SMILE MODULE 2025

SOCIAL SCIENCE 1 & 2

Preface

Dear Students,

As part of the curriculum reform, the 10th grade social science subject has also been upgraded!

Social science studies play a major role in shaping students as value-based citizens of modern society.

The new approach to social science aims to achieve comprehensive quality by creating action-based knowledge, giving high priority to the thinking process of children, comprehensively and continuously evaluating the acquired knowledge and skills, and providing additional support to those who need it. Therefore, this module can be used as a handbook that can be used effectively in classrooms that devise and implement diverse learning strategies.

Each unit has been prepared in a way that can be understood by students of different levels by including all the concepts in each lesson. In accordance with the new assessment method, question models have been included along with the lesson.

This Smile module will be helpful for teachers and students alike, along with the timely and systematic communication of the lesson, taking into account the importance of the SSLC public examination.

SOCIAL SCIENCE: 1

PART 1

Resource Team:

K Venu, Govt. HSS Munderi.

Ranthiv Thottathil, Govt. HSS Koothuparamba

Contents

0. Preface 1

1. **Humanism** 5

2. Liberty Equality Fraternity 19

3. Social Analysis: **Through Sociological Imagination** 29

4. **Wealth and the World** 37

5. **Public Opinion in Democracy** 50

1. Humanism

❖ Renaissance

- From 14 the century onwards a series of changes took place in the social economic and political spheres of Europe. These changes were particularly evident in Italy, which was part of the ancient Roman civilisation. Historians termed these changes as "Renaissance."
- The Renaissance is considered as a period of transformation from the Medieval feudalism to the modern age.

❖ The Characteristics features of the changes in Europe in Renaissance period

1. Humanism
2. Growth of urban life
3. Monetary economy
4. Progress of trade
5. Importance gained by regional languages
6. Rise of nation states
7. Rationalism
8. Changes in the realms of art and science

❖ Cities in Italy were different from the rest in Europe. Give reasons?

- They were more independent, wealthy and dynamic
- Traders in these cities were well aware about banking and insurance
- Some of them had expertise in technical matters of trade, such as book keeping.
- Many of them had become extremely wealthy through trade.

- The commercialisation that occurred in in Europe by the 11th century led to the disintegration of the medieval feudal systems and the decline of the religious supremacy
- This led to the emergence and domination of the new wealthy classes
- As a result, several wealthy families also emerged in Italy.
- The demanded a share in the political power

❖ Italian cities were wealthier compared to other European cities. Why?

- The crusades that took place during the Medieval period facilitated cultural exchange between the east and the west.
- Italian cities acquainted with the culture's cities and lives of the people in the Eastern world. This accelerated the growth of Italian cities.
- Merchants in Italian cities gained monopoly in the trade between east and west in the Mediterranean.
- The bubonic plague which erupted in the Mid-14th century severely affected the Italian cities.
    - This catastrophic event known as the Black death claimed the lives of thousand results in a severe shortage in Labour.

❖ Some of the families emerged and their respective cites in Italy.

Italian Families	Cities
Medici	Florence
Sforza	Milan
Farnese	Parma
Orsini	Naples
Visconti	Milan

- What is the impact brought about by the outbreak of the plague in 14 the century in various fields in Europe?
  - Declined medieval feudalism
  - It was heavily reliant on the agriculture sector
  - Emergence of Middle class
  - People began to explore the medical sciences of ancient Greece and Rome
  - Human beings started to contemplate the fleeting nature of life, seek wellness and focus on their own well-being
  - Emergence of Humanism
- The impact of the conquest of the Constantinople by the Turks on the intellectual landscape of the society
  - In 1453, The Ottoman Turks conquered Constantinople, the capital of the Eastern Roman Empire.
  - Constantinople was a centre of many scholars who possessed manuscripts of Ancient Greco-Roman literary works
  - After the Turkish conquest these scholars migrated to Italian cities bringing their manuscripts with them
  - They began to spread to libraries.
  - Wealth and political freedom created a fertile ground for artistic innovation and cultural experimentation
  - Novel ideas began to emerge in the cultural and intellectual spheres

- Difference between Scholasticism and Humanism

Scholasticism:	Humanism
Scholasticism is a philosophy Which was deeply rooted in Christian theology	Humanism emerged as a departure from Christian theology

It encouraged knowledge and research	It encourages the uniqueness emotions capabilities literary expression and communication skills
It prioritised the divine and after life	The emergence of humanism impacts the course of world history. People began to read ancient Greco Roman works. humanists produced works in regional languages
	Created paintings and sculptures in the Greco-Roman style. Greco-Roman art depicted Gods as wealthy and powerful in all its beauty and splendour.

- Renaissance Art
  - Middle age paintings
  - Middle aged paintings tend to emphasise spiritual themes such as angels and heavenly realms
  - Renaissance paintings focus on the beauty of the human form originality and naturalistic use of colours
  - This shift in artistic focus was a hallmark of the Renaissance period, during which fields like paintings sculpture and architecture underwent profound transformations
  - Florence one of the major commercial centres in Europe was also the centre of

- Renaissance in Italy.
  - Renaissance paintings
  - Humanistic ideals were reflected profoundly in renaissance paintings
  - Painters of the Time presented human forms with remarkable accuracy, clarity and meticulous attention to detail in their works

- The knowledge they had acquired about human anatomy facilitated this artistic achievement
- Moreover, painters emphasised rationalism and human emotions attributing significance to the values of this world
- With the influence of humanism artworks became increasingly precise and realistic
- Painters often selected themes that emphasised theological significance for their work

❖ <u>Features of Renaissance Paintings</u>

- Landscapes
- The use of colour to illustrate light and spatial depth
- Realistic depiction of the human body
- The use of oil paints
- Portraits
- The representation of divine figures in idealised human forms

❖ Renaissance Painters:

❖ Giotto	❖ The influence of Greco-Roman art was first evident in Giotto's works.
❖ Masaccio	❖ Masaccio was a painter who emerged later created profound impact on all artists who came later ❖ His wall paintings, characterised by their round in shape and seemed to protrude from the surface, showcased human figures engaging in everyday life experiences.
❖ Leonardo Da Vinci	❖ The last Supper and Mona Lisa ❖ These paintings speak of the unique way in which da Vinci harmonises colour shadow and light. ❖ He was a versatile genius who scientifically studied human body ❖ In the last supper emotions like surprise fear and guilt of Christ's disciples are vividly etched as Christ reveals that one of them betray him. ❖ The enigmatic expression of Mona Lisa conceals many un answered questions masterfully embedded by Leonardo da Vinci
❖ Michaelangelo	❖ The paintings done on the ceiling of the Sistine Chapel at Vatican along with the last Judgement have cemented Michelangelo's status as an immortal artist ❖ His works predominantly feature powerful and graceful human forms
❖ Titian and Raphael	❖ Raphael portrayed human as wise moderate and dignified ❖ In their paintings, beauty and ideas were given equal importance.

❖ Renaissance Sculpture:

❖ Donatello	❖ David, Gattamelata ❖ Donatello was one of the most important sculptures of the Renaissance period. ❖ He liberated the art of sculpture from the Medieval Gothic style, giving his works greater power and individuality. ❖ His iconic bronze sculpture David showcases a youthful figure standing with his weight shifted onto one leg. ❖ Another notable work Gattamelata depicts a soldier sitting on horseback evoking the cavalrymen of ancient Rome Through this masterpiece Donatello immortalised a secular hero.
❖ Michelangelo	❖ Michelangelo's sculpture which depicted Gods in human forms, deviated significantly from the traditional ancient Greco-Roman style ❖ His renowned works such as the Pieta portrays virgin Mary, with Jesus Christ on her lap and the majestic sculpture of David have cemented his legacy as an immortal artist.

❖ Architecture

- Filippo Brunelleschi set a new style in architecture
- Quite different from the Gothic Architectural style of the medieval period, influence of ancient Greco Roman(classical) style is evident in the cathedral he built in Florence
- The lofty Towers found in Gothic style, were replaced with domes (Dumo). Later in the St. Peters Basilica, built under the supervision of Michelangelo and Bramante this style is more evident.

❖ Renaissance Literature

- Renaissance writers gave importance to individual liberty and secular values
- The basic characteristics of renaissance literature was its breaking away from the scholasticism of the Middle Ages.
- Although influenced by ancient Greco-Roman culture, most Renaissance writers chose to produce their works in regional languages.
- Prose literature gained prominence during the period

❖ Renaissance Writers

- Dante – Divine Comedy

  Dante, the renowned author of The Divine Comedy was a prominent literary figure during the Renaissance period.
  The Poems theme revolves around Dante's imagination of a pilgrimage through Hell, Purgatory and Paradise.

  However, it also profoundly reflects human emotions patriotism fascination for natural phenomena and the longing for a unified and independent Italy. Dante wrote The Divine comedy in the regional language

- Petrarch

  Another world-renowned writer, Petrarch was a leading exponent of humanism.

