THE NATIONAL ANTHEM

Jana-gana-mana-adhinayaka, jaya he
Bharata-bhagya-vidhata.
Punjab-Sindh-Gujarat-Maratha
Dravida-Utkala-Banga
Vindhya-Himachala-Yamuna-Ganga
Uchchala-Jaladhi-taranga.
Tava shubha name jage,
Tava shubha asisa mage,
Gahe tava jaya gatha,
Jana-gana-mangala-dayaka jaya he
Bharata-bhagya-vidhata.
Jaya he, jaya he, jaya he,
Jaya jaya jaya, jaya he!

PLEDGE

India is my country. All Indians are my brothers and sisters.

I love my country, and I am proud of its rich and varied heritage. I shall always strive to be worthy of it.

I shall give my parents, teachers and all elders, respect and treat everyone with courtesy.

To my country and my people, I pledge my devotion. In their well-being and prosperity alone, lies my happiness.

Foreword

Dear Students,

I commend your initiative in exploring innovative pathways in Work Integrated Education.

In 'Personal Grooming', Part I of the Work Integrated Education prescribed for class IX, you reflected on your own skills and limitations. Through this process, you understood that each one of us possesses unique talents, and that comparing ourselves with others does not help us grow. What truly matters is nurturing our strengths while working to overcome our limitations. With this awareness, you also realized the importance of planning ahead for your future courses of study and the career paths you wish to pursue.

In Part II of the Class 9 Activity Book, you may have completed activities in one specific area. That book was one among a set of 11 Work Integrated Education activity books, each designed for a different area. As a continuation, in Part I of the class X Work Integrated Education Activity Book, you may have now completed the activities in your chosen area. As you progress through class X, it is essential to recognize that the stage of studying all subjects together will soon come to an end. Beyond this level, thoughtful choices become crucial.

From class XI onwards, learning takes you to new depths. You will begin to specialize by choosing subjects from those you have already studied, exploring them in greater detail. It is important to make these choices based on your genuine interests and to ensure that you are fully committed to learning the subjects you select. Only then will you be able to engage in careers that you enjoy, while also developing the essential skills needed for future success.

Part II of the Work Integrated Education is designed to guide you in making informed decisions about your future fields of study and possible areas of employment. Approach the contents of this book with seriousness and clarity. Participate actively in the discussions, complete the activities with care, and make full use of the opportunities it provides. In doing so, you will be able to prepare yourself meaningfully for the years ahead, ensuring that your learning journey remains both enjoyable and purposeful.

With best wishes for your future,

Dr. Jayaprakash R K

THE CONSTITUTION OF INDIA

PREAMBLE

WE, THE PEOPLE OF INDIA, having solemnly resolved to constitute India into a [1]**[SOVEREIGN SOCIALIST SECULAR DEMOCRATIC REPUBLIC]** and to secure to all its citizens :

JUSTICE, social, economic and political;

LIBERTY of thought, expression, belief, faith and worship;

EQUALITY of status and of opportunity; and to promote among them all

FRATERNITY assuring the dignity of the individual and the [2][unity and integrity of the Nation];

IN OUR CONSTITUENT ASSEMBLY this twenty-sixth day of November, 1949 do **HEREBY ADOPT, ENACT AND GIVE TO OURSELVES THIS CONSTITUTION.**

---

1. Subs. by the Constitution (Forty-second Amendment) Act, 1976, Sec.2, for "Sovereign Democratic Republic" (w.e.f. 3.1.1977)
2. Subs. by the Constitution (Forty-second Amendment) Act, 1976, Sec.2, for "Unity of the Nation" (w.e.f. 3.1.1977)

Unit 1

Ladder of Growth

"Our greatest ability as humans is not to change the world, but to change ourselves."

- Mahatma Gandhi

You are growing up, aren't you? By the time you finish your Plus Two, you will have turn eighteen and become an adult. However, only one stage of your education will be complete.

Pic 1.1

What responsibilities would you like to take on in the future? How would you like to be known?

Shouldn't one think about what can be done for family, relatives, friends, and the community? How can we find career paths that are enjoyable and helpful? How can you ensure your growth as a person?

Try to find answers to such questions. Personality develops as you progress by evaluating, analysing, and improving yourself.

Remember the lesson 'Personal Grooming' from Part I of Work Integrated Education for Standard IX.

Did that help you to redefine your goals? How useful were its activities for you?

Pic 1.2

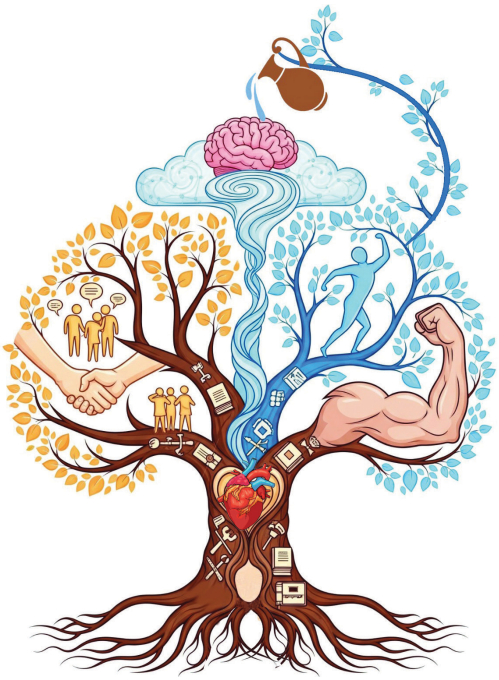

Personal development is fully accomplished when a person's knowledge, skills, and emotional sphere develop along with their intelligence and self-awareness. This requires conscious and continuous effort. This is made possible when you set goals, accept challenges, and learn continuously from successes and failures. To this end, the activities in this book will help you to step out of your comfort zones and take on challenges.

Activity 1

My Growth

What are your ideas about personal development? Look at the picture (1.3) developed by a child.

It refers to the various stages of personal development.

Pic 1.3

Personality

"Personality is the dynamic organisation within the individual of those psychophysical systems that determine the individual's unique pattern of behaviour, thinking and adjustment to the environment"

— G.W. Allport

Personality refers to the defining features that a person possesses with respect to thinking styles, attitudes, and unique patterns of behaviour.

Prepare a poster that illustrates your idea of personal development and display it in the class.

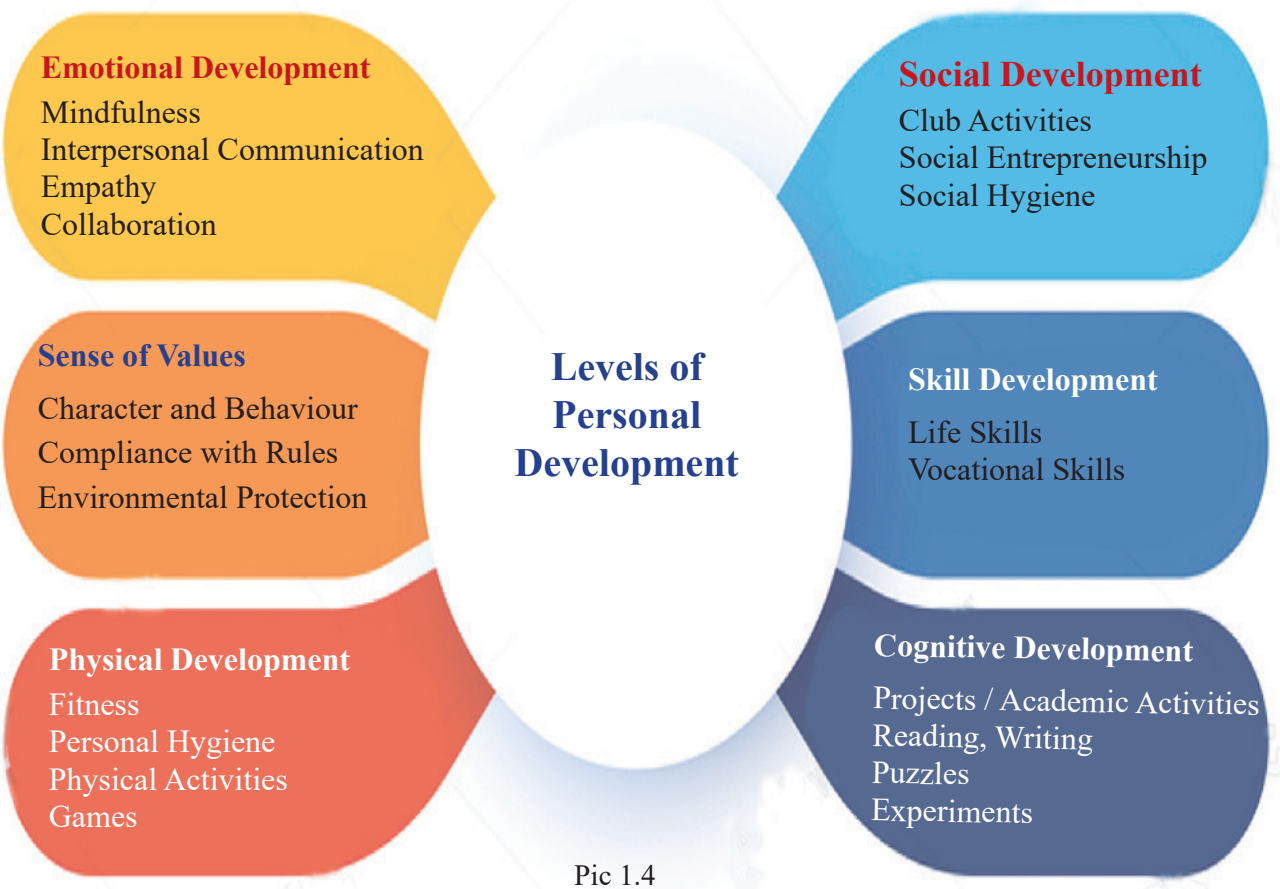

Evaluate the different perspectives and creative works of yourself and your friends.

Activity 2

Personal Development – Levels

The picture shows the different levels of personal development and the indicators that help to develop these levels.

Pic 1.4

Observe the picture (1.4)

We are all growing up. Some of these changes are visible, such as riding a bicycle or delivering a speech. Some others are invisible, such as having self-confidence, patience, and being responsible. Haven't you acquired these skills?

To what extent have the lessons of Work Integrated Education that you learned last year influenced your future planning?

What changes have you undergone during the last year?

Self-evaluate these changes based on school life, experiences, attitude, friendships, surroundings, mental and physical well-being, personal attempts, limitations, and improvements.

You may make use of the following indicators:

Indicators Description

Recognition of Skills

Recognising the skills and abilities useful for the future.

Perceptions about Thinking and Decisions

Clarity about work, studies, and interests.

Personal Development

Improvement achieved in responsibility, self-confidence, and time management.

Learning Habits and Active Participation

Active participation in class, group activities, and leadership.

Public Awareness

Increased awareness of environmental protection, resource use, and rule-following.

Social Relationships

Changes in interactions with friends and new relationships.

Creativity

Interest shown in arts and sports.

Internal Changes

Changes in faith, fear, enthusiasm, and goal setting.

Opportunities in School

Participation in learning methods, class activities, and extended activities.

Family and Society

Communication, support gained in difficult situations, and the role in decision-making.

Use of Social Media

Interventions and awareness in the proper use of technical gadgets, limiting screen time, cyber security and media literacy.

Prepare a collage, poster, picture, or cartoon and record your growth in the various levels of personal development, like cognitive development, social development, physical development, emotional development, skill development, and sense of values. Conduct an exhibition of your creations in the class.

Wouldn't this help you to analyse your growth track and plan your journey ahead?

Personal Development and Career Path

An important stage in a person's development starts with the career they choose. It is preferable for a learner to identify a suitable higher education field by recognising one's abilities and aptitudes during high school stage itself. One of the primary goals of Work Integrated Education is to create this awareness.

Which career field would you like to choose according to your abilities?

Following is the list of the different career fields you have acquired with while going through the Work Integrated Education Activity book.

