiji did not condemn it. He alleged that it was the brutality of the government that provoked the people.'Parallel governments' in certain parts of India. The importance of the Quit India Movement is that it made freedom an urgent goal. Transfer of power became inevitable.

34.“Here is a mantra, a short one, that I give you. You may imprint it on your hearts and let every breath of yours give expression to it. The mantra is: ‘Do or Die.’ We shall either free India or die in the attempt. We shall not live to see the perpetuation of our slavery.”- Who said this ?

Mahatma Gandhi

Delhi Chalo

35.“India’s last war of independence has begun. Father of our nation! In this holy war of India’s liberation, we ask for your blessings and good wishes.” Who said this ?

These words were broadcast over Azad Hind Radio by Subhas Chandra Bose on July 6, 1944, in his address to Mahatma Gandhi.

36.Subhas Chandra Bose who took a completely different path for India’s freedom. Elucidate the role of Subhas Chandra Bose and Indian National Army in India’s freedom.

Sure A Pls

Or Subas Chandra Bose and Indian National Army (INA) were able to put the British government into a crisis during the second world war. Substantiate. **(SCERT Model)**

Bose, after serving as Congress President twice and then forming the Forward Bloc due to differences with Gandhiji, adopted an aggressive approach to freedom. During World War II, he reached Singapore, took command of the INA, and led it in a march toward India alongside the Japanese army. Although the INA's military effort was ultimately unsuccessful against British resistance, it generated enthusiasm during the final stage of the freedom movement. The trial of captured INA soldiers notably Colonel Prem Sahgal, Colonel G. S. Dhillon, and Shah Nawaz Khan at the Red Fort after World War II triggered widespread protests. The public and leaders, including Jawaharlal Nehru, defended the soldiers with the slogan "Not traitors, but patriots." This massive agitation against the trials presented a major post-war challenge to the British government.

Towards Freedom

37.World War II and the altered global circumstances accelerated the journey towards freedom

Simla Conference- Lord Wavell, the then Viceroy, put forward certain proposals in his discussions with the Indian leaders. Although a conference was held in Simla in June 1945 to discuss these proposals, it ended without resolution.

Significant developments after the Simla Conference are,

Cabinet Mission (March 1946) **(Second Term Exam)**	The Cabinet Mission, which included three members of the British Cabinet, reached India to discuss the transfer of power. Stafford Cripps, Pethick Lawrence and A. V. Alexander were its members. The key proposals included the formation of an interim government until the transfer of power and the establishment of a Constituent Assembly for drafting a constitution for India.
Mountbatten Plan (June 3, 1947) (Second Term	This proposal was put forward by Lord Mountbatten, the last Viceroy. It proposed partitioning the country into India and Pakistan, and granting them independence.

Sure A Plus

model	
Indian Independence (August 15, 1947)	India gained independence on August 15, 1947, in accordance with the provisions of the Indian Independence Act passed by the British Parliament. Jawaharlal Nehru became the first Prime Minister of Independent India.

38.Explain how the non-cooperation movement differ from the early struggles in which Gandhiji intervened in India. **(SCERT Model)**

Early struggles involved by Mahatma Gandhi – local struggles – Rise of Gandhiji as a national leader – people familiarise with Gandhiji's method of struggle and his political ideology – non co-operation mass movement – non violent struggle organised by Indian National Congress and khilafat committee - widespread popularity in rural and urban areas – different sections of the people like women, workers, students, tribal people and peasants were participated.

THE GLIMPSES OF FREE INDIA

India After Partition

1.India's occasion of India's independence first Independence Day was not just a moment of happiness but also one filled with sorrow.

The task of drawing the final detailed boundaries was assigned to the British lawyer Cyril Radcliffe. Following the partition, most British Indian provinces remained with India, with only Bengal and Punjab undergoing division.

The division resulted in:

West Bengal (India) and East Bengal (East Pakistan) (which later became Bangladesh).

East Punjab (India) and West Punjab (Pakistan).

Sylhet in Assam joining East Pakistan after a referendum.

The partition immediately triggered a massive, forced migration in the Punjab region, with Hindus and Sikhs moving from West Punjab to India, and Muslims moving from Indian Punjab to Pakistan. While Bengal was also divided, the scale of migration there was not as severe as in Punjab.

SURAPUS

When Partition Became Pain...

2.what are the problems created by Partition

• Hundreds of thousands refugees flowed from India to Pakistan and from Pakistan to India.• Widespread violence took place, and tens of thousands were killed. •Communal riots broke out in places like Kolkata, Delhi, and Lahore. • Many women were dishonoured. • Numerous women and children became victims of abduction.

The Father of the Nation Becomes a Martyr

3.Prepare a brief note on martyrdom of Gandhiji

Gandhiji who strove for the Hindu-Muslim unity was shot dead by Nathuram Vinayak Godse a communalist on January 30, 1948 at the courtyard of Birla House in New Delhi.

Challenges Faced by Independent India

4."India which was suffering from the effects of Colonisation faced many challenges when it became independent." Examine **(Second Term model)**

Most significant challenges among them are• Rehabilitation of refugees • Integration of princely states • Incorporation of Portuguese and French territories • Reorganisation of states on a linguistic basis • Strengthening the Indian economy • Formulating an independent foreign policy

Rehabilitation of Refugees

5.Write a short note on rehabilitation of refugees

Initially, over six million people became refugees in India, primarily from West Pakistan. The Indian government successfully rehabilitated these refugees, fully resolving the crisis by 1951.

In contrast, while the initial refugee influx from East Pakistan was low, the later conflict between East and West Pakistan caused a continuous flow of refugees into India for years. This persistent crisis was finally afforded a temporary resolution with the formation of Bangladesh in 1971.

Integration of Princely States

6.Explain the steps taken for the integration of princely states **(Second Term Exam)**

Or Why was the integration of princely states into the Indian Union considered a challenging mission analyse and justify conclusions. **(Second Term model)**

Sure A Plus

Following the Indian Independence Act of 1947, which allowed the 565 states to join either India or Pakistan, or remain independent. This challenging mission was successfully accomplished by a team led by Home Minister Sardar Vallabhbhai Patel and States Department Secretary V. P. Menon, who urged states to sign the Instrument of Accession.While most joined, the rulers of Junagadh, Kashmir, Travancore, and Hyderabad initially refused. These holdout states were subsequently integrated into the Union using a combination of conciliation talks and military action. The rulers of the princely states that acceded to the Indian Union were granted Privy Purses..

Liberation of French-Portuguese Enclaves

7.Complete table based of liberation of territories which were under the control of France and Portugal

*Even India became independent , France and Portugal continued their control over some territories in India.

*Following mass protest, France handed over its territories under their control to India.

*Territories under the control of Portugal were accessed to India through military operations.Subsequently,honouring the request of the Government of India, France agreed
to leave India in 1954.

*In 1954, Portuguese dominance in the Dadra and Nagar Haveli regions ended following a popular uprising. Subsequently, in 1961, the territories of Goa, Daman and Diu were liberated through military operation and merged with the Indian Union.

Country	Year of Accession	Enclaves
France	1954	Pondicherry,Mahe, Yanam, Karaikal, and Chandranagar
Portuguese	1954	Dadra and Nagar Haveli
Portuguese	1961	Goa, Daman and Diu

Linguistic Reorganisation of States

8.Write a note on the formation of the Linguistic reorganisation of states **(Second Term model)**

The 1920 Nagpur session of the Indian National Congress decided to organize its committees on a linguistic basis. After Independence, the demand became urgent, The major steps were taken by government;

Sure A Plus

*1948: The Constituent Assembly appointed the S. K. Dhar Linguistic Provinces Commission and the Congress appointed the J.V.P. Committee (Jawaharlal Nehru, Sardar Vallabhbhai Patel, and Pattabhi Sitaramayya) to study the demand.

*1952-53: Following the death of Potti Sreeramulu during a hunger strike demanding a Telugu-speaking state, the state of Andhra was formed on October 1, 1953.

*1953: The Central Government appointed the States Reorganization Commission under Justice Fazal Ali (with K. M. Panikkar and H. N. Kunzru).

*1956: Based on the Commission's report and the State Reorganisation Bill, 14 linguistic states and 6 Union Territories were formally created on November 1, 1956.

Strengthening the Indian Economy

8.Prepare a seminar paper based on Economic progress in Independent India
Or Were the Five Year Plans able to stabilise the economy of independent India?
Or Role of major dams in the economic development of india
Or Early governments in Independent India followed an economic policy of strengthening the public sector. Substantiate the statement with examples.
(SCERT Model)

Despite gaining independence in 1947, India faced severe economic issues, including food scarcity and poverty. To address these, Prime Minister Nehru established the Planning Commission, adopting the Soviet Union's economic planning model, which resulted in a mixed economy prioritizing the public sector.The main problems of independent India were food scarcity and poverty.Subsequent plans focused on areas such as poverty alleviation, food self-sufficiency, education, and energy generation. Irrigation facilities and power generation were necessary for the development of agricultural and industrial sectors.

The First Five-Year Plan focused on agricultural development to combat food shortages, leading to the construction of major river valley projects like Bhakra Nangal and Hirakud to support irrigation and power generation. The Second Five-Year Plan shifted focus to industrial development to resolve

Sure A Plus

unemployment. Through these plans, India sought to achieve national progress and economic development by strengthening the public sector.

9.Make a table based on Iron and steel industries were established in the public sector with the financial and technical assistance of foreign countries

Iron and Steel Industry	State Where Located	Country that Provided Assistance
Rourkela Iron and Steel Industry	Odisha	Germany
Bhilai Iron and Steel Industry	Chhattisgarh	Soviet Union
Durgapur Iron and Steel Industry	West Bengal	United Kingdom
Bokaro Iron and Steel Industry	Jharkhand	Soviet Union

10.Briefly explain Land Reforms

Land reform was a significant step that initiated remarkable changes in the agricultural sector in independent India. Its aim was to set a limit on the amount of land an individual could own. The idea of land reform had already taken shape in India even before independence. Based on the recommendation of a committee chaired by Nehru, an Agrarian Reforms Committee was appointed under the leadership of J. C. Kumarappa, with the aim of economic development. Based on the report ,law was implemented to set limits on the land, and acquire surplus land from them and distribute it to landless farmers. To some extent, this helped in poverty alleviation and increasing food production.

Food Production - Through Revolutions

10.How did the revolutions in the agricultural sector help increase food production?

Or What are the initiatives implemented to attain food self sufficiency in Independent India? Why are they called revolutions? **(SCERT Model)**

The collective efforts of national leaders and scientists helped India achieve food self-sufficiency. The Green Revolution began with the aim of enhancing the agricultural sector and achieving self-sufficiency in food

SURE A PLUS

production. The changes achieved in the agricultural sector in a short period through the use of high-yielding varieties of seeds, irrigation facilities, chemical fertilisers, pesticides, and modern machinery are known as the Green Revolution. The Green Revolution took place in two phases: from 1960 to 1970 and from 1970 to 1980. Dr. M. S. Swaminathan is known as the Father of the Green Revolution in India.