  His sonnets addressing Laura reflected a bold and unique style. However, Petrarch remained committed to writing in Latin.

- Boccaccio:
  - Another notable Renaissance writer was Boccaccio, the author of the celebrated work The Decameron.
- Niccolo Machiavelli- The Prince, (presents political thoughts.)

  He believed that a ruler paramount responsibility is to maintain the authority and security of the state. He also believed that individuals are generally selfish, driven by a desire for power and material prosperity.

- He advocated that a head of the state should remain impartial and avoid showing favouritism or obligation to specific groups among the subjects.
- In The Prince, Machiavelli portrays an administrator who is different from the traditional medieval feudal administrators.

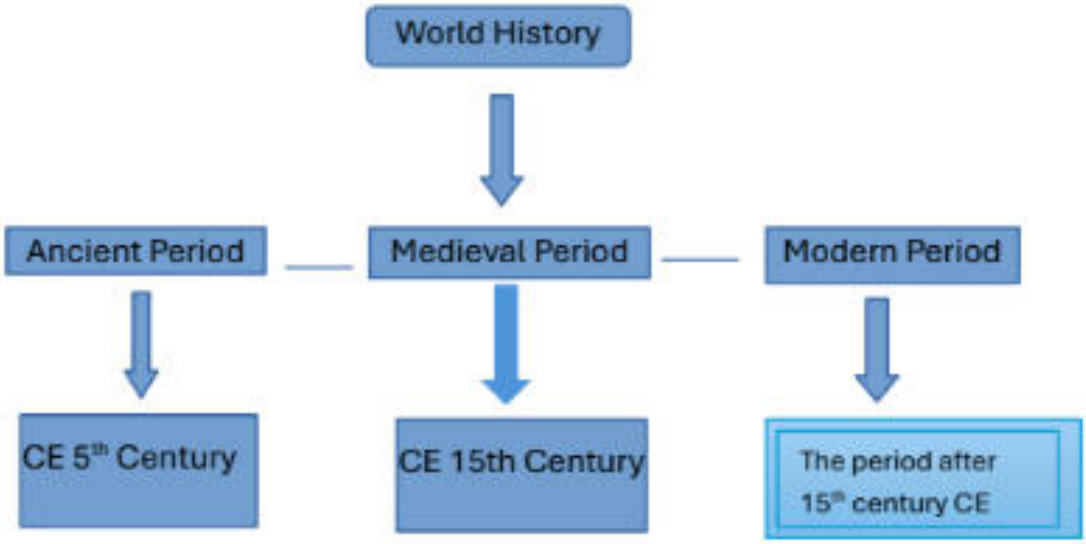

➢ Cassandrea-Fedele

- She earned a name through her writings and speeches emphasising the import the importance of providing higher education to woman.
- Fedele maintained a lively correspondence with wealthy Italian lords who championed humanism.
- Her speeches and writings were printed published and popularised by several prominent publishing houses.

❖ Authors and their works:

❖ Dante	- Divine Comedy
❖ Petrarch	Sonnets addressing Laura
❖ Boccaccio	The Decameron
❖ Niccolo Machiavelli	The prince

❖ AUTHOR	❖ WORK	❖ COUNTRY
❖ Erasmus	❖ In praise of Folly	❖ Netherland
❖ Geoffrey Chaucer	❖ Canterbury Tales	❖ England
❖ Thomas More	❖ Utopia	❖ England
❖ Miguel de Cervantes	❖ Don Quixote	❖ Spain

❖ <u>This classification divides history into three distinct periods</u>

- The ancient period, spanning up to the 5th century CE
- The medieval Period, extending from the 5th to the 15th century and the Modern Period encompassing the era thereafter.
- This classification emerged during the Renaissance period.
- It was introduced by two Italian historians<u>, Flavio Biondo and Leonardo Bruni</u>

❖ <u>Renaissance and Science</u>

- Remarkable transformation took place in the field of astronomy during this period.
  - i) Scientists put forward a ground breaking view that planetary motions are governed by material forces.
  - ii) The geocentric model of Ptolemy, which positioned Earth at the centre of the universe remained un challenged until the 16th century
  - iii) Later Nicolaus Copernicus a Polish astronomer and priest challenged this prevailing doctrine.
  - iv) He presented a revolutionary argument that the centre of the earth is not the Earth, but the Sun.

v) Through his observations, Copernicus demonstrated that the earth and other planets revolve around the sun.

vi) The revolutionary discoveries of Copernicus were further elucidated and expanded upon by Galileo Galilei and Johanne Kepler.

vii) Kepler's pathbreaking findings revealed that the speed of the planets varied based on their distance from the sun, which laid the foundation towards the end of the 17th century for Isaac Newton's formulation of the theory of gravitation.

viii) With the Telescope that he designed, Galileo Galilei made seminal discoveries, including satellites of Jupiter and Rings of Saturn.

ix) Galileo's findings provided conclusive the evidence in the support of the Copernicus principles.

b) The Renaissance also witnessed significant advancements in the field of medicine particularly anatomy.

i) The Swiss scientist Paracelsus conducted extensive research on the causes of the diseases tried to develop remedies.

ii) Andreas Vesalius pioneered the study of the human anatomy through meticulous dissection of cadavers, there by contributing substantially to the field of human anatomy.

❖ <u>The Reformation:</u>

❖ Reformation	❖ Counter reformation
▪ Erasmus, John Wycliffe, Jan Hus and Savonarola laid the ground work for protests against certain practices and beliefs with in the catholic Church	▪ Following the Reformation. The Catholic church-initiated efforts to reform itself. A movement known as counter reformation.

❖ Martin Luther, a priest responded by pasting his famous Ninety-Five Theses on the door of the Wittenberg Cathedral in 1517. This pivotal event marked the beginning of the Protestant Reformation. ❖ Initially, Luther's intention was merely to spark an ideological debate. So, he wrote his theses in Latin instead of German.	❖ As part of this initiative the church leadership convened the Council (synod) of Trent in Northern Italy. ❖ The objective of this council was to correct erroneous tendencies with in the Church and to implement reforms
❖ However, His work was translated to German without his knowledge, and as a result widely disseminating it. ❖ Subsequently Luther severed his ties with the church	As a result, the sale of indulgences was banned. A list of books (The Index) that should not be read by the believers was published.
The reformation that originating in Germany, soon spread to another European Kingdom.	❖ ✞ The court of inquisition which was there in Medieval times was reinstituted.
Huldrych Zwingli and John Calvinin Switzerland and King Henry VIII in England assumed the leadership in the reformation movement and the Anglican Church emerged there with the monarch serving as its Head. This development led to the establishment of the National Church	The society of Jesus, set up by Ignatius Loyola, a Spanish priest also played a prominent part in Counter Reformation. Its members were bound to observe strict discipline and unquestioned obedience.

❖ Model Questions based on this chapter:

- Which catastrophic event in the mid-14th century, known as the 'Black Death', claimed thousands of lives and contributed to the decline of medieval feudalism?
    - The Crusades
    - The Ottoman Conquest
    - The Bubonic Plague
    - The Renaissance
- The word "Renaissance" literally means:
    - Rebirth
    - Enlightenment
    - Revolution
    - Transformation
- Johannes Gutenberg is credited with establishing the first printing press in
    - Europe, which was made of:
    - Wood and Cloth
    - Metal and movable type
    - Stone and ink
    - Paper and digital components
- Identify two key reasons why the Renaissance changes were particularly evident in Italy.
- Briefly explain how the philosophical perspective shifted from Scholasticism to Humanism during the Renaissance.
- Match the Renaissance artist/writer with their notable work or characteristic

❖ Leonardo da Vinci	❖ The Divine Comedy
❖ Michelangelo	❖ Sculpted David and painted The ❖ Last Judgment
❖ Dante	❖ Known for paintings like Mona ❖ Lisa and The Last Supper
❖ Machiavelli	❖ The Prince
❖ Erasmus	❖ In Praise of Folly

- "The Renaissance is considered as a period of transformation from the medieval feudalism to the modern age" Based on the learnings about intellectual thought, artistic expression, and historiography, discuss how the Renaissance period justifies this statement, highlighting specific examples of change. (essay)
- Compare and contrast the Protestant Reformation and the Catholic CounterReformation, outlining their underlying causes and the key initiatives taken by each movement. (comparative analysis)
- Explain how the conquest of Constantinople by the Ottoman Turks in 1453 impacted the intellectual landscape of Italian cities. (short answer)
- Identify two characteristic features of Renaissance painting that distinguished it from medieval painting.