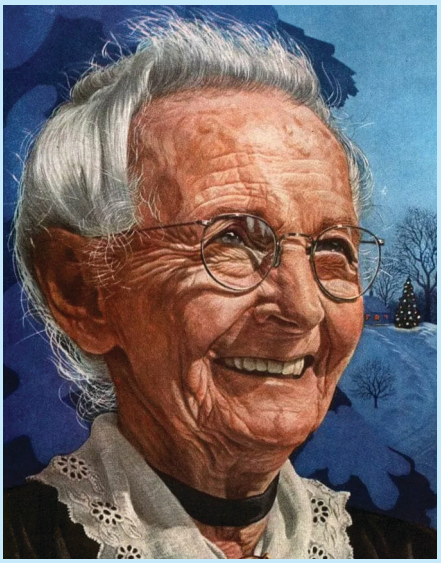

- Agriculture - The Science of Harvest
- Food Industry - The World of Flavours
- Green Technology- Green Technology Solutions for Waste Management
- Media and Entertainment – Know and Gain Media Skills
- Tourism – Tourism and Hospitality
- Finance - Financial Literacy
- Clothing - Passion in Fashion
- Housing - Basic ideas of Constructing Houses
- Plumbing - Pipes and Fittings - A Guide to Plumbing
- Electrical and Electronics - EC Tronics
- Printing and Stationery - Printing and Packaging

In which career field would you like to be—this or some other?

Have you ever thought about how you can reach your dream career?

Let's read the story of Grandma Moses.

Grandma Moses

Pic 1.5

Anna Mary Robertson Moses (later known as Grandma Moses) was born on September 7, 1860, in New York, US. She spent most of her life working on a farm, raising children, cooking and doing beautiful embroidery. At the age of 70, she began to feel pain in her hands. Doctors said that she was suffering from arthritis, and she could no longer hold a needle for embroidery. To spend her time, she started painting simple pictures of village life, snow-clad natural scenery, and farming scenes—things she had experienced throughout her life. Her paintings were simple, colourful, and filled with delight. Gradually, her work began to get noticed. By the age of 80, she had become a professional artist. She gained worldwide fame through her paintings and held more than 150 exhibitions in different countries.

You have read about the change that happened in the life of Grandma Moses. She discovered her passion for painting at the age of 70. What does Grandma Moses' life tell us?

Discuss with your friends.

Why was she so late to discover her passion for painting?

What benefits and opportunities would she have gained if her talent had been recognised earlier?

What are the advantages of recognising your talents early?

Activity 3

My SWOC

Grandma Moses life tells us that challenges will help us to recognise our new skills. Have you recognised your own abilities and limitations? What opportunities and challenges will you encounter?

SWOC is the short form for Strengths, Weaknesses, Opportunities, and Challenges. If we take advantage of opportunities by recognising our strengths and weaknesses and meeting challenges, we can discover new paths to go ahead in life.

Complete the worksheet given below.

My Strengths	My Weaknesses
• • • •	• • • •
My Opportunities	**The Challenges I face**
• • • •	• • • •

Based on the SWOC you have prepared, present your strengths and opportunities in the class.

Activity 4

Interview

Conduct an interview with experts in the field of psychology to understand how personal development can be achieved. For this, first prepare a questionnaire on the topics you would like to explore. After completing the interview prepare a detailed report based on the responses and include the report in your portfolio.

Activity 5

Step by Step to Achieve Your Dream

Pic 1.6

Personal development requires self-preparation. The first step is to set a clear Purpose, then formulate a suitable Plan and make the necessary Preparations. After that, it is important to Practise consistently, Perform your skills in real situations, and review your Progress at regular intervals to move forward. By following these steps, your abilities will improve and personal development will become Achievable.

Based on this, prepare a write-up on your personal development.

Key Takeaways

Gains			
Understood the importance of Personal Development.			
Realised the changes that have happened in me during the last one year.			
Prepared a SWOC that gives clear insights into how to face the challenges and move forward.			
Gained a better understanding of how to accomplish personal development.			

Unit 2

Navigating the Influences

"People exercise an unconscious selection in being influenced."

T.S. Eliot

Vanderlei de Lima, the iconic sports genius, left an indelible mark on the world with his radiant smile.

Pic 2.1

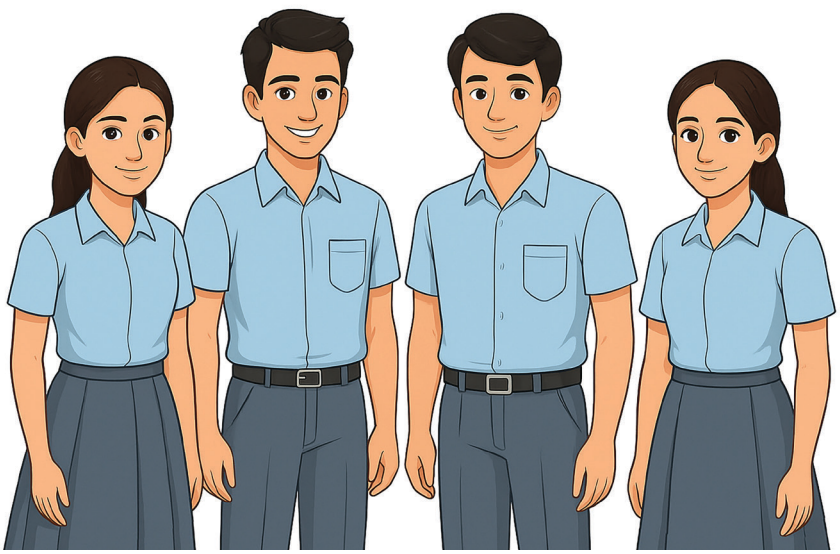

Vanderlei de Lima, a renowned Brazilian marathon runner, was making strides in the 2004 Athens Olympics marathon when a shocking incident altered the course of the race. At the 30-kilometre mark, while holding a comfortable lead, Brazil seemed destined for gold. But a shocking turn of events at the 35km mark left the world stunned. Lima was suddenly attacked by a spectator, disrupting his focus and momentum. Despite this setback, he didn't quit the race. He strode forward with determination and won the bronze medal. With unbridled joy, he celebrated his triumph, arms raised in victory, proclaiming to the world that his spirit remained unbroken. After the race, the media asked him, "Don't you feel angry?" He replied, " I was a victim, but i am not a angry man. I forgive him" It was his attitude that touched the world, demonstrating the true spirit of the Olympics. Considering his remarkable sportsmanship and dignity, even in the face of adversity, the International Olympic Committee recognised him with the prestigious Pierre de Coubertin Medal. He was selected to light the cauldron in the 2016 Rio Olympics. Crisis is inevitable in life, but coming back to the track makes the ultimate triumph.

No matter how good a plan is, unexpected things may occur when it is implemented. There are many external factors that can impact our plans. These influences can either help or hinder our progress. Instead of resisting circumstances, we can adapt and make the most out of them. By embracing life's uncertainties, we can turn challenges into opportunities and make our journey smoother.

As humans are social beings, they cannot lead a lonely life. Many factors may influence our thoughts and activities.

Activity 1

Friendly Dreams

Pic 2.2

Fida, Basil, Sujin and Mahija are studying together in the Tenth Standard. The teacher's question about their future goals ignited a discussion.

Starting the discussion, Fida said that she wanted to be a doctor. Her father is a pharmacist in a medical store. If she does not get the opportunity to become a doctor, she would prefer nursing.

Sujin aspires to join the Army, inspired by the courageous soldiers he sees in the news and in films. His uncle, an Army personnel, noticed his interest and introduced him to the NDA exam. With a clear focus on his future, Sujin is planning for his higher studies.

Pic 2.3

However, his father prefers him to pursue medicine or engineering. Sujin hopes his uncle can help him convince his father to support his Army ambitions.

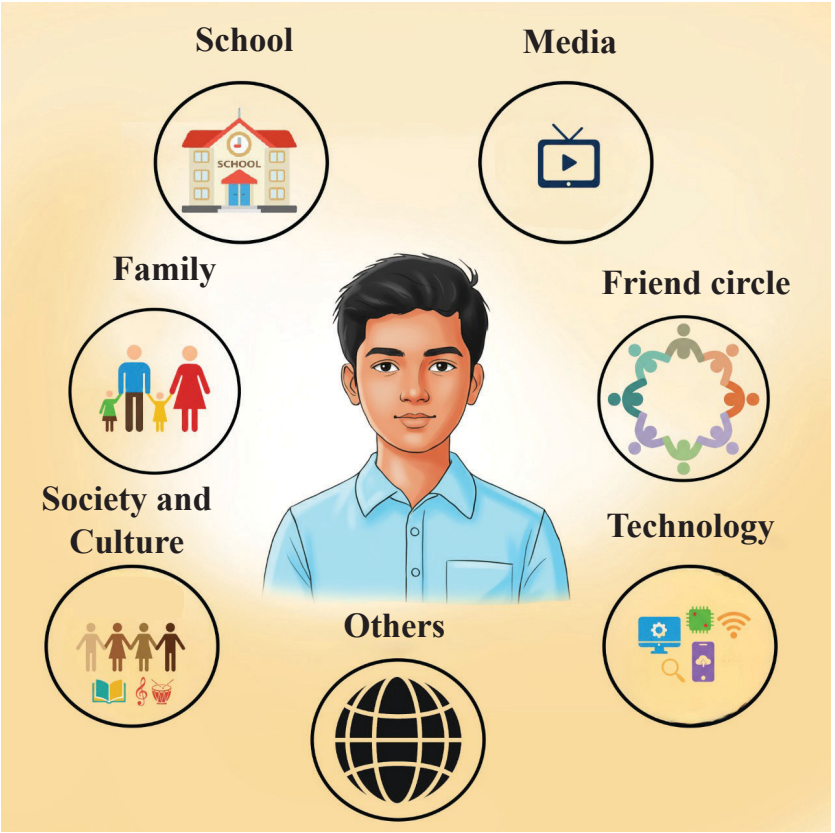

Basil's father used to work at a large clothing factory, but after it shut down, he now drives an autorickshaw. He attributes the factory's closure to its failure to adapt to changing times. Basil wants to pursue higher studies in design, hoping to revive the factory, but his father is sceptical due to financial constraints. "We can't afford to take that risk. If your plan fails, we'll be bankrupt, says his father." Basil feels apprehensive about the potential financial burden.

Mahija is passionate about agriculture and aspires to become an ideal farmer or an agricultural expert. Her interest in agriculture grew after listening to discussions at the nearby ‘Pada Sekhara Samithi’ committee office, which she passes by the library she visits every evening. She is inspired by the committee members' efforts to innovate and adapt farming practices despite natural calamities and climate challenges.

You have read about the dreams of the four classmates. Look at the picture given.

What are the factors that influenced the ambitions of these friends?

- Home
- School
-

Pic 2.4

Prepare a diary entry on your future career, considering the given indicators.

- My wishes
- My influencers (family, friends, other factors)
- Factors that hinder my dreams
- Solutions to overcome them

Don't forget to include these things while writing the diary. Based on the notes prepared by each student's career field, display their career fields on a wall magazine in the classroom.

Activity 2

Helping Hands

Pic 2.5

Our future dreams are shaped by various factors, some good and some bad. We should identify these influences, understand their advantages and disadvantages, and make choices that help us grow.

We mentioned Basil, who aspires to become an entrepreneur in the garment industry. Behind Basil's decision, there is an emotional layer. The lack of modernisation and new marketing strategies contributed to the closure of the company where his father and friends worked diligently. Basil is motivated by the concerns of the workers there, including his father. However, his family's financial status is poor. The modernisation and revival of the factory require a large investment. Basil worries that his family's financial situation is not sufficient to support for his studies in this field. These worries made Basil restless and distarcted him from his studies.

Fida was the first to notice the changes in Basil. She presented the matter to her Class Teacher, Farida.

The teacher congratulated him after listening to him carefully. The teacher said that modernizing and renovating the garment factory where his father worked could be a challenging task, even after learning from the struggles faced by his father and friends. "Such challenges need to be taken up bravely. There are institutions where you can study garment manufacturing, designing and related fields at a low cost. Those who study in such institutions can reach the best institutions through campus selection and gain work experience. Educational loans are easily available these days to cover the cost of studies. Loans are also available to start self-employment. Those who have aptitude, talent, confidence, and perseverance can make their dreams come true."

Teacher's words inspired Basil. His doubts and disappointment dissipated. His friends were thrilled when Basil's enthusiasm returned. With their emotional support and teacher's guidance, Basil's anxiety eased.

Did the situation mentioned above influence the friends' decisions? Likewise, what factors are likely to influence your own future decisions?

How can you overcome the negative influences?