Following the Green Revolution, the White Revolution which aimed to increase the production of milk and dairy products.Blue Revolution which aimed to improve the fish production sector, were successfully implemented in India. Through this, numerous employment opportunities were created in the country and the nation's economic growth was ensured.

11.Give an account on Nationalisation of Bank

In independent India, banks were owned by large industrialists and wealthy individuals. Since banks prioritised the rich, farmers and common people found it difficult to obtain loans and other banking services. Thus, in 1969, the Government of India, under the leadership of Indira Gandhi took the ownership of fourteen major banks. This is known as Nationalisation of Banks. Later, six more banks were taken over by the government. We have seen that post-independent India followed an economic policy based on planning. These policies helped strengthen the public sector.

12.Explain the significant changes brought in the country's economic policy in 1990s.

New economic policy was introduced in1991.Eventually, economic policies like liberalisation, privatisation, and globalisation gained prominence. As a result, many public sector enterprises were privatised.

Education

13.The major education commissions in independent India and their primary areas of focus

Education Commission / Education Policy	Year	Area of Focus
Dr. Radhakrishnan	1948	University Education

Sure A Plus

Dr. Lakshmanaswami Mudaliar Commission	1952	Secondary education
Dr. D. S. Kothari Commission	1964	National Pattern of Education
National Education Policy	1986	Primary Education, Vocational Education
National Education Policy	2020	Education from Pre-Primary to Higher Secondary, Higher Education

of Knowledge: Through Science and Technology

14.“ There is no visible limit to the advance of science, if it is given the chance to advance.” -Jawaharlal Nehru.Evaluate the statement? **(Second Term model)**

Jawaharlal Nehru encouraged the development of science and technology in India. Along with this, he considered it is his mission to create a society based on scientific temperament. For this, he availed the services of scientific advisors like Homi J. Bhabha and Meghnad Saha.During this period, the foundation was laid for numerous institutions in independent India that were capable of creating a knowledge revolution. The prominent ones among them are

• Indian Institute of Technology (IIT) • National Institute of Virology (NIV) • Bhabha Atomic Research Centre (BARC) • All India Institute of Medical Sciences (AIIMS) • Defence Research and Development Organisation (DRDO) • Indian Institute of Management (IIM)

Space Research

15.Write a brief note on Space Research in the free india ? **(Second Term model)**

India has a fundamental vision for its space research: utilizing space technology for national development. Prominent scientists like Homi J. Bhabha and Vikram Sarabhai were instrumental in this field.The central institution is the Indian Space Research Organisation (ISRO), established in 1969 with its headquarters in Bengaluru. Other key institutions under the Department of Space include the Satish Dhawan Space Centre (Sriharikota),

Sure A Plus

the National Remote Sensing Centre (NRSC) (Hyderabad), and the Vikram Sarabhai Space Centre (VSSC) (Thiruvananthapuram).
India has achieved global recognition through several proud space exploration missions:

- Aryabhata, India's first artificial satellite, launched on April 19, 1975.
- Lunar exploration missions: Chandrayaan I, II, and III.
- The Mangalyaan mission (Mars Orbiter Mission) in 2013.
- The Aditya L1 mission for solar research and space weather studies.
- India is also actively working towards the Gaganyaan mission, which aims to send humans into space.

India's Foreign Policy

16.Who is the chief architect of India's foreign policy ? List the fundamental principles of India's foreign policy. **(Second Term model)**

Jawaharlal Nehru formulated a foreign policy that safeguarded our nationalinterests.The fundamental principles of India's foreign policy are
• Peaceful Coexistence • Stand against Colonialism and Apartheid • Protect National Security and Sovereignty • Non-Aligned Policy • Panchsheel Principles.

Panchsheel Principles

17.Give an account on Panchsheel Principles. What are they?

The Panchsheel Principles were formulated based on India's foreign policy. The Panchsheel Principles signed by Jawaharlal Nehru, the then Prime Minister of India, and Zhou Enlai, the then Premier of China in 1954.
• Mutual respect for each other's territorial integrity and sovereignty • Mutual non-aggression • Mutual non-interference in each other's internal affairs • Observe equality and mutual assistance • Maintain peaceful coexistence

Non-Aligned Movement (NAM)

18. Write a note on Non Aligned Movement (NAM)

After the Second World War, the United States and the Soviet Union emerged as two global powers. The Cold War that began between them threatened world peace. The Non-Aligned Movement was formed under India's leadership. It was based on a foreign policy that aimed for independent stand without joining either power bloc. Thereby, India could protect national interests. While striving to maintain healthy relations with all countries

Sure A Plus

worldwide, India pays special attention to upholding its dignity and interests among nations.

The Experiences of Kerala's Development That Captured World Attention

19.What can you understand about Kerala Model Development

.Kerala attained global attention in the field of Education,Health etc through exemplary initiatives

20.Explain formation of kerala state and first general election in kerala

The state of Kerala officially came into existence on November 1, 1956: it was formed by integrating the geographically distinct political regions of Travancore, Kochi, and Malabar, along with the Kasaragod taluk of South Karnataka. The first election to the Kerala Legislative Assembly was held in 1957. E. M. S. Namboodiripad formed the government as the first Chief Minister of Kerala.

Land Reform in Kerala

21.Examine the general condition of farmers in Kerala before the land reform measures began/ the social system prevalent at that time?

The condition of farmers and the social system in Kerala before the land reform measures began was characterized by a feudal, exploitative, and caste-based agrarian structure.This system, though complex and varied across the regions of Malabar, Cochin, and Travancore, ensured the misery and insecurity of the majority of the cultivating population.

22.Prepare a short note on land reform laws that paved the way for far-reaching changes in Kerala's socio-economic sectors.

Kerala government, formed in 1957, introduced the Agrarian Relations Bill. Later, under the Kerala Land Reforms (Amendment) Act, which came into effect on January 1, 1970, gave permanent rights to the tenants in agricultural land.

Key Outcomes of Land Reform Laws in Kerala

• A limit was set on the land that could be owned. • The landlordism (Janmi system) was abolished. • Tenants received permanent ownership rights over agricultural land. • Exploitation and inequality prevalent in the agricultural sector were eliminated to a certain extent.

Educational Achievements of Kerala

23.Briefly explain on primary education in Kerala **(SCERT Model)**

Kerala gained strength when agricultural land became accessible to farmers, through land reforms. Kerala managed to make primary education free and universal through steps like land reforms and the Kerala Education Act of 1958. As a result of popular literacy campaigns, Kerala became India's first fully literate state on April 18, 1991. With the enactment of the Kerala

SURAPUS

Panchayati Raj Act on April 23, 1994, local self-government institutions gained more powers in the education sector. This led to the formulation of various educational projects with public participation.

24.Prepare a note comparing the higher education sector in Kerala with that in other states. **(SCERT Model)**

Kerala's initial success in universal primary education paved the way for advances in its higher education sector. While the foundational goal of higher education is to cultivate a young generation capable of leading comprehensive societal change, Kerala's institutions have added specific objectives. These include fostering research and innovative discoveries and achieving proficiency in science, technology, and humanities.At the state's formation, Kerala had only one university; today, it boasts a diverse array of universities specializing in sectors like science, technology, agriculture, and health. Furthermore, institutions like Polytechnics and ITIs function to promote job skill development. The sustained emphasis on universal education since the state's inception and the resulting achievements are the primary reasons Kerala has become a recognized model state in education.Kerala ensures access and equity in higher education sector.Also can maintain quality

Health Sector

23.What do you know about the achievements of Kerala in the health sector? **(SCERT Model)**

Kerala has a public healthcare system comparable to that of developed countries. Kerala has been able to elevate its health sector to global standards and ensure excellent healthcare even with limited resources and at a low cost. Some of the achievements of Kerala in the health sector are

• Low infant mortality rate • Low maternal mortality rate • High life expectancy • Rapidly declining population growth rate

24.Elucidate the key reasons and programs that established Kerala as a "model state" for development.

Through the achievements in education and health sectors, Kerala has been able to rise to a global standard in the Human Development Index, despite having a low per capita income. Kerala became a model for other states in poverty alleviation through the Universal Public Distribution System implemented in 1965. In addition to this, Kerala has achieved significant progress in women's empowerment, through Kudumbashree; in local governance, through decentralised planning; and in literacy, through the activities of Kerala State Literacy Mission Authority (KSLMA).

Indian Economy: Growth and Transformation

1.What can be the objectives of individuals, institutions and government engaging in economic activities?

Increase in infrastructure # Better employment opportunities # Increased income and purchasing power # Higher quality of life

Economic Growth

2. Define Economic Growth

Goods and services are produced as a result of activities in the agricultural, industrial, and service sectors of an economy.Economic growth is the increase in a country's Gross Domestic Product compared to the previous year.

3.What is GDP?

Gross domestic product is the monetary value of all goods and services produced within the domestic territory of a country in a year.

4.How does economic growth benefit the economy? Examine

When economic growth occurs, a country's capacity to meet the needs of its people increases through changes in production, employment etc which leads to higher incomes, more jobs, and improved living standards for the population. Essentially, it means the economy has more resources available to improve people's lives.

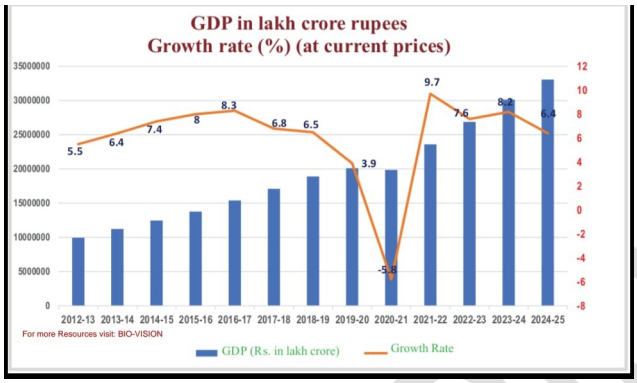

Economic growth rate

5.Write a short note on economic growth rate

The economic growth rate is the rate of increase in GDP in the current year compared to the previous year. The growth rate is measured in percentage.

SURE A PLUS

6.Observe and analyze the graph below to see India's economic growth rate published by the Ministry of Statistics and Programme Implementation (MOSPI) from 2012-13 to 2023-24.

.Which year achieved the highest growth rate in GDP ? 2021-22 .In which year did the lowest economic growth rate occur ? 2020-21

.Has there been any period of negative growth (ie., below zero)? If so, why?

2020-21.Negative GDP (Gross Domestic Product) growth, often described as a recession or economic contraction.Numerous factors can cause this;Financial Crises, Wars or Political Instability, Government Policy Changes,High Inflation/Deflation,Natural Disasters or Pandemic.

Economic growth rate

Per Capita Income - PCI

7.What do you mean by Per Capita Income? (SCERT Model)

PCI, which is the average income of individuals. PCI is calculated by considering the national income and population.

PCI = National income ÷ Population

8.Prepare an analysis report comparing India's Per Capita Income with Afghanistan, China and the USA for each period.