2. Liberty Equality Fraternity

Causes of French revolution:

- 1. Despotic Rule and Extravagance of the Bourbon Kings
  - The Bourbon dynasty ruled France for decades, and its kings were despotic, believing in the divine right of rulers.
  - The Estates General, the parliament, was not summoned after 1614, leaving the people without representation.
  - Corruption, extravagance, and continuous wars under Louis XV worsened the people's misery as new taxes were imposed.
  - Later, Louis XVI's weak governance and Queen Marie Antoinette's extravagance further angered the people, leading to public uprising.
- 2. Social Inequality in French Society.
  - French society in the 18th century was divided into three estates – the clergy, the nobles, and the common people.

First Estate (Clergy)	The clergy, who owned vast lands, were exempted from taxes but collected the tithe from peasants, causing resentment.
Second Estate (Nobles)	The nobles enjoyed high positions, lived luxuriously, and though all were supposed to pay the Vingtième tax, they escaped it by giving small gifts to the king.
Third Estate (Commons)	The common people, who formed the majority, lived in poverty, paid heavy taxes to the king, church, and nobles, and were forced to perform unpaid services.

  - This deep inequality and exploitation created widespread discontent in society.

❖ 3. The Rise of the Middle Class.

- The 18th century saw the rise of a middle class in France due to progress in agriculture, industry, and trade.
- Industrialists, traders, doctors, lawyers, and bankers became economically strong but remained burdened with heavy taxes like the common people.
- Despite their wealth and education, they were denied proper status, privileges, and power in administration and the army.
- This neglect and inequality led to deep discontent among the middle class.

❖ 4. Economic Crisis.

- In the 1770s, France faced a severe agricultural crisis as cereal production declined, causing bread prices to rise by 60% while wages increased only 22%.
- Shortage of fodder reduced livestock, worsening the misery of a large section of the population.
- A trade agreement with Britain flooded the French market with British goods, leading to unemployment among native artisans.
- Meanwhile, King Louis XVI's heavy borrowing and unequal taxation deepened the economic crisis, angering farmers, workers, and the middle class alike.

❖ 5. Influence of French Thinkers.

- French philosophers played a major role in inspiring people to oppose injustice and fight for change.
- Voltaire criticized the clergy, Rousseau argued that kings lost the right to rule if they violated their duties, and Montesquieu advocated separation of powers to protect individual freedom.
- John Locke's rejection of divine right and tyranny, along with the economic ideas of physiocrats like Turgot and Necker, further influenced public thought.

- These thinkers awakened political and social consciousness, fueling the spirit of the French Revolution.

French Thinkers	Ideas / Works
Voltaire	Criticised the clergy through writings; historian, satirist, philanthropist; expelled from France for his stance.
Rousseau	The Social Contract – people created the king through a contract for welfare; if violated, king loses right to rule. Advocated naturalism; "Man is born free, but everywhere he is in chains." Opposed existing power structure.
Montesquieu	The Spirit of Laws – criticised church and tyranny of state; proposed separation of powers into legislative, executive, and judicial branches; supported limited monarchy.
John Locke	Two Treatises of Government – rejected divine right of kings and tyranny; supported people's rights.
Turgot & Necker (Physiocrats)	Advocated economic reforms favoring the middle class; encouraged agriculture and free trade of food items.

❖ Arrange timeline cards – Fall of Bastille & Beginning of Revolution

- King Louis XVI dismissed Necker.
- Crowds seized granaries & bakeries.
- 14 July 1789 – Bastille stormed.
- Violence spread to countryside & tax collectors attacked.
- King approved National Assembly's laws.
- Reforms – slavery abolished, nobility's powers removed, Church tax ended, extra taxes cancelled.

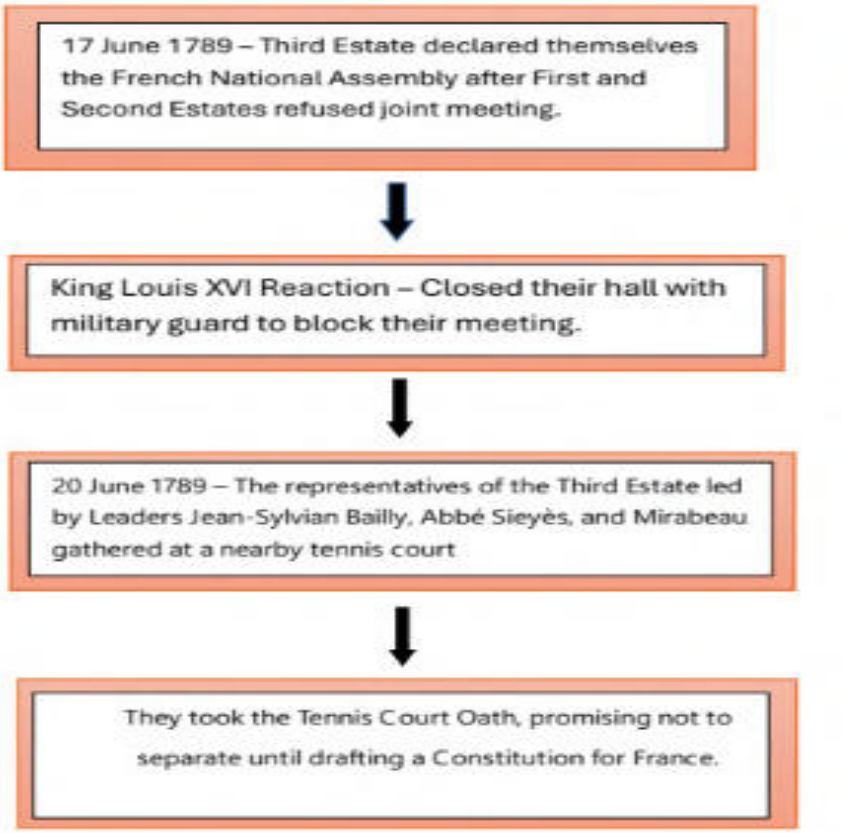

❖ Women in the French Revolution:

- Food shortages forced women to march to Versailles and bring the king back to Paris.
- Olympia de Gouges wrote Declaration of the Rights of Woman and Citizen, demanding equal rights.
- Madame Jeanne Rolland fought for women's equality.
    - Achievements: right to property, right to divorce, and equality movements that inspired future struggles.

❖ Main ideas in declaration of Rights of Man and Citizen (1789)

- Men are born free and equal.
- The purpose of political association is liberty, property, security, and resistance to oppression.
- Sovereignty lies with the nation.
- Law can only prohibit harmful actions.

❖ Tennis Court Oath - Flow Chart

❖ The reforms of the French National Assembly

Reforms Sorting Game.

Categorize each reform as “Social Reforms”, “Economic Reforms”, and “Political Reforms”.

Place it into the correct basket (Social, Economic, or Political).

1) Implemented a unified constitution throughout the country (Political Reforms)
2) Issued a new paper currency called ‘Assignat’ (Economic Reforms)
3) Confiscated properties controlled by religious leaders (Social Reforms)
4) Declared complete religious tolerance (Social Reforms)
5) Clergy became salaried government employees (Social Reforms)

Reign of Terror and September Massacre – Mind mapping	
Governing Body changes (1792)	National Convention replaced the National Assembly
Declaration and Executions	France declared a Republic and King Louis XVI executed.
Control of France	Jacobins took power
Foreign Attacks	Britain, Austria, and Russia attacked France
Response	Formation of Committee of Public Safety
Leaders	Danton, Hébert, Marat, and Robespierre.
Reign of Terror	Thousands of nobles, priests, and royal supporters branded traitors & jailed
September Massacre	Overcrowded prisons → 1,500 killed on Paris streets
Execution Method	Guillotine
Irony	Later, even Republic leaders were guillotined

- "I found the crown of France in the gutter. I picked it up with the tip of my sword and cleaned it, and placed it atop my own head" – What was the situation in France that Napoleon came into power.
  - New Constitution (1795)
    - → Directory formed (A 5-member a committee formed after Reign of Terror ended)
    - → Corruption & Mismanagement
    - → Poverty
    - → People lost faith
    - → Napoleon took over.

❖ Impact of the French Revolution.

- Feudalism collapsed
- Church property taken, given to middle class
- Nobles' lands confiscated, privileges abolished
- Metric system introduced
- Nationalism emerged
- Democracy established (Rousseau's sovereignty of the people)
- Inspired independence movements in Asia & Africa

❖ Napoleon and Post-Revolutionary Changes:

- Work sheet. Shuffle reforms and arrange them as legal, educational, economic etc..

Reforms	Changes
Legal reforms	Napoleonic Code abolished feudal laws, ensured equality and religious freedom.
Concordat	As per the agreement with the Pope, the freedom of the Catholic Church was restored. Other religious groups were also granted freedom.
Educational reforms	Established lycee schools and the University of France.
Economic reforms	Founded the Bank of France and unified currency.
Military reform	The army was reorganised into several battalions.