-
-

Conduct a panel discussion on the topic with the support of your teachers. Include a career guide, a psychologist, parents, and teachers in this panel.

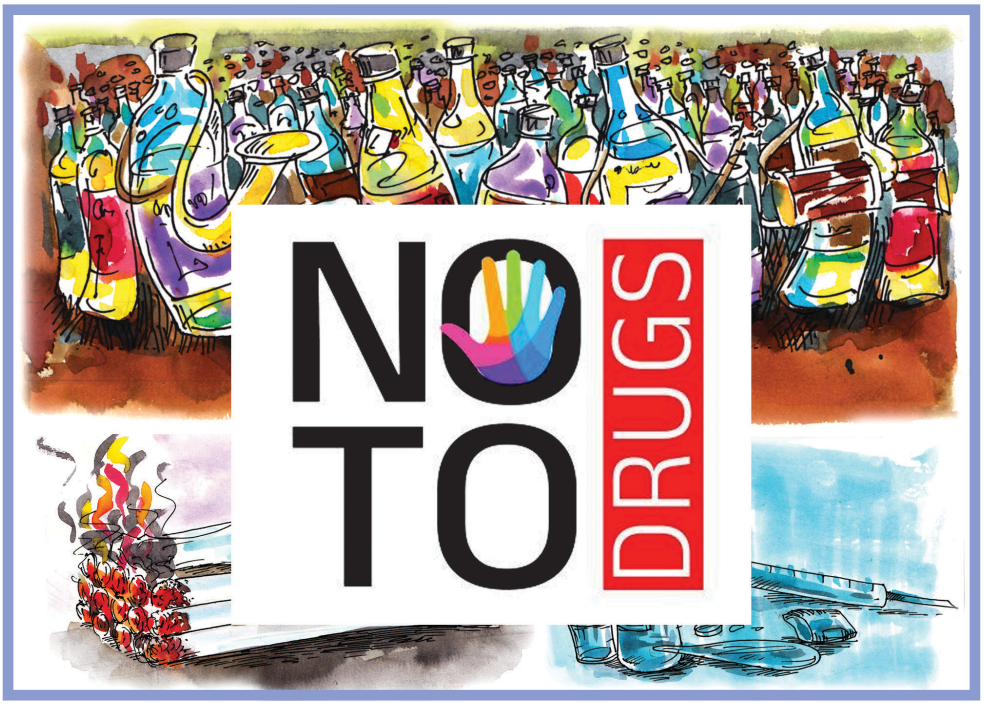

Activity 3

Carefully Moving Ahead

Deciding on life goals and career goals at the right time is crucial. We can overcome the negative situations through open discussions and self-evaluation.

Don't you think social situations during adolescence can have both positive and negative effects on individuals?

Pic 2.6

Why do some teenagers become the victims of drugs?

Why are they involved in drug abuse, conflicts, and similar situations?

During the curious teenage years, there is a high risk of falling into negative influences.

Someone you often see waiting at the bus stand strikes up a conversation and tries to befriend you. Within a few days, he asks for your personal details and persuades you to skip school for other forms of entertainment. He assures you that there are ways to earn money to fund these activities. To convince you further, he shows photos of other children involved in such activities.

How would you face this situation?

Record your response.

- What are the possible dangers that could arise if we fall into the influence of such a situation?
- From whom can you seek help?
- How can you solve the problem?

Organise a seminar on the topic – 'Unhealthy influences- caution and problem solving'.

Self-Control

During adolescence, socio-emotional changes make the transition from childhood to youth more adventurous. Teenagers often feel drawn to risky activities in an effort to gain attention. At this stage, the brain's dopaminergic system becomes highly active, which can trigger impulsive or reckless behaviour. However, the cognitive control system of the brain is still developing in early adolescence, which limits their ability to regulate impulses.

As individuals grow older, self-control improves due to the structural and functional development of the prefrontal cortex, the part of the brain responsible for emotional regulation. Therefore, it is important to remain cautious and make conscious choices to avoid harmful influences. Maintaining open communication with family members, friends, and teachers plays a key role in staying safe and making better decisions.

Activity 4

Complete the checklist to see if there is a possibility of falling under such negative influences.

Number	Statement	Always	Sometimes	Never
1	I keep scrolling through my mobile phone even while studying at home			
2	I am influenced to follow my friends' actions.			
3	I feel stressed due to my parents' expectations.			
4	I'm often late in completing my tasks.			
5	I feel uncomfortable expressing my lack of interest or disagreement openly.			

If your answers to the above questions are 'always' or 'sometimes', you need to be more

careful not to lose your independence, since staying away from such harmful influences requires determination and self-confidence.

Activity 5

Self-Contract

We must always be vigilant in developing and adhering to basic life values such as perseverance, honesty, and empathy. Human values are always appreciated everywhere in the world at every stage of life. In the modern world controlled by technology and artificial intelligence, human values are of great importance. There may be people, situations, or other conditions that distract us from our journey towards our goals. There may also face temptations. To overcome such challenges, we can enter into a self-contract.

The contract I make with myself

Date : .....

The things that harm my time and attention

1. .....
2. .....

The effort to overcome these starts now, and the activities I will do from today are

1. .....
2. .....

The people who can help me with this

1. .....
2. .....

I often look to them for guidance. Even when I face setbacks, I continue working toward my goals.

Name : .....

Signature : .....

Key Takeaways

Gains			
I understand the factors that influence career aspirations.			
I understand the factors that can hinder career-related decisions.			
I understand the ways to overcome negative influences.			
I understand whom to approach for help in achieving my goals.			

Unit 3

Emerging Career Fields

"Build your own dreams, or someone else will hire you to build theirs' "

- Farrah Gray

We discussed the factors that influence dreams related to determining life goals and the factors that hinder career-related decisions.

The future jobs and the future of jobs are the important factors to consider when shaping career goals. Not all job sectors that we like and wish to pursue will be equally stable or secure at all times. Some job sectors may change or become irrelevant over time. Even the current employment structure may undergo transformation.

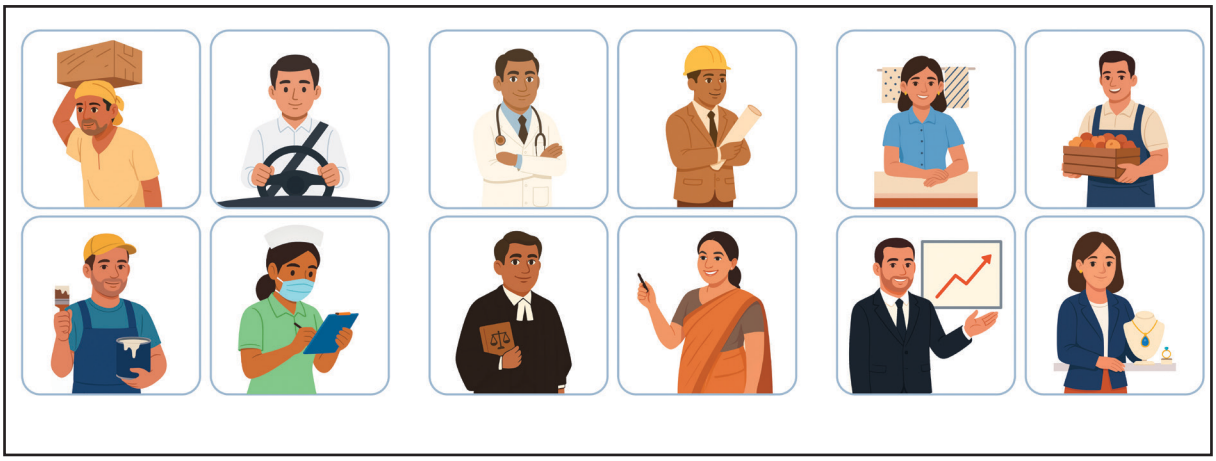

This chapter highlights the expected changes and trends in various career sectors in the coming years.

According to the World Economic Forum's 2025 Future of Jobs Report, by 2030, almost 170 million new jobs will be created globally, while 92 million existing jobs will be displaced. That means the jobs we currently aspire to may no longer exist, and new jobs that we cannot even imagine may emerge.

Activity 1

Employment Survey

Pic 3.1

Observe Picture 3.1, which illustrates various employment sectors. In your household and familiar surroundings, what types of occupations are people of different age groups engaged in? Collect information from them and complete the table below.

Sl. No.	Name	Age	Profession	Reason to select the profession

Table 3.1

Broad Areas Related to Occupations

The terms we often hear in connection with occupations include job, work, employment, profession, and vocation. These terms, which are associated with the broad fields of occupations, differ only in subtle ways. Based on the nature of work, occupations are generally classified into three types: employment, profession, and business.

Working under individuals, establishments, or the government to earn an income is known as employment. Bank employees, government staff, factory workers, and employees in various private sectors all fall under this category.

Professionals are individuals who require specialised education, training, and expertise, and who are governed by explicit ethical standards and professionalism. They earn income either through fees or salaries. Doctors, engineers, government officials, and chartered accountants who work in their own institutions are included in this category.

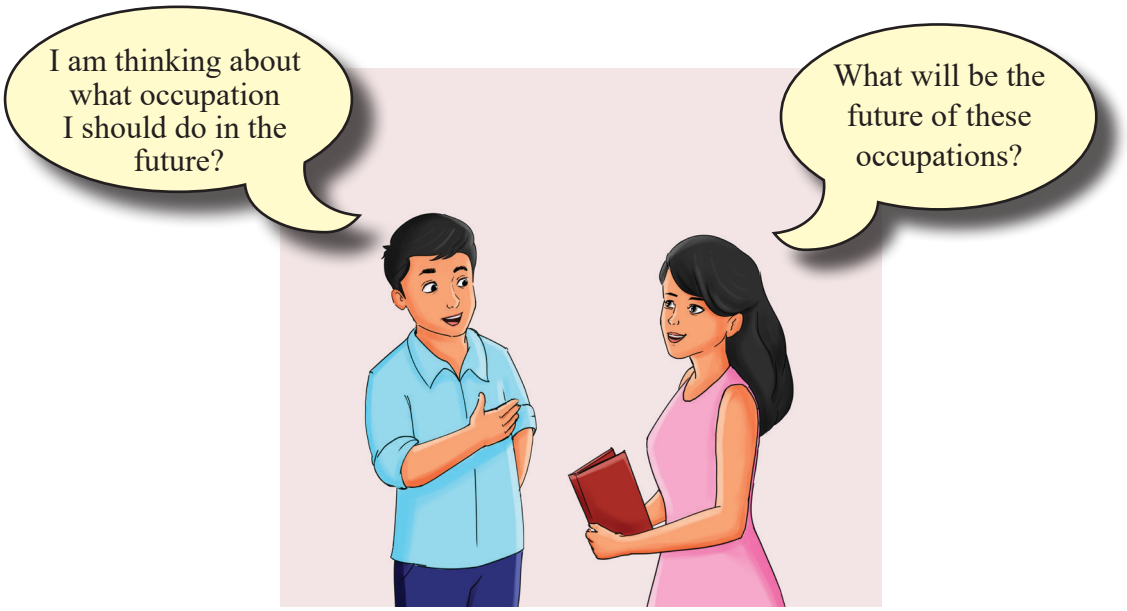

The trade and commerce sector refers to generating income through activities such as production, distribution, and marketing of goods and services. This sector includes everything from small-scale businesses to large-scale factories.

In Table 3.1, classify the activities you have recorded under the categories of employment, profession, and business.

Nature of Occupation	Employment	Profession	Business

Table 3.2

Occupational Trends

Pic 3.2

Job sectors are rapidly undergoing changes. With the spread of the internet and globalisation, new trends have emerged, such as remote-hybrid work, the gig economy, and the growing influence of artificial intelligence. These changes influence the job market and compel workers to adapt by actively engaging in upskilling and reskilling. They also encourage employers to reconsider traditional methods. Digital marketing, e-commerce, healthcare, and logistics are rapidly growing sectors. In the employment sectors, there are significant difference between traditional work practices and modern methods. Please refer to the table below.

Gig Economy

In the modern economic system, many jobs are becoming temporary or part-time. Work is being done both on a contractual basis and through digital platforms like apps. This is called the gig economy. This type of work offers greater freedom to those who engage in these jobs.