Sure A Plus

USA (Developed Economy): Consistently maintains the highest per capita income, demonstrating a massive wealth gap compared to the other nations. Its income is roughly 30 times that of India and six times that of China.

China (Rapid Growth): Experienced explosive growth since the 1990s, surpassing India early on and reaching middle-to-high income status. Its per capita income is now five times that of India.

India (Emerging Economy): Has shown consistent, steady growth since its 1991 reforms, significantly increasing its per capita income. However, its large population keeps the per capita figure relatively low, and it lags behind China's growth trajectory.

Afghanistan (Conflict-Affected): Remains the poorest among the group, with data reflecting a nation severely impacted by decades of war and political instability. The per capita income has generally stagnated or declined in recent years due to ongoing crises.

9.What are the peculiarities of Per capita Income? How do Per Capita Income differ from Personal Income. (SCERT Model)

Per capita income is used to compare the economic growth of different countries over the same period and to understand the economic growth of a country over different periods.PCI shows the average income of the people. But personal income is the actual income of a person. The per capita income of a country can be higher or lower than personal income. Hence difference between PCI and PI always exists.

10.As an indicator of economic growth, per capita income has certain shortcomings: (SCERT Model)

It is only an average income. Information about the distribution and inequality of wealth is not reflected in the income index. Since per capita income is calculated on the basis of national income, the limitations of calculating national income also affect per capita income. Factors that enhance the quality of life are not included in the scope of the PCI index.

Sure A Plus

Economic development

11.To improve the quality of life, economic growth must be accompanied by better living conditions. Find out what such conditions are.

* Educational facilities *Nutrient availability *Transportation facilities *Housing *Employment opportunity * Medical facilities

12.How can achieve economic development?

The standard of living of the people increases when the above mentioned living conditions are accessible for everyone. A country achieves economic development when the benefits of the increase in production and income are shared by everyone in the country. It happens when there is the improvement in the standard of living of the people along with economic growth.

13.How economic development is defined by the economists Michael P Todaro and Stephen C Smith in their book, Economic Development.

”Economic development is the process of improving the standard of living and economic well-being of people through growth in income, education, and infrastructure.”

14.The central and state governments provide benefits like food items and medical facilities at low prices to the poor and vulnerable sections of the society. Prepare a note discussing such schemes and their objectives ?

Public Distribution System (PDS) / National Food Security Act (NFSA)-To provide food security and access to adequate quantities of quality food at affordable prices

Antyodaya Anna Yojana (AAY) - To reach the most vulnerable and marginalized families who face severe food insecurity.

#Ayushman Bharat Pradhan Mantri Jan Arogya Yojana (AB-PM-JAY)-To reduce the out-of-pocket (OOP) healthcare expenditure for poor and vulnerable families.

#National Food Security Act (NFSA), 2013

Sure A Plus

For more Resources visit: BIO-VISION

#The "LIFE Mission" (Livelihood Inclusion and Financial Empowerment) is a flagship housing project of the Government of Kerala aimed at providing safe and sustainable housing to all landless and homeless families in the state

#The Karunya Arogya Suraksha Padhathi (KASP) is a government-funded health insurance scheme in Kerala. It provides financial assistance for the medical treatment of economically weaker families.#Amma Canteen (Tamil Nadu) – Low-cost meals for the poor.

#Annapurna Scheme (Kerala, Odisha, etc.) – Free rice for elderly poor persons.

#Arogyasri (Telangana, Andhra Pradesh) – Free medical treatment for low-income families.

Economic development indices

What is Economic development indices ?

Various development indices are used to measure and evaluate economic development.

16.Briefly explain Human Development Index (HDI)

This is an index developed by the United Nations based on human development to measure economic development.

The Human Development Index is calculated based on three factors: (SCERT Model)

*Life expectancy *Literacy and gross school enrollment rate *Per capita income.Their value will be between zero and one. Based on the value of this index, the countries of the world are divided into four groups. Since 1990, the United Nations Development Programme has been preparing the HDI Report, classifying the world's countries on the basis of development based on the HDI value. According to the 2023 report, India is ranked 130th out of 193 countries.

17.Compare the period when India was in low human development- 1990 - 2005

Sure A Plus

For more Resources visit: BIO-VISION

Medium human development based on HDI value. -2010 - 2023

India was classified in the low human development category from the start of the data series in 1990 until around the early 2010s, and it has been in the medium human development category since then. The specific transition is generally noted to have occurred in the 2010 report.

18.Write down the areas in which progress needs to be made if India is to achieve high human development and very high human development based on the HDI value.?

India needs significant progress across several key areas to elevate its Human Development Index (HDI) ranking from the current "medium human development" category to "high" and "very high" levels. The HDI is a composite index focusing on three main dimensions: health, education, and standard of living.

19.Identify the countries ranked 1to 5 in the highest human development index from the 2023 24 UNDP HDI report and analyze the progress of these countries in areas such as education and health.

The countries ranked 1 to 5 in the 2023/2024 UNDP Human Development Index (HDI) report are Switzerland, Norway, Iceland, Hong Kong (SAR, China), and Denmark. These nations demonstrate outstanding performance in health and education indicators, maintaining consistently high standards of living.

Physical Quality of Life Index (PQLI)

20.Briefly explain PQLI (SCERT Model)

The economic development of a country should be such that the standard of living of the people increases and the basic needs are met. Based on this, this is the development index developed by a renowned economist, Morris David Morris, in 1979. The Physical Quality of Life Index is prepared based on three indices. Let's see what these are.Basic Literacy Index (BLI) Infant Mortality Index (IMI) Life Expectancy Index (LEI).The Physical Quality of Life Index (PQLI) is the average of these three indicators.

Sure A Plus

PQLI = (LEI+IMI+BLI) ÷ 3

21.Define Basic literacy?

It is the percentage of the population that can read and write.

22.Define Infant mortality rate?

It refers to the number of deaths of infants under the age of one per 1,000 live births.

23.Define Life expectancy?

It is calculated based on the average number of years a person lives.

Sustainable Development Goals Index (SDGI)

24.What do you mean by Sustainable Development Goals Index (SDGI)?

Sustainable Development Goals that were adapted by the United Nations in 2015. The Sustainable Development Goals Index assesses the efforts taken by countries to achieve the sustainable development goals. The Sustainable Development Goals index is a comprehensive development index. In India, the Sustainable Development Goals Index is prepared by the NITI Aayog in collaboration with the United Nations to measure the development progress of states and union territories.

25.Analyse the SDG India index, launched in 2018, assesses India's performance across all 17 sustainable development goals across economic, social, and environmental sectors. (SCERT Model)

Economic goals	Social goals	Environmental goals
Affordable and Clean Energy (SDG 7) Decent Work and Economic Growth (SDG 8) Industry, Innovation, and Infrastructure (SDG 9) Responsible Consumption and	No Poverty (SDG 1) Zero Hunger (SDG 2) Good Health and Well-being (SDG 3) Quality Education (SDG 4) Gender Equality (SDG 5) Clean Water and Sanitation (SDG 6)	Climate Action (SDG 13) Life Below Water Life (SDG 14) Life on Land (SDG 15)

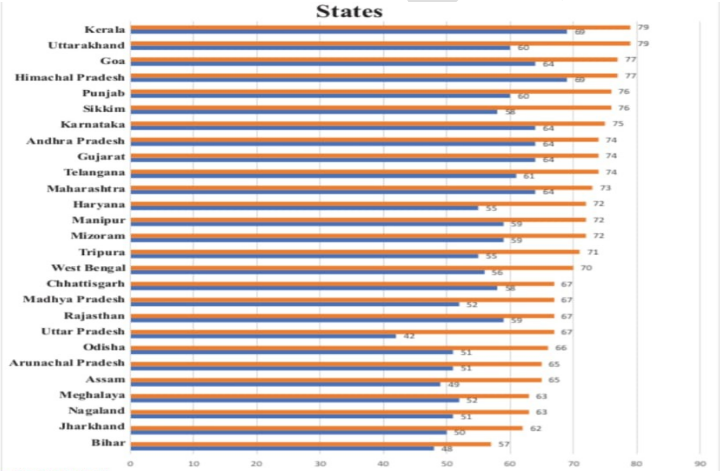

Sure A PLUS

Production (SDG 12)	Reduced Inequalities (SDG 10) Sustainable Cities and Communities (SDG 11) Peace, Justice and Strong Institutions (SDG 16) Partnerships for the Goals (SDG 17)	

26.The SDGI score is calculated by averaging the values of each of the Sustainable Development Goals, which are calculated between zero and 100

Score	Category
0 - 49	Aspirant
50 - 64	Performer
65 - 99	Front Runner
100	Achiever

27.Analyse and answer the following

List the 5 top states and 5 at the bottom in the SDGI rankings for 2023-24.

Find out which states have scores ranked 0-49, 50-64, 65-99 and 100 in the 2018-19 rankings. - Kerala,Uttarakhand,Goa,Himachal Pradesh,Punjab

Which state is at the top of the rankings in 2018- 19 - Kerala

Which states are at the top of the rankings in 2023 -24 - Kerala

28.Find out the reasons why Kerala is ranked high on the SDG India Index as compared to other states in India. (SSLC Pre Model)

Kerala consistently ranks high on the NITI Aayog SDG India Index primarily due to its exceptional performance in social development indicators, robust public health system, high literacy rates, and strong local governance. These factors are often referred to as the "Kerala model" of development.

Key reasons for Kerala's top ranking:

.High Literacy and Education .Superior Healthcare System .Low Poverty Rates .Gender Equality and Empowerment .Economic Stability through Remittance

29.Prepare a short note on Kerala model of development ?

Kerala has made great strides in the areas of education, health and social justice. High literacy rates, low infant mortality rates and improved life expectancy are its key features. Kerala was able to achieve this feat through land reforms, universal public health and education systems, public distribution systems, social security schemes and public participation.

30.Give an account on Nava Kerala Mission

The Nava Kerala Mission is an action plan launched in 2016 with a holistic development vision for Kerala. It includes four main missions: Aardram Mission in the health sector, Life Mission to ensure adequate housing, Vidhyakiranam to improve the education sector, and Haritha Keralam Mission to improve water conservation, waste management, and organic farming. The main objective of the mission is to improve the lives of the people by solving fundamental problems in these four areas. In addition to strengthening the activities of the existing four missions, Nava Kerala Mission has also included the Rebuild Kerala Initiative, and is being implemented from 2021. The objective of Nava Kerala Mission - 2 is to lead Kerala towards economic and social progress by embracing the benefits of

SURE A PLUS

development and embracing all sections of the people, while facing new challenges and second-generation problems

Economic Planning

31. Briefly Explain Economic planning

India had formulated plans that outlined how the country's resources should be utilized on the basis of some common goals. Economic planning is the preparation made to achieve the main economic goals of a society by utilizing available resources.

32.Complete the flow chart on History of Planning (SCERT Model)

Planning activities had started in India even before attaining Independence.