❖ Continental system of Napoleon

- Trick to remember - "Napoleon could not sink Britain, so he tried to starve Britain." ☹ Britain was Napoleon's arch enemy.
- Since Britain was a strong naval power, he could not conquer it by sea.
- So he planned an economic attack → Continental System.
- France and its friendly countries were banned from trading with Britain.
- The plan failed and caused battles with Britain.
- Finally, Napoleon was defeated in the Battle of Waterloo (1815).

❖ How do the statement "The map of Europe redrawn", closely related with major decisions taken by the congress of Vienna.

❖ The map of the Europe Redrawn by restoring the monarchies that existed in the countries of Europe including France before the French revolution. This is the main decision taken by Congress of Vienna.

❖ Recognise Britain's naval supremacy and Russia's dominance in Eastern Europe and Austria's dominance in Central Europe are the other decisions.

❖ Model Questions based on this chapter:

1. Who among the Bourbon kings declared "I am the State"?
    a. Louis XIV
    b. Louis XV
    c. Louis XVI
    d. Napoleon
2. Which section of French society was exempted from paying all taxes but collected tithe from peasants?
    a. Nobles
    b. Clergy

c. Commons

d. Middle Class

3. Who authored The Social Contract?

a. Montesquieu

b. Rousseau

c. Voltaire

d. John Locke

4. When did the members of the Third Estate take the Tennis Court Oath? a) June 17, 1789

a. June 20, 1789

b. July 14, 1789

c. Sept 22, 1792

5. Matching (1 mark each)

A (Person / Term)	B (Work/Idea)
Montesquieu	Two treatises of Government
Rousseau	Separation of powers
Voltaire	Criticism of clergy and superstition
John Locke	The social contract

6. " Nobles fight, Priests pray and the commons pay" Analyse the social system that existed in France in the 18th century based on the above statement.
7. What was the September Massacre?
8. "The counter reformation was both a reaction against the reformation and an effort to reform itself." Evaluate the statement based on the initiatives taken by the catholic church

9. How did the outbreak of the Bubonic plague in the mid -14th century paved the way for the emergence of humanism?
10. What are the reforms introduced by the French national assembly in the social, economic and political spheres of France?
11. If you were a woman living in that era (French revolution and women movement), how would you have responded or acted?

03. Social Analysis: Through Sociological Imagination

❖ Introduction:

- This module explores two fundamental approaches to understanding personal and social problems: Common-sense Knowledge and Sociological
    - Imagination. We will delve into their definitions, how they are formed, their characteristics, and critically examine their strengths and limitations.

❖ Common-sense Knowledge Approach

- Definition:
    - Common-sense knowledge is the direct understanding individuals acquire about the world through personal experiences, social interactions, and cultural knowledge. It is not formal knowledge but rather assumptions or everyday practical knowledge.
- Formation:
    - It is formed based on norms, practices, beliefs, and personal experiences, which are often not critically examined. It develops through personal experiences and general observations.
- Limitation:
    - Relies on speculations or practices: For example, the idea that a high score is achieved only by studying for longer hours, which is a speculation or practice, may not be effective for everyone.

- Often partial:

- Statements like "Climate change is natural: Human actions have no role in it" are examples of common-sense knowledge that are often partial, as human actions are responsible for climate change and global warming.

- Not based on scientific observations or studies:
  - For instance, believing that "eating till you are full is good for health" is based on day-to-day observations rather than a detailed understanding of nutrition and health.
- Bases itself on stereotypes:
  - General statements, beliefs, or ideas, such as "Teenagers are always rebellious and irresponsible," are stereotypes that create misconceptions and a lack of trust.

<u>Individual problems or complex social problems cannot be understood properly:</u>

The problem of housing is not just about personal choice or laziness. Common-sense may say people just need to try harder or get temporary help, but the real causes are deeper—like financial instability and unemployment. Common sense knowledge cannot fully explain such complex social problems. To really understand them, we need deeper study, not just everyday assumptions.

- Based on these we can say that there are other factors too which contribute to different problems in the society.
  - They are: Financial, Environmental, Administrative, Geographical disparities

❖ What is Social Analysis?

- Social analysis is the process of examining how social relationships, social institutions, social structures, and social problems affect individuals and society. Its purpose is to develop a deeper understanding of the factors influencing various social situations and to provide suggestions for their improvement

❖ Sociological Imagination Approach

- Short Notes:
  - Definition:
    - Sociological imagination is the skill to identify and analyse how individual problems are related to broader social structures. It helps to see individual problems as part of a wider social structure, moving beyond personal experiences to wider observation and analysis.
  - Origin:
    - The concept was introduced by the American Sociologist Charles Wright Mills in his 1959 book, The Sociological Imagination.
  - Core Idea:
    - It enables individuals to understand that their personal problems are often deeply intertwined with larger social factors such as environment, geography, administration, and finance. It helps us to grasp the influence of social relationships, social institutions, and social structures on individual lives.
  - Benefits:

- This approach helps in developing a deeper understanding of the factors influencing various social situations and provides suggestions for their improvement. It allows for a comprehensive understanding of individual problems and their causes by identifying the influence of social factors

❖ Characteristics of Sociological Imagination:

Characteristic	Explanation and Example
1. Broadens individual perspective	Helps identify multiple social factors influencing individual problems, beyond mere personal shortcomings. Example: Road accidents are not just carelessness but also traffic rule violations, overcrowding, and legal system failures.
2. Understanding social issues in depth	Reveals the relationship between individual problems and larger social issues, leading to deeper insights. Example: Low female labour force participation is linked to gender norms, educational access, and cultural/economic factors.
3. Enables selfreflection	Fosters the ability to critically evaluate one's own thoughts and actions, recognising social influences on personal choices. Example: Ishan realised his career choice (engineer) was influenced by parents and teachers, not just personal will.
4. Develops empathy and tolerance	By understanding the social context behind others' experiences, individuals develop compassion and diverse perspectives. Example: A child's low scores may stem from family background or limited resources, fostering empathy.
5. Develops critical thinking	Helps individuals recognise how various social factors influence their lives and encourages active engagement in improving circumstances. Example: Priya, a migrant, critically thought about migrants' common problems and worked to improve their conditions.

❖ 6. Questions negative social norms	❖ Inspires individuals to challenge societal beliefs and stereotypes that are detrimental, such as those related to mental health. Example: Rinu realised negative social norms prevented him from sharing his mental health issues, prompting him to raise awareness.

❖ Comparative Study: Common-sense Knowledge vs. Sociological Imagination:

Different Approaches to Social Problems

Feature	Common-sense Knowledge Approach	Sociological Imagination Approach
Scope	Limited to personal views and experiences.	Broad, connects individual experiences to larger social structures.
Explanation	Often provides only a superficial explanation, based on stereotypes.	Analyses deeply the impact of social factors on individuals.
Critical Thinking	Social realities and problems are not approached through critical thinking.	Encourages critical thinking about interrelationships between personal experiences and social structures.
Understanding Causes	Attributes problems to individual failings (e.g., laziness, lack of effort).	Attributes problems to wider social factors (e.g., uneven distribution of resources, population growth, and systemic pressure).
Problem Solving	Often leads to incomplete or temporary solutions.	Leads to the formulation of more effective social policies and strives for social change.
Basis	Personal experience, observation, socialisation, speculation.	Scientific study of society, observing, analysing, and interpreting relationships, institutions, and structures.

❖ Comparative Analysis:

- While both common-sense knowledge and sociological imagination are ways of understanding society, they are distinct and lead to vastly different conclusions and solutions. Common-sense knowledge, derived from everyday experiences, is often limited, partial, and prone to stereotypes, preventing a proper understanding of complex social problems. It tends to individualise problems, blaming personal choices or failures for broader societal issues.

- In contrast, sociological imagination provides a powerful tool to look beyond individual circumstances and connect personal troubles to public issues. It broadens perspectives, allows for a deeper understanding of social issues, fosters self-reflection, develops empathy, encourages critical thinking, and helps in questioning negative social norms. By integrating these two ideas, individuals can engage critically with society, differentiate the complexities of social realities, and avoid viewpoints based solely on common sense.

Model Questions based on this chapter:

1. "Commonsense Knowledge" is primarily acquired through:
    a. Formal education and scientific studies
    b. Personal experiences, social interactions, and cultural knowledge
    c. Critical analysis and logical deduction
    d. Speculations based on abstract theories
2. The concept of "sociological imagination" was introduced by which American Sociologist?
    a. Emile Durkheim
    b. Karl Marx

c. Max Weber
d. Charles Wright Mills

3. Which of the following is explicitly listed as a limitation of commonsense knowledge?
    a. It encourages critical thinking.
    b. It is always based on scientific observation.
    c. It provides only partial knowledge.
    d. It helps understand complex social problems.
4. Identify two distinct characteristics of sociological imagination and briefly explain how each helps an individual to understand social issues in a deeper way.
5. Match the sociological concept or figure with its description.