Old Job Trends	Modern Job Trends
A typical career path involves an individual working long-term in a single organisation, advancing through positions based on seniority and experience.	The new trend involves changing jobs and workplaces in search of new opportunities for the future (career mobility).
Work is mainly office- or organisation-based. It emphasised workers' direct presence and face-to-face interactions.	The number of people working mainly outside office or organisation-based jobs is increasing.
Most individuals spend the majority of their careers focused on a particular position or specialised area within a specific organisation. It is rare for individuals with different skills and from different organisations to work together towards common goals.	Individuals with diverse skills and from different organisations work collaborate to achive common goals.

Working hours are very strict, and opportunities for flexible arrangements, such as work-from-home are very limited.	Working hours are not very strict, and there are opportunities to adopt flexible schedules, including work-from-home options.
Give more priority to knowledge	Emphasis is given to practical skills and experiences, in addition to knowledge.

Table 3.3

Activity 2

Employment - Old Style, Modern Style

Classify familiar employment into those followed since ancient times and those that follow modern patterns.

Employments following conventional methods	Employments following modern methods
Bank cashier	Target oriented sales person

Table 3.4

Compare the classified items with the new-generation job opportunities shown below.

New Generation Job Sectors

- Artificial Intelligence, Machine Learning
- Data Science
- Cyber Security
- Prompt Engineering
- Cloud Computing
- Renewable Energy Engineering
- Healthcare
- Digital Marketing
- E-commerce and Supply Chain
- Fintech
-

Which of these job sectors are you familiar with?

Vanishing Jobs

Jobs that are gradually disappearing or becoming outdated due to factors such as technological advancement, automation, and changes in consumer preferences are referred to as vanishing jobs. According to the World Economic Forum's 2025 report, factors such as the growth of AI, self-check-in/check-out systems, online banking, and digital marketing cause many jobs to vanish. The report also highlights which jobs are expected to grow fastest and which are declining most rapidly between 2025 and 2030.

Co-working Space

A co-working space is a shared office environment where individuals, startups, and small businesses work together, collaborate and innovate.

Activity 3

Talk Show

You have realised that job sectors are no longer the same everywhere. What do you think is the future of current jobs in your region will be?

Organize a talk show on this topic.

Vanishing Jobs: Causes

Let's explore the most significant reasons for the vanishing of current jobs.

Automation and Robotics

Many jobs previously performed by humans are now being carried out by AI and robots. This shift is changing the types of jobs available across various sectors and is leading to the disappearance of some jobs.

Digitalization

The shift towards online platforms, mobile apps, and digital services is significantly affecting certain job sectors that requiring on physical presence.

Changes Occuring in Consumer Attitudes

Compared to traditional methods, consumers are choosing faster and more convenient

digital solutions as they become available. This reduces the need for human presence and leads to greater acceptance of technology.

Structural Re-organisation

There is a widespread trend to reduce costs and make operations more efficient by dismissals and automation. This affects certain jobs. The new generation should nurture with creativity and excellent problem solving skills, enabling them to adapt to the charecteristics of future job sectors. To maintain competitive strength in the changing job market, we need to gain new skills and knowledge.

Entrepreneurship and Startup

The world of work is constantly changing. The change is visible from the stage of getting a job to creating a job. It is in this situation that entrepreneurship becomes the hallmark of the modern economic system. Entrepreneurs are those who create new ideas with fresh perspectives and turn those ideas into products or services to bring to the market.

Entrepreneurship in Future : Different Sectors

1. Digital Entrepreneurship

Entrepreneurial initiatives utilizing mobile apps, online services, e-commerce, AI, IOT, and similar technologies.

2. Green Entrepreneurship

Entrepreneurial initiatives based on eco-friendly products, reuse, and green energy.

3. Social Entrepreneurship

Businesses that offer solutions to societal problems, such as health startups, waste management, and pollution control.

4. Tech Entrepreneurship

Businesses that use innovative ideas and creativity along with technology.

What is the Importance of Entrepreneurship for Students?

- To create job opportunities
- To enter local and global markets
- To ensure job security
- To build connections with various sectors and can lead to social empowerment.
- To generate income

Essential skills to become a successful entrepreneur

Skills	Description
Entrepreneurial mindset	Recognising opportunities and developing new ideas.
Communication skill	Building strong customer relationships and marketing skills.
Leadership	Leading the team towards the goal, Decision making.
Problem solving skill	Facing unexpected challenges.
Digital literacy	Awareness related to digital tools like social media and online marketing.

Table 3.5

Automation, AI, climate change, and population shifts bring about new trends in business and create new spaces for entrepreneurship.

Activity 4

Entrepreneurs in my locality

Prepare a class magazine titled 'Entrepreneurs in Our Locality'.

Indicators

- Identify the entrepreneurs in your locality
- Explain their business sectors
- Identify their unique features.

Prepare the magazine and present it in the class

Activity 5

The business I chose

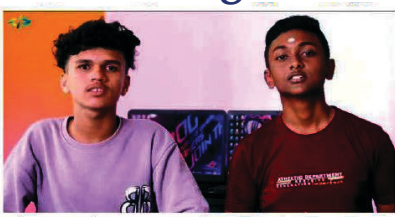

Start-up of tenth standard students with coding dreams

Kasargod: Tenth standard students are now assisting B.Tech and M.Tech scholars in preparing projects and mastering computer programming.

Surprised? There's more. They have launched a start-up named Code Cave Media, offering computer coding (programming) training and website design at affordable rates and have already started generating income from the venture.

K. Sreenand of Kuttikkol Government Higher Secondary School and Sravan Narayan of Kurumathoor GVHSS are these young start-up enterpreneurs

Results poured in almost instantly, with many approaching the duo right after the launch of their venture.

Sreenand and Sravan introduce their new startup through youtube channel

Enquiries have also been flowing in from countries such as the UAE, Saudi Arabia, South Africa, Finland, and beyond, seeking their expertise in this field.

Remarkably, these two student entrepreneurs had never met in person before starting their company; their collaboration began entirely online. They finally met in Kannur on the very day they came together for the official launch of their venture.

Pic 3.3

We have read the success story of Sreenand and Sravan. A startup is a newly established venture with a small team of founders and limited resources focused on developing and bringing a unique product, service or bussiness model to the world. If you plan to start your own business, what would it be? Share your ideas in class.

When each person presents, others will analyse using the practical aspects like feasibility, sustainability, marketing, and indicators of innovation.

Pic 3.4

Multitasking

As the modern work world becomes more technology driven, people often have to take on multiple responsibilities simultaneously. In such situations, multitasking becomes useful.

Multitasking is the ability to perform two or more different activities effectively at the same time. It has become a fundamental skill for future jobs.

Important Aspects of Multitasking

- Performing multiple tasks simultaneously with concentration.
- Time management
- Increased efficiency
- The ability to respond simultaneously to multiple situations
- The ability to proportionally reorganise activities
- A practice of collective thinking, quick decision-making, and shared responsibility

Identify situations in daily life where multitasking occurs and present a role play in the class.

Key Takeaways

Gains			
Jobs can be categorised according to different sectors.			
Can classify jobs into those following traditional methods and those following modern methods.			
Gained insights into the emerging new job opportunities.			
Learned about vanishing jobs, their causes, and possible solutions.			
Understood the importance of upskilling and reskilling.			
Understood the importance of startups and entrepreneurship.			
Understood the importance of multitasking.			

Unit 4

My Skill Development Plan

"Make it thy business to know thyself, which is the most difficult lesson in the world"

Miguel de Cervantes

We are all bestowed with unique skills, aren't we? Just observe your friends of yours. Some of them have language skills. They enjoy reading stories, writing poems, learning new languages. Some others may be very good listeners. They lend ears to others with empathy and understanding. Some others show great skills in presenting things before others. They may actively engage in presentation, acting, group discussion and what do they like. They are able to express their ideas with lucidity and will inspire others. Those who have artistic skills engage in drawing, painting, music, dancing etc. for self-expression. In fact, they have a great sensibility that allows them to view the world with imagination together with a sense of newness. Those who are good at puzzles seek pleasure in finding solutions to brainteasers and mathematical problems. They invent and repair devices.

So, we understand that each of us has different skills, and no skill is either superior or inferior. They open new vistas of formal studies with a career-focused aptitude and shape yourself in the best possible way. And remember, if you are able to find out your skills and explore the ways to use them in a meaningful way, you will definitely succeed in life.

Let's look at some examples.

Pic 4.1

Shilpa, the Story Teller

Shilpa likes drawing and writing stories. She creates picture stories in her notebook. She finds pleasure in doing this as a leisure activity. She never realized that her skills make her fit to choose the career in graphic designing, visual story-telling, animation, advertising, content creation and the like.

Ahan, the Troubleshooter

Ahan, when he is at home, he engages in repairing those things like fans, clocks, toys etc. when they stop working without being taught by anyone from outside. He never delves in to the huge possibilities of his skills. But these skills can enable him to choose a successful career in mechanical engineering, electrical work or product design.

Pic 4.2

Pic 4.3

Anaya, the Problem Solver

Anaya is extremely talented in forging consensus through a peaceful approach whenever her classmates go wild in group discussions, debates or conflicts. She wins the hearts of her teachers mainly because of her perseverance, empathy and leadership quality. Hence her teachers persuaded her that she possesses the skills that match to choose the career of a counsellor, social worker, moderator, team leader etc.

Jithin, the Event Manager

Pic 4.4

Jithin is a quiet reticent boy, who never tries to seek the attention of people wherever he is. But his friends always select him to do the whole job of organising programmes at school. And he does it very well. The skills he possess makes him suitable for the jobs of event management, logistics, co-ordination.

What do these examples show?

The truth is that not all talent is seen on stage or receive a big round of applause. Keeping things organised at home, helping others when needed, planing things properly and treating people with kindness are all skills - the invisible tools that help us succeed in life. Even if these skills may not always be noticed, but they are important.

- Don't you have these kinds of skills in abundance?
- Have you ever figured which skill you are good at?
- Do you know how to shape your future by understanding of the skills lying in you? In what way do you understant this?
- How will you develop these?

This chapter shows light on the understanding and developing of the skills lying in you. Through this you will definitely prompt yourself to set your goals in making your future safe.

Steps to Your Goal

We have realised that the first important thing is to know our skills. Once you realise your excellence and groom new skills, step by step you will reach your goals. Each step you take will move you forward to achieve your dream. Let's discuss each of these steps in detail. This will help you understand your abilities, potentials, it will help you to acquire the knowledge needed to develop your skill development plan.

My Strength

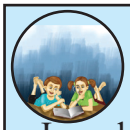

As we have already understood that our journey to growth begins from knowing our skills. We should be aware of our skills – personal or soft, academic, and social- that

make us know what we really are. It is vital to recognise our skills through learning activities, interactions with other people etc. in our daily life.

What is skill?

Generally, we define skill as the ability to do or complete a task or activity within a given time in an effective way.

Certain skills are natural and are innate while some others we attain through experience, practice or education. Indeed, these help us progress in studies, career and relationship

Life Skills

In order to lead a peaceful and successful life, one must gain not only knowledge and skills but also the ability to make appropriate decisions at the time required. The skills, that we practice in our life to overcome the problems and sometimes the challenges that come unexpectedly, can be addressed as life skills. The World Health Organisation (WHO) has identified life skills as abilities that enable individuals to adapt positively to the demands and challenges of everyday life. Generally, these involve the experiential knowledge, attitude, values and skills.

The Following are the Life Skills

1. Self-awareness – Understanding one's potential, emotions and feelings, strengths and weaknesses etc.
2. Empathy – Understanding others' feelings and being able to put oneself in their situation relating to other people's situations.
3. Critical Thinking – Analyzing the given knowledge and information logically and arriving at reasonable conclusions to form a standpoint.
4. Creative Thinking – Generating new ideas, finding new solutions to problems.
5. Decision Making – Taking appropriate decisions from the given choices after analyzing different options and possible consequences.
6. Problem Solving – Identifying challenges and finding effective solutions.
7. Effective Communication – Expressing oneself clearly and confidently after a careful understanding.
8. Interpersonal Relationships – Co-operating with fellow beings, collective activities, co–living with harmony.

9. Coping with Stress – Managing situations of stress, strife and strain effectively.
10. Coping with Emotions – Recognising and regulating emotions, controlling impulses, and responding appropriately.

By going through such a reliable documents, you can get a clear idea about 21st century skills, green skills and the skills needed for sustainable development.

Activity 1

My Skills

Pic 4.5

Listen to what some students have to say about them.

