GROUP 1
INKSCAPE & OPEN TOONZ

For more Resources visit : Bio-vision

QUESTION 1

Prepare a **Play button** banner using Inkscape software as in the model according to the hints given below.

Hints :-

- Draw and colour the rectangle. Avoid Stroke colour.
- Include the text **PLAY** and arrange it as in the model. (Font : Sans-serif)
- Create a circle and colour it. Increase the Stroke width accordingly.
- Draw the shape inside the circle and colour it.

Export the completed file with your **RegisterNo_playButton.png** as file name to the **Exam10_Products** folder.

Show Application – Inkscape – File – Document Properties - Click on Show Page Border
Click on create rectangle Tool – Draw a Square (Red Colour)
Click on Circle Tool – Draw a Circle (Red Colour)
Select the Circle – Object – Fill and Stroke – Click on Stroke – Click Paint Box and Select a Gray Colour – Click on Stroke Style (3 cm) – Arrange the Circle as shown in Question
Click on Text Tool – Type the Text “ PLAY” – Resize and change the colour as White – Arrange it
Click on Draw Bezier Tool – Draw a Triangle – Change the colour (White) – Arrange the Triangle shown in Question
Click on Ctrl A – Click on Ctrl G
File – Export PNG image – Export as – Select the Folder (Exam 10_Products)– Type the File name (Register No_playButton)– Export

QUESTION 2

For more Resources visit : Bio-vision

Prepare a logo using Inkscape software as in the model according to the hints given below.

Hints :-

- Create a circle and avoid the Fill colour. Adjust the Stroke width as 7mm.
- Create the shape in the image and color it as in the model. Apply Stroke color- white & stroke width= 5mm.
- Include the text **ELECTRICITY.**
- Arrange the text and image as in the model.

Export the completed file with your **RegisterNo_Electricity.png** as file name to the **Exam10_Products** folder.

Show Application – Inkscape – File – Document Properties - Click on Show Page Border
Click on Circle Tool – Draw a Circle – Object – Fill and Stroke – Click on Fill – Click on No Paint – Click on Stroke – Click Paint Box and Select a Black Colour – Click on Stroke Style (7 mm)
Click on Draw Bezier Tool – Draw a Shape Shown in Question – Fill the colour (Red) – Object – Fill and Stroke –Click on Stroke – Click Paint Box and Select a Gray Colour – Click on Stroke Style (5 mm) – Arrange the Shape as shown in Question
Click on Text Tool – Type the Text " ELECTRICITY" – Select the text – Text(Menu Bar) – Text and Font – Select Bold – Apply
Click on Ctrl A – Click on Ctrl G
File – Export PNG image – Export as – Select the Folder ((Exam 10_Products) – Type the File name (Register No_electricity)– Export

QUESTION 3

For more Resources visit : Bio-vision

Prepare a Flash card using Inkscape software as in the model according to the hints given below.

Hints :-

- Create a rectangular background and colour it, avoiding the stroke.
- Include the image namely **puppy.jpg** from the **Images10** folder.
- Include the text **DOG.**
- Arrange the text and image as in the model.

Export the completed file with your **RegisterNo_flashcard.png** as file name to the **Exam10_Products** folder.

Show Application – Inkscape – File – Document Properties - Click on Show Page Border
Click on create rectangle Tool – Draw a Square (Green Colour)
File – Import – Home – Images 10 – Select the Image puppy.jpg – Ok – Arrange it
Click on Text Tool – Type the Text " DOG" – Resize and change the colour as White – Arrange it
Click on Ctrl A – Click on Ctrl G
File – Export PNG image – Export as – Select the Folder (Exam 10_Products)– Type the File name (Register No_playButton)– Export

QUESTION 4

For more Resources visit : Bio-vision

Prepare a name board using Inkscape software for the Smart Classroom of the school as in the model according to the following hints -

Model Image

Hints :-

- Prepare the background of the name board by creating a rectangle, apply Grey colour to it. Stroke width = 1mm, Stroke colour = black
- Create background for the texts **SMART** and **CLASS** by drawing two small rectangles and colour them as in the model. Avoid the stroke of the small rectangles.
- Add the text **SMART CLASS** (Font:Sans-Serif).
- Arrange the text and shapes as in the model.

Export the completed file with your **RegisterNo_smartclass.png** as file name to the **Exam10_Products** folder.

Show Application – Inkscape – File – Document Properties - Click on Show Page Border
Click on create rectangle Tool – Draw a Square (Gray Colour) - Object – Fill and Stroke – Click on Stroke – Click Paint Box and Select a Black Colour – Click on Stroke Style (7 mm)
Draw another Rectangle (Black) - Object – Fill and Stroke – Click on Stroke – Click on No Paint - Take Duplicate – Change the Colour – Arrange as Shown in Question
Click on Text Tool – Type the Text " SMART CLASS" – Resize and change the colour as Shown in Question – Arrange it
Click on Ctrl A – Click on Ctrl G
File – Export PNG image – Export as – Select the Folder (Exam 10_Products) – Type the File name (Register No_playButton)– Export

QUESTION 5

For more Resources visit: Bio-vision

Prepare a logo using Inkscape software as in the model according to the hints given below.

Hints :-

- Create the background and colour it, avoiding the stroke the colour.
- Create a circle and colour it.
- Include " **f** " inside the circle and colour it.
- Include the text **facebook** and arrange it as in the model (font : Sans-serif)

Export the completed file with your **RegisterNo_facebook.png** as file name to the **Exam10_Products** folder.

Show Application – Inkscape – File – Document Properties - Click on Show Page Border
Click on create rectangle Tool – Draw a Square (Gray Colour)
Click on Circle Tool – Draw a circle (Blue) shown in Image
Click on Text Tool – Type the Text “f” (White Colour) Arrange it.
Click on Text Tool – Type the Text “facebook” (Blue Colour) – Select the text - Text(Menu Bar) – Text and Font – Select Font family (Sans- serif) – Apply
Click on Ctrl A – Click on Ctrl G
File – Export PNG image – Export as – Select the Folder (Exam 10_Products) – Type the File name (Register No_facebook)– Export

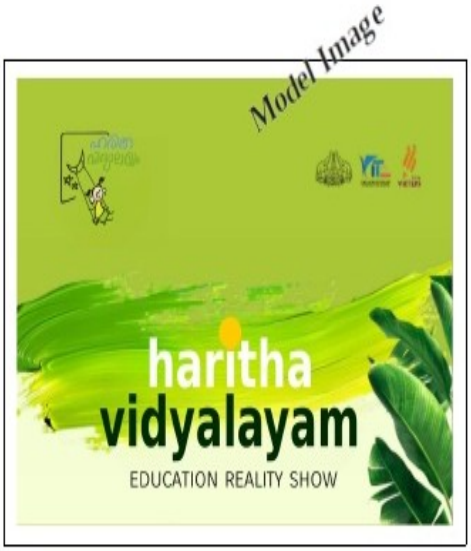

QUESTION 6

For more Resources visit : Bio-vision

Prepare a poster for Harithavidyalayam Reality Show using Inkscape software as in the model according to the hints given below.

Hints :-

- Include the image namely **Haritham.png** from the **Images10** folder as the background of the poster.
- Include the image namely **HV-logo.png** from the **Images10** folder to the poster.
- Include the text **haritha vidhyalayam** and arrange it as in the model (Font- Sans-Serif (bold)).
- Draw a circle above the text **haritha** and colour it.

Export the completed file with your **RegisterNo_vidyalayam.png** as file name to the **Exam10_Products**.

Show Application – Inkscape – File – Document Properties - Click on Show Page Border
Click on create rectangle Tool – Draw a Square (Gray Colour) - Object – Fill and Stroke – Click on Fill – Click on No Paint - Object – Fill and Stroke – Click on Stroke – Click Paint Box and Select a Black Colour – Click on Stroke Style (7 mm)
File – Import – Home – Images 10 – Select the Image haritham.png – Ok – Arrange it
File – Import – Home – Images 10 – Select the Image HV-logo.png – Ok – Arrange it
Click on Text Tool – Type the Text " haritha vidyalayam" – Resize and change the colour – Arrange it
Click on Circle Tool – Draw a circle (Yellow) – Arrange it.
Click on Ctrl A – Click on Ctrl G
File – Export PNG image – Export as – Select the Folder (Exam 10_Products)– Type the File name (Register No_vidyalayam)– Export

QUESTION 7

മാതൃകയിലേതു പോലെ ഒരു ഭൗമദിന പോസ്റ്റർ Inkscape ൽ തയ്യാറാക്കുക.

For more Resources visit : Bio-vision

സൂചനകൾ:

- പോസ്റ്ററിൽ മാതൃകയിലേതു പോലെ ടെക്സ്റ്റ് ടൈപ്പ് ചെയ്ത് ചേർക്കുക. ആദ്യ വരിക്ക് sans-serif എന്ന ഫോണ്ടും രണ്ടാമത്തെ വരിക്ക് FreeSans എന്ന ഫോണ്ടും നൽകുക.
- Images10 ഫോൾഡറിലുള്ള earth.png എന്ന ചിത്രം പോസ്റ്ററിലേക്ക് ഉൾപ്പെടുത്തുക.

- മാതൃകയിലേത് പോലെ പശ്ചാത്തലം ക്രമീകരിക്കുക.

പൂർത്തിയായ ഫയൽ, നിങ്ങളുടെ RegisterNo_EarthDay എന്ന പേരിൽ Exam10_Products ഫോൾഡറിൽ png ഫയൽ ഫോർമാറ്റിൽ Export ചെയ്യുക.