Charles Wright Mills	The scientific study of society
Emile Durkheim	Skill to identify how individual problems are related to broader social structures
Sociology	Framework of rules to stabilize and regulate social relations
Social Institutions	Studied the social causes behind suicide
Sociological Imagination	Introduced the concept of sociological imagination

6. Sociological imagination helps in "developing empathy and tolerance". Using the example of a child who consistently gets low scores and is not active in studies, explain how approaching this problem through a sociological imagination lens, rather than common sense knowledge, can foster empathy and lead to a more supportive response.

7. Explain the key differences between the Commonsense Knowledge Approach and the Sociological Imagination Approach when analysing social problems, as outlined in the provided table.
8. Define "social problem" and give two examples.
9. Provide two examples of social institutions that establish rules to stabilize and regulate social relations

04. Wealth and the World

- Theme of the Chapter:
  - The explorations and discoveries of the 15th and 16th centuries were major events that shaped the course of history.

- Significant events that led to the geographical expedition:
  - The conquest of Constantinople by the Turks.
  - Arrival of the Portuguese at the Guinea Coast in Africa.

- Effects of these events on the world:
  - When the Turks captured Constantinople, the primary trade route was obstructed
  - Europeans began exploring new routes
  - They reached lands unknown to them
  - The arrival of the Portuguese on the Guinea coast was a milestone
  - These voyages and explorations led to European dominations and the spread of European culture
  - Countries like Portugal, Spain, started expeditions, followed by the Netherlands, England and France and conquered new territories

- Factors that enabled them to undertake successful expeditions:
  - Building of advanced ships
  - Invention of the compass and navigation tools
  - Patronage of rulers
  - Strong military

- Experience in seafaring
- Advances in cartography and astronomy

❖ European expeditions to other continents

➢ Portuguese expeditions to Africa:

- The knowledge of gold deposits in the Niger plains.
- Initiated their quest by capturing Ceuta in 1415
- Later, Ceuta became a vital granary
- Crossing Cape Bojador was a challenge which was done in 1434
- This allowed them to profit from the trade of gold and slaves
- Portuguese established colonies in the islands of the Atlantic, too ▪ This paved the way for finding sea routes to Asia

➢ European domination in India:

- In 1488, Bartolomeu Dias reached the Cape of Good Hope
- He was unable to navigate through the rough sea to India
- Portuguese-built sturdy ships to withstand the harsh conditions of the Indian ocean
- 1498 Vasco da Gama reached the eastern coast of Africa through the same route
- Reached the shore of Kapad at Kozhikode, India

➢ Spanish expedition to America

- Spain, with its long coastline and seafaring heritage, also participated in expeditions.
- They received patronage from the rulers, King Ferdinand and Queen Isabella

- With the financial aid of Spain, Christopher Columbus reached the Bahamas island in North America in 1492
- It led to the discovery of the unknown continent
- Paved the way for invasion and exploitation by Europeans
- It came to be called as "new world" Later, it was named America

❖ Impacts of Exploration and Colonisation:

- The Atlantic coast became a major trade route, leading to the decline of Mediterranean trade and the rise of Atlantic trade.
- Many regions in America, Africa, and Asia fell under European colonial rule.
- Europeans began attempts to monopolise the spice trade from Asia.
- Large quantities of gold and silver flowed into Europe from South America.
- The Triangular Trade developed between Europe, Africa, and America.
- Monetisation increased in Europe due to the influx of gold and silver.
- Portugal and Spain's trade dominance gradually declined, replaced by the Netherlands, England, and France

❖ Mercantilism

- Concept:
  - An economic system where a nation's wealth was determined by its accumulation of gold and silver (bullion).
- Policy:
  - Nations aimed to maximise exports and minimise imports to prevent the loss of bullion and acquire wealth from other countries.

❖ Colonial Policies:

- Objective:

- Policies adopted by dominant nations to extract maximum wealth from their colonies.
  - Portuguese: Aimed to seize a monopoly over the Asian spice trade. Trade in colonies became a royal monopoly, and they tried to exclude other European powers.
  - Spanish: Their colonies were directly under royal protection. They focused on extracting as much gold and silver as possible from America.
  - Dutch (Netherlands) and English: Conducted trade through Joint Stock Companies, which pooled capital from various sources and allowed investors to hold shares. Unlike royal monopolies, these companies reinvested profits to generate more income. This played a crucial role in the economic development.

❖ <u>Colonisation and Natives:</u>

- Consequences of colonisation on natives
  - Wealth extracted from the colonies forward into European countries
  - Natives lost their economic and political rights over their own region
  - Indigenous culture faces destruction
  - Western lifestyle and practices spread
  - Christianity was propagated in colonies

❖ <u>Merchant Capitalism:</u>

- In this system, merchants distributed raw materials to rural artisans who produced goods at home.
- The merchants then collected these finished products, paid the artisans, and sold the products for profit.
- They acted as intermediaries between producers and consumers

❖ Industrial Capitalism:

- This system evolved from merchant capitalism when capital gained from colonisation was invested in industries.
- Factory owners gained huge profits from large-scale production.

❖ Industrial Revolution

- Definition:
  - A period of significant changes in production systems between 1780 and 1850, primarily originating in England's textile industry. It involved the shift to large-scale, machine-based production in factories

❖ Key Changes of Industrial Revolution:

- Production became machine-based.
- Improved iron and steel technology(metallurgy) led to better tools.
- Steam emerged as an energy source.
- Transportation facilities developed.
- Production shifted from cottages to factories

❖ Impacts of Industrial Revolution:

Merits	Demerits
Rise of factories	Exploitation of labourers
Increased production	Poverty, epidemics

New employment opportunities	Long working hours and low wages for women and children
Rise of cities and urbanisation	Rise of slums
Urban life	Miserable life for labourers in cities
Better living condition	busy polluted city

❖ Responses to Exploitation

- Socialism:
  - In response to the exploitation under industrial capitalism, socialist ideas emerged, advocating for the equitable distribution of resources and public ownership of the means of production. Karl Marx and Friedrich Engels transformed the early stage dream or belief in socialism into a practical and scientific ideology
- Imperialism
  - Definition:
    - The process by which a nation establishes and maintains political, economic, and social control over other territories beyond its borders.
    - Industrialised nations, unable to find sufficient raw materials and markets within their borders due to increased production, sought colonies as sources for raw materials (e.g., Belgium exploiting rubber in Congo) and markets for their finished products.
    - This led them to establish political dominance over these regions

❖ World Wars

➢ First World War (1914-1918):

- Imperialist Rivalry:
  - New imperial powers emerged (Germany), competing with older ones (France, England) for control over territories and resources.
  - As Asia and Africa were already under British and French control, Germany aimed for territories under Ottoman control. For this, they planned to construct berlin Berlin-Baghdad railway line leading to . conflict with British, French, and Russian interests.
- Extreme Nationalism:
  - An excessive love for one's country, often tied to racial superiority, led to countries claiming territories inhabited by their particular race.
  - Pan-Slavism (led by Serbia, supported by Russia) and Pan-Germanism (led by Germany) are examples.
- Formation of Military Alliances: Mistrust among European powers led to the formation of two major alliances:
  - Triple Alliance: Germany, Austria-Hungary, Italy.
  - Triple Entente: Britain, Russia, France.
- Immediate Cause:
  - The assassination of Archduke Franz Ferdinand, heir to Austria-Hungary, by a Serbian citizen in Sarajevo on June 28, 1914.
  - This led to Austria-Hungary declaring war on Serbia, and the alliance system rapidly drew other nations into the conflict, turning it into a world war.

❖ Effects:

➢ ▪ Massive loss of life for soldiers and civilians.

➢ ▪ Devastation of agricultural and industrial sectors.

- ▪ Beginning of the decline of European dominance.
- ▪ Rise of freedom struggles in Asian and African nations.
- ▪ Formation of the League of Nations (an international organisation to promote peace and secure independence).
- ▪ Rise of Totalitarianism in countries like Italy, Germany, and Spain.

❖ Totalitarianism:

- Definition:
  - A political system where the ruling government exerts absolute control over all aspects of citizens' lives, denying individual freedoms and demanding complete submission to the state.

❖ Characteristics

- Rejection of democracy
- Opposition to socialism
- support for autocratic rule,
- extreme nationalism,
- elimination of political opponents,
- glorification of war and violence

Italy	Germany	
Fascism (Italy): Led by Benito Mussolini	Nazism (Germany): Led by Adolf Hitler,	
Organised march on rome in 1922 using threats to seize power.	Organised march to berlin in 1923 and was imprisoned	

Rose to power following march established the 'Blackshirts' Banned all non-fascist parties Enmity to socialist, labour, peasant organisation	Efforts to secure power through election Established 'Brownshirts' and came to power in 1933. He implemented policies to eliminate communists, socialists, democrats, and Jews, formed a secret police force called 'Gestapo'. Hitler's aggressive actions ultimately led to the Second World War.	