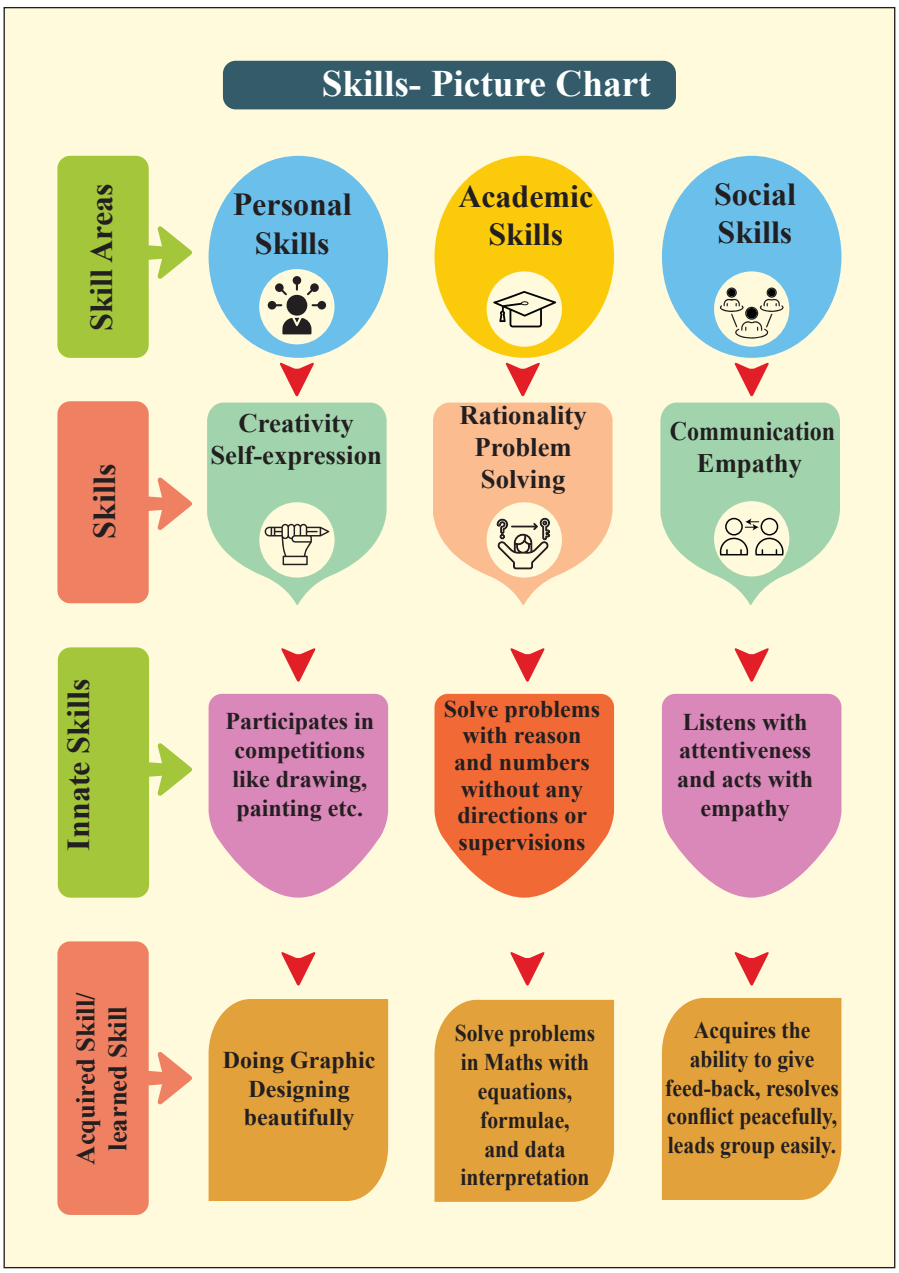

I am Nidhi. I draw pictures very well. I slowly learned to make digital posters with sketches using digital tools. I realised that creativity and self-reflection are the twin factors that helped me to grow up.

I am Riswan. I really like the world of numbers. I can answer questions on numbers quickly through mental computation. Eventually I gained distinction in solving mathematical problems and applying formulae. I willingly undertake problems of any kind that needs critical thinking and problem-solving skills.

I am Sara. I used to listen to others with patience and attentiveness. Often friends especially when they are upset or disturbed, used to visit me. Slowly I learned to present things patiently in group, resolve conflicts and engage with people in trouble.

Pic 4.6

How would you describe yourself in this way?

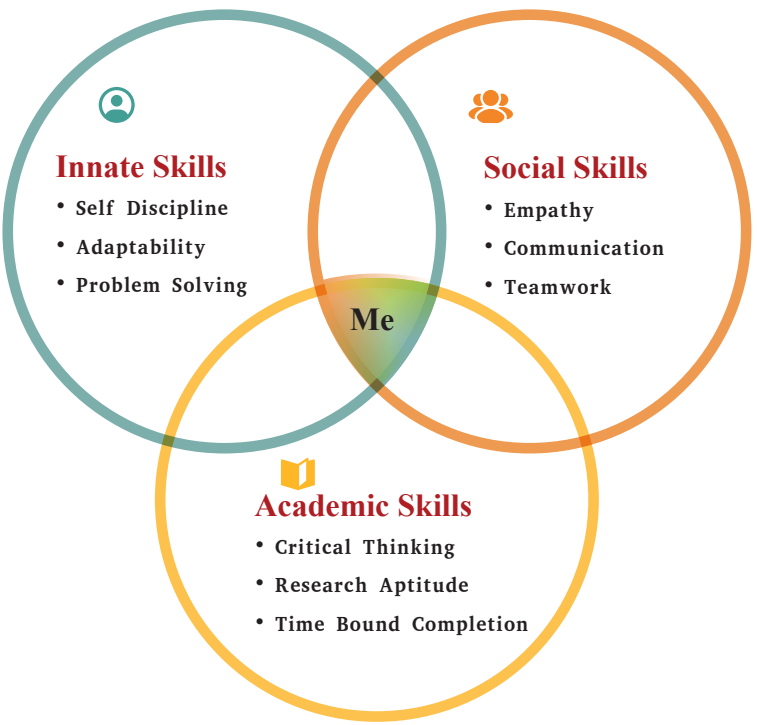

Write those in the activity book under the title ‘What I got to say’

Look at the points given to guide your ideas.

- Who am I?
- What are my innate abilities?
- What are my acquired skills/ learned skills?
- How do these skills help me?

Now let’s go for a presentation in teamwise. Once the team members listen, try to find out the skill of a member of your team. (For instance, empathy, leadership, singing etc.) Now let’s go for the preparation of a chart that shows the skills of your team members with a title, ‘Skills of Our Team Members’ and display it in the class.

Don’t forget to record in the activity book the skills you have identified according to their characteristics just as given below.

Pic 4.7

Activity 2

Skill Museum

Pic 4.8

Choose a skill that you are proud of. Organise a "Skill Exhibit" (a drawing, poster or story) to show how you use that skill. Organise a Skill Museum by arranging everyone's display in the class room. You may use this opportunity to honour and appreciate your classmates highlighting the expertise they had shown in that field.

My Career Path

Do you have dreams? Yes, for sure. Everyone will have dreams, right? Some of you wanted to become doctors, some to be farmers and some others to be journalists. Is it?...

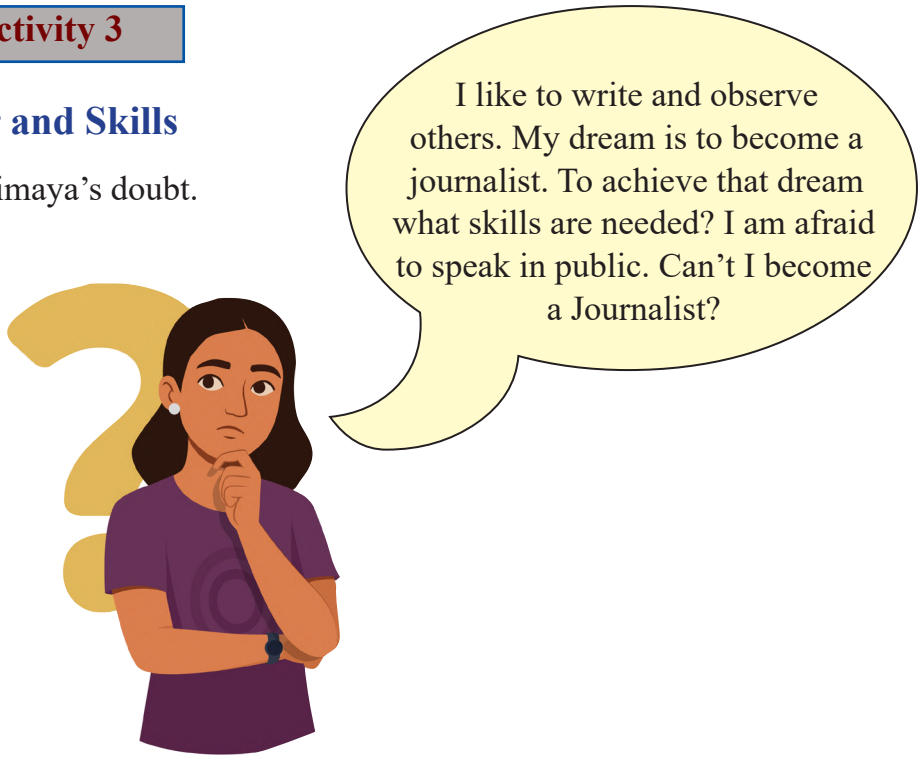

Which is your dream path?

Skills are those which guide you to reach that dream. You know what they are. You should know how to connect your skills with your career. You should identify your opportunities and connect the skills and career and through that find out how to reach your favourite field.

Activity 3

My Career and Skills

Listen to Vinimaya's doubt.

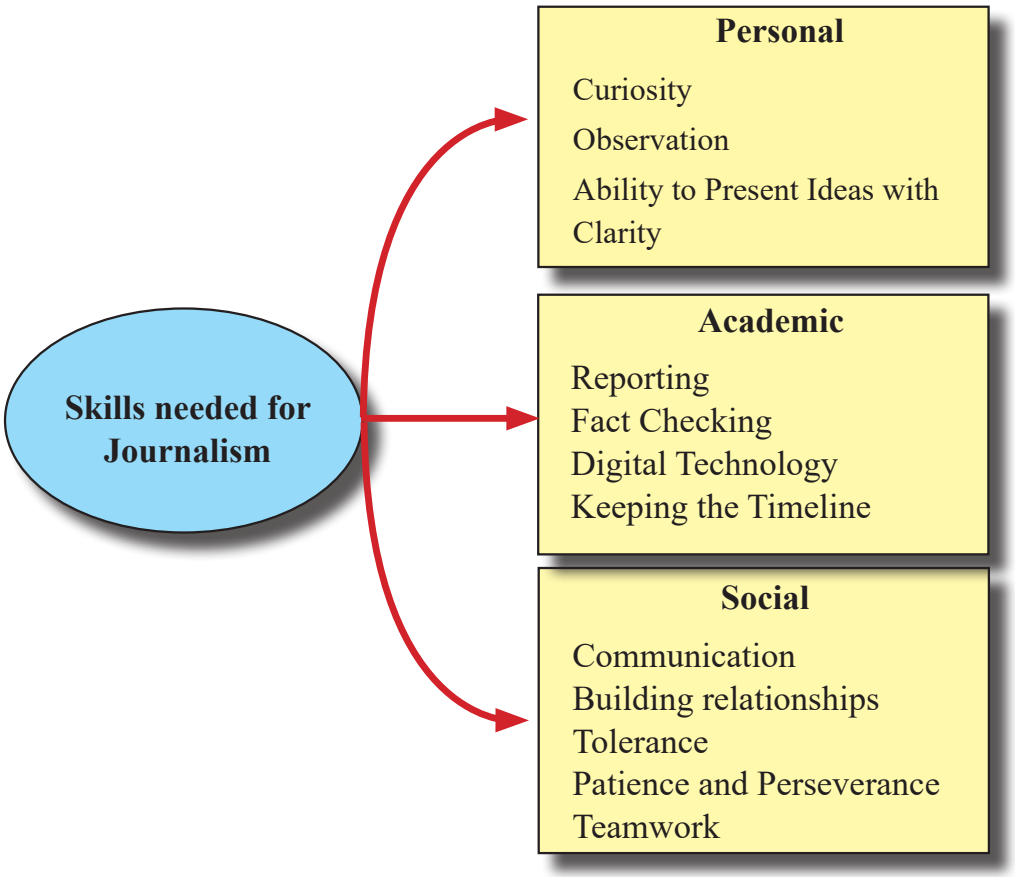

Pic 4.9

Review the information collected by Vinimaya regarding her career field.