Show Application – Inkscape – File – Document Properties -Click on Show Page Border
Click on create rectangle Tool – Draw a Square (Gray)
File – Import – Home – Images 10 – Select the Image earth.png – Ok – Arrange it
Click on create rectangle Tool – Draw a Small Square (Blue)
Click on Text Tool – Type the Text " Our Power Our Planet" – Resize and change the colour(Black) – Arrange it as shown in Question – Select the text - Text(Menu Bar) – Text and Font – Select Font family Sans-serif – Apply
Click on Text Tool – Type the Text " WORLD EARTH DAY" – Resize and change the colour(BLUE) – Arrange as Shown in Question
Click on Ctrl A – Click on Ctrl G
File – Export PNG image – Export as – Select the Folder (Exam 10_Products) – Type the File name (Register No_vidyalayam)– Export

QUESTION 8

മാതൃകയിലേതുപോലെ ഒരു ജലദിന പോസ്റ്റർ Inkscape ൽ തയ്യാറാക്കുക.

For more Resources visit : Bio-vision

സൂചനകൾ:

- പോസ്റ്ററിൽ, മാതൃകയിലേതു പോലെ ടെക്സ്റ്റ് ടൈപ്പ് ചെയ്ത് ചേർക്കുക. Gentium Book Basic എന്ന ഫോണ്ട് ഉപയോഗിക്കുക.
- Images10 ഫോൾഡറിലുള്ള hand.png, water.png എന്നീ ചിത്രങ്ങൾ പോസ്റ്ററിലേക്ക് ഉൾപ്പെടുത്താം.

- മാതൃകയിലേത് പോലെ പശ്ചാത്തലം ക്രമീകരിക്കുക.

പൂർത്തിയായ ഫയൽ നിങ്ങളുടെ RegisterNo_WaterDay എന്ന പേരിൽ Exam10_Products ഫോൾഡറിൽ png ആയി Export ചെയ്യുക.

Show Application – Inkscape – File – Document Properties -Click on Show Page Border
Click on create rectangle Tool – Draw a Square (Blue)
File – Import – Home – Images 10 – Select the Image hand.png – Ok – Arrange it
File – Import – Home – Images 10 – Select the Image wter.png – Ok – Arrange it
Click on Text Tool – Type the Text “ Save Water Save Life” – Resize and change the colour(White) – Arrange it as shown in Question
Click on Text Tool – Type the Text “ WORLD WATER DAY” – Resize and change the colour(White) – Arrange as Shown in Question - Select the text - Text(Menu Bar) – Text and Font – Select Font family Gentium Book Basic – Apply
Click on Ctrl A – Click on Ctrl G
File – Export PNG image – Export as – Select the Folder ((Exam 10_Products)– Type the File name (Register No_vidyalayam) – Export

QUESTION 9

For more Resources visit : Bio-vision

Create an animation scene of a dog walking by a pond using OpenToonz software.

Hints :

- Copy the **OpenToonz** folder from the **Exam10_Documents** and paste it to the **Documents** folder in **Home**.
- Set the file name of the project being prepared in OpenToonz as **Dog**.
- Set the following video profile for the scene that is being created.

Scene Name	:	Scene1
Camera Size	:	HD720,1280x720, 16/9
Units	:	pixel
Frame Rate	:	12

- The animation scene being created should be for 5 seconds.
- Use the image namely **Scenery 4.png** given in the **OpenToonz** folder as background.
- Use the sequence images given in the **Dog** folder in **OpenToonz.**

Save the completed animation scene with **yourRegisterNo_DogWalking** as file name to **Exam10_Products** as **MP4** video. (If it is exported to Desktop, rename it and copy to Exam10_Products folder).

Home – Exam10_documents – Right Click on the Folder Open Toonz – Copy – Click on Documents – Right Click – Paste
Show Application – Open Toonz – New Project – Type the Project name (Dog) – Ok
Click on New Scene – Type the Scene Name (Scene 1) – Change the Camera Size (HD720.1280x720,16/9) – Change the Unit (Pixel) – Change the Frame Size (12) – Click on Create Scene
Click on Animation Room – Right Click Frame 1 in Column 1 – Load level – Select the Folder Documents – Open Toonz – Scenery 4.png – Load – Drag the image to 60th Frame
Right Click Frame 1 in Column 2 – Load level – Select the Folder Documents – Open Toonz – Dog – Load – Select the Dog Image Using Shift Key and Drag the images to 60th Frame
Click on Fist Frame Dog – Click on Animate Tool – Position – arrange to Starting Point
Click on 60th Frame Dog – Click on Animate Tool – Position – Arrange to Finishing Point
Render – Output Settings – Save in (Exam10_products) – Choose – Change the name (Reg No_DogWalking) – Change ttf to Mp4 - Render

QUESTION 10

Create an animation of a fruit falling from a tree using OpenToonz software.

For more Resources visit : Bio-vision

Hints :

- Copy the **OpenToonz** folder from the **Exam10_Documents** and paste it to the **Documents** folder in **Home**.
- Set the file name of the OpenToonz project as **Fruit**.
- Set the following video profile for the scene that is being created.

Scene Name	:	Scene1
Camera Size	:	HD720,1280x720, 16/9
Units	:	pixel
Frame Rate	**:**	**12**

- The animation scene being created should be for 5 seconds.
- Use the images namely **Fruit.png ,Scenery 3.png** given in the **OpenToonz** folder.

Save the completed animation scene with **yourRegisterNo_Fruit** as file name to **Exam10_Products** as **MP4** video. (If it is exported to Desktop, rename it and copy to Exam10_Products folder).

Home – Exam10_documents – Right Click on the Folder Open Toonz – Copy – Click on Documents – Right Click – Paste
Show Application – Open Toonz – New Project – Type the Project name (Fruit) – Ok
Click on New Scene – Type the Scene Name (Scene 1) – Change the Camera Size (HD720.1280x720,16/9) – Change the Unit (Pixel) – Change the Frame Size (12) – Click on Create Scene
Click on Animation Room – Right Click Frame 1 in Column 1 – Load level – Select the Folder Documents – Open Toonz – Scenery 3.png – Load – Drag the image to 60th Frame
Right Click Frame 1 in Column 2 – Load level – Select the Folder Documents – Open Toonz – Fruit.png – Load – Click Fruit Frame and Drag the images to 60th Frame
Click on Fist Frame Fruit – Click on Animate Tool – Position – arrange to Starting Point
Click on 60th Frame Dog – Click on Animate Tool – Position – Arrange to Finishing Point
Render – Output Settings – Save in (Exam10_products) – Choose – Change the name (Reg No_Fruit) – Change ttf to Mp4 - Render

QUESTION 11

Create an animation of an archer shooting an arrow at his target, using OpenToonz software.

For more Resources visit : Bio-vision

Hints :

- Copy the **OpenToonz** folder from the **Exam10_Documents** and paste it to the **Documents** folder in **Home**.
- Open the software and set the file name of the animation project being prepared in OpenToonz as **Archer.**
- Set the following video profile for the scene that is being created.

Scene Name	:	Scene1
Camera Size	:	HD720,1280x720, 16/9
Units	:	pixel
Frame Rate	:	12

- **The animation scene being created should be for 5 seconds.**
- Use the images namely **Target.png ,Archer.png,Arrow.png** given in the **OpenToonz** folder.

Save the completed animation scene with **yourRegisterNo_Archer** as file name to **Exam10_Products** as **MP4** video. (If it is exported to Desktop, rename it and copy to Exam10_Products folder).

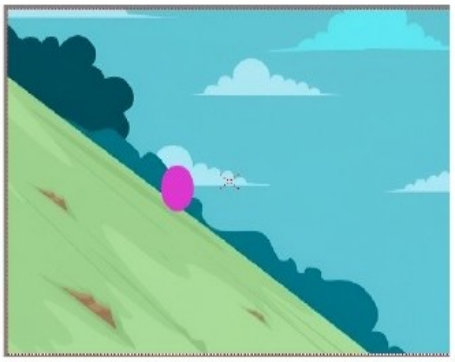

Home – Exam10_documents – Right Click on the Folder Open Toonz –Copy – Click on Documents – Right Click – Paste
Show Application – Open Toonz – New Project – Type the Project name (Archer) – Ok
Click on New Scene – Type the Scene Name (Scene 1) – Change the Camera Size (HD720.1280x720,16/9) – Change the Unit (Pixel) – Change the Frame Size (12) – Click on Create Scene
Click on Animation Room – Right Click Frame 1 in Column 1 – Load level – Select the Folder Documents – Open Toonz – Target.png – Load – Drag the image to 60th Frame
Right Click Frame 1 in Column 2 – Load level – Select the Folder Documents – Open Toonz – Archer.png – Load – Drag the image to 60th Frame
Right Click Frame 1 in Column 3 – Load level – Select the Folder Documents – Open Toonz – Arrow.png – Load – Drag the image to 60th Frame
Click on Fist Frame Arrow – Click on Animate Tool – Position – arrange to Starting Point
Click on 60th Frame Arrow – Click on Animate Tool – Position – Arrange to Finishing Point
Render – Output Settings – Save in (Exam10_products) – Choose – Change the name (Reg No_Archer) – Change ttf to Mp4 - Render

QUESTION 12

For more Resources visit Bhavishya

Create an animation scene of a ball rolling down a hill using OpenToonz software.

Hints :

- Copy the **OpenToonz** folder from the **Exam10_Documents** and paste it to the **Documents** folder in **Home**.
- Set the file name of the project being prepared inOpenToonz as **Ball.**
- Set the following video profile for the scene that is being created.

Scene Name	:	Scene1
Camera Size	:	HD720,1280x720, 16/9
Units	:	pixel
Frame Rate	**:**	**12**

- **The animation scene being created should be for 5 seconds.**
- Use the image namely **hill.png** given in the **OpenToonz** folder as background.
- Draw the ball in vector layer and then apply pink colour to it.

Save the completed animation scene with **yourRegisterNo_Ball** as file name to **Exam10_Products** as **MP4** video. (If it is exported to Desktop, rename it and copy to Exam10_Products folder).

