Preface

The Vijayabheri Education Project is a project planned and implemented by the Malappuram District Panchayat in the year 2001-2002 with the aim of comprehensive educational progress of Malappuram district.
This project has been able to change the educational face of the district in the last 24 years. The district, which was very behind in SSLC pass percentage, Plus Two pass percentage and competitive examinations, is today not only comparable to other districts in the state, but has also been able to surpass them in many areas.
Malappuram district is today the district with the highest number of A+s, the district where the highest number of children get admission to central universities, and the district that is leading in medical engineering entrance examinations. We have overcome the infamy of being an educationally backward district.

Unlike other districts, all the local self-government bodies and MLAs in the district today have special education projects. The inspiration for all such projects is the Vijayabheri Education Project. This project is being discussed not only at the state level but also at the national level. The Vijayabheri project is a subject of study for research students in universities.

The success of this project is not the success of the Malappuram District Panchayat, but the support of the teachers, parents and students who have undertaken it is the basis of the success of this project. Therefore, I would like to express my gratitude to them on this occasion.

Like in previous years, the new District Panchayat Board that came into existence this year has decided to take the Vijayabheri project forward with more vigor. As a first step, the question collection of all subjects is being released in a helpful manner for the students and teachers appearing for the SSLC examination this year.

Vijayabheri Malappuram Dist Panchayath

For more Resources visit : Bio-vision

This year's students will have to face new textbooks and a new type of examination method. Such a question collection has been prepared to conduct revision in a very helpful manner and to introduce new types of questions. Expected questions from all subjects and all lessons have been made available in it. It is hoped that this question collection will be very helpful to students and teachers.

We would like to specially congratulate the teachers who have stood by us in taking on such a heavy task during their daily activities and completing and publishing it on time.