Skill	Need
Ability to write	To write news, notes, reports etc.
Curiosity	To investigate and find out things.
Observation	To collect information by observing even small things.
Communication	To speak with people and collect data.
Reporting	To write information in detail and with accuracy and without any leakage.
Patience and self control	While asking questions and dealing with conflicts.
Time Management	To prepare news in a timely manner.

Table: 4.1

Notice how the skills needed for journalism are categorised into personal, academic and social.

Pic 4.10

What is your favourite career field?

What skills are needed for that?

To identify this, organise an interview with a career guide and prepare a questionnaire for the interview through a discussion. The insights gained from the interview should be marked in the activity book.

Skill Matrix

You have found the career field of your passion and the skills needed for that.

- Which of these skills do you have?
- How do you identify the skills you need to develop?

The next step is to find out what skills you are good at and what are to be improved, according to the goal. We learn many things as we grow. Some we do enjoy, some we understand easily and some others we find challenging. But how do we know which skills we have achieved to what extent and which skills still need to be doveloped through practice?

Skill matrix is a tool that helps us to figure it out. Instead of saying like, I have the ability to draw or I have no confidence in speaking , Skill Matrix can be used to analyse these perceptions, plan accordingly and organise them in a way that helps you to grow up.

What is Skill Matrix?

Skill Matrix is a visual map that helps you.

While using Skill Matrix:

- Skills can be clearly understood.
- Identifies areas for improvement.
- You can focus your efforts on improtant areas.
- Develop the attitude of taking responsibility in learning.
- Can develop a belief that skills be developed through efforts.
- Can prepare properly for higher studies and career.
- Develop the attitude of achieving new skills through self-learning.

Activity 4

My Skill Matrix

Observe the skill matrix prepared by Vinimaya. (Table 4.2)

Name : Vinimaya

Career Field : Journalism

	Key skills for a journalist	Skills that are not directly needed for a journalist
My excellences	Curiosity, observation skills, ability to write and present	Ability to draw pictures
Areas for improvement	Reporting ability Fact checking Handling digital devices communication,tolerance, patience	Photography

Table 4.2

- What perceptions do you get from this?
- What are the skills Vinimaya possess to become a journalist?
- Which of her skills need improvemnet?

- As a journalist, though she has the ability to draw pictures, what importance is to be given for that?

Prepare a skill matrix similar to the one prepared by Vinimaya according to your chosen career. Which of your skills are suitable for that career? Which ones you need to acquire?

Organise a skill matrix exhibition in the class.

My Skill Development

The skill matrix reveals the relationship between your skills and your goal. The next step is to find out, how to develop the skills that are needed for the career field that you aspire. There are many ways to do that. Choosing the right path is very important.

- Which skill development should I give priority?
- Which method is best for skill development?
- Is that method suitable for me?
- Whose support is needed?
- What time should be spent?

Consider all these things while planning the activities.

I need to know more about the world. I always observe people and events. I have confidence in my writing. But I cannot speak patiently in the discussion in the class and groups. I want to improve my communication skills along with reporting skills.

Activity 5

My Skills from Recognition to Growth

We listened to what Vinimaya said about herself. Observe how she marked in a table the things to be considered while planning activities for skill development.

Area	What are the things to be considered in this area?	Vinimaya's opinions
Defining goals	Does the path I chose relate to the goal to be a journalist?	I prefer to go to journalism field. For that I need to develop communication skills and reporting skills.

Current skills	What is my present skill in this area?	I can write and observe well. But I need to practise speaking style and reporting.
Practicability	How can it be made practical?	Speech practice (daily five minutes), try to speak in class groups, write the school news.
Interest and enthusiasm	Is this activity interesting for me?	I like to write and present. It is necessary to improve communication.
Support	Do I get the support of teachers, parents and friends?	My teacher encourages me. Friends support me.
Gradual growth	Can the activities to reach the goal be divided in to different steps?	Can plan a two minutes speech at first, then practice news reading and later prepare the notes.
Priority and time schedule	Which skill is very necessary now? What time should be given?	Practice speech for 10 minutes daily during the first three weeks. Next month is for writing and to study reporting.

Table 4.3

Like this, prepare indicators to be considered while planning skill development activities and present them in the class.

Skill Development Plan

The next step is to create your own skill development plan that will help you become a better person and start implementing it.

- What is my career goal?
- What should I do in each step?
- What time should be spent for that?

Skill development plan should be formed based on these things.

Activity 6

Skill Development Plan : Log book

Examine the log book prepared by Vinimaya

Name : Vinimaya

Class : 10

Month : November

Career field : Journalism

Step	Activity	Duration	Questions for Analysis	Remarks/ Notes
1	Speech Practice daily five minutes	Week 1	Did I practise everyday? Is my fear reducing? Is my self confidence in speech improving?	
2	Speak in class group discussion	Week 2	Did I speak in group discussions? Did I try to share my opinion? Could I express myself clearly?	
3	Prepare class news week	Week 3	Did I collect information for writing news? Did I examine the facts? Did I prepare the news?	
4	Present the news report in school assembly	Week 4	Was the news presented well? Is there improvement in writing and presentation?	

Pic 4.4

Like this, you may prepare your skill development plan. Prepare a plan for each month. After implementing, analyse the improvement each week. At the end of the month analyse the activities comprehensively and form the plan for the next month according to the skill to be given priority.

Key Takeaways

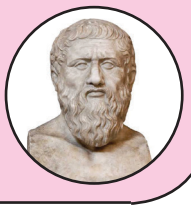

Gains			
Realised the skills.			
Recognised the career fields and skills needed.			
Knew how to prepare a skill matrix according to the career field.			
Identified which skills are to be developed to reach the goal.			
Knew how to prepare a skill development plan.			

Unit 5

My Career Portfolio

"The beginning is the most important part of the work."

Plato

In the previous chapters, you have gone through the stages of personal development, how to creatively construct habits that control various influences, and the importance of skill formation. As a continuation to this, let's now have a look on how to create a career portfolio.

Pic 5.1

Venturing Into the Interview Room - An Imaginary Visual

Visualise the following scenario.

Time Period: Six years after Class 10.

You are attending an interview. Confidently, you enter the room or log into the online meeting platform.

"Welcome!"

Says one of the interviewers.

You have settled yourself on a chair and is ready to answer the first question. The Chairman of the interview board directly asks you the first question.

I saw your resume. Could you briefly describe how you have grown yourselves over the years? Why do you feel that you are qualified for this job?

When answering a question like this, you are required to have a backup log of documents to support your responses. An essential document that you have to ponder about here is a career development document or career portfolio.

What is a Career Portfolio?

Pic 5.2

A career portfolio is a personal collection of documents and work samples that demonstrates candidate's skills, achievements, aptitudes, desires, and potentials. It clearly and briefly reflects your learning path and professional goals.

It is a document that demonstrates who you are and how you are growing. A career portfolio can include the following elements.

- Personal information (Name and Educational Background)
- Skills and Values
- Valid Documents of Achievements (e.g., Certificates, Awards, Projects)
- Prospects of the desired Career Fields and Goals
- Dream Board/Vision Map
- Action Plan for future endeavours

If you are already prepared with this, you can confidently submit your career portfolio before the interview board with a slender smile.That portfolio will unfurl you before them. This report could be submitted in print format or digital format or in any other updated form that is accessible to the interview board. In accordance with criteria of the day, what credentials should be included in a portfolio?

For example

- Certificates of skills / proficiency obtained in various classes and their digital versions
- Certificate of participation in the Scouts/Guides Camp when you were an 8th grade student
- Certificate received in Class 9 for Quiz Competition.
- 10th grade certificate
- Dream vision board prepared in Class 10.
- Certificate of participation in a seminar held while studying in the undergraduate class and presentation of a paper
- Professional degree/diploma certificate
- Internship work experience certificates
-

A career portfolio is a comprehensive collection of information that contains evidence of one's professional journey, skills, achievements, abilities, etc.

A career portfolio is not only useful for job applications but also for educational purposes such as higher education applications, scholarships, etc., and unique portfolios can be prepared to suit each need.

A resume is usually submitted along with a job application. It is a document that briefly presents your education, work experience, skills, and achievements.

Everyone in life must have explored various ways to identify their path. Through work integrated education in previous classes, you have been introduced to different career fields such as electronics, electricals, plumbing, waste management, etc. Have any of them inspired you to decide your future prospects?

The world we live in is changing rapidly. New areas such as Information and Communication Technology (ICT), Artificial Intelligence (AI), Robotics, Data Science, and Automation are growing in a way that are changing human life itself.

It is understood that not only work methods and means, but also some existing job fields may disappear in the future. Instead, new job fields will be created.

We have discussed in detail the changes that are likely to occur in the job field in the future and what preparations you will need to make to accept the changes.

As an individual, it is important to prepare yourself to maintain your capabilities, skills, and values. As part of that, you need to start preparing a career portfolio.

The portfolio will grow by recording your activities and achievements each and every year. Your portfolio should also grow with you.

Activity 1

Let's Prepare a Career Portfolio

Find and write down the capabilities, values, and requirements that are needed for higher studies. Note down the training and the courses you wish to pursue, that suits the career field of your choice. The concepts and interests you have discussed and formed in the previous chapters can be included in this. The format given below will be helpful in preparing a career portfolio.

Pic 5.3

Career Portfolio (Table)

Name :

Date of Birth :

School :

Class / Division :

Address :

Phone / Email :

Photo

Sl. No.	Category Areas	Information
1	Academic Areas	Information and achievements related to the academic field (Subject, Score, Position, etc.)
2	Other Areas	Information and achievements related to other fields (Arts, Sports, Social, etc)
3	Skills	Life skills, Job skills, Technical skills.
4	Achievements	Year, Field, Description, Recognitions received, Awards
5	Abilities	Cognitive skills, Creative skills, Athletic skills
6	Self-Assessment	To improve career prospects - main things I did this year, and goals for next year
7	Certificates & Other Evidences	Certificates / Projects / Pictures (add to the file)

Social Media Profile

In the digital world, individuals and organisations rely on social media to reflect their interests, values, and goals.

You have learned about the wise and legitimate use of such platforms in previous classes. They also have immense potential in career profile building.

Your skills, achievements, and intentions can be effectively reflected through these platforms. The content that a person shares on online pages may affect his future employment prospects. Authorities may check your social media profiles when deciding on college admissions, job placements, etc.

Social media posts and shares should reflect your interests, values, and attitudes and so it should be legal. This is very important. You will be evaluated for your respect for the laws of the country and your creative approaches.

Building a career portfolio at the school level is crucial in shaping the future of the students. Recording your own skills, achievements, interests, and areas of study in childhood will help you identify yourself and get a clear sense of direction towards your future study and career goals. In this way, you can develop the confidence and decision-making ability to meet the needs of the changing world of work.

Key Takeaways

Gains			
Realised the importance of a career portfolio			
Understood how a career portfolio is formed.			
Commenced the work on my growing career portfolio			
Realised the importance of creating social media profile creation and the things that are to be given special attention.			

Unit 6

My Career Dreams

'Dream is not that you see in sleep, dream is something that doesn't let you sleep.

Dr. A P J Abdul Kalam

Pic 6.1

You have a dream for your future. We have discussed in previous chapters how to make it a reality. We have to find out the institutions of higher studies and courses that cater to our interests. There will be entrance examinations and interviews to gain admission to those institutes. We must also understand the scholarships available in the different courses. This chapter discusses the courses, institutes, websites for applications, scholarships and financial aid which you can select after SSLC besides plus two. You can then select the most suitable options by considering your individual circumstances and possibilities.

School exams are over. What is next?

Pic 6.2

You have reached an important turning point in your life. There are a lot of ways ahead. The most suitable path considering your aspirations and abilities must be chosen. Various courses for higher studies are available after the tenth standard.

When selecting these, your interests, aptitudes, skills, life values, and personality traits must be considered.