Home – Exam10_documents – Right Click on the Folder Open Toonz –Copy – Click on Documents – Right Click – Paste
Show Application – Open Toonz – New Project – Type the Project name (Ball) – Ok
Click on New Scene – Type the Scene Name (Scene 1) – Change the Camera Size (HD720.1280x720,16/9) – Change the Unit (Pixel) – Change the Frame Size (12) – Click on Create Scene
Click on Animation Room – Right Click Frame 1 in Column 1 – Load level – Select the Folder Documents – Open Toonz – hill.png – Load – Drag the image to 60th Frame
Click Frame 1 in Column 2 – Click on Drawing Room - Click on Brush Tool – Draw a Ball – Colours – Add New Style - Select a colour – Click on Fill Tool – Fill the colour to Ball
Click on Animation Room – Right Click Frame 1 in Column 2 - Drag the image to 60th Frame
Click on Fist Frame Ball – Click on Animate Tool – Position – arrange to Starting Point
Click on 60th Frame Ball – Click on Animate Tool – Position – Arrange to Finishing Point
Render – Output Settings – Save in (Exam10_products) – Choose – Change the name (Reg No_ball) – Change ttf to Mp4 - Render

QUESTION 13

Create an animation of a bird flying away from a tree using OpenToonz software.

For more Resources visit : Bio-vision

Hints

- Copy the **OpenToonz** folder from the **Exam10_Documents** and paste it to the **Documents** folder in **Home**.
- Set the following video profile for the scene that is being created.

Scene Name	:	Scene1
Camera Size	:	HD720,1280x720, 16/9
Units	:	pixel
Frame Rate	**:**	**12**

- The animation scene being created should be for 5 seconds.
- Use the image namely **Scenery1.png** given in the **OpenToonz** folder as background.
- The sequence images given in the **Bird 1** folder in **OpenToonz** can be used.
- Include the audio file namely **Music 1.mp3** given in the **OpenToonz** folder.

Save the completed animation scene with **yourRegisterNo_ Flying bird** as file name to **Exam10_Products** as **MP4** video. (If it is exported to Desktop, rename it and copy to Exam10_Products folder).

Home – Exam10_documents – Right Click on the Folder Open Toonz –Copy – Click on Documents – Right Click – Paste
Show Application – Open Toonz – New Project – Type the Project name (Bird) – Ok
Click on New Scene – Type the Scene Name (Scene 1) – Change the Camera Size (HD720.1280x720,16/9) – Change the Unit (Pixel) – Change the Frame Size (12) – Click on Create Scene
Click on Animation Room – Right Click Frame 1 in Column 1 – Load level – Select the Folder Documents – Open Toonz – Scenery 1.png – Load – Drag the image to 60th Frame
Right Click Frame 1 in Column 2 – Load level – Select the Folder Documents – Open Toonz – Bird.png – Load –Select the Dog Image Using Shift Key and Drag the images to 60th Frame
Right Click Frame 1 in Column 3 – Load level – Select the Folder Documents – Open Toonz – Music 1.mp3 – Load – Drag the image to 60th Frame
Click on Fist Frame Bird – Click on Animate Tool – Position – arrange to Starting Point
Click on 60th Frame Bird – Click on Animate Tool – Position – Arrange to Finishing Point
Render – Output Settings – Save in (Exam10_products) – Choose – Change the name (Reg No_Flying_bird) – Change ttf to Mp4 - Render

QUESTION 14

Create an animation scene of a bee flying to a flower using OpenToonz software.

For more Resources visit : Bio-vision

Hints:

- Copy the **OpenToonz** folder from the **Exam10_Documents** and paste it to the **Documents** folder in **Home**.
- Set the file name of the animation project being prepared in OpenToonz as **Bee**.
- Set the following video profile for the scene that is being created.

Scene Name	:	Scene1
Camera Size	:	HD720,1280x720, 16/9
Units	:	pixel
Frame Rate	**:**	**12**

- The animation scene being created should be for 5 seconds.
- Use the image namely **Scenery 2.png** given in the **OpenToonz** folder as background.
- Use the sequence images given in the **Bee** folder in **OpenToonz.**

Save the completed animation scene with **yourRegisterNo_Bee** as file name to **Exam10_Products** as **MP4** video. (If it is exported to Desktop, rename it and copy to Exam10_Products folder).

Home – Exam10_documents – Right Click on the Folder Open Toonz – Copy – Click on Documents – Right Click – Paste
Show Application – Open Toonz – New Project – Type the Project name (Bee) – Ok
Click on New Scene – Type the Scene Name (Scene 1) – Change the Camera Size (HD720.1280x720,16/9) – Change the Unit (Pixel) – Change the Frame Size (12) – Click on Create Scene
Click on Animation Room – Right Click Frame 1 in Column 1 – Load level – Select the Folder Documents – Open Toonz – Scenery 2.png – Load – Drag the image to 60th Frame
Right Click Frame 1 in Column 2 – Load level – Select the Folder Documents – Open Toonz – Bee – Load – Select the Bee Image Using Shift Key and Drag the images to 60th Frame
Click on Fist Frame Bee – Click on Animate Tool – Position – arrange to Starting Point
Click on 60th Frame Dog – Click on Animate Tool – Position – Arrange to Finishing Point
Render – Output Settings – Save in (Exam10_products) – Choose – Change the name (Reg No_bee) – Change ttf to Mp4 - Render

QUESTION 15

For more Resources visit : Bio-vision

ആകാശത്തിലൂടെ പറന്നു പോകുന്ന ഒരു വിമാനത്തിന്റെ ആനിമേഷൻ Opentoonz സോഫ്റ്റ്വെയറിൽ തയ്യാറാക്കുക.

സൂചനകൾ:

- Exam10_Documents നകത്തുള്ള OpenToonz ഫോൾഡർ കോപ്പി ചെയ്ത് Home ലെ Documents ഫോൾഡറിൽ പേസ്റ്റു ചെയ്തു വയ്ക്കുക.
- OpenToonz ൽ തയ്യാറാക്കുന്ന ആനിമേഷൻ സീനിനു താഴെ പറയുന്ന വീഡിയോ പ്രൊഫൈൽ ക്രമീകരിക്കുക.

Scene Name	:	Scene1
Camera Size	:	HD720,1280x720, 16/9
Units	:	pixel
Frame Rate	:	12

- OpenToonz ഫോൾഡറിൽ നൽകിയ Scenery 8.png എന്ന ചിത്രം ബാക്ക്ഗ്രൗണ്ടായി ഉപയോഗിക്കുക.
- OpenToonz ഫോൾഡറിലെ aeroplane.png എന്ന ചിത്രം ഉപയോഗിക്കാം
- വിമാനം ഒരു വശത്തുനിന്ന് മറുവശത്തേക്ക് ചലിക്കുന്ന രീതിയിൽ 5 സെക്കൻഡ് നേരത്തേക്കുള്ള അനിമേഷനാണ് തയ്യാറാക്കേണ്ടത്
- പൂർത്തിയാക്കിയ ആനിമേഷൻ mp4 ഫോർമാറ്റിൽ എക്സ്പോർട്ട് ചെയ്യുക.

എക്സ്പോർട്ട് ചെയ്ത ഫയൽ Home ലെ Exam10_Products എന്ന ഫോൾഡറിൽ നിങ്ങളുടെ RegisterNo_ aeroplane.mp4 ഫയൽ നാമമായി നൽകി സേവ് ചെയ്യുക. (ഡെസ്ക്ടോപ്പിലേക്കാണ് എക്സ്പോർട്ട് ചെയ്യുന്നതെങ്കിൽ പുതിയ പേര് നൽകി Exam10_Products എന്ന ഫോൾഡറിലേക്ക് മാറ്റണം)

Home – Exam10_documents – Right Click on the Folder Open Toonz – Copy – Click on Documents – Right Click – Paste
Show Application – Open Toonz – New Project – Type the Project name (Aeroplane) – Ok
Click on New Scene – Type the Scene Name (Scene 1) – Change the Camera Size (HD720.1280x720,16/9) – Change the Unit (Pixel) – Change the Frame Size (12) – Click on Create Scene
Click on Animation Room – Right Click Frame 1 in Column 1 – Load level – Select the Folder Documents – Open Toonz – Scenery 8.png – Load – Drag the image to 60th Frame
Right Click Frame 1 in Column 2 – Load level – Select the Folder Documents – Open Toonz – aeroplane.png – Load – Drag the image to 60th Frame
Click on Fist Frame Aeroplane – Click on Animate Tool – Position – arrange to Starting Point
Click on 60th Frame Dog – Click on Animate Tool – Position – Arrange to Finishing Point
Render – Output Settings – Save in (Exam10_products) – Choose – Change the name (Reg No_bee) – Change ttf to Mp4 - Render

QUESTION 16

സൂര്യഗ്രഹണത്തിന്റെ ആനിമേഷൻ open toonz സോഫ്റ്റ്വെയറിൽ തയ്യാറാക്കുക.

For more Resources visit : Bio-vision

സൂചനകൾ :

- Exam10_Documents നകത്തുള്ള OpenToonz ഫോൾഡർ കോപ്പി ചെയ്ത് Home ലെ Documents ഫോൾഡറിൽ പേസ്റ്റു ചെയ്തുവയ്ക്കുക.
- OpenToonz ൽ തയ്യാറാക്കുന്ന ആനിമേഷൻ സീനിനു താഴെ പറയുന്ന വീഡിയോ പ്രൊഫൈൽ ക്രമീകരിക്കുക.