Plan	Proposed by	Year
Ten Year Plan	M Visvesvarayya	1934
National Planning Committee	Jawaharlal Nehru.	1938
Bombay Plan	JRD Tata	1944
Gandhian Plan	SN Agarwal	1944
People's Plan	MN Roy	1945
Planning Commission	Chairman-Jawahar Lal Nehru	1950

33.Who is considered as the Father of Indian economic planning?

M Visvesvaraya

34.Complete the table on Objectives of Planning (SSLC Pre Model)

Growth	An increase in production
Modernization	Use of new technologies and ideas, and modernizing social perspectives

Sure A Plus

For more Resources visit: BIO-VISION

Self-reliance	Minimize foreign dependence on economic activity.
Equity	Ensuring equality by providing basic needs to all and enabling fair distribution of wealth.

35.Briefly explain the Planning Commission

It was established in 1950 to achieve the above-mentioned objectives. Structure

.Chairman - Prime Minister. Vice Chairman- Nominated Members from the Central Cabinet The planning process was implemented in India in 1951 through the Five-Year Plans.

36.prepare a short note on NITI Aayog (National Institution for Transforming India)

NITI Aayog came into existence on 1 January 2015, replacing the Planning Commission of India. It aims at transforming India through economic growth, social welfare, and infrastructure development. Present Structure of NITI Aayog Prime Minister as Chairman. Vice Chairman as nominated by the Prime Minister All Chief Ministers and Lieutenant Governors of Union Territories as members Two part-time members, four non-official members and a Chief Executive Officer Four Central Ministers and non-official members as nominated by the Prime Minister

37.The objectives of the Planning Commission and NITI Aayog were adequate to meet the needs of the respective periods. Evaluate this statement.(SCERT Model)

To create a vision for India's development priorities and plans To promote sustainable development and inclusive growth To promote economic growth through innovation, entrepreneurship, and job creation To collaborate with international organizations and countries to leverage global diversity and resources To develop and implement strategic and

Sure A Plus

For more Resources visit: BIO-VISION

long-term policies and programs.These objectives are also adequate to meet the needs of the present period to some extent.

38.Give an account on Economic Reform of 1991

Initialy government's dominance and control over the private sector in economic activities are evident. The private sector was controlled through licenses, permits, and quotas (LPQ). It was through the economic policy formulated in 1991 that the economic reforms, which relaxed the restrictions imposed during the planning period, were initiated.

39.What are the important factors that led India to the Economic Reforms of 1991.

The economic crisis in India caused by a high fiscal deficit and a decline in foreign exchange reserves. Inefficiency of the public sector. Changes in the world market. Arguments in favour of the free market. The economic crisis caused by the 1990 gulf war . Economic growth in East Asian countries through industrialization and liberalization . The conditions imposed by the World Bank and IMF. Main Goal of Reforms To liberalize the Indian economy and open it to the world economy . To deregulate the private sector To reduce the government regulation in various sectors.To remove the trade restrictions with foreign countries.

40.Prepare a seminar paper on the general features of these economic reforms

Economic reforms commonly referred to as LPG. The basis of this reform is the shift from LPQ to LPG (Liberalization, Privatization, Globalization).

Liberalization- is a policy change that gives a country's economy more freedom by relaxing restrictions imposed on various sectors to promote economic growth and development. The main areas where liberalization has been implemented are as follows: Industrial sector reforms Financial sector reforms Tax reforms Foreign exchange reforms Foreign trade sector reforms

Sure A Plus

Privatization- It is the process of reducing the role of the public sector and providing more opportunities for the private sector. Disinvestment is the most important of the privatization processes and is implemented through the sale of shares. Disinvestment is the sale of the government's investment or capital in a public sector enterprise to the private sector.

Globalization- Globalization is the integration of a country's economy with the global economy. This will significantly reduce import duties and encourage foreign investment. This means the further globalizing of trade, capital investment, and the transfer of technology and human resources. Liberalization and privatization are economic policies. Globalization is a consequence of these policies.

41.“Globalization is not a policy; it is a phenomenon” Who said it

Amartya Sen

42.Elucidate the merits or good effects of Globalization.

Globalization is the result of policies that have made economies more interconnected and integrated. With this, global trade becomes regulated by the World Trade Organization and global production comes to be determined by multinational corporations.The globalization made possible the widespread exchange of goods, services and capital among countries. Along with the flow of foreign capital, multinational companies also promoted research and innovative ideas in the field of production. This accelerated the growth of technology.

43.What are the driving forces of economic growth ?

Inventions, mechanization, spread of technology, modernization, etc. played an important role in accelerating economic growth. Industrial revolution, which was triggered by the invention of the steam engine, passed through many stages. Today, the world is on the edge of a fifth industrial revolution. Let’s take fleeting look at the various industrial revolutions and their characteristics.

Sure A Plus

44.Explain the inventions that led to various industrial revolutions and their characteristics? (SCERT Model)

Industrial Revolution	Features
Invention of the steam engine:	Emergence of the factory system Changes in production and transportation
Electricity	Use of electricity in the place of steam. Expansion into new areas of production and distribution
Electronics & Automation	Use of robotics and automation in factories
The era of advanced technologies	The beginning of Internet of Things (IoT) sensors and Big Data Analytics, Cloud Computing, Nanotechnology
Human-centric approach to digital technologies including AI	Sustainable productivity growth and expansion of smart factories through technologies like AI, IoT and Robotics.

45.Stages of Industrial Revolution

Ist	2nd	3rd	4th	5th
1784	1870	1969	2000	2020
Steam engine Mechanization	Electricity Assembly line	Electronics Automation	Cyber Systems IoT Digitalization	Robotics AI Genetics

Knowledge Economy

45.What is meant by Knowledge Economy ?

Sure A Plus

It is an economic system that thrives by incorporating innovative ideas in the production, distribution, and use of knowledge and information. Knowledge is the key element in a knowledge economy. New ideas, research, and inventions are important here. The basis of this economy is human resources capable of effectively using knowledge and technology. Therefore, research, innovation, and skill development need to be accelerated. Continuous efforts to develop new products and services (innovation) are a characteristic of Knowledge Economy

47.Find out how economic activities in the Knowledge Economy lead to economic growth.

$ Skill development $ Human resource utilization $ Job creation $ Leveraging Information and Communication Technologies (ICT) $ Fostering Continuous Innovation

48.It is the new era of Knowledge Economy is bringing out changes in Indian economy, too.Write some examples from various sectors.

Sector: Agriculture

Agri Tech -New technologies are transforming agriculture in India from traditional farming to a more profitable and efficient (smart) one. Things like when to water, fertilize, etc. are being done with the help of sensors and drones. This has enabled farmers to earn higher incomes through reduced costs, improved yields, and direct sales through online platforms.

Sector: Industry

Industry 4.0 -Industry 4.0 is a manufacturing method that uses computers, automation (machines working on their own) and the Internet to connect factories and make them more efficient. This leads to increased industrial production and also to quality products and less wastage. This change can create highly diversified jobs and lead to economic growth. India aims to lead economic growth through projects like MAKE IN INDIA

Sure A Plus

49.Elucidate the Technology based advancements happening in Service sector.

Industrial Revolution	Features
Edu Tech	Innovative ways to utilize technology in education. Robotics, AI, IoT etc.
Health Tech	Telemedicine Digital health platforms
Green Tech	Renewable energy, Electric vehicle
Animation, Visual Effects, Gaming, Comics, Extended Reality - Sector	Visual story telling through sequential art and dialogue Forms the base for many animations and movies Includes digital web comics and graphic novels

Kerala towards a Knowledge Society

50.Briefly explain the programmes and institutions working in kerala for the growth of Knowledge based Economy (SSLC Pre Model)

Or Which Committee was established in Kerala for the growth of the knowledge economy? Explain its functions- (Kerala Development and Innovation Strategy Council)

(SCERT Model)

Kerala Startup Mission, K-DISC, Digital University etc. are working to provide technical and innovative knowledge in Kerala for the growth of a knowledge-based economy. Kerala University of Digital Science, Innovation and Technology Digital University of Kerala Digital University of Kerala was established in 2020 with the aim of transforming Kerala into a global digital education hub. The main goal is to develop high-quality human resources in technologies such as artificial intelligence, data science, cyber security, and blockchain.

Kerala Development and Innovation Strategy Council (K - DISC) K-DISC is a committee formed in 2018 with the aim of transforming Kerala into a

Sure A Plus

knowledge economy and a hub of innovation. Its main responsibilities are to promote research in new technologies, products and processes and to organize skill development programmes. The Young Innovative Program (YIP) is a project run by K-DISC to foster innovation among the youth. It provides support to transform the innovative ideas of students into projects. The Kerala Knowledge Economy Mission (KKEM) is a project aimed at transforming Kerala into a knowledge economy and providing employment to the educated. Kerala Startup Mission (KSUM) Kerala Startup Mission (KSUM) is a model agency launched in 2006 to promote the startup scene in Kerala, transform innovative ideas into enterprises and make the state a leading hub. It supports startups through innovation hubs, incubators, funding support, mentorship and international exchange programmes.

Towards Sustainability

1.Do you think that resources are simply free gifts of nature?

That's not entirely true. Resources are also formed as a result of human efforts. Therefore, humans are an essential element in the formation of resources. We convert the materials available in our environment into resources and use them to meet our needs.

2.Do you think human a resource?

Humans can be considered as resources because they create and develop resources using their abilities, skills, and technology.

3.Resources can be classified into two categories: Natural resources and Man-Made resources

Natural Resources	Man-made Natural Resources
air, water, soil, sunlight, minerals,	Buildings, roads, machines,

Sure A Plus

fossil fuels, plants, and animals	electronics, plastic, paper, furniture, vehicles

4.Resources can also be classified into different categories based on their origin, renewability, ownership, and state of development.Based on the origin, resources are classified into two types: Biotic Resources and Abiotic Resources.

Biotic Resources	Abiotic Resources
Anything that is part of the biosphere and can be used by humans is called a biotic resource. Humans, plants, and animals are examples of biotic resources.	Resources that are made of non-living matter are called abiotic resources.Air,Soil, Water, Minerals are examples.

5.Based on their replenishment capacity or renewability, resources can be classified into two types: Renewable resources and Non-renewable resources.

Renewable Resources	Non renewable resources
Continuously produced or replenished in nature. Many of them do not diminish after use and can be reused. These resources are considered sustainable as long as they are not overused. Most renewable resources are readily available to humans. Eg.Solar, Wind, Biomass, Water	Non-renewable resources are those that have been formed over millions of years and whose reserves decrease with use. Minerals and fossil fuels are examples of non-renewable resources. Some of these, like metals, can be reused, but others, like fossil fuels, deplete with use and cannot be reused.

Sure A Plus

6.Resources can also be classified into different types based on their ownership. Make a flowchart (SCERT Model)

Resources			
Personal Resources	**Community Resources**	**National Resources**	**International Resources**
Owned by an individual Eg: House, Yard, Own vehicle etc	Accessible to all members of the society Eg: Public play ground, Parks, cemeteries etc.	Owned by the nation.Mineral deposit, forest, wildlife, water resources, land with in the countries border, the ocean from the coast up to 12 nautical miles.	Owned by international agencies. Eg: Marine resources beyond 200 nautical mile

7.Are all the resources on Earth accessible to us?