For example :

- If you are interested in humanities, science or commerce, numurous options available at the higher secondary and vocational higher secondary level under the DGE (Department of General Education).
- Polytechnic and ITI programmes open the doors to technical education.
- Courses are available in Kerala Kalamandalam for those with artistic interests.
-

Activity 1

Identifying Aptitude

Below are statements to help you identify your interests in various fields of work. Read each instruction carefully and put a tick mark (✓) against those relevant to you, with the guidance of your teachers.

RIASEC Text – Tnterested Fields

Sl. No	Statements	✓
1	I like jobs related to vehicles	
2	I like solving puzzles	
3	I like involving in individual activities	
4	I like working in a team	
5	I am optimistic. I have chosen my aims	
6	I like arranging files and books in order	
7	I like creating new products	
8	I like reading about art and music	
9	I need proper instructions to proceed with tasks	
10	I would like to influence and motivate people	
11	I like working on experiments	
12	I like teaching and guiding people	
13	I try solving people's problems	
14	I like training animals	
15	I don't mind working eight hours in an office	
16	I like selling things	
17	I enjoy creative writing	
18	I am interested in scientific activities	
19	I take over new responsibilities fast	

20	I am interested in understanding the people's problems and helping them	
21	I try to understand the nuances and feasibilitys of things	
22	I like creating products by connecting various parts	
23	I am a creative person	
24	I like understanding details of things	
25	I like typing and filing	
26	I like analysing problems and circumstances	
27	I like singing and playing musical instruments	
28	I like understanding about other cultures	
29	I like embarking on startups	
30	I like cooking	
31	I like acting in plays	
32	I believe in practical aspects of things	
33	I like working with numbers and charts	
34	I like being involved in discussions related to problems	
35	I am efficient in keeping records related to job	
36	I like leading my peers	
37	I would like to do petty jobs in and around me	
38	I like doing office works	
39	I am mathematically inclined	
40	I like helping others	
41	I like drawing	
42	I am passionate about speaking	

Table 6.1

Hope you have finished marking.

Now let's find out the fields of interest in RIASEC.

Circle the numbers of the statements marked in Table 6.1 in the third column of table 6.2. For example if you have marked tick in the 29th statement of the table 6.1, circle the number 29 across the code E given in the third column. Count the circled numbers and write tehm in coloumn 4.

Code	Field of interest	Question numbers	Total score
R	Realistic	1, 7, 14, 22, 30, 32, 37	
I	Investigative	2, 11, 18, 21, 26, 33. 39	
A	Artistic	3, 8, 17, 23, 27, 31, 41	
S	Social	4, 12, 13, 20, 28, 34, 40	
E	Enterprising	5, 10, 16,19, 29, 36, 42	
C	Conventional	6, 9, 15, 24, 25, 35, 38	

Table 6.2

Write the three codes which record the highest scores among the total score (English letters in column 1) in the boxes below to find out "My interest code"

My interest code 

The fields of interest identified as per RIASEC are not final. Therefore more detailed discussions and self identifications are all important for selecting a field of study.

Check Table 6.3 and find out the suitable possibilities of higher education.

Related Pathways

Interest Code	Suitable Fields
R – Realistic	Horticulture, health assistant, computer related subject, construction, mechanic/machinist, engineering, tourism and hospitality, food
I – Investigative	Health services, business, public services, industrial technology, marine biology, engineering, mathematics, physics, chemistry, biology, consumerist economics, psychology
A – Artistic	Public services, art and media, communications, cosmetology, fine arts and performing arts, photography, interior design, architecture
S – Social	Health services, public services, counselling, nursing, physiotherapy, tourism, advertising, public relations, education
E – Enterprising	Business, public services, arts and media, fashion merchandising, real estate, marketing/sales, law, political science, international trade, banking/finance
C – Conventional	Health service, business, industrial technology, accounting, court reporting, insurance, administration, medical records, banking, data processing

Table 6.3

Activity 2

Select the Path with Confidence

Hope you have identified your fields of interest. Check table 6.5 and 6.6 and find out the courses suited to your aptitude and the institutions, then complete the table 6.4

My aptitudes	Suitable courses for me	Institutions

Table 6.4

1. Important Field and Courses

Field	Course / Institution	Qualification	Course duration	Suitable for
General Education	Higher Secondary (DHSE)	SSLC	2 Years	Those who are interested in academic subjects
Vocational Education	Vocational Higher Secondary (VHSE)	SSLC	2 Years	Those who are interested in vocational education
Technical Education	Polytechnic Diploma (DTE Kerala)	SSLC	3 Years	Those who wish to pursue technical education and training
Skill development	ITIs (Industrial Training Institute)	SSLC	6 months – 2 years	Those who wish to gain technical education and job
Art education	Fine arts college, Kalamandalam etc.	SSLC/ Talent fest	2-5 years	Those who are interested in painting, music, dance and drama

Table 6.5

2. Vocational Short-term courses

Course	Eligibility	Course duration	Institute
Electrician (ITI)	SSLC	2 years	Government/Private ITIs
Plumber (ITI)	SSLC	1 year	Government/Private ITIs
Welder (Gas and Electric)	SSLC	1 year	Government/Private ITIs
Two-wheeler/Four-wheeler mechanic	SSLC	6-12 months	ITI/ Skill centres
Refrigeration and AC mechanic	SSLC	1-2 years	Government ITIs /Polytechnics
Computer Hardware Maintenance	SSLC	6 months – 1 year	ITIs / Recognized institutes
CCTV technician	SSLC	3-6 months	Recognized skill centres/ ASAP
Fashion Designing and Tailoring	SSLC	6 months – 1 year	Government ITIs/Kudumasree/ KSWDC

Table 6.6

Higher Secondary/ Vocational Higher Secondary Career Guidance Cells

After SSLC, you have trained career guides under the CG & AC (Career Guidance and Adolescent Counselling) at the higher secondary level to provide guidance for you.

One of the options of higher education for you after tenth standard is higher secondary. There are 45 combinations available in the branches of science, humanities and commerce at the higher secondary level.

Activity 3

My Higher Studies

Find out the higher secondary schools in your area and the course combinations offered there with the help of your teacher by logging on the website www.hscap.kerala.gov.in. Write the courses in the order of your interest among the streams Science, Humanities and Commerce as well as the schools in which they are offered.

Admission to the higher secondary is conducted through the single window system. With the help of your teacher, you may check the sites of VHSE, polytechnic, and art education for details.

VHSE – www.vhscap.kerala.gov.in

Technical education – www.polyadmission.org, www.dtekerala.gov.in

Education after Twelth Standard

What all things should students and parents have to know more about higher education?

There has been an increase in the number of students gaining access to quality education and jobs after schooling. It is important that in order to support them, parents and teachers should be provided with careful instructions and authentic details. Keep in mind the three facts connected with them.

- Entrance examinations
- Suitable educational institutions
- Educational expenses/ Scholarships

National-State level Examinations

If admission is sought in the different universities and institutions at the state level/ national level after higher secondary, you should crack different entrance examinations. Besides there are also institutions which grant admission on the basis of scores or grades.

Details of various national level entrance examinations, are given in table 6.7

Entrance Examinations, Educational Institutions

Sl No	Examination	Educational qualification	Admission portal	Institutions
1	JEE Main and advanced, IAT,	12th Class pass with Physics, Chemistry and Mathematics	NTA (jeemain.nta.nic.in)	NITs, IITs, CFTIs, IISER, IISc etc. State Institutes
2	KEAM	12th Class pass with Physics, Chemistry, Mathematics, Biology	Kerala CEE portal (cee kerala.org)	Different institutes offering courses in Engineering, Agriculture, Medicine and Pharmacy
3	CUET UG	12th Class pass in any stream	cuet.samarth.ac.in	Central universities
4	NEET UG	NEEET-UG 12th class pass in Physics, Chemistry and Biology	neet.nta.nic.in	Different institutes in India offering MBBS, BDS, Ayush and Veterinary
5	CLAT UG	Pass in 12th Class in any stream	consortium ofnlus.ac.in	Law universities offering five-year integrated law programmes

Table 6.7

There are various private institutions that offer high quality education. Conduct a seminar about them by using informations from authentic websites.

Activity 4

Higher Course and Entrance Examination

Hope you have understood from the Table 6.7, about the various entrance examinations and their details. Apart from this, many other entarnce examinations also exist.

Which stream do you intend to choose according to your interest and aptitude?

Decide the course of study and the institution.

And for that, which entrance examination should you appear for?

Search and find out.

Inclusive Education

In government approved institutions there is reservation for admission in each course for differently abled students according to their eligibility and need. Inclusive education, as its name implies, tries to include students who are physically and mentally challenged, students with learning disorders and other students in the mainstream educational scenario along with their peers at every level of their learning.

Pic. 6.3 AIISH, Mysore

Pic 6.4 NISH, Thiruvananthapuram

AIISH and NISH are the two major institutions that offer suitable courses for differently abled students as well as students with different educational needs.

Distance Education

Distance Education or Open Learning is useful for those who could neither gain formal education nor study in any campus, institution or class. Today Open Learning has become a mode of learning that has gained international recognition. There are modes to provide distance education in central as well as state universities.

In regional study centres, institutions that offer distance education provide academic counselling classes and facilities for clarification of ideas and facts for the convenience of learners. Learning aids are available in printed and digital format that enable the learners to complete the course with more ease.

Ensure that institutions are approved by the Government and UGC (University Grants Commission) while opting for courses.

SCOLE Kerala - State Council for Open and Lifelong Education - Kerala

This is a self-governing institution under the DGE (Department of General Education) of the Government of Kerala. There are facilities in this institution for distance education and further studies. The main aim of SCOLE Kerala is to provide education to learners of all ages.

Important institutions providing distance education are

NIOS (National Institute of Open Schooling)

SGOU (Sreenarayana Guru Open University)

IGNOU (Indira Gandhi National Open University).

Scholarships

A scholarship is the financial aid that a learner receives for learning. It is given according to various terms and conditions.

Do you get such scholarships at school level?

List the various scholarships that you know

- LSS/USS scholarship
- Pre Metric scholarship
-

Let's familiarise with some scholarships

National Scholarships for School Students in India

1. NMMS (National Means Cum Merit Scholarship)

NMMS is a project for students studying from standard 9th to 12th and supports the students studying in government and aided schools. Students who emerge successful at the state level merit examinations and belong to a particular income category are selected and provided scholarship.

2. Pragathy scholarship (for girls only)

This scholarship is for girls to encourage them to acquire technical education. Girls of all categories studying AICTE (All India Council of Technical Education) approved courses are eligible this scholarship.

3. Different Scholarships for Differently Abled Children

Educational scholarships are provided to differently abled students of pre-matric and post-matric levels by the DEPwD (Department of Empowerment of Persons with Disabilities) under the Central Government.

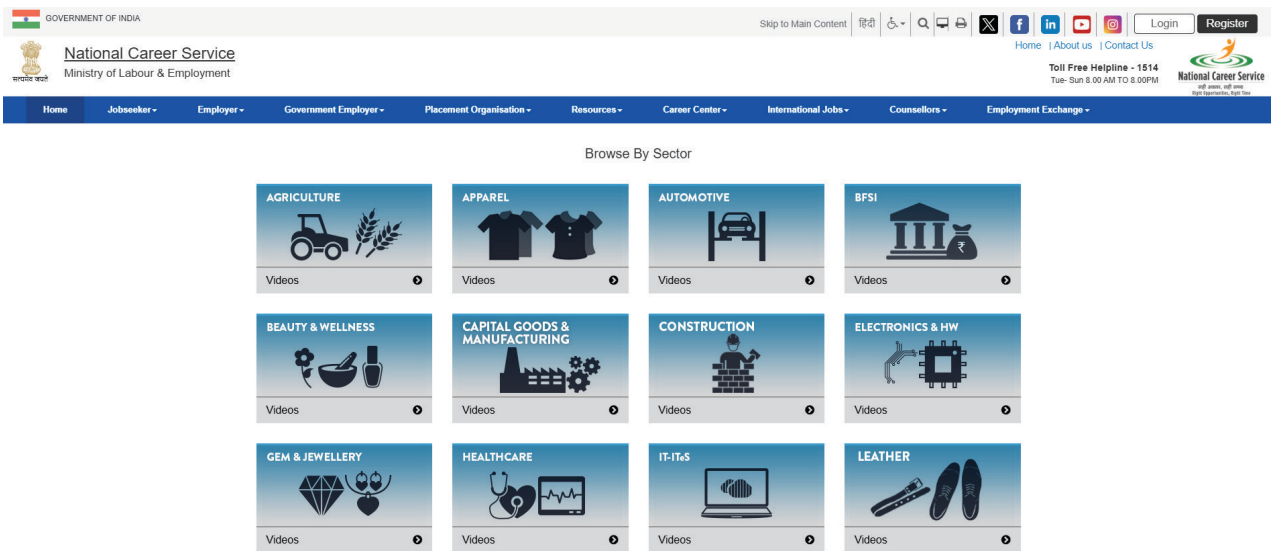

4. Saksham Scholarship

Students who pursuing AICTE approved diploma and degree courses after SSLC are eligible for this scholarship. Thousand students are eligible for this scholarship annually.