Scene Name	:	Scene1
Camera Size	:	HD720,1280x720, 16/9
Units	:	pixel
Frame Rate	:	12

- OpenToonz ഫോൾഡറിൽ നൽകിയ sun.png എന്ന ചിത്രം ബാക്ക്ഗ്രൗണ്ടായി ഉപയോഗിക്കാം.
- അനുയോജ്യമായ കോളത്തിൽ ചന്ദ്രന്റെ ചിത്രം വരച്ച് കറുത്ത നിറം നൽകി സ്ഥാനം ക്രമീകരിക്കുക. (vector layer)
- മാതൃകയിൽ കാണുന്നതുപോലെ ചന്ദ്രൻ, സൂര്യന്റെ മുകളിലേക്ക് നീങ്ങി വരുന്ന രീതിയിൽ 5 സെക്കൻഡ് നേരത്തേക്കുള്ള ആനിമേഷനാണ് തയ്യാറാക്കേണ്ടത്
- പൂർത്തിയാക്കിയ ആനിമേഷൻ mp4 ഫോർമാറ്റിൽ എക്സ്പോർട്ട് ചെയ്യുക.

എക്സ്പോർട്ട് ചെയ്ത ഫയൽ Home ലെ Exam10_Products എന്ന ഫോൾഡറിൽ നിങ്ങളുടെ RegisterNo_ solar_eclipse.mp4 ഫയൽ നാമമായി നൽകി സേവ് ചെയ്യുക. (ഡെസ്ക്ടോപ്പിലേക്കാണ് എക്സ്പോർട്ട് ചെയ്യുന്നതെങ്കിൽ പുതിയ പേര് നൽകി Exam10_Products എന്ന ഫോൾഡറിലേക്ക് മാറ്റണം)

Home – Exam10_documents – Right Click on the Folder Open Toonz – Click on Documents – Right Click – Paste
Show Application – Open Toonz – New Project – Type the Project name (Ball) – Ok
Click on New Scene – Type the Scene Name (Scene 1) – Change the Camera Size (HD720.1280x720,16/9) – Change the Unit (Pixel) – Change the Frame Size (12) – Click on Create Scene
Click on Animation Room – Right Click Frame 1 in Column 1 – Load level – Select the Folder Documents – Open Toonz – sun.png – Load – Drag the image to 60th Frame
Click Frame 1 in Column 2 – Click on Drawing Room - Click on Brush Tool – Draw a Moon – Colours – Add New Style - Select Black colour – Click on Fill Tool – Fill the colour to Ball
Click on Animation Room – Right Click Frame 1 in Column 2 - Drag the image to 60th Frame
Click on Fist Frame Moon – Click on Animate Tool – Position – arrange to Starting Point
Click on 60th Frame Ball – Click on Animate Tool – Position – Arrange to Finishing Point
Render – Output Settings – Save in (Exam10_products) – Choose – Change the name (Reg No_ball) – Change ttf to Mp4 - Render

GROUP 2
SCRIBUS, QGIS, GEOGEBRA, STELLARIUM

For more Resources visit : Bio-vision

QUESTION 1

Design a School newspaper using Scribus software as in the model according to the hints given below.

Hints :-

- Use the file namely **School News.sla** given in the **Scribus** folder in **Exam10_Documents** for this.
- Include the text **School NEWS** as heading, colour it and arrange it as in the model. (Font: Ubuntu)
- Include the logo namely **Sample .png** given in the **Images10** folder.
- Include the text from the file namely **Sports.txt** given in the Scribus folder in Exam10_Documents, and arrange it as in the model.

Export the prepared file with your **RegisterNo_schoolnews** as file name in **pdf** format to the **Exam10_Products** folder.

Home – Exam10 _documents– Scribus – Double Click on School News.sla
Insert – Text frame – Draw Frame – Double in the Frame and Type the Text "school NEWS" – Select the text – Right Click – Content Properties – Change the Font to Ubuntu – Change the Font Size and Line Space - Change the Colour (Colours and effects)
Insert – Image frame – Draw Frame - Right Click on the Frame - Content – Get Image – Images10 – Sample.png - Ok - Right Click on the Image – Image – Adjust image to Frame
Insert – Text frame – Draw Frame – Right Click on the Frame - Content – Get Text – Exam10_documents - Scribus - Sports.txt – Ok - Select the Text - Right Click – Content Properties – Change the Paragraph Colour to White (Colours and effects) – Change the Heading Colour (Sports) Yellow.
File – Export – Save as PDF – Click on Change - Select the Folder Exam10_products – Type the File Name (Reg No_schoolnews) – Save

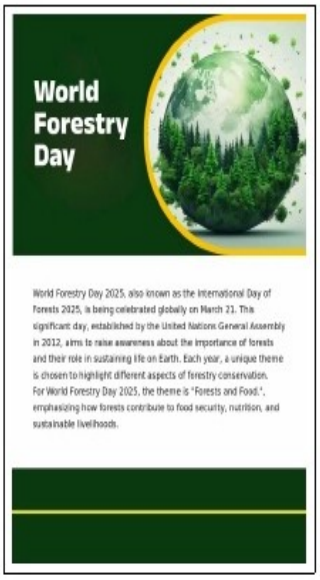

QUESTION 2

For more Resources visit : Bio-vision

Design a notice using Scribus software as in the model according to the hints given below.

Hints :-

- Include the image namely **World foresty day.png** from the **Images10** folder.
- Include the text **World Forestry day** as heading, colour it and arrange it as in the model (Font: Noto Sans).
- Include the text from the file namely **World forestry day.txt** given in the **Scribus** folder in **Exam10_Documents** and arrange the paragraph as in the model.
- Draw a rectangle below the paragraph and colour it.
- Draw a line on the rectangle and colour it (Line Width-2.000mm).

Export the prepared file with your **RegisterNo_forestryday** as file name in **pdf** format to the **Exam10_Products** folder.

Show Application – Scribus – Ok
Insert – Image frame – Draw Frame - Right Click on the Frame - Content – Get Image – Images10 – World Forestry day.png - Ok - Right Click on the Image – Image – Adjust image to Frame
Insert – Text frame – Draw Frame – Double in the Frame and Type the Text "World Forestry Day" – Select the text – Right Click – Content Properties – Change the Font to Noto Sans – Change the Font Size and Line Space - Change the Colour (Colours and effects)
Insert – Text frame – Draw Frame – Right Click on the Frame - Content – Get Text – Exam10_documents - Scribus - World Forestry Day.txt – Ok - Select the Text - Right Click – Content Properties – Change the Paragraph Colour – Change the Line Space
Insert – Text frame – Draw Frame – Right Click on the Frame - Properties – Colours - Select the Green Colour – Click on Line Tool – Draw a Line – Select the Line – Right Click – Content – Colours – Stroke – Select the Colour (yellow)
File – Export – Save as PDF – Click on Change - Select the Folder Exam10_products – Type the File Name (Reg No_forestryday) – Save

QUESTION 3

For more Resources visit : Bio-vision

Design a notice using Scribus software as in the model according to the hints given below.

Hints :-

- Include the image namely **Forestry.png** from the **Images10** folder as background.
- Include the text **World forestry day 2025** as heading, colour it and arrange it as in the model (Font: Noto Sans)
- Include the text from the file namely **World forestry day.txt** given in the **Scribus** folder in the **Exam10_documents**, and arrange the paragraph as in the model.
- Draws line on the top and bottom of the paragraph and colour them. (Line Width-2.000mm)

Export the prepared file with **your RegisterNo_forestry** as file name in **pdf** format to the **Exam10_Products** folder.

Show Application – Scribus – Ok
Insert – Image frame – Draw Frame - Right Click on the Frame - Content – Get Image – Images10 – forestry.png - Ok - Right Click on the Image – Image – Adjust image to Frame
Insert – Text frame – Draw Frame – Double in the Frame and Type the Text “World Forestry Day 2025” – Select the text – Right Click – Content Properties – Change the Font to Noto Sans – Change the Font Size and Line Space - Change the Colour (Colours and effects)
Click on Line Tool –Draw a Line – Select the Line – Right Click – Content – Colours – Stroke – Select the Colour (White)
Insert – Text frame – Draw Frame – Right Click on the Frame - Content – Get Text – Exam10_documents - Scribus - World Forestry Day.txt – Ok - Select the Text - Right Click – Content Properties – Change the Paragraph Colour (Yellow)– Change the Line Space
Click on Line Tool –Draw a Line – Select the Line – Right Click – Content – Colours – Stroke – Select the Colour (White)
File – Export – Save as PDF – Click on Change - Select the Folder Exam10_products – Type the File Name (Reg No_forestry) – Save

QUESTION 4

Prepare a magazine page using Scribus software as in the model according to the hints given below.

For more Resources visit : Bio-vision

Hints :-

- Include the image namely **Friend.jpeg** from the **Images10** folder as background.
- Include the poem from the file namely **Friends.txt** given in the **Scribus** folder in **Exam10_Documents.**
- Include the image namely **Tagore.png** given in the **Images10** folder.
- Arrange the text and image as in the model.

Save the prepared file with **your RegisterNo_Friends** as file name in **pdf** format to the **Exam10_Products** folder.

Show Application – Scribus – Ok
Insert – Image frame – Draw Frame - Right Click on the Frame - Content – Get Image – Images10 – friend.jpeg - Ok - Right Click on the Image – Image – Adjust image to Frame
Insert – Text frame – Draw Frame – Right Click on the Frame - Content – Get Text – Exam10_documents - Scribus - Friends.txt – Ok - Select the Text - Right Click – Content Properties – Change the Paragraph Colour (White)– Change the Line Space
Select the Heading (Friends...) – Right Click – Content Properties – Change the Font Size
Insert – Image frame – Draw Frame - Right Click on the Frame - Content – Get Image – Images10 – Tagore.png - Ok - Right Click on the Image – Image – Adjust image to Frame
File – Export – Save as PDF – Click on Change - Select the Folder Exam10_products – Type the File Name (Reg No_friends) – Save

QUESTION 5

For more Resources visit : Bio-vision

Prepare an info card on the great poet Sri. G. Sankara Kurup using Scribus software as in the model according to the hints given below.