❖ Second World War (1939-1945):

- Causes:

1) Treaty of Versailles:
   a) This peace treaty, signed after WWI, imposed harsh terms on Germany, including loss of colonies and territories, disarmament, and heavy war reparations.
   b) These measures sowed the seeds for future conflict.
2) Failure of the League of Nations:
   a) It failed to resolve disputes and take action against aggressive states like Japan, Italy, and Germany.
3) Formation of Military Alliances):

a) The world again saw the formation of opposing alliances: Axis Powers (Germany, Italy, Japan) and Allied Powers (Britain, France, later joined by the Soviet Union and the USA).

4) Policy of Appeasement:
   a) by signing the Munich Agreement (1938), which was partly motivated by fear of Soviet socialism and hoping Fascism would counter its spread.
   b) This policy gave Hitler confidence to continue his aggressive expansion.
5) Immediate Cause:
   a) Germany's invasion of Poland on September 1, 1939, marked the beginning of the war.

◦ Effects:

1. Tens of millions of people were killed.
2. Widespread famine and epidemics.
3. Collapse of the European economic system.
4. Decline of colonialism and imperialism.
5. End of European dominance in the world.
6. Formation of the United Nations Organisation (UNO) in 1945 to ensure global peace and security.
7. End of totalitarian regimes in Italy and Germany.
8. Asian and African colonies gained independence.
9. The USA and Soviet Union emerged as global superpowers.

❖ <u>Post-War World</u>

➢ Cold War (Post-WWII - 1991):

Description: An ideological confrontation between the capitalist nations led by the USA and the socialist nations led by the Soviet Union. It was not a period of direct war or complete peace.

End: The Cold War ended with the dissolution of the Soviet Union in 1991.

- Neocolonialism:
  - ◦ Description: After WWII, newly independent nations in Asia and Africa still needed economic support. The USA, a capitalist power, adopted a new approach to gain wealth by indirectly exploiting these countries through financial aid and loans. This new form of colonialism is known as neocolonialism.

❖ Finance Capitalism:

- ◦ Description:
  - This economic system, which facilitates neocolonialism, is dominated by financial institutions like banks, insurance companies, stock markets, and investment firms.
- Focus:
  - Its primary focus is on financial transactions and accumulation of wealth, rather than industrial production or public welfare. It allows for significant wealth accumulation without direct production or technological advancement.
- ◦ Impacts:
  - Finance capitalism aims for huge profits, leading to the exploitation of ordinary people and traditional workers. Resources that were once freely available become controlled by a few capitalists, and unregulated resource exploitation contributes to environmental problem.

❖ Model Questions based on this chapter:

1. Which two significant events in the 15th century were instrumental in launching European geographical expeditions?
   a. The Crusades and the Industrial Revolution
   b. The conquest of Constantinople by the Turks and the arrival of the

c. Portuguese at the Guinea Coast
d. The Protestant Reformation and the Treaty of Versailles
e. The discovery of America and the invention of the compass

2. Mercantilism, an economic policy adopted by European nations, measured a nation's wealth primarily by the amount of:
    a. Land and natural resources it possessed
    b. Industrial production and technological advancement
    c. Gold and silver it possessed
    d. Skilled labor and intellectual capital
3. Who was the first explorer to circumnavigate the globe through the oceans?
    a. Christopher Columbus
    b. Vasco da Gama
    c. Ferdinand Magellan
    d. John Cabot
4. List two factors, other than geographical location, that enabled European nations to undertake successful overseas expeditions.
5. Identify two far-reaching consequences of European geographical explorations on global trade and colonization.
6. Match the explorer or political ideology with their associated achievement or characteristic.

Vasco da Gama	Founder of Nazism
Christopher Columbus	Reached Kappad, India in 1498
Bartolomeu Dias	Founder of Fascism
Benito Mussolini	Reached the Bahamas Islands in 1492

Adolf Hitler	Reached the Cape of Good Hope in 1488

7. "The Industrial Revolution paved the way for both positive and negative changes". Discuss the significant social and economic demerits of industrialization, such as those leading to the rise of slums and exploitation of labor, and how these issues contributed to the emergence of new ideologies like socialism.
8. Explain the fundamental difference between "Merchant Capitalism" and "Industrial Capitalism" as economic systems that evolved in Europe.
9. Define "Imperialism" and explain how it transformed the economic policies of European countries.
10. Identify the two major military alliances that were formed prior to the First World War and name one prominent member country from each alliance.

5. Public Opinion in Democracy

❖ Definition of Public Opinion:

- It is the general opinion of the people concerning issues that affect them. This can also be interpreted as the position or opinion generally held by a particular section of society on a specific matter.

❖ Role in a Democratic System:

- Public opinion is a foundational element of democracy, as governments typically accept public opinions during their policy formulation processes. It empowers citizens, thereby strengthening democracy, and serves as an effective form of social control over the government, fostering public debate. Public opinion is considered an essential criterion for democracy. A robust public opinion ensures accountability of rulers, prevents arbitrary or dictatorial tendencies, safeguards citizen rights, and promotes responsibility among political parties.

❖ Characteristics of Public Opinion:

- ◦ It reflects diverse opinions within society.
- ◦ It represents a general consensus on a topic, rather than strictly being the views of the majority.
- ◦ Public opinion is dynamic, capable of changing based on circumstances, time, and new knowledge.
- ◦ Its formation is not limited to political matters but also extends to socio-economic and cultural issues.
- ◦ Individuals can express their opinions from any location, as there is no single fixed platform for its expression.
- ◦ It plays a role in ensuring democratic communication.

❖ Formation of Public Opinion:

- It is shaped when responsible citizens highlight societal problems to others. This process is not automatic but occurs through both formal and informal channels. Various factors influence its formation, including individuals' social and cultural backgrounds, attitudes, beliefs, preconceptions, leadership skills, and education.

❖ Civil Society

- Definition: Civil society is a crucial democratic concept that includes voluntary organisations, groups, and individuals who work for the welfare of society without government control or profit motives.
- Function: It represents various views and ideas and contributes to the development of a civil society that is attuned to social issues. It also holds rulers accountable through ongoing criticism.

❖ Agencies Shaping Public Opinion

- Family: Plays the primary and initial role in a child's opinion formation, influencing them through socialisation, traditional beliefs, and discussions on a wide range of topics.
- Educational Institutions: Significant in developing knowledge, understanding of rights and duties, and fostering scientific and critical thinking skills in children. School activities like parliaments and clubs offer platforms for expressing opinions and cultivating a democratic and civic sense.
- Peer Groups: Composed of individuals of similar age with shared interests, goals, beliefs, and ideals. Their debates and discussions are vital in shaping and refining opinions on social and political matters, leading to common consensus.
- Media (Traditional & New): Has a pivotal role in bringing issues to public attention and shaping public sentiment.
- ◦ Newspapers: Essential for informing the public about political and social events and for conveying public opinion to the government. However, they can also mislead public opinion through non-factual news driven by vested interests.

- ◦ Radio & Television: Reach both literate and illiterate communities, reflecting societal life and disseminating views on government policies.
- ◦ Social media: Increasingly crucial for opinion formation, yet also a common channel for fake news, highlighting the need for digital and media literacy.
- Political Parties: Are at the forefront of shaping and mobilising public opinion within a democratic system. Both ruling and opposition parties use diverse methods (e.g., journals, manifestos, rallies, campaigns, seminars) to propagate their views and influence the public.
- Social Institutions and Organisations: Various non-governmental entities, such as religious institutions, trade unions, human rights movements, and environmental organisations, contribute significantly to public discourse and opinion formation.
- Opinion Polls: A professional and effective method for gathering data on public attitudes concerning social, cultural, political, and economic issues by surveying a sample population.
- Art and Literature: Have historically, and continue to, influence public opinion and inspire social change by critically reflecting on or challenging contemporary issues. Examples include works like Chandalabhikshuki (challenging the caste system) and Adukkalayil Ninnu Arangathekku (promoting social reform)

❖ What are the preventive measures that we should take against the spread of such fake news and messages?

- Finding the real source in order to find the validity of the news and messages.
- If recognised as fake news and messages, do not share it with others ➢ Inform official system such as cyber cell.

❖ <u>Media Literacy:</u>

- Media Literacy is the ability to access, analyse, evaluate, create new messages and communicate the messages received through various forms of media. Content creation and the way it shapes our perceptions and how we critically interpret news

and messages are all included in this. Media literacy includes the way we shape our perceptions and critically interpret news and messages

❖ Digital Literacy:

- Digital literacy is the ability to find information from the digital world and evaluate them efficiently using digital equipment and technology. This includes basic computer knowledge, effective use of internet, navigation of digital platforms, critical evaluation of online content, cyber awareness etc. Digital literacy is how we effectively use digital tools and technology to find out and evaluate information from digital spaces.