Due to limitations in technology or the lack of appropriate technological advancement, we are not able to develop many things on Earth into resources. Sometimes, we have to wait until the adequate technology is developed to convert them into resources.

8.Based on the state of development, resources can be classified into two types: Potential resources and Developed resources.Examine

Potential Resources	Developed Resources
Potential Resources are resources that are found in a region but are not yet fully utilized. For example, Rajasthan and Gujarat have a huge potential for generating energy from	Developed Resources are resources whose quantity and quality have been surveyed, assessed, and adequate technology has been developed to utilize them efficiently.

Sure A Pls

wind and solar power, but these sources are currently only marginally used for power generation.	Eg.Coal, Petroleum, Natural gas

9.Is petroleum a developed resource?

While petroleum as a whole is a developed resource, specific deposits might still be "potential" if they are in remote areas where extraction technology is not yet cost-effective.

10.What do you mean by stocks?

Materials that can meet human needs but for which humans do not have the appropriate technology to utilize are called stocks. Hydrogen can be utilized as a rich source of energy, but we have not yet developed the advanced technology to use it as a resource today. There are many energy sources in nature that we may be able to utilize in the future.

Natural Resources

11.Define Natural resources?

Natural resources are substances, objects, or forms of energy that are obtained from nature and are useful to humans. They are valuable resources available in their natural state and are not created by humans.

12.Natural resources such as mineral resources and energy resources are indispensable to human life. Elucidate

Natural resources include air, water, soil, minerals, plants, animals, fossil fuels, and more. We depend on these resources to meet our domestic, agricultural, industrial, and energy needs.It influences our daily life much.

13.What you meant by Minerals? Explain it's importance

Minerals are naturally occurring organic or inorganic substances with definite chemical and physical properties. They are chemical compounds in which atoms are arranged in a specific manner. Most minerals are formed by the combination of two or more elements, while only a few elements occur in their pure (elemental) state in nature. The welfare of the people,

Sure A Plus

For more Resources visit: BIO-VISION

the development of science and technology, and the economic growth of a country depend, to some extent, on the availability of minerals.

14.Minerals can be classsified into Ferrous minerals and Non Ferrous minerals

Ferrous minerals- iron ore (hematite, magnetite), manganese, and chromite

Non Ferrous minerals-gold, copper

Non-Metallic Minerals can be classsified into Inorganic minerals and organic minerals

Inorganic minerals-quartz, feldspar, mica, calcite, elements like iron, gold, copper

organic minerals-mellite, humboldtine, fichtelite, and idrialite

15.Write a short essay on The Versatility and Industrial Utility of Minerals

Metals and non-metals, along with their various compounds, are indispensable to modern industry, technology, and medicine. While iron remains a staple for general manufacturing, titanium is prized for its high strength-to-weight ratio in aerospace engineering. Gold serves critical roles beyond aesthetics, particularly in high-tech electronics. Furthermore, minerals like manganese support the pharmaceutical sector, while non-metallic minerals provide the essential raw materials necessary for diverse industrial applications.

16. Elucidate the economic extraction of metals from Ores

The Earth's crust contains various rocks rich in metallic minerals that can be harvested economically. These materials, known as ores, are defined by the ability to extract metals from them for a profit. A single metal, such as iron, may be sourced from multiple minerals like hematite or magnetite; conversely, a single ore deposit can often yield several different types of metals.

Sure A Plus

17.What is mineral deposits ?

When beneficial minerals found as natural occurrences in unusually high concentrations, they can be termed as mineral deposits.

18.Are all mineral-rich areas considered deposits?

No, not every area containing minerals is considered a "deposit." In geology and mining, there is a distinct hierarchy based on concentration and economic potential.

19.Write a seminar paper on mineral deposits that have greatly contributed to the progress of human society across the world.

Iron: The Foundation of Modern Civilization

Iron is a globally indispensable metal that has driven human progress since the Iron Age. Today, the largest reserves are found in Australia, Brazil (home to the massive Carajás Mine), and Russia, with India also ranking as a top global producer. Its versatility makes it essential for everything from small household items to massive industrial infrastructure.

Because of its strength and durability, iron is used in:

- Infrastructure,Transportation,Household Items

Iron is a key component in the manufacturing of steel. About

- 98% of the iron ore mined worldwide is used to produce steel.
- Nearly 50 countries are involved in iron ore mining. Steel
- plays a crucial role in maintaining a strong industrial base

Copper: From Ancient Tools to Modern Technology

Copper is one of the oldest metals used by humanity, marking the transition from the Stone Age to the Copper Age. Because it often occurs in a pure metallic state in nature, it was easily shaped by early humans into tools, weapons, and ornaments. Today, its exceptional electrical and thermal conductivity has made it a cornerstone of modern infrastructure, with Chile

Sure A Plus

leading the world in its production through massive operations like the Escondida and Collahuasi mines.

Industrial Metals and Their Diverse Applications

Beyond iron and copper, several other metals are essential to modern manufacturing and infrastructure. Aluminium is valued for its versatility in transportation, construction, and electronics, while Manganese and Chromium are critical agents in refining and strengthening steel. Additionally, Lead remains a fundamental component in energy storage and industrial ceramics.

20.What are energy resources? Define fuel. Write an example of renewable fuel. (SCERT model)

Any substance that can produce heat, move objects, or generate electricity is called an energy source. A substance that releases energy through a chemical process is known as a fuel.

21.List the energy sources you are familiar with:

Solar Energy,Coal,Hydel (Hydroelectric) Power,Petroleum,Natural Gas

22.When do energy sources become resources?

In simple terms, an energy source is the raw natural phenomenon (like sunlight or flowing water), while an energy resource is the usable supply of that energy that humans can actually harness.Energy resources play a crucial role in human life and in the economy of every country.

23.Energy resources can be classified into two categories based on their renewability

Non-Renewable resources/Conventional resources	Renewable resources/Non-conventional resources
Natural gas,coal, petroleum	Solar energy, hydroelectricity,tidal

SureAPlus

	energy, geothermal energy, wind, nuclear energy, bioenergy

24.The characteristics of both conventional and non-conventional energy resources (SSLC Pre Model)

Non-Renewable resources/Conventional resources	**Renewable resources/Non-conventional resources**
These resources get depleted and exhausted with use. They cause pollution. Very expensive to maintain, extract, and transport	Available in plenty Eco-friendly Usually pollution-free

25.Why humans rely on resources ?

The earth has provided humankind with plenty of energy resources. Humans rely on these resources for food production, transportation, healthcare, and almost every sector of human activity.

25. What you meant by Fossil fuels ? List the major fossil fuels

Fossil fuels belong to the category of non-renewable resources, but they are very important sources of energy. Fossil fuels are formed from the fossilized remains of ancient plants and animals.Eg-Natural gas,coal, petroleum

26.Briefly explain Coal

Coal is a combustible **sedimentary rock** formed from ancient plant remains and is distinguished by its high carbon content and dark coloration. While widely recognized as a primary fuel for **thermal power generation**, coal is also critical in **metallurgy** for extracting and refining metals. Beyond energy, it serves as a versatile chemical raw material in the production of diverse goods, including medicines, pesticides, and dyes.

Sure A Plus

For more Resources visit: BIO-VISION

27.Prepare an article on Petroleum: The Evolution and Impact of "Black Gold" Petroleum, or "rock oil," is a complex liquid mixture that has evolved from a sacred ancient phenomenon into the world's most influential energy source. Historically used by Egyptians for mummification and as a waterproofing agent, it became the primary driver of the Industrial Revolution, eventually surpassing coal. Today, its economic power is best demonstrated by nations like Saudi Arabia, which transformed into a developed global power through its vast oil reserves.Naturally occurring petroleum is extracted as crude oil, which varies in color from black to yellow. It must be processed in a refinery to separate its components into usable products through a process called fractional distillation.It uses as Energy and Fuels,Petrochemicals

Global Economic Influence

The availability of low-cost petroleum from regions like West Asia has fundamentally altered global trade and lifestyle. Because it powers almost every sector of modern society—from transportation to manufacturing—it is aptly nicknamed "Black Gold."

28.Prepre a discussion note on the topic, 'Uncontrolled Consumption of Fossil Fuels and the Energy Crisis',

The Impending Fossil Fuel Crisis

The rising global demand for energy is rapidly depleting non-renewable fossil fuel reserves, which include coal, petroleum, and natural gas. Since coal's early use in metallurgy and steam engines, followed by the 19th-century commercialization of petroleum and the current domestic reliance on natural gas, these finite resources have powered modern development. However, their uncontrolled consumption threatens a total exhaustion of supplies. Without these essential energy sources, global

Sure A Plus

developmental activities face a potential standstill and a catastrophic energy crisis.

29.What are the importance of wise energy use ?

To address the imminent energy crisis and the environmental damage caused by over-exploiting fossil fuels, we must pivot toward **non-conventional energy sources**. These are sustainable, naturally replenished, and abundant alternatives that offer a path for long-term development without harming nature

30.Examine the major non-conventional energy sources and see how they can be utilised to meet our energy needs.

Or Hold a discussion in what ways can non-conventional energy resources be utilised in human life?

Solar Energy	The Sun serves as our planet's primary energy source. To utilize this power, modern technology employs two main methods: **photovoltaic** and **solar thermal** capture. While thermal methods focus on heat, photovoltaic cells convert solar radiation directly into electrical energy, which can be stored and used for a wide range of applications.
Wind energy	The kinetic energy of the wind is converted into electricity. The force of the wind is used to spin a windmill, which in turn drives a generator connected to it, producing electricity.
	The heat released when magma erupts from the Earth's interior to the surface is efficiently stored and converted into electrical energy. In addition, it is possible to generate thermal energy from the hot water and vapour that emerge from the Earth through geysers. It has

Sure A Plus

	significant importance as an alternative energy source.
Tidal Energy	The movement of ocean tides is used to spin turbines and generate electricity.
Bio energy	Bioenergy is energy produced from organic matter and organic waste. It helps improve the quality of life for rural populations in developing countries and reduces environmental pollution. Today, projects to produce energy from urban waste are also being implemented.

31.Energy Conservation Day is observed in December 14

32.Why do we observe Energy Conservation Day

Or What are the importance of Energy Conservation Day

As natural resources dwindle, balancing consumption with development is vital to preserve the Earth's self-regenerative capacity. True conservation involves protecting ecosystems and the global climate by transitioning from finite, harmful fossil fuels to renewable energy sources like solar, wind, and geothermal power. Sustainable development—the careful management of resources to prevent depletion—is essential to ensure that future generations inherit a viable planet.