Hints :-

- Include the text from the file namely **G Sankara Kurup.txt** given in the **Scribus** folder in **Exam10_Documents** to the page.
- Include the text **G.Sankara Kurup (3 June 1901 – 2 January 1978)** as heading and format it (Font: Noto Sans).
- Draw a rectangle and colour it. Arrange it as the background of the heading. (Black – Opacity - 30)
- Include the image namely **G.shankarakurup.jpg** from the **Images10** folder and arrange it as in the model.
- Draw the lines as in the model.

Export the prepared file with your **RegisterNo_SankaraKurup** as file name in **pdf** format to the **Exam10_Products** folder.

Show Application – Scribus – Ok
Insert – Image frame – Draw Frame - Right Click on the Frame - Content – Get Image – Images10 – G.shankarakurup.jpg - Ok - Right Click on the Image – Image – Adjust image to Frame- Right Click on the Frame – Properties – Click on Flip Horizontally Tool
Insert – Text frame – Draw Frame – Right Click on the Frame - Properties – Colours - Select the Gray Colour – Double Click on the frame – Type the Text (G. Shankara Kurup (3 June 1901 – 2 January1978) - Select the text – Right Click – Content Properties – Change the Font to Noto Sans – Change the Font Size and Line Space - Change the Colour (Colours and effects)
Click on Line Tool –Draw a Line – Select the Line – Right Click – Content – Colours – Stroke – Select the Colour
Insert – Text frame – Draw Frame – Right Click on the Frame - Content – Get Text – Exam10_documents - Scribus - G.Shanakarakurup.txt – Ok - Select the Text - Right Click – Content Properties – Change the Paragraph Colour - Size - Change the Line Space
Click on Line Tool –Draw a Line – Select the Line – Right Click – Content – Colours – Stroke – Select the Colour
File – Export – Save as PDF – Click on Change - Select the Folder Exam10_products – Type the File Name (Reg No_shankarakurup) – Save

QUESTION 6

For more Resources visit : Bio-vision

Design a Magazine page using Scribus software as in the model according to the hints given below.

Hints :-

- Use the file namely **Desert Exploration.sla** given in the **Scribus** folder in **Exam10_Documents** folder for this.
- Include the text **DESERT EXPLORATION** as heading, colour it and arrange it as in the model (Font: Anek Malayalam, Size: 65pt).
- Draw a line below the heading and colour it (Line Width-1.000mm).
- Set the contents in three columns (Gap 5mm).

Save the prepared file with **your RegisterNo_Desert** as file name in **pdf** format to the **Exam10_Products** folder.

Home – Exam10 _documents– Scribus – Double Click on Desert Explorattion.sla
Insert – Text frame – Draw Frame – Double in the Frame and Type the Text "DESERT EXPLORATION" – Select the text – Right Click – Content Properties – Change the Font to Anek MALAYALAM – Change the Font Size (65PT) and Line Space - Change the Colour (Colours and effects)
Click on Line Tool –Draw a Line – Select the Line – Right Click – Content – Colours – Stroke – Select the Colour (White)
Right Click on the Paragraph - Content Properties – Columns and Text Distances - Columns 3 – Gap 5 mm
File – Export – Save as PDF - Click on Change - Select the Folder Exam10_products – Type the File Name (Reg No_Desert) – Save

QUESTION 7

മാതൃകയിൽ നൽകിയിരിക്കുന്നതുപോലെ ഒരു പത്രത്താൾ Scribus സോഫ്റ്റ്വെയറിൽ തയ്യാറാക്കുക.

For more Resources visit : Bio-vision

സൂചനകൾ :

- Exam10_Documents ലെ Scribus ഫോൾഡറിനകത്തുള്ള News_Daily.sla എന്ന ഫയൽ തുറക്കുക.
- ഒരു ദീർഘ ചതുരം തയ്യാറാക്കി നിറം നൽകി, തലക്കെട്ടിന് പിന്നിലായി ക്രമീകരിക്കുക.
- Exam10_Documents ലെ Scribus ഫോൾഡറിനകത്തുള്ള Kerala_Extreme_Poverty.odt ഫയലിലെ ടെക്സ്റ്റ് ഉൾപ്പെടുത്തുക.
- ഉൾപ്പെടുത്തിയ ടെക്സ്റ്റ് 3 കോളങ്ങളിലായി ക്രമീകരിക്കുക
- (Gap : 4.0 mm)
- Images10 ൽ നിന്നും Poverty.jpg എന്ന ചിത്രം ഉൾപ്പെടുത്തുക.

NEWS DAILY

Kerala becomes first state in India to eradicate extreme poverty

തയ്യാറാക്കിയ ഫയൽ, നിങ്ങളുടെ RegisterNo_NewsDaily എന്ന ഫയൽ നാമം നൽകി pdf ഫോർമാറ്റിൽ Exam10_Products എന്ന ഫോൾഡറിൽ സൂക്ഷിക്കുക.

Home – Exam10 _documents– Scribus – Double Click on News_Daily.sla

QUESTION 1

A Python program to find the sum of numbers from **1 to 10** namely **Find_Sum.py** is given in the **Python** folder in **Exam10_Documents.** Modify the program so that it gives the sum of numbers from **29 to 37.**

```
count = 1
total = 0
while count <= 10:
    total = total + count
    count = count + 1
print("Sum is:", total)
```

Hints :-

- Open and run the given program in IDLE.
- Add the code so that the sum of numbers from **29 to 37** is given as output.

Save the edited program using **Save As** with **your RegisterNo_Sum.py** as file name to **Exam10_Products** folder.

Home – Exam10 documents– Python – Right Click on Find-Sum.py – Open with other Application – IDLE - Select

Edit

Count = 29

While count<=37:

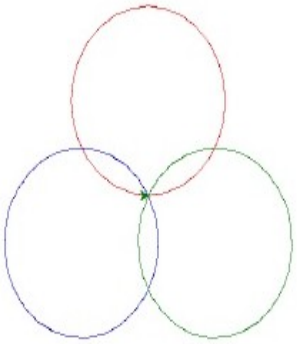

File – Save as – Exam10_Products – Type the File Name (Reg No_Sum) – Save

Home – Exam10_Products - Right Click on Newly Saved File – Open with other Application – IDLE – Select – Run – Run Module

QUESTION 2

For more Resources visit : Bio-vision

A Python program namely **Draw_Circle.py** to draw three circles of different colours at equal angular distance as in the image below, is given in the **Python** folder in **Exam10_Documents.** When the program is run, the expected output is not obtained. Make necessary changes in the program to obtain the output as in the image.

```
from turtle import *
colors = ["red", "blue", "green"]
for clr in colors:
    color(clr)
    circle(100)
    left(70)
```

Hints :-

- Open and run the given program in IDLE.
- Add the necessary code to obtain the output as above.

Save the edited program using **Save As** with **your RegisterNo_Circle.py** as file name to **Exam10_Products** folder.

Home – Exam10 documents– Python – Right Click on Draw_Circle.py – Open with other Application – IDLE - Select

Edit

left(120)

File – Save as – Exam10_Products – Type the File Name (Reg No_Circle) – Save

Home – Exam10_Products - Right Click on Newly Saved File – Open with other Application – IDLE – Select – Run – Run Module

QUESTION 3

For more Resources visit : Bipinvision

A Python program namely **Find_Grade.py** which returns the grade on giving the score obtained in an examination as input, is given in the Python folder in **Exam10_Documents.**

When this program is run, no grade information is obtained if the input score is less than 50.

Modify the program so that **"No Grade "** is printed when the **input score is less than 50.**

Hints :-

- Open and run the given program in IDLE.
- Add necessary code to obtain the output as above.

```
score = int(input("Enter your score: "))
if score >= 90:
    print("Grade = A+")
elif score >= 80:
    print("Grade = A")
elif score >= 70:
    print("Grade = B+")
elif score >= 60:
    print("Grade = B")
elif score >= 50:
    print("Grade = C+")
```

Save the edited program using **Save As** with **your RegisterNo_Grade.py** as file name to **Exam10_Products** folder.

Home – Exam10 documents– Python – Right Click on Find_Grade.py – Open with other Application – IDLE - Select

Type the next line

else:

print(“No Grade”)

File – Save as – Exam10_Products – Type the File Name (Reg No_Grade) – Save

Home – Exam10_Products - Right Click on Newly Saved File – Open with other Application – IDLE – Select – Run – Run Module

QUESTION 4

A Python program namely **Find_Category.py** is given in the **Python** folder in **Exam10_Documents**, which returns the category as **Senior, Junior, Sub – Junior** if the name and age of persons above 12 years are given as input. Make the necessary changes in the program so that **"You are in kiddies Category"** is also printed whenever the age is below 12 years as input.

```
name = input("Enter your name: ")
age = int(input ("Enter your age: "))
print(name, ", your age is:", age)
if age >= 16:
    print("Your are in Senior Category")
elif age >= 14:
    print("You are in Junior Category")
elif age >= 12:
    print("You are in Sub-Junior Category")
```

Hints -:

- Open and run the given program in IDLE.
- Add the code to print **"You are in kiddies Category"** also if the age is below 12.

Save the edited program using **Save As** with **your RegisterNo_Category.py** as file name to **Exam10_Products** folder.

Home – Exam10 documents– Python – Right Click on Find_Category.py –

Open with other Application – IDLE - Select

Type the next line

else:

print(“You are in Kiddies Category”)

File – Save as – Exam10_Products – Type the File Name (Reg No_Category) – Save

ഒരു വശത്തിന്റെ നീളം നൽകിയാൽ, ഒരു സമചതുരത്തിന്റെ പരപ്പളവ് (area) കാ-ണുന്നതിനുള്ള പൈത്തൺ പ്രോഗ്രാമിന്റെ ചില ഭാഗങ്ങൾ താഴെ നൽകിയിരിക്കുന്നു. വിട്ടുപോയ ഭാഗങ്ങൾ കൂടി ചേർത്ത് പ്രോഗ്രാം പൂർത്തിയാക്കുക.

```
length = input("Enter the length:")
.....................................
print("Area :",area)
```

തയ്യാറാക്കിയ പ്രോഗ്രാം നിങ്ങളുടെ RegisterNo_square.py എന്ന പേരിൽ Exam10_Products ഫോൾഡറിൽ സേവ് ചെയ്തു പ്രവർത്തിപ്പിക്കുക.