❖ IV. Factors Hindering Public Opinion Formation

- Illiteracy: Restricts individuals' knowledge and their capacity to form rational opinions on public issues.
- Digital Divide: The disparity in access to modern information technology (e.g., internet, smartphones) hampers the effective formation of public opinion.
- Poverty: Often results in groups being isolated from public affairs, thereby impeding their appropriate participation in opinion formation.
- Unhealthy Political Activity: This includes partisanship and polarisation, which can distort genuine public opinion.
- Unhealthy Election Practices: Methods used to manipulate voters during election periods can prevent the formation of authentic public opinion.
- Other Obstacles: Corruption, regionalism, narrow group interests (socio-economic, cultural, parochial), and hero worship are also identified as factors that undermine true public opinion.

❖ V. Digital and Media Literacy

- Media Literacy: The capability to access, analyse, evaluate, create, and communicate messages received through various media forms. This skill includes critically interpreting news and understanding how perceptions are shaped.

- Digital Literacy: The ability to efficiently find and evaluate information from digital platforms using digital equipment and technology. It encompasses basic computer knowledge, effective internet use, navigation of digital platforms, critical evaluation of online content, and cyber awareness.
- Importance: Both literacies are crucial for navigating the digital world, identifying fake news, and preventing its spread.

❖ ---

❖ Model Questions based on this chapter:

1) Which of the following is NOT necessarily a characteristic of public opinion in a democratic system ?
    a. It reflects diverse opinions.
    b. It is always the view of the majority.
    c. It may change with circumstances, time, and new knowledge.
    d. It ensures democratic communication.
2) The "first stage of public opinion formation" for a child begins with which agency?
    a. Educational institutions
    b. Peer groups
    c. Family
    d. Media
3) What is the ability to access, analyze, evaluate, create new messages, and communicate the messages received through various forms of media called?
    a. Digital literacy
    b. Information literacy
    c. Media literacy
    d. Technological literacy
4) Define "public opinion" as described in the textbook.

5) Identify two factors that can hinder the effective formation of genuine public opinion in a society.
6) Match the agency shaping public opinion with its primary role or example.

Family	Plays a key role in sharing opinions and thoughts among the illiterate community
Educational Institutions	Groups of similar age with shared interests that influence views
Peer Groups	The first stage of a child's opinion formation through discussions
Radio and Television	Collects information about public attitudes on various issues through surveys
Political Parties	Publishes journals, pamphlets, and manifestos to create public opinion in their favor
Opinion Poll	Platforms for developing democratic and civic sense among students

7) Media plays a significant role (including print, electronic, and social media) in shaping public opinion. Discuss both the positive ways media influences public discourse and the challenges it poses, such as the spread of fake news, in a democratic society.
8) Differentiate between "Digital literacy" and "Media literacy".
9) Describe two methods used by political parties to shape and mobilize public opinion in their favor, especially during election campaigns.
10) Explain how a strong and critically informed public opinion is essential for strengthening the democratic process and ensuring governmental accountability.

SOCIAL SCIENCE:2

PART: 1

Table of Contents:

1. Weather and Climate 58
2. Climatic Region 68
3. From The Rainy Forests To The Land of Permafrost 74
4. Consumer: Rights and Protection 81
5. Money and Economy 91

1. Weather and Climate

❖ Weather:

- Atmospheric conditions such as temperature, pressure, wind, humidity and precipitation for a shorter period of time.

❖ Climate:

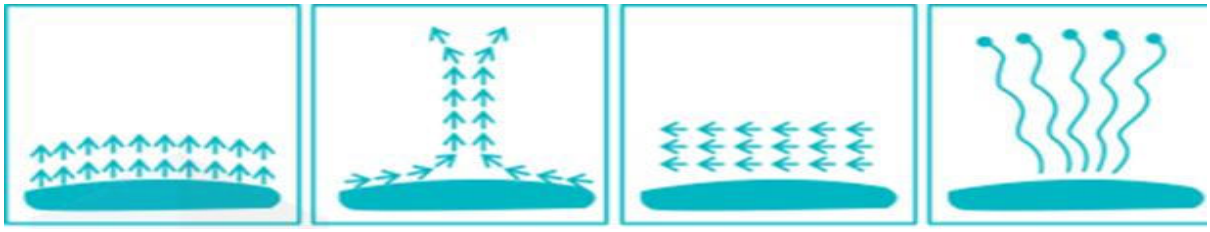

- The average weather condition experienced for a longer period over a larger area.

❖ Insolation and Terrestrial Radiation:

- Insolation:
  - The amount of sun's rays reaching the earth's surface.
  - As the incoming solar radiation is in the form of short waves, it does not heat the atmosphere considerably.
  - The earth's surface gets heated by insolation.

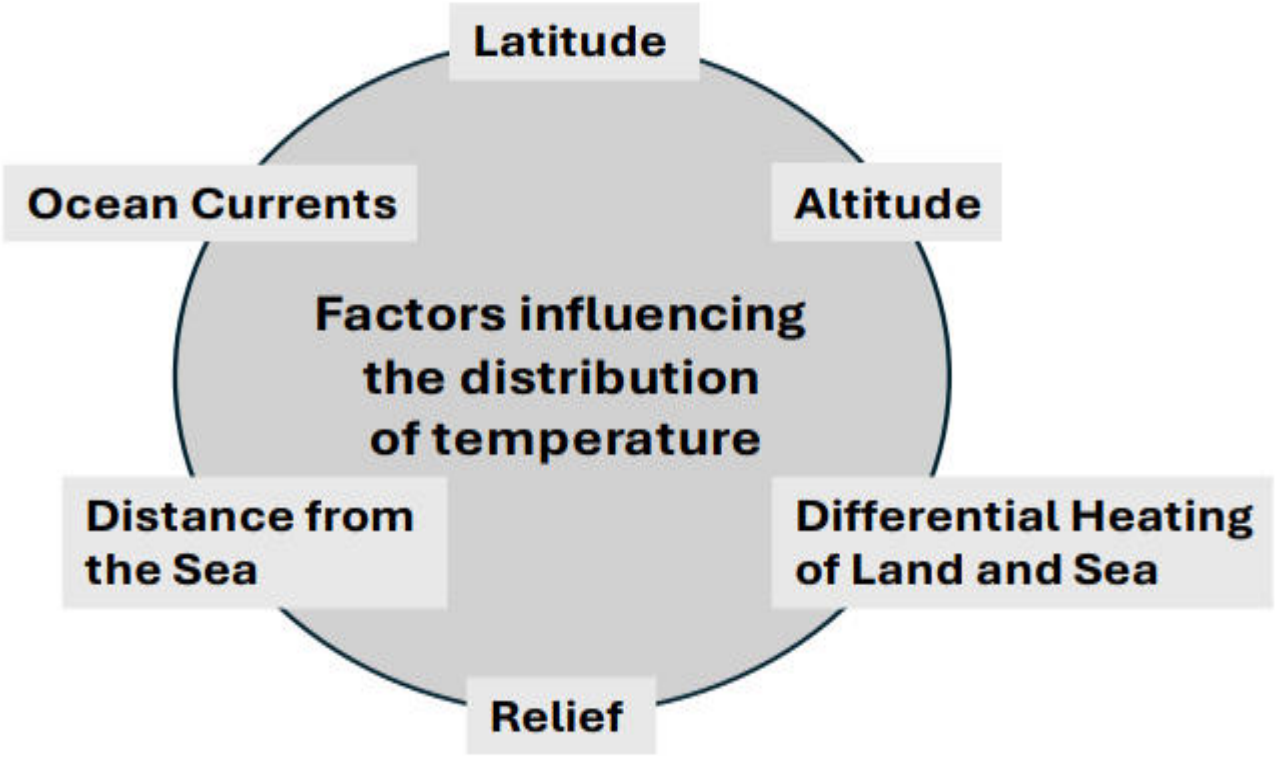

- Terrestrial Radiation
  - The re-radiation of energy in the form of long waves.
  - Terrestrial radiation heats up the atmosphere.