33.Write a short note on the topic: "The Role of Children in Sustainable Development."
Or Examine the role of the conservation of resources in sustainable development. (SCERT Model)

Sustainable development is development that meets the needs of the present without compromising the ability of future generations to meet their own needs. We can move forward by engaging in activities that aim to achieve the objectives of sustainable development, protect the Earth, and conserve resources for a better tomorrow.We must try to develop sense of usage of energy sources and other resources such as solar energy, wind energy, hydroelectricity, and geothermal energy, simultaneously

Sure A Plus

reducing the use of fossil fuels, which are scarce, costly to replenish, and have adverse environmental impacts.We can lead campaign for 3Rs,Energy saving and conservation.Assemblies,club activities, public awareness programmes,surveys can be arranged.

34.“The world has enough for everyone's need, but, not enough for everyone's greed" Who said it?

Mahatma Gandhi

35.Elucidate the importance of Hydrogen a non-conventional energy resource. (SCERT Model)

Hydrogen is utilized as a non-conventional energy source. Hydrogen, is used to produce energy, which can serve as a clean fuel. When hydrogen is burned in a fuel cell, only water vapor is reused.It does not release pollutants like fossil fuels when they are burned. This energy is useful in areas ranging from transportation to various economic activities. It can be used.

DEMOCRACY AN INDIAN EXPERIENCE

1.What were the major challenges that independent India faced ?

>Post–partition migration and exodus.

>Hindu Muslim Sikh riots

>Crimes against Children and women

>Abduction and displacement of people

2. It was essential to find out political solutions to issues created by the partition and post–partition migration and exodus. Tabulate the attempts to address these challenges

The laws were passed such as,

* The Abducted Persons (Recovery and Restoration) Act, 1949,
* The Displaced Persons (Compensation and Rehabilitation) Act, 1954
* The Citizenship Act of 1955.

Besides, the Rights of Minorities were included as fundamental rights in the Constitution.

3.Integration of princely states was one of the challenges faced by independent India. Compare the three treaties implemented for integration of princely states. **(SCERT Model)**

SURE PIS

Stand Still Agreement	Instrument of Accession	Merger Agreement
The princely states should maintain their status quo was the provision based on this agreement. This agreement helped to prevent these states from joining Pakistan.	This agreement was meant for the princely states to give their consent to merge into the Indian Union. At the same time, the right to internal self-governance was also granted to the princely states through this.	This was an agreement for the complete accession of the princely states to the Indian Union. According to this agreement, the right to selfgovernance ceases to exist.

4.For conducting free and fair election the Election Commission was formed based on the Constitution on?

January 25, 1950.

5. The first general election was held from?

October 1951 to February 1952.

The first general election an experiment

5.Conducting a free and fair election in a country as vast and diverse as India was replete with numerous challenges.Examine the statement.

Conducting a free and fair election in a country as vast and diverse as India was replete with numerous challenges due to the following reasons

• Delimiting constituencies. • Preparing voters lists based on adult franchise. • Educating the illiterate majority about the necessity of voting. • Finding out enough election officials and training them. • Ensuring a transparent, impartial and fair election.

From One-Party Dominance to a Coalition System

6.One-party dominance gradually ceased to exist and Indian politics transformed into a multiparty system and a coalition system. Prepare a

SURA PLUS

chronological list of the various governments in India since the first general election.

1952 - 1971 Indian National Congress (INC) Unchallenged dominance; retained power from the first election (1952, 1957, 1962). State-level setback in 1967.

1977 - 1979 Janata Party INC dominance temporarily broken; Janata Party forms the government.

1980 - 1984 Indian National Congress (INC) Resurgence; Congress wins a majority on its own in both elections.

1989 - 1996 Shift to Coalition Era Marked by the end of single-party dominance.

1989- National Front (Janata Dal-led) Forms government, indicating the start of coalition politics.

1991- INC Forms government with support from other parties.

1996- BJP / United Front (Various Parties) Brief BJP government, followed by the United Front coalition.

1998 - 1999 National Democratic Alliance (NDA - BJP-led) BJP-led coalition forms the government.

2004 - 2009 United Progressive Alliance (UPA - Congress-led) Congress-led coalition forms the government.

2014 - 2024 National Democratic Alliance (NDA - BJP-led) Sustained dominance; NDA wins three successive elections (2014, 2019, 2024).

7.What are the ways Coalition governments formed in India?

Political parties reaching an understanding among themselves to contest as a front based on a common minimum programme before the election. • Creating an alliance and forming a government after the election. • Providing external support to a government that does not have a majority in the Lok Sabha.

Emergency - A Crisis Period in Indian Democracy

Sure A Plus

8. Give an account on the Emergency was a major crisis faced by the Indian Democracy
Or How did the internal emergency of 1975 affect the Indian democracy? Analyse (SCERT Model)
The Emergency (1975–1977) was triggered by a perfect storm of **economic instability** (food shortages and unemployment) and **political unrest**, specifically the Gujarat and Bihar agitations led by Morarji Desai and Jayaprakash Narayan. The crisis peaked when the **Allahabad High Court invalidated Indira Gandhi's election**. Citing "internal security" threats from resulting Opposition protests, the government declared a state of Emergency.

During this period, democratic norms were suspended. Key measures included:

- **Centralization of Power:** The federal structure was dismantled, and judicial review was curtailed.
- **Civil Liberty Suppression:** Fundamental Rights were frozen, the press was censored, and Opposition leaders were jailed without trial.

Persistent public resistance eventually forced the revocation of the Emergency in March 1977. In the ensuing elections, the Congress Party was defeated, leading to the formation of the first non-Congress government under the **Janata Party**, with Morarji Desai as Prime Minister.

The era serves as a definitive lesson on the importance of **civil society vigilance** and a free press, ultimately proving the resilience of India's democratic framework against authoritarian overreach.

Popular Movements and Indian Democracy

9.Briefly explain Movements emerged after 1970s

SureA Plus

For more Resources visit: BIO-VISION

Since 1970 in democratic India, various social groups, including Dalits, women, and farmers, felt that mainstream political parties were neglecting their specific problems and needs. This disillusionment led these groups to form their own movements, organizing protests to protect their interests and demand greater political representation and power.

10.Discuss and prepare a note about the background in which the Mandal Commission was appointed and the developments that followed after its implementation. (SCERT Model)

The Struggle for Other Backward Classes (OBC) Reservation in India

The Other Backward Classes (OBC), defined as socially and educationally backward groups not included in SC/ST, have long sought political representation and advancement in government jobs and education.

- **1953:** Kaka Kalelkar Commission formed to study OBC backwardness, but recommendations were **not implemented**.
- **1979:** Second Backward Classes Commission (the **Mandal Commission**) established by the Janata Party, headed by B. P. Mandal.
- **1980:** Mandal Commission submitted its report, recommending **27% reservation** for OBCs in government jobs and education.
- **1990:** The V. P. Singh-led National Front government **implemented the report**, leading to protests.The Supreme Court later approved the implementation.
- **Significance:** The implementation secured welfare for a large OBC population and coincided with the **rise of OBC-dominated political movements** (e.g., Janata Dal). Reservation is now accepted by all major political parties.

Dalit Movements

11.Explain the changes brought about by the dalit movements in the Indian Social System (SCERT Model)

Dalit Movements for Social Justice and Political Empowerment

SURAPUS

For more Resources visit: BIO-VISION

Despite constitutional reservations, Dalit communities in post-independence India remained marginalized socially, politically, and economically, facing issues like educational backwardness and inequality.

Inspired by Dr. B. R. Ambedkar's ideals, they formed movements to secure their rights:

Dalit Panthers (1972, Maharashtra): An urban youth movement that used aggressive resistance and cultural programs to protest caste discrimination and police brutality, successfully pressuring the government on anti-Dalit attacks.

BAMCEF (1978): Focused on the political empowerment of SCs, STs, OBCs, and minorities. This led to the formation of the Bahujan Samaj Party (BSP), led by Kanshi Ram, which gained significant political influence, especially in states like Uttar Pradesh.

Women's movements

11.Prepare a seminar paper on women movements and their demands in India during the post emergency period

Key Women's Rights Movements in India

Women's rights movements in India advocate for gender equality, education, employment, and proportional representation against issues like domestic violence, oppression, and sexual harassment. Two significant movements are:

Anti-Arrack Movement (1990s):

Emerged in the Nellore district of Andhra Pradesh and spread state-wide.

Motivated by the widespread use of Arrack (local liquor), which caused social discord, economic ruin, and increased domestic violence and atrocities against women. The movement, involving thousands of women, successfully created social awareness and later expanded its focus to other issues like sexual harassment and gender discrimination.

Nirbhaya Movement (2012): **(SCERT Model)**

Sure A Plus

A mass movement formed in Delhi following the brutal sexual assault and murder of a girl in 2012, sparking nationwide protests.

The main demands were for strong legal action, faster legal processes, and exemplary punishment in sexual violence cases. **$** The movement was a catalyst for the enactment of the Indian Criminal Law Amendment Act, 2013 (Nirbhaya Act), and the establishment of fast-track courts.

12.Elucidate Fishermen's movement?

Indian Fishermen's Agitation

India's fishing community, the world's second largest, faced severe livelihood crises due to economic policy changes in the mid-1980s, particularly concerning deep-sea fishing.

The National Fishworkers Forum (NFF), coordinating traditional fishworker collectives nationwide, led protests and legal battles. Key grievances included the Central government granting fishing and trawling licenses to foreign companies, which threatened the traditional fishing industry and coastal environment.

The movement, strengthened significantly by fishworkers in Kerala, has fostered organizational awareness and increased their participation in the democratic system.

Environmental Movements

13.What are the reasons for the mobilization people for environment?

Environmental movements emerge against the social injustice and environmental problems stemming from unscientific development. They primarily target the harm caused by major activities like large-scale irrigation projects, industries, mining, and deforestation.

These movements are influential in matters of natural resource and biodiversity conservation, environmental policy formulation, awareness creation, and promoting sustainable development.

Sure A PLUS

14.Analyse how environmental movements reflect the conflict between unscientific development and environmental protection.(SCERT Model)

Chipko Movement	Opposed the felling of trees in large scale for industrial purposes in the Himalayan regions in Uttarakand Stood up for the rights of Indigenous people over forest resources Women's participation . Leader- Sunderlal Bahuguna A form of struggle involving embracing trees.
Narmada Bachao Andolan (SCERT Model)	A movement formed against the Sardar Sarovar project on the Narmada River Worked against the eviction of Tribal people Worked to protect the livelihoods of indigenous people Stood against unjust evictions and rehabilitation
Silent Valley	A movement against the proposed Silent Valley Hydro electric project Stood for the conservation of rain forest and bio-diversity .Abandoned the proposed Hydro electric project due to public agitations Silent Valley was declared a National Park.

16.Briefly explain the impacts of Environmental movements in India

As a result of the intervention of the Environmental organisations and other popular movements, several environmental protection laws, laws protecting ecological rights, declaration of protected forest areas and declaration of national parks have been enacted in India .

2002-Bio diversity Act

2006-The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act

2013-The Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act

Peasant movements

17.Prepare a note on farmer movements and agricultural laws In India

SureAPUS

Farmers' movements in India have historically addressed the challenges faced by the agricultural sector, particularly in the wake of economic shifts.

Key Context and Crisis

Green Revolution (Post-1960s): Initially provided a boost to agricultural production.