Show Application – IDLE – File – New File

Type the programme

```
length=int(input("length"))
breadth=int(input("breadth"))
area=length*breadth
print("Area is", a)
```

File – Save – Exam10_Products – Type the File Name (Reg No_Square) – Save

Home – Exam10_Products - Right Click on Newly Saved File – Open with other Application – IDLE – Select – Run – Run Module

QUESTION 6

For more Resources visit : Bio-vision

ഒരു വ്യക്തിയുടെ ശരീര താപനില 370c കൂടുതൽ ആണെങ്കിൽ "Fever alert" എന്നും അല്ലെങ്കിൽ "Normal" എന്നും output നൽകുന്ന ഒരു പൈത്തൺ പ്രോഗ്രാമിന്റെ ചില ഭാഗങ്ങൾ നൽകിയിയിരിക്കുന്നു. വിട്ടുപോയ ഭാഗങ്ങൾ ഉൾപ്പെടുത്തി പ്രോഗ്രാം പൂർത്തിയാക്കുക.

```
temp = int(input("Enter body temperature in Celsius:"))
if temp > 37:
    ..................
else:
    ..................
```

തയ്യാറാക്കിയ പ്രോഗ്രാം നിങ്ങളുടെ RegisterNo_fevercheck.py എന്ന പേരിൽ Exam10_Products ഫോൾഡറിൽ സേവ് ചെയ്തു പ്രവർത്തിപ്പിക്കുക.

Show Application – IDLE – File – New File

Type the programme

```
temp =int(input("Enter the body temperature in Celsius"))
if temp>=370:
    print("Fever alert")
else:
    print("Normal")
```

File – Save – Exam10_Products – Type the File Name (Reg No_fevercheck) – Save

Home – Exam10_Products - Right Click on Newly Saved File – Open with other Application – IDLE – Select – Run – Run Module

QUESTION 7

For more Resources visit : Bio-vision

ഒരു സംഖ്യ ഇൻപുട്ടായി നൽകുമ്പോൾ അതിന്റെ ഗുണനപ്പട്ടിക പ്രിന്റ് ചെയ്യുന്ന വിധത്തിൽ താഴെ നൽകിയ പൈത്തൺ പ്രോഗ്രാമിനെ പരിഷ്കരിക്കുക.

```
num = 5

for i in range(1,11):
    print(i, "X", num , "=" , i * num )
```

സൂചന:

- പ്രോഗ്രാം പ്രവർത്തിക്കുമ്പോൾ വിലകൾ സ്വീകരിക്കുന്നതിന് input() ഫങ്ഷൻ ഉപയോഗിക്കാം.

പൂർത്തിയാക്കിയ പ്രോഗ്രാം നിങ്ങളുടെ RegisterNo_multitable.py എന്ന പേരിൽ Exam10_products ഫോൾഡറിൽ സേവ് ചെയ്തു പ്രവർത്തിപ്പിക്കുക.

Show Application – IDLE – File – New File

Type the programme

```
count=5
while count<=50:
        print(count)
        count=count+5
```

The details of children participating in the School Kalolsavam are given in the file namely **Kalolsavam_DB** in the **Exam10_Documents** folder in **Home**. From this, display the names of the children participating in the Drama competition alone using an SQL query.

Hints :

- A sample query to find the details of the girls participating in the competition is given below.

  ```
  select Students_Name from Students where Gender='F'
  ```

- Write the SQL query to obtain the names of children participating in the Drama competition in the Execute SQL tab and run it.

Take a screenshot of this and save it with **your RegisterNo_Drama.png** as file name to the **Exam10_Products** folder in **Home**.

(To take a screenshot, press the PrtSc key on the keyboard. Then, select the specified portion in the window that appears and press the Enter key. The screenshot file will be available in the Pictures/Screenshots folder in Home. Copy it to Exam10_Products and give it a specific file name).

Home – Exam10 documents– Kalolsavam_DB

Click on Execute SQL – Type the Command

select Students_Name from Students where

Item_name='Drama'

Click on Execute All

Take Screen Shot Using PrtSc Key in Key board – Crop the Image

Home – Pictures – Screen shot – Rename the Screen shot (Reg No._Drama) - Right Click on the Picture – Copy – Home – Exam10_products – Right Click – Paste

The details of the participants in the Kudumbasree Kalamela is provided in the database file namely **Kudumbasree.db** in the **Exam10_Documents** folder in **Home**. From this, display the names of the participants of Oppana competition alone using a SQL query.

Hints :

- Open the given data base file in DB Browser for SQLite software.
- A sample SQL query to get the details of male participants alone in the Kalamela is given below -

  select Participant_Name from Participant where Gender='M'

- Write the SQL query to display the names of the participants of Oppana competition in the Execute SQL tab and run it.

Take a screenshot of this and save it with **your RegisterNo_Oppana.png** as file name to the **Exam10_Products** folder in **Home**.

(To take a screenshot, press the PrtSc key on the keyboard. Then, select the specified portion in the window that appears and press the Enter key. The screenshot file will be available in the Pictures/Screenshots folder in Home. Copy it to Exam10_Products and give it a specific file name).

Home – Exam10 documents– Kudumbasree_DB

Click on Execute SQL – Type the Command

select Students_Name from Students where Participant='Oppana'

Click on Execute All

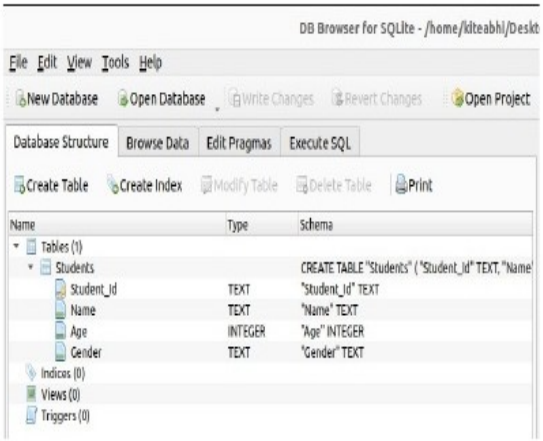

Take Screen Shot Using PrtSc Key in Key board – Crop the Image

Home – Pictures – Screen shot – Rename the Screen shot (Reg No._Oppana) - Right Click on the Picture – Copy – Home – Exam10_products – Right Click – Paste

QUESTION 11

For more Resources visit Bio-vision

Create a database using the DB Browser for SQLite software as per the instructions given below.

Hints :

- Save the database with **yourRegisterNo_School** as file name to the **Exam10_Products** folder in **Home**.
- Create a table named Students in the database with the following fields. Set the field Student_ID as the primary key.

Field Name	Data Type	Constraints
Student_ID	Text	Primary Key
Name	Text	
Age	Integer	
Gender	Text	

Show Application – Db Browser – New Data Base – Exam10_Products – Type the File Name (Reg. No_School) Type the Table Name (Students) – Add – Field 1 Change to Student_ID – Type Change to Text – Click on PK
Add – Field 2 Change to Name– Type Change to Text
Add – Field 3 Change to Age– Type Change to Integer
Add – Field 4 Change to Gender– Type Change to Text – Ok
Click on Browse data

QUESTION 12

QUESTION 1

The circuit diagram and Pictoblox code of a device made using an Arduino and Buzzer are given below. **On operating the device, pressing Space key will make the buzzer sound 5 times.**

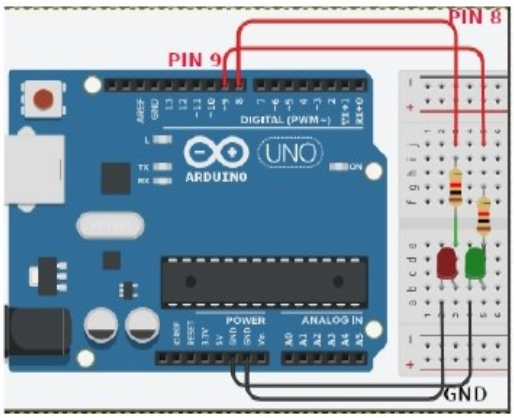

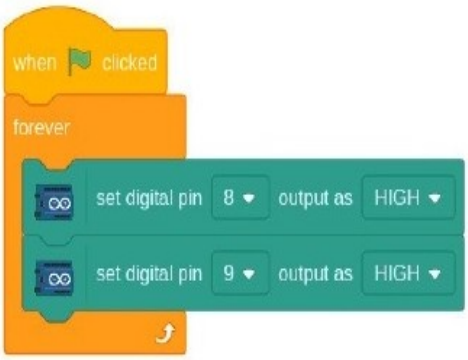

- Build the circuit using the components in the diagram, create the code in the Pictoblox and operate the device.
- **Modify the code so that when 'b' key on the Keyboard is pressed, the buzzer sounds 3 times,** and operate the device accordingly.

Save the edited program with **your RegisterNo_Arduino_Alarm.sb3** as file name to the **Exam10_Products** folder.
(Hint : Use **Stage Mode.** Upload the Firmware before running the program).

QUESTION 2

The circuit diagram and Pictoblox code for glowing 2 LEDs when the green flag in the Pictoblox, are given below.