NSP (National Scholarship Portal) will provide proper information on the scholarships funded by the central and state governments for education at the pre matric and the post-graduation levels and to apply for them and to check the status of application.

NCS (National Career Service) Portal – Job Opportunities at the Click of a Button

There is a national portal www.ncs.gov.in active to link job aspirants and job providers. It connects job seekers, job providers, counsellors, and training providers. Online

registration can be done free. The portal gives information on more than three thousand career openings in fifty-three important industries like IT, textiles, automobiles, pharmacy etc. Job aspirants will get necessary information here.

Activity 5

My Career Area and Features

Hope you have understood something about NCS portal. Enter the portal and select a career field you aspire for. Prepare and present a seminar on the features of that career field, the job roles in it, and other related things in the class.

Key Takeaways

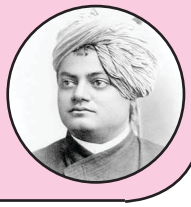

Gains			
Have realised about the courses available according to my aptitude and interests.			
Can find out the institute in which the selected course is available.			
Have got the idea of how to gain admission in institution of higher learning.			
Acquired knowledge about the opportunities for distance and life long education.			
Got an idea of different scholarships.			

Unit 7

My Career My Decision

"Arise, awake, and stop not until the goal is reached"

— Swami Vivekananda

Pic 7.1

We take many decisions in our daily lives. These decisions guide us forward in our daily routine. Recall the decisions you made today:

- What to eat and when to have breakfast
- What dress to wear today
- Activities like homework and assignments

How much do we think while making such decisions?

Are all decisions made in the same manner?

Have you taken decisions on the following matters?

- Which course to pursue after SSLC?
- Which career to choose in the future?
-

Is decision making in these matters as easy as in the case of earlier ones?

What could be the reason?

Sometimes we make decisions without even knowing that we are making them.

Some decisions require careful thought.

Pic 7.2

In this way can you categorise decisions that are taken or need to be taken?

1 Decisions taken quickly

-
-

2 Decisions that required a lot of time

-
-

3 Instances when you were confused and unable to take a decision

-
-

We continuously make many decisions in our daily lives. Our activities depend on them. Others judge us by our actions. Hence, decisions have an important role in our lives.

Look at the picture below. It shows the questions and circumstances a tenth standard student has to face about the future.

Pic 7.3

The decisions that we make for the future are very different from those we take in daily life. A lot of thought and analysis are needed when taking decisions that can greatly influence our life journey. The right decisions you make now will guide you in the right direction in the future.

Activity 1

Preferred Field of Study

Sit in different groups based on your preferred field of study in the future:

1. Science
2. Humanities
3. Commerce
4. Vocational / Technical Education

With the help of the teacher, each group should list the options for higher studies as well

as the career opportunities related to each field of study. Display them on charts.

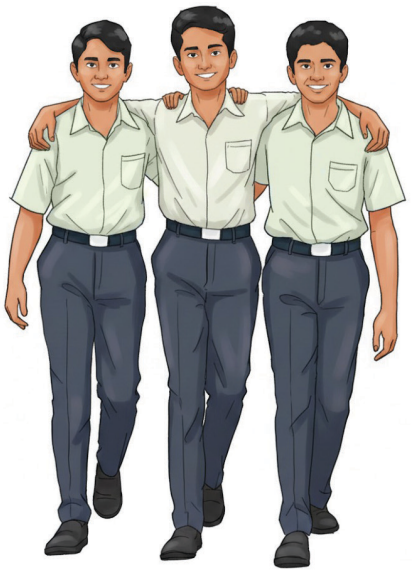

Have you selected your preferred field of study?

Did you choose it after careful thought?

Can your interests change in the future?

What might be the reasons?

Influences and Decisions

Pic 7.4

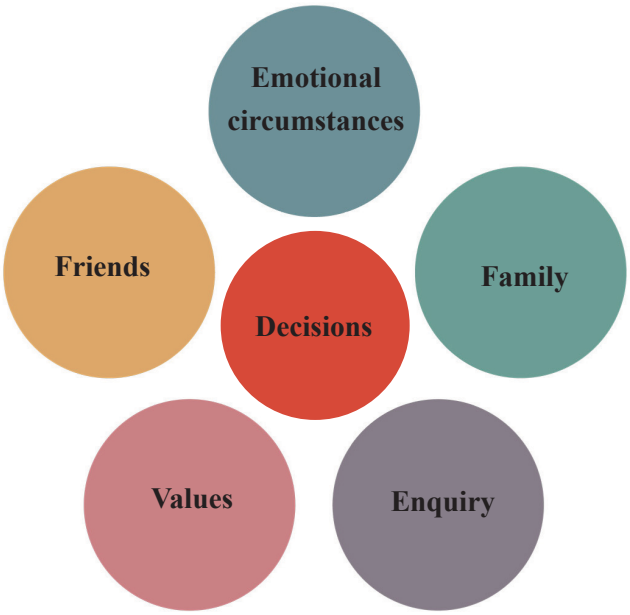

Nihal, Arjav, and Meban are close friends. All three are good at studying. Nihal, who secured high grades in Class 10, wished to become a doctor. He had understood the courses required, the entrance examinations to be cleared, and the best institutions to study in.

His best friends Arjav and Meban decided to choose commerce. As Nihal wishes to become a doctor, he also wishes to study with his friends. So, he put aside his decision to become a doctor and opted for commerce in higher secondary.

- Do you agree with Nihal's decision?
- What are the factors that influenced his decision?
- What would you have done if you were in Nihal's position?
- What are the factors that usually influence our decisions?

Situations:

- Some decisions are made on our own
- Some with the help/influence of our parents
- Some by asking friends
- Some by enquiry and collecting details

Pic 7.5

We can see that many factors influence our decisions.

The decisions we make under multiple influences may not always be right. Wrong decisions may create many difficulties in the future.

How can we take the right decisions?

How can we recognise and avoid the factors that negatively impact our decisions?

What qualities are needed to make the best decisions?

Some are mentioned below.

- Critical thinking
- Self awareness
- Time sense
- Emotional stability

Activity 2

Basics of Decision - A Debate

Manav has ₹500 with him. He has got three wishes: to buy a branded shirt, to buy a sports equipment he has long wanted, and to buy a book he wished to read. Although he desires all of them, the available money is enough to buy only one.

- Three desired things are available.
- Available money is limited.
- It is possible to buy only one item.

Organise Manav's thoughts properly.

What would you do if you were in this situation?

What is your friend's opinion?

Discuss these points with your friends and engage in a debate.

Consider the following points.

- Know the difficulty ahead (only ₹500).
- Look at the possibilities / opportunities and analyse each of them.
- Decide which is most essential.
- Decide which is the most right and suitable.
- Analyse whether the decision taken is right.

If we are able to make decisions in this way, they will always be the best.

Activity 3

Decision Making - Process

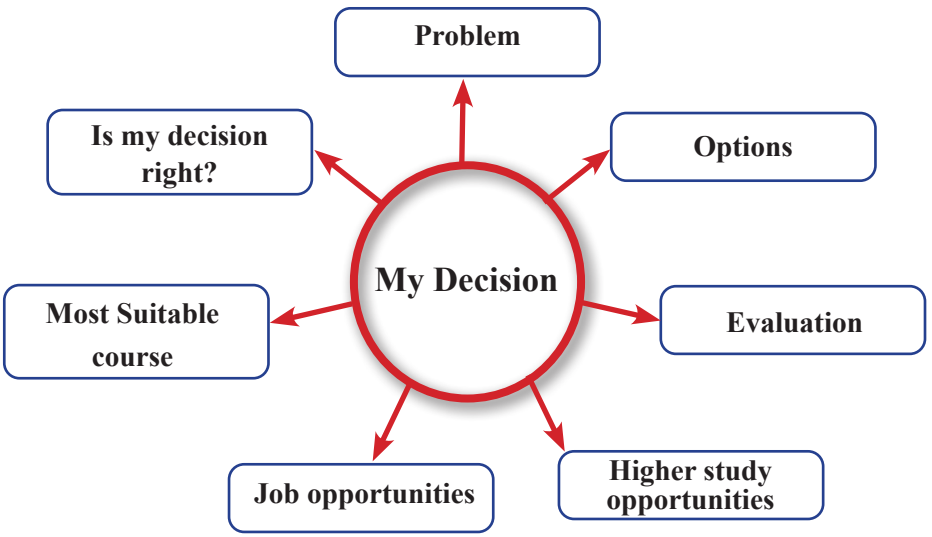

How will you make a decision on what to study after SSLC?

Write down the process

1. Problem: Can choose only one course
2. Options: Plus Two, Vocational Higher Secondary Course, Polytechnic, etc.

3. Each course is evaluated.
4. Higher study options are evaluated.
5. Career opportunities are evaluated.
6. The most suitable course is selected.
7. Analyse whether the decision taken is right.

Which course did you select? On what basis was the decision taken? Present it in the idea map given below.

Evaluation of course

Pic 7.6

How about forming the habit of taking the important decisions of life in this way?

Ask yourself:

What is the best decision you have taken in life?

Have you ever taken decisions hurriedly?

What abilities should be developed along with decision-making?

You need to develop these abilities and take the right decisions based on proper evaluation.

If you decide your aim in advance, the process of decision-making will become easier.

Key takeaways

Gains			
Understood the importance of taking the right decisions to succeed in life.			
Understood the factors that influence career-related decisions.			
Understood the abilities required to make the best decisions.			
Learned the steps needed to make the best decisions.			

Notes

CONSTITUTION OF INDIA

Part IV A

FUNDAMENTAL DUTIES OF CITIZENS

ARTICLE 51 A

Fundamental Duties- It shall be the duty of every citizen of India:

(a) to abide by the Constitution and respect its ideals and institutions, the National Flag and the National Anthem;

(b) to cherish and follow the noble ideals which inspired our national struggle for freedom;

(c) to uphold and protect the sovereignty, unity and integrity of India;

(d) to defend the country and render national service when called upon to do so;

(e) to promote harmony and the spirit of common brotherhood amongst all the people of India transcending religious, linguistic and regional or sectional diversities; to renounce practices derogatory to the dignity of women;

(f) to value and preserve the rich heritage of our composite culture;

(g) to protect and improve the natural environment including forests, lakes, rivers, wild life and to have compassion for living creatures;

(h) to develop the scientific temper, humanism and the spirit of inquiry and reform;

(i) to safeguard public property and to abjure violence;

(j) to strive towards excellence in all spheres of individual and collective activity so that the nation constantly rises to higher levels of endeavour and achievements;

(k) who is a parent or guardian to provide opportunities for education to his child or, as the case may be, ward between age of six and fourteen years.

CHILDREN'S RIGHTS

Dear Children,

Wouldn't you like to know about your rights? Awareness about your rights will inspire and motivate you to ensure your protection and participation, thereby making social justice a reality. You may know that a commission for child rights is functioning in our state called the ***Kerala State Commission for Protection of Child Rights.***

Let's see what your rights are:

- Right to freedom of speech and expression.
- Right to life and liberty.
- Right to maximum survival and development.
- Right to be respected and accepted regardless of caste, creed and colour.
- Right to protection and care against physical, mental and sexual abuse.
- Right to participation.
- Protection from child labour and hazardous work.
- Protection against child marriage.
- Right to know one's culture and live accordingly.
- Protection against neglect.
- Right to free and compulsory education.
- Right to learn, rest and leisure.
- Right to parental and societal care, and protection.

Major Responsibilities

- Protect school and public facilities.
- Observe punctuality in learning and activities of the school.
- Accept and respect school authorities, teachers, parents and fellow students.
- Readiness to accept and respect others regardless of caste, creed or colour.