Liberalization Policies (Mid-1980s onwards): Introduction of economic reforms led to a crisis in the agricultural sector.

Adverse Effects: These reforms negatively impacted production, food security, and employment in agriculture.

Various regional organizations emerged to mobilize farmers:

Bharatiya Kisan Union (BKU): Formed in Uttar Pradesh, known for organizing massive rural protests.

Shetkari Sanghatana: Active in Maharashtra.

Raita Sangha: Active in Karnataka.

Recent Significant Protest (2020-2021) Organized by the Samyukt Kisan Morcha (SKM) against new Central Government agricultural laws in Border areas of Delhi.

Gained widespread attention due to massive public participation.

Right to Information Movement

18.Prepare an article on “How does the Right to Information Movement strengthen Democracy in India?” (SCERT Model)

The Right to Information (RTI) Act of 2005 is a landmark example of a successful public movement and legislative acceptance. The movement was spearheaded in 1990 by the Mazdoor Kisan Shakti Sangathan (MKSS) in Rajasthan. The initial protest and demand for access to documents began in Bhim Tehsil, a backward area, driven by suspicions of misuse of public funds allocated for local construction projects like schools and dams. The movement gained national momentum with the formation of the National Council for People’s Right to Information, established in Delhi under the patronage of MKSS, which launched a nationwide campaign. Support was also voiced by other significant bodies, including the Consumer Education and Research Centre, the Press Council, and the Shuri Committee, all of whom advocated for a draft RTI law.This collective public and expert

SURE A PLUS

For more Resources visit: BIO-VISION

demand ultimately led to the enactment of the Right to Information Act in 2005.

Regional Movements

19.Give an account on regional movements in India

India's vast diversity (geography, climate, language, culture, religion, etc.) is the backdrop for the emergence of various regional movements.

Purpose of Regional Movements

These movements arise to fulfill the specific needs of a particular region, demanding:Special consideration,Benefits,

Protection.Regional movements are broadly classified into three categories:immigration movements, regional autonomy movements, and separatist movements

20.Briefly explain the following

The Dravidian Movement began in early 20th-century Tamil Nadu, driven by ideas of Dravidian political empowerment, Tamil language growth, and rationalism. Its main goal was to resist Brahmin cultural dominance over Dravidian culture. The movement evolved from E. V. Ramaswamy Naicker's (Periyar) Self-Respect Movement. Periyar later formed the Dravida Kazhagam. This led to the formation of the Dravida Munnetra Kazhagam (DMK), which, through strong agitations, significantly influenced Tamil Nadu politics and came to power in 1967.The movement's legacy continues to shape the subsequent politics of the state.

Anti-Immigration Movements form due to ethnic, linguistic, cultural, economic, and employment problems caused by uncontrolled immigration on the indigenous population of a region. The Assam Movement is the most significant example, primarily against the illegal influx of Bangladeshis.The All Assam Students' Union led the movement. Protesters feared that illegal immigration was causing poverty, economic crises, and loss of employment for the people of Assam. They demanded the expulsion of all illegal immigrants who arrived after 1951.

The movement involved widespread violence and clashes. The issue was partially resolved by an agreement signed between the Central Government and the protesters in 1985, followed by democratic measures.

Movements for Autonomy: Movements for Autonomy arise from demands for greater self-governance or special statehood within a country, often

SURE A PLUS

citing regional neglect, linguistic/cultural differences, and unbalanced economic growth.

Gorkhaland Movement Gorkha National Liberation Front (GNLF) - Separate state for Nepali-speaking Gorkha community in West Bengal. Autonomous Darjeeling Gorkha Hill Council (1988), later replaced by Gorkhaland Territorial Administration (2012).

Jharkhand Movement Jharkhand Mukti Morcha (JMM) Form a separate state (Jharkhand) by dividing Bihar. Jharkhand state was formed in 2000.

Telangana Movement Telangana Rashtra Samithi (TRS) Form the Telangana state by dividing Andhra Pradesh.

Separatist Movements in India

Evaluate how the separatist movements became a challenge to the unity of the nation.(SCERT Model)

Separatist movements aim to separate certain regions from India to form independent states. Major movements emerged in Punjab, Jammu and Kashmir, and the North-East.

. Khalistan Movement (Punjab)

Demand: Separate nation called Khalistan for the Sikh people.

Tactics: Led by an extremist faction; adopted armed means.

1984: 'Operation Blue Star' to flush out militants from the Golden Temple.

Assassination of Prime Minister Indira Gandhi and subsequent anti-Sikh riots.

Separatism was eradicated after the Punjab Accord (1985) signed by Rajiv Gandhi and Harchand Singh Longowal, followed by effective democratic processes.

. Separatist Movements in Jammu and Kashmir

Demand: Either a separate independent nation or accession to Pakistan.

Tactics: Armed insurgencies, posing a major threat to national security.

2019: Central government revoked special rights under Article 370 and reorganised the state into two Union Territories: Jammu and Kashmir and Ladakh.

2024: Peaceful elections were held, and the Jammu and Kashmir National Conference, led by Omar Abdullah, formed the government.

Separatist Movements in the North-East

Sure A Plus

Mizo National Front (MNF) Laldenga Separate nation for the Mizo Tribe. Peace Accord (1986) granted Mizoram full statehood with special powers.

Naga National Council (NNC) Angami Zapu Phizo Unification of Naga Territory, autonomy, conservation of tribal culture. Naga Peace Accord signed in 2015.

Some Other Challenges Faced by Indian Democracy

21.List the major challenges that destabilise the democratic process in our country?

They are communalism, tensions in center-state relations, corruption, criminalisation of politics, and trends like defection. These adversely affect the peaceful lives of the people, national progress, and economic growth.

22.Prepare a speech on 'Communalism is a threat to Indian Democracy.'

Or While the Indian constitution upholds democratic values, what kind of impact does communalism, as a societal evil, create in society. (SCERT Model)

'Communalism a Challenge to Democracy

Ladies and genleman, Today i would like say a few words on 'Communalism is a threat to Indian Democracy.' Communalism is the idea of dividing people on the basis of religion and creating social conflict. During the colonial period, the British strategy of 'divide and rule' led to the division of the Indian populace on the basis of religion and fostered communalism. Similarly, the riots that followed the partition of India also contributed to dividing the population based on religion and nurturing communal thoughts. Communal divide undermines our constitutional values like secularism and social justice, posing a threat to the nation's unity and integrity. The formation of public opinion based on religion and communal thinking, and the way by which political parties use it to influence voters in elections, pose a significant challenge to democracy. Communalism can only be countered through creating public awareness, sensitisation, and proper democratic literacy.

Thank you…

Tensions in Centre-State Relations

23.Tensions in Centre-State relations are another major challenge facing Indian democracy.Substantiate the statement

SURE PLUS

For more Resources visit: BIO-VISION

The Constitution divides powers, but the Centre holds greater authority and has a vantage in some matters. On the other hand, the Constitution also gives the States the right to freely exercise the powers given to them. Successive Central Governments (directly and through Governors) often **interfere** with the States' right to freely exercise their powers.Politics often interferes in **centrally-funded schemes** and the **distribution of resources**.Such moves are the main cause for worsening the Centre-State relations. The Judiciary has the authority to resolve legal dispute between the Centre and the States.

24.Real political processes that provide flesh and blood to the constitution. Elucidate the role of the Governor has been very crucial in maintaining the Centre-State relations.

The Governor's role is a controversial subject in Centre-State relations, primarily because the Governor is an appointed official (by the President on Central Government's advice, minimum age 35) and not elected. Controversies often escalate when different political parties govern at the Centre and in the State, leading to perceptions of the Governor as an instrument of Central interference. The Sarkaria Commission (1983) recommended that active politicians should not be appointed as Governors.

A major source of conflict is Article 356, which allows the President to impose President's Rule in a state based on the Governor's report if the state administration fails to follow the Constitution. This power has been controversial, with instances like the 1959 dissolution of the Kerala Government where a majority government was dismissed.

25.The Governor's duty is to help the state government to carry out the democratic process of the state smoothly and in a manner consistent with the spirit of the constitution.prepare a seminar paper on Powers and Functions of the Governor (SSLC Pre Model)

The Governor should exercise his powers on the advice of the Council of Ministers. The major powers and functions of the Governor are given below:

Legislative and Executive Role

The Governor plays a key role in the state's legislative process, having the power to summon, prorogue, or dissolve the Legislative Assembly. They address the assembly and their assent is essential for bills to become law.

Sure A+ PLUS

For more Resources visit: BIO-VISION

Crucially, the Governor can promulgate ordinances when the Assembly is not in session and gives prior permission for presenting the budget and money bills.

As the state's chief executive, all executive actions are taken in the Governor's name. They are responsible for inviting the majority leader to form the government and appointing the Chief Minister and other ministers based on the Chief Minister's recommendation. The Governor also makes important appointments such as the Advocate General and the Chairman and members of the State Public Service Commission (PSC).

Judicial and Discretionary Authority

The Governor holds Judicial Power to grant pardon, suspend, remit, or commute sentences for offenses related to matters under the state's executive jurisdiction. Furthermore, the Governor exercises Discretionary Powers in specific situations. This includes their judgment in the formation of the Council of Ministers when there is a hung assembly (no clear majority).

Elucidate actions that can be taken by the Governor, when the bills passed by the legislative assembly are submitted for the Governor’s assent. **(SCERT Model)**

They can also reserve a bill for the consideration of the President. Regarding the bills presented for assent, the Governor can give assent, withhold assent, or return the bill to the Assembly for reconsideration. However, if the Assembly passes the returned bill again, the Governor must give their assent. They also have the discretionary power to submit a report to the President on the state's administrative affairs

26.How could corruption become a curse to democracy?

Corruption is the abuse of power or position for undue personal gain (e.g., bribery, nepotism).It hinders financial investments, economic growth, and the democratic system by diverting public resources and welfare to a few, causing a loss of public faith.

Prevention involves:Strong, independent legal systems and investigation mechanisms.

Transparency in governance and political party funding.Public awareness campaigns

27.Examine what is an electoral bond?

SURE A PLUS

For more Resources visit: BIO-VISION

It was introduced in the 2017-2018 Union Budget, Electoral Bonds allowed individuals and corporations to donate any amount to political parties.Parties registered with the Election Commission that secured at least one percent of the total votes in the previous state/Lok Sabha elections. Buyers could purchase bonds from SBI in denominations from Rs 1,000 to Rs 1 crore.The donation amount was tax-deductible.Political parties had fifteen days to convert the received bonds into cash. The Supreme Court quashed the Electoral Bond scheme on February 15, 2024, ruling it was unconstitutional and violated the fundamental right to information regarding political funding transparency.

28.‘The criminalisation of politics and defection are the challenges to Indian democracy.’ Prepare a note based on the stands and actions taken by the Indian Election Commission in this regard.

Criminalisation of Politics: A Threat to Democracy

It occurs when political leaders or workers engage in or encourage criminal activities, or when individuals with criminal backgrounds enter politics.This trend erodes democratic values by:

Intimidating voters to favour certain parties.