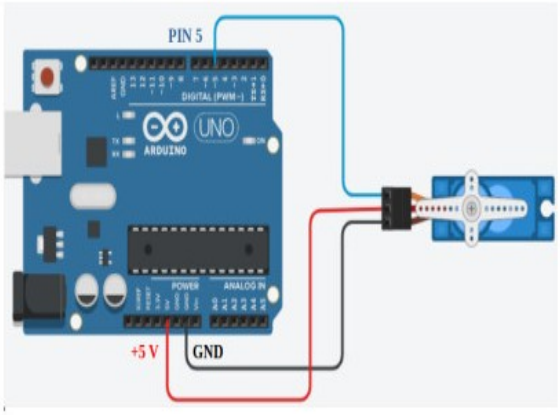

- Build the circuit using the components in the diagram, create the code in the Pictoblox and operate the device.
- Modify the code so that both the LEDs blink at a fixed interval and run the program.

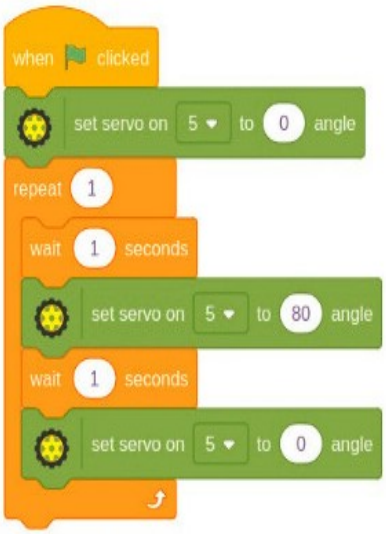

Save the edited program with **your RegisterNo_Blink2Led.sb3** as file name to the **Exam10_Products** folder.
(Hint : Use **Stage Mode.** Upload the Firmware before running the program)

QUESTION 3

For more Resources visit Bitvision

The diagram and Pictoblox code of a wiper made using an Arduino and Servo Motor are given below. **When green flag is clicked to operate the device, the wiper moves once at an angle of 80° and returns back.**

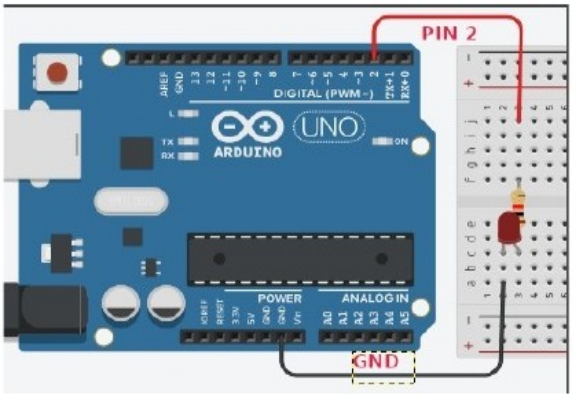

- Build the circuit using the components in the diagram, create the code in the Pictoblox and operate the device.
- Modify the code so that **when green flag is clicked, the wiper rotates up to 180° and returns, repeating this action 5 times.** Operate the device accordingly.

Save the edited program with **your RegisterNo_Arduino_Wiper.sb3** as file name to the **Exam10_Products** folder.
(Hint : Use **Stage Mode.** Upload the Firmware before running the program).

QUESTION 4

The circuit diagram and Pictoblox code to glow an LED when the letter 'a' on the keyboard is pressed are given below.

- Build the circuit using the components in the diagram, create the code in the Pictoblox and operate the device.
- Modify the code so that **the LED turns OFF when the letter 'b' on the keyboard is pressed and turns ON when the letter 'a' is pressed.** Operate the device accordingly.

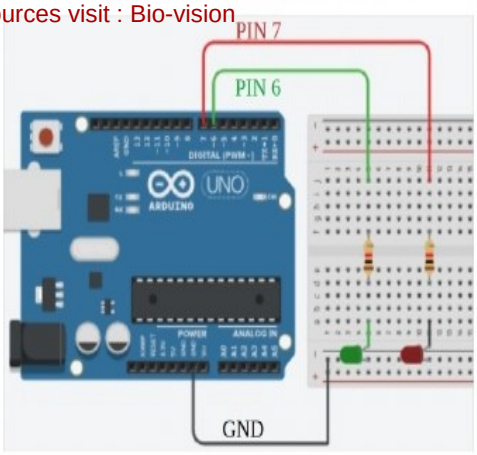

Save the edited program with **your RegisterNo_keyboardLed.sb3** as file name to the **Exam10_Products** folder.

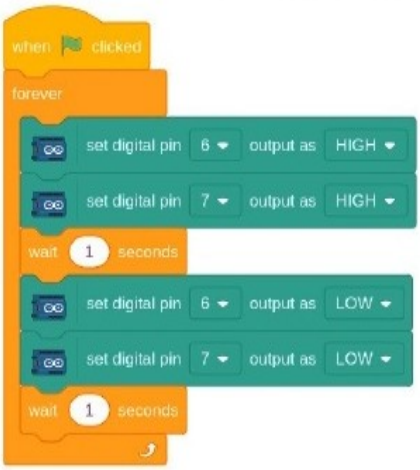

(Hint : Use **Stage Mode.** Upload the Firmware before running the program)

QUESTION 5

The circuit diagram and PictoBlox code for turning two LEDs ON and OFF at one second intervals are given below.

For more Resources visit : Bio-vision

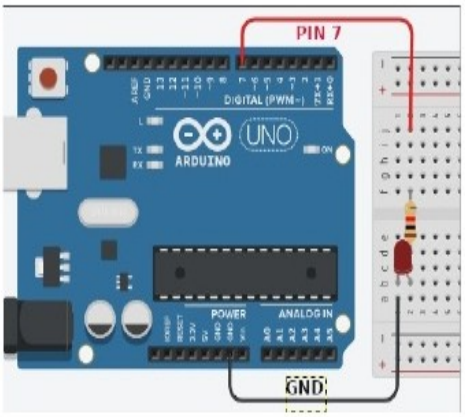

- Build the circuit using the components in the diagram, create the code in the Pictoblox and operate the device.
- Make necessary changes in the code and operate the device so that **both the LEDs blink alternatively (one LED is ON while the other is OFF)**.

Save the edited program with **your RegisterNo_Blink_2Leds.sb3** as file name to the **Exam10_Products** folder.
(Hint : Use **Stage Mode.** Upload the Firmware before running the program).

QUESTION 6

Given below is the circuit diagram and Pictoblox code prepared to blink an LED 5 times.

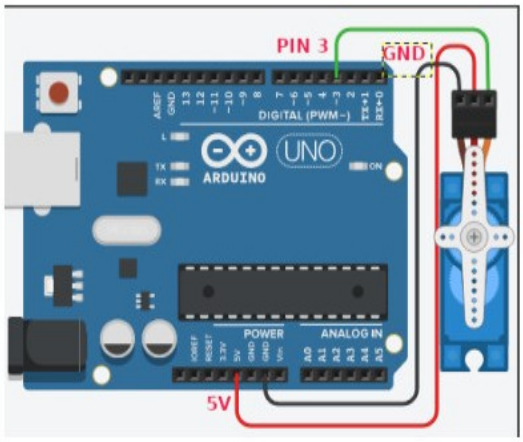

- Build the circuit using the components in the diagram, create the code in the Pictoblox and operate the device.
- Modify the code so as **to blink the LED 10 times** and run the program.

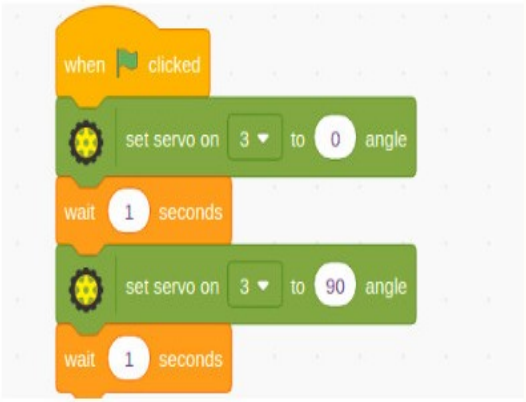

Save the edited program with **your RegisterNo_LED10.sb3** as file name to the **Exam10_Products** folder.
(Hint : Use **Stage Mode.** Upload the Firmware before running the program)

QUESTION 7

For more Resources visit : Bio-vision

The circuit diagram and Pictoblox code prepared for rotating the servomotor from **0°** to **90°** are given below.

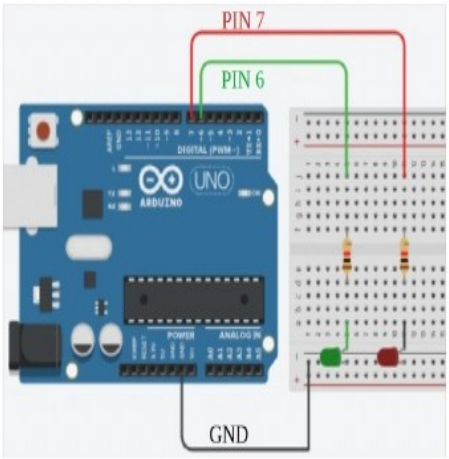

- Build the circuit using the components in the diagram, create the code in the Pictoblox and operate the device.
- Modify the code so that the servomotor moves from **0°** to **90°** and then to **180°** and run the program.

Save the edited program with **your RegisterNo_Servo.sb3** as file name to the **Exam10_Products** folder.

(Hint : Use **Stage Mode.** Upload the Firmware before running the program)

QUESTION 8

The circuit diagram and PictoBlox code for turning two LEDs ON and OFF at one second intervals are given below.

- Build the circuit using the components in the diagram, create the code in the Pictoblox and operate the device.
- Make necessary changes in the code and operate the device so that both the LEDs turn ON and OFF together.