Causing citizens to lose faith in the democratic system when criminals assume leadership.

Solutions to Eliminate the Challenge:

Electoral Reforms: Prohibiting those facing trial or convicted of criminal offenses from contesting elections.Strong Legal SystemsAwareness Campaigns against the criminalisation of politics.

29.”Defection often betrays voters' trust, causes a crisis in governance, and challenges democracy”. Substantiate the statement

Defection emerged as a trend in Indian politics after the 1967 elections. It is the act of an elected representative, who won on one party's ticket, abandoning or joining another party. To prevent this, the Anti-Defection Law was passed in 1985 through the 52nd Constitutional Amendment.Resort Politics is a strategy used by political parties to prevent defection. It involves gathering party members at a specific venue, led by a loyal member, to design strategies and prevent influence from other

SURE APUS

For more Resources visit: BIO-VISION

parties.This trend began in Haryana in 1982 and has since occurred in states like Karnataka, Gujarat, Maharashtra, and others.

Know the Indian Social System

1.How different social institutions and their parts work together to maintain the stability, growth and order in society ?

To ensure stability, growth and order in society various parts of society work in coordination. A social system is formed when each part of the society, including education, transportation, communication, media, law, the social justice system, health and security systems, religious and cultural institutions, and the government work interdependently and perform jointly.

2. Name the sociologist who compared society to a living organism?Elucidate hos concept.

Herbert Spencer.He developed the concept of Social Organism by highlighting the similarity between the human body and the social system.Herbert Spencer's concept posits that like organs in the human body, various societal parts (family, education, economy, religion, government, etc.) function interrelatedly and complementarily to maintain social stability and order.

3.Which social institutions do / does we/midhun interact with during the day? What is its importance?

. Family. School. Religious institutions. Club. Financial institutions. Government offives. Social media. Digital platforms. Peer group Society is composed of different social institutions that work complementarily to maintain social existence. Social institutions regulate the behaviour and actions of individuals and groups.

4.Define Social system?

A social system is one that interconnects various social institutions and also regulates relationships, interactions and social order. A social system can be seen as a systematic arrangements of social interactions.

Indian Social System

5. Who is the pioneering sociologist in India?

Sure A Plus

For more Resources visit: BIO-VISION

G S Ghurye

6.What are the features of the Indian social system are highlighted by G. S. Ghurye?

Rich in its regional, linguistic, and religious plurality

7.India is a land with a diverse population.Substantiate the statement

The Indian social system is a complex mosaic shaped by millennia of religious, cultural, and historical evolution. Its foundation lies in an extraordinary diversity of castes, languages, tribes, and traditions. This multifaceted structure reflects the enduring values and historical shifts that define India's unique social fabric.

8.Tabulate the some distinctive features of the Indian social system (Pre model)

Religion,Language,Tribal, Rural & Urban Societies,Caste System

Caste System

9. Name the Indian Sociologist who conducted several insightful studies about the caste system in the Indian social systemb?

M. N. Srinivas

10.Caste is determined at one's birth. That is, a person who is born into one caste cannot move to another caste. Many castes and subcastes exist in Indian society. Prepare a seminar paper on important features of the caste system that existed in Indian society.

.**Social Hierarchy**-Historically, the Indian social system was organized into a rigid caste hierarchy that dictated an individual's status, occupation, and rights. Higher castes enjoyed significant social privileges, while those at the bottom of the structure were denied basic status and fundamental rights.

Division of Labour- Traditional Indian society enforced hereditary occupations based on the Varna system, which strictly prohibited professional choice. This rigid structure ensured social stability but eliminated social mobility**.**

Social Control and Order- In ancient India, the caste system functioned as a mechanism of social control rooted in the concepts of purity and pollution. This ideology enforced strict behavioral norms, physical segregation, and the

Sure A Plus

discriminatory practice of untouchability. Social interactions, such as communal dining, were prohibited to maintain hierarchy.

Restrictions on Marriage- The caste system enforced endogamy (marriage within one's caste) to preserve ritual purity and rigid social boundaries. Exogamy (marrying outside the caste) was strictly prohibited, often resulting in social expulsion for those who defied these norms.

Inequality and Marginalisation (Struggles against Inequality and Marginalisation)

The traditional caste system institutionalized social inequality by denying lower castes access to education, land, and resources. These "unquestionable" barriers prevented individual merit from overcoming birth-status, leading to deep-seated marginalization.

In response, numerous social movements emerged—such as the Kallumala, Mookkuthi, and Channar agitations in Kerala—to challenge this oppression. Today, the Indian Constitution prohibits discrimination, replacing rigid hierarchies with democratic values to foster social mobility and a just, equal society.

Religion

10.Analyse the role of Religion in maintaining the social system of India (SCERT Model)

The Indian Constitution, through its Preamble, establishes India as a secular state where the State does not grant special status to any religion. Furthermore, Article 15 prohibits discrimination based on religion, race, caste, sex, or place of birth. A defining characteristic of the Indian social system is the harmonious coexistence of both indigenous and foreign-origin religions, making the examination of religion's influence essential to understanding Indian society.

A Tool for Social Control-Religions instill core human values like honesty, empathy, mutual respect, love, care, social responsibility, justice, and morality, which significantly enrich the process of socialisation. By promoting these values, religion aids in ensuring social order and coexistence. Consequently, religious values both influence and guide individual behaviour, serving as an effective tool for social control.

Sure A Plus

Enriching Cultural Diversity-Religion significantly enriches India's cultural diversity through its influence on beliefs, arts, and literature, as vividly demonstrated by the paintings and engravings found in diverse religious institutions like temples, churches, mosques, viharas, and gurudwaras.When people from different religious groups become part of such celebrations, does it lead to strengthening unity and amity in society.

Accelerating Social Change-Some religious movements have successfully evolved into social movements, promoting significant social changes by challenging caste discrimination and advocating for equality. The Brahmo Samaj, led by Raja Ram Mohan Roy, is a key example of this reformative role. However, while religion often promotes reformation and unity, it can also pose a threat to India's social harmony by creating divisions and conflicts along religious lines, tendencies that ultimately harm social unity.

Language

11.Analyse the role of language in maintaining the social system of India. (SCERT Model)

Language is not just a means of communication–it is a symbol of culture and identity. Differences in social systems and cultural practices exist among people who speak different languages.

Make Cultural Traditions Organic -Oral songs helped preserve traditional values, social norms and historical events. Languages preserve the traditions of their respective societies through oral transmission overtime and with adaptations, through written records. The traditions, stories, and values of each society nurture its culture.

Provides a Sense of Identity - As the Malayalam-speaking people are known as Malayalees, people are connected to their identities through language. Eg: Tamils, Biharis and Punjabis.

Fosters Respect for and Coexistence with Cultural Diversity -We can learn about different cultures and foster respect and coexistence through various languages. To maintain equilibrium in Indian social systems, it is essential to recognise and respect linguistic diversity.

Tribal Society

Sure A Plus

12.Elucidate the features of Tribals and their role in maintaining ecological balance

Tribal societies are distinct from rural and urban communities, characterized by unique languages, customs, and political systems. Their close bond with nature promotes ecological balance through sustainable farming and forest conservation. Ultimately, their diverse lifestyles and traditional knowledge play a vital role in preserving India's biodiversity.

13.The tribal societies play a vital role in preserving Indian cultural heritage.Evaluate the statement on the basis of the following (SCERT Model)

Traditional Knowledge -Traditional tribal communities hold valuable knowledge concerning agriculture, medicine, and biodiversity conservation. This is evident in their practices, such as developing crop varieties resilient to diverse climatic conditions and employing unique seed preservation methods. Their healthcare practices rely entirely on indigenous natural resources. Furthermore, the folkways and oral histories of these societies make a significant contribution to Indian culture.

.Sustainable Life-Tribal communities are distinguished by their harmonious existence with nature and their eco-friendly integration of natural resources (like forests and water) into daily life. Their practices provide effective models for environmental preservation and resource management. Furthermore, their deep knowledge of forests is a valuable asset that strengthens the development of the eco-tourism sector, illustrating how tribal knowledge contributes to the nation's knowledge economy.

Art and culture - Tribal communities, exemplified by figures like Padma Shri Cheruvayal Raman, enrich Indian culture through unique languages, arts, and traditions. By upholding "unity in diversity," tribal art forms like Warli Painting and various cultural festivals attract global tourism and significantly contribute to India's heritage.

Resistance against Inequalities -(SCERT Model)

Tribal societies in India organised numerous struggles against inequality and oppression and fought for justice. Examine the relevance of this statement based on the main resistance raised by them.

Santhal Revolt 1855 -	Bengal, Jharkhand,	Exploitation by

Sure A Plus

1856	Odisha, Bihar Led by Sidhu Murmu, Kanhu Murmu	landlords/money-lenders and forced displacement from traditional lands.
Munda Revolt (Ulgulan) 1899 - 1900	Chota Nagpur (Jharkhand). Led by Birsa Munda	British intervention in land ownership and exploitation by landlords.
Kurichya & Kurumba Revolt 1812	Wayanad (Kerala) Led by Raman Nambi	Excessive taxation, intervention of the British in regional administration, forced displacement from traditional land, confiscation of property

Rural-Urban Societies

14.Most of the villages and cities in the states of India are interdependent. Substantiate the statement. (SCERT Model)

As cities depend on the villages for the raw materials for food, villages also depend on cities for technology and markets. Villages in contrast to cities, emphasise social relationships and cooperation. Rural-urban migration connects both societies. Urban societies promote industrialisation and provide modern employment opportunities. Urban life encourages cultural exchange. Rural and Urban societies maintain equilibrium through interdependence and strengthen the Indian social system.

15.Compare the ideas of diversity and pluralism. (SCERT Model)

Diversity in society means the presence of differences within society. It includes cultural, religious, linguistic, racial and social distinctions. These diversities may not have mutual relations or mutual respect.

Pluralism promotes communication between different social groups, fostering mutual respect, love, and friendshipirrespective of their diversity.

SURE A PLUS

Pluralism ensures that diversity does not lead to division, instead, it contributes to unity and coexistence.

16.Tabulate the challenges that hinder Indian pluralism. (SCERT Model)

.Threat to Secularism .Eviction from ancestral lands.Neglection of interests of linguistic minorities.

17.Elucidate the role of national integration in overcoming the challenges faced by pluralism in Indian society.(SCERT Model)

National integration is a process by which people from different backgrounds, regions, languages, religions, and cultures are respected for their diversity, leading to a unified and harmonious state. It also emphasises people's identity, solidarity and public identity while respecting their diversity. India's national integration is a process that unifies Indian society into a national identity by respecting India's cultural, linguistic and religious diversity. Ensures inclusive participation of all marginalised groups and ensures equal participation and representation for all groups in society. It ensures coexistence, tolerance and secularism .

18.List the core features of national integration

#Nurtures Unity in Diversity Encourages Social Unity #Develops National Identity #Strengthens Democratic Governance #Helps to Overcome Challenges to Pluralism #Encourages Social and Economic Development