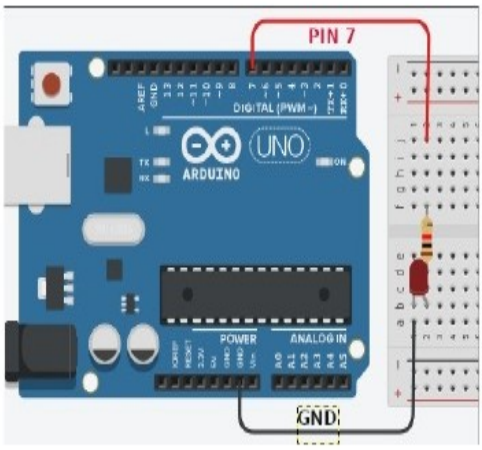

Save the edited program with **your RegisterNo_Blink_Together.sb3** as file name to the **Exam10_Products** folder.

(Hint : Use **Stage Mode.** Upload the Firmware before running the program).

QUESTION 9

For more Resources visit: Bio-vision

The circuit diagram and Pictoblox code for lighting an LED for one second are given below.

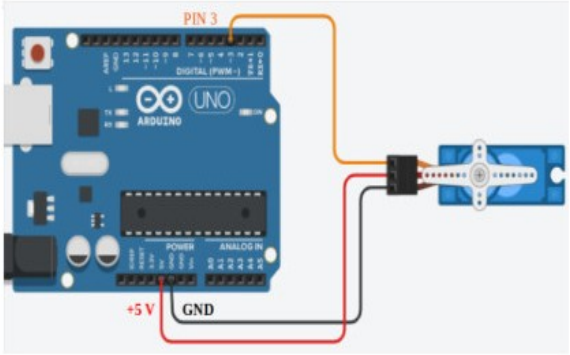

- Build the circuit using the components in the diagram, create the code in the Pictoblox and operate the device.
- **Modify the code so as to light the LED for 5 seconds and run the program.**

Save the edited program with **your RegisterNo_LED5.sb3** as file name to the **Exam10_Products** folder.

(Hint : Use **Stage Mode.** Upload the Firmware before running the program)

QUESTION 10

The circuit diagram and Pictoblox code of a PC_Controlled_Door made using Arduino and Servo Motor are given below.

- Build the circuit using the components, create the code in the Pictoblox and operate the device.
- **Click on the green flag. Then, when the 'd' key is pressed on the keyboard, the door opens to 30°, and when the 'c' key is pressed, the door closes. Modify the code so that when 'd' is pressed to open the door, it opens fully (180°), and operate the device accordingly**

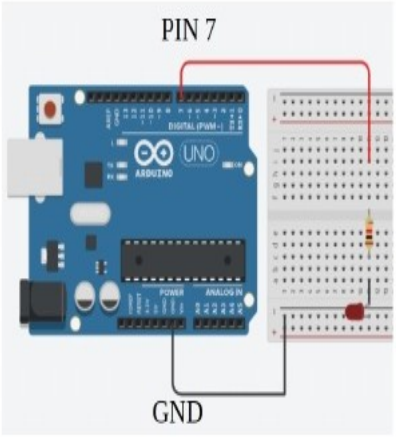

Save the edited program with **your RegisterNo_PC_Door.sb3** as file name to the **Exam10_Products** folder.

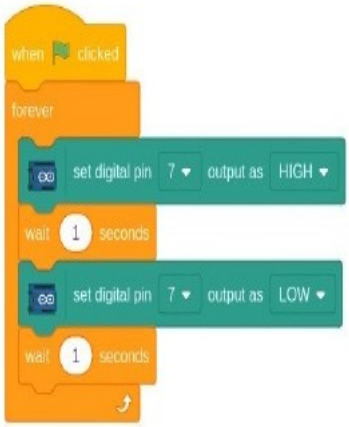

(Hint : Use **Stage Mode.** Upload the Firmware before running the program).

QUESTION 11

The circuit diagram and PictoBlox code for turning an LED ON and OFF at one second intervals are given below.

For more Resources visit : Bio-vision

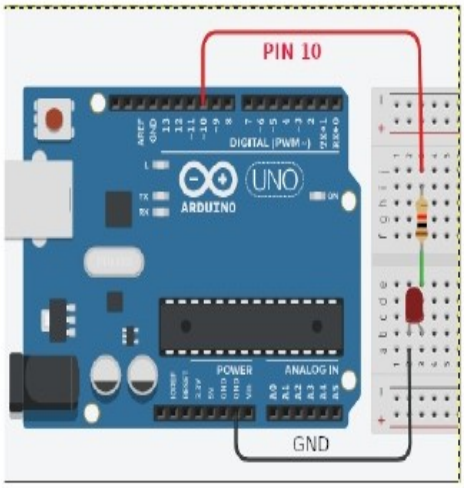

- Build the circuit using the components in the diagram, create the code in the PictoBlox and operate the device.
- Run the device by making the necessary changes in the code so as to **increase the speed at which the LED turns ON and OFF**.

Save the edited program with **your RegisterNo_Blink_LED.sb3** as file name to the **Exam10_Products** folder.
(Hint : Use **Stage Mode.** Upload the Firmware before running the program)

QUESTION 12

Given below are the circuit diagram and Pictoblox code to blink an LED.

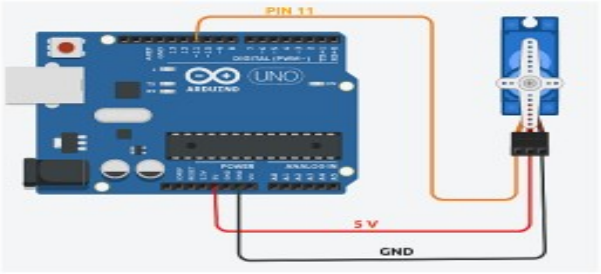

- Build the circuit using the components in the diagram, create the code in the Pictoblox and operate the device.
- Modify the code so that **the speed of blinking of LED is reduced** and operate the device accordingly.

Save the edited program with **your RegisterNo_Blinking.sb3** as file name to the **Exam10_Products** folder.
(Hint : Use **Stage Mode.** Upload the Firmware before running the program)

QUESTION 13

For more Resources visit Bio Vision

കീബോർഡിലെ RIGHT ARROW പ്രസ്സ് ചെയ്യുമ്പോൾ സെർവോമോട്ടോറിനെ 90° യിൽ നിന്നും 180° ലേക്ക് ചലിപ്പിക്കുന്നതിനായി തയ്യാറാക്കിയ ഒരു സർക്കീട്ട് ഡയഗ്രവും PictoBlox കോഡുമാണ് ചുവടെ നൽകിയിരിക്കുന്നത്.

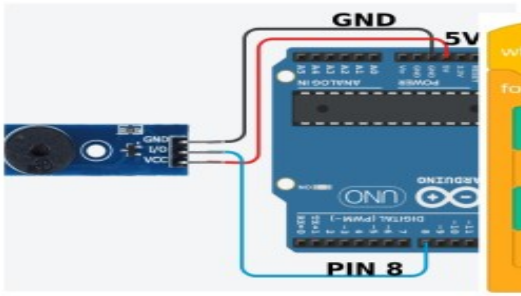

- ഡയഗ്രത്തിലെ ഘടകങ്ങൾ ഉപയോഗിച്ച് സർക്കീട്ട് നിർമ്മിച്ച്, PictoBlox ൽ കോഡ് തയ്യാറാക്കി ഉപകരണം പ്രവർത്തിപ്പിക്കുക.
- കീബോർഡിലെ LEFT ARROW എന്ന കീ പ്രസ് ചെയ്യുമ്പോൾ സർവോ മോട്ടോറിനെ 90 ൽ നിന്നും 0 ലേക്ക് കൂടി ചലിപ്പിക്കുന്ന വിധത്തിൽ കോഡിൽ ആവശ്യമായ മാറ്റം വരുത്തി ഉപകരണം പ്രവർത്തിപ്പിക്കുക.

മാറ്റം വരുത്തിയ പ്രോഗ്രാം Exam10_Products ഫോൾഡറിൽ നിങ്ങളുടെ RegisterNo_Leftarrow.sb3 എന്ന ഫയൽനാമം നൽകി സേവ് ചെയ്യുക.
(സൂചന: Stage Mode ഉപയോഗിക്കുക. പ്രോഗ്രാം പ്രവർത്തിപ്പിക്കുന്നതിന് മുമ്പ് Firmware അപ്‌ലോഡ് ചെയ്യുക).

QUESTION 14

ഒരു സെക്കന്റ് ഇടവേളയിൽ ബസ്സർ ബീപ്പ് ചെയ്തുകൊണ്ടിരിക്കുന്ന ഒരു വാണിങ് അലാം നിർമിക്കുന്നതിനായി തയ്യാറാക്കിയ സർക്കീട്ട് ഡയഗ്രവും PictoBlox കോഡുമാണ് നൽകിയിരിക്കുന്നത്. എന്നാൽ കോഡ് പ്രവർത്തിപ്പിക്കുമ്പോൾ ഓണാവുന്ന ബസ്സർ ഓഫാകുന്നില്ല.

- ഡയഗ്രത്തിൽ നൽകിയിരിക്കുന്ന ഘടകങ്ങൾ ഉപയോഗിച്ച് സർക്കീട്ട് തയ്യാറാക്കി കോഡ് പ്രവർത്തിപ്പിക്കുക.
- ഉപകരണം കൃത്യമായി പ്രവർത്തിക്കുന്നതിന് ആവശ്യമായ മാറ്റം കോഡിൽ വരുത്തി പ്രവർത്തിപ്പിക്കുക.

മാറ്റം വരുത്തിയ കോഡ് Home ലെ Exam10_Products എന്ന ഫോൾഡറിൽ നിങ്ങളുടെ RegisterNo_Beeps.sb3 ഫയൽ നാമമായി സേവ് ചെയ്യുക.

(സൂചന: Stage Mode ഉപയോഗിക്കുക. പ്രോഗ്രാം പ്രവർത്തിപ്പിക്കുന്നതിന് മുമ്പ് Firmware അപ്‌ലോഡ് ചെയ്യുക.)