❖ Processes of heat transfer in the atmosphere:

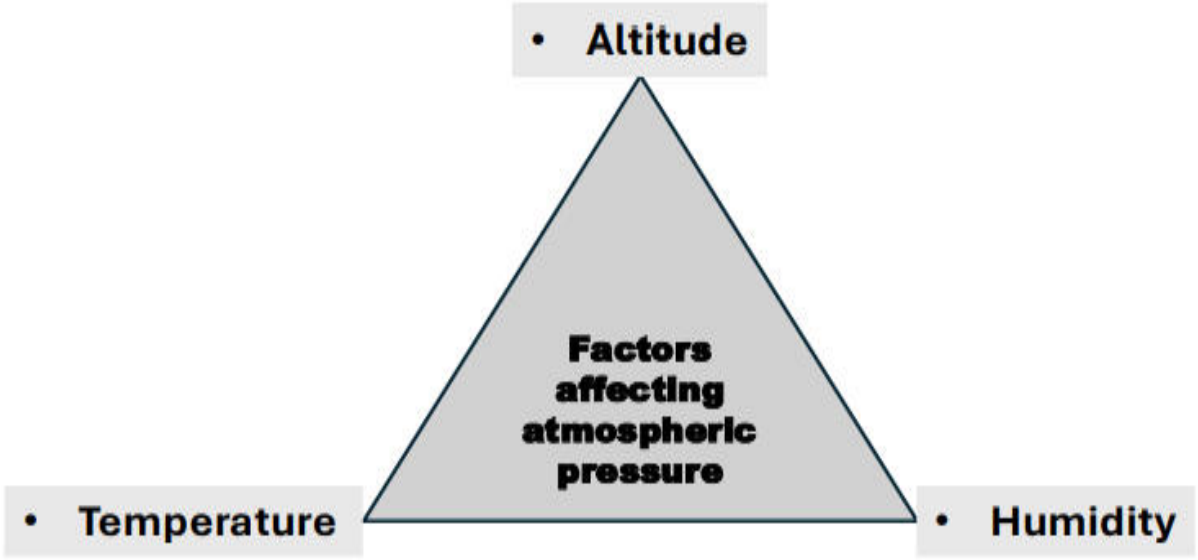

- Conduction: Heat is transferred to the lower part of the atmosphere which is close to the earth's surface.
- Convection: As the heated air expands and rises up.
- Advection: Heat is transferred horizontally through wind.
- Radiation: Emission of energy in the form of long waves.

❖ Factors influencing the distribution of temperature on the earth's surface:

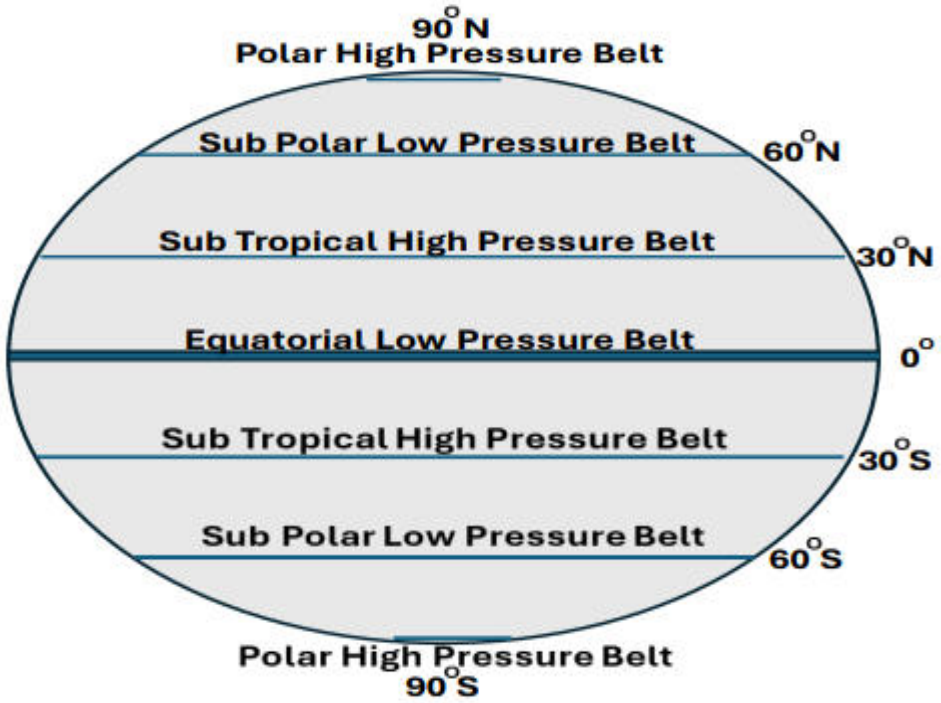

❖ Factors affecting atmospheric pressure:

❖ Global Pressure Belts and situations of their formation:

➢ Different pressure belts are formed along certain specific latitudinal zones. These are called Global Pressure Belts.

- a) Equatorial Low-Pressure Belt: The expansion and rising up of air due to high temperature prevailing in the equatorial region is the cause for the formation of Equatorial Low-Pressure Belt.
- b) Sub Tropical High-Pressure Belts: The rising warm air along the equatorial region gradually cools and subside at about 30-degree North and 30-degree South latitudes due to the rotation of the earth. This results in the formation of Sub Tropical High-Pressure Belts.
- c) Sub Polar Low-Pressure Belts :(60-degree North and South latitudes):Due to the rotation of the earth, the air throwing up along these regions. This is the reason for the formation of low pressure.
- d) Polar High-Pressure Belts: Polar High-Pressure Belts are formed as a result of the contraction and subsidence of cold air.

❖ One of the major factors influencing the direction of winds is the Coriolis Force. If so, the speed and intensity of winds are influenced mainly by two factors such as:

- Pressure Gradient Force
- Frictional Force

❖ Permanent Winds and Pressure Belts that form them: (Table)

- The winds blowing constantly over a particular direction throughout the year are called Permanent Winds.

Permanent Winds	Pressure Belts
• Trade Winds	- From the Sub tropical high pressure belts to the equatorial low pressure belt
• Westerlies	- From the Sub tropical high pressure belts to the sub polar low pressure belts
• Polar Winds	- From the Polar high pressure belts to the sub polar low pressure belts

❖ Local Winds and their features:

- Local Winds are winds formed as a result of local differences in temperature and pressure in different parts of the World.

Local Winds	Region	Characteristics
• Loo	North Indian Plains	Hot Wind
• Chinook	Slopes of Rocky Mountains (in North America)	Dry hot wind
• Foehn	Slopes of Alps Mountain (in Europe)	Dry hot wind
• Harmattan	Sahara Desert (in Africa)	Relief to intense heat

1) Periodic Winds:

a) Winds subjected to the periodic reversal of their direction are termed as Periodic Winds.

b) Land Breezes and Sea Breezes, Mountain Breezes and Valley Breezes (Diurnal Periodic Winds), Monsoon Winds (Seasonal Periodic Winds).

i) Land Breezes & Sea Breezes:

(1) During the night, land gets cool down quickly, high pressure formed over the land and low pressure over the sea. The wind blows from land to sea. These are Land Breezes.

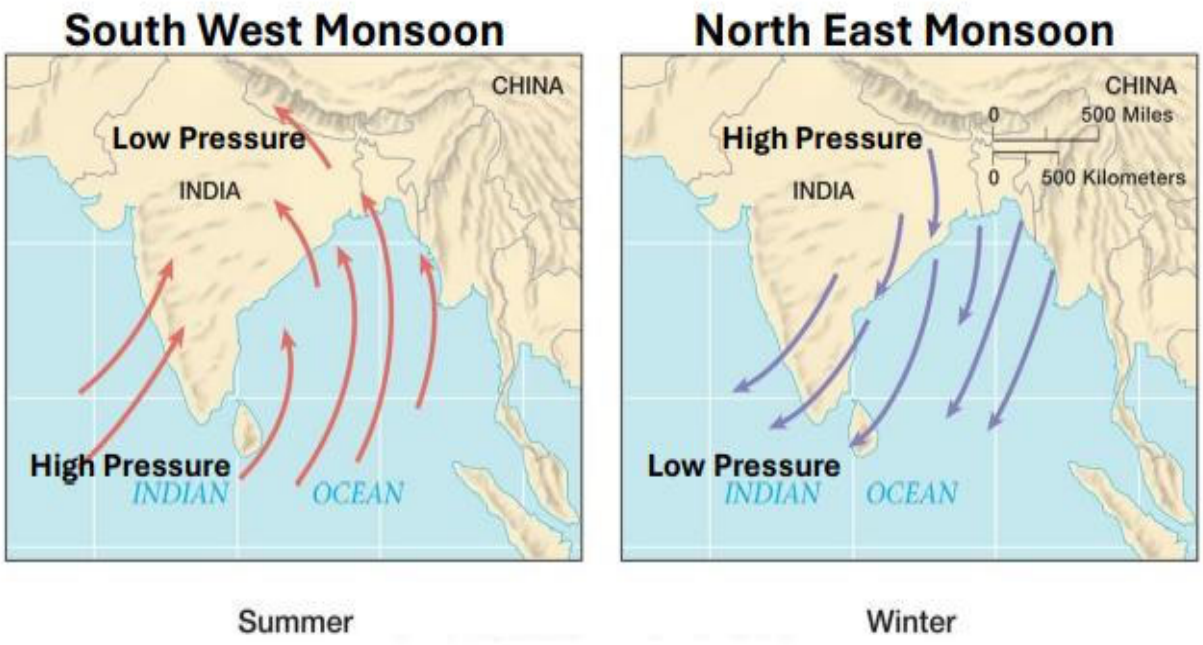

(2) During the day time, land gets heated up quickly, the low pressure formed over the land area and high pressure over the Indian Ocean. The wind blows from the sea to land. These are Sea Breezes.

ii) Mountain Breezes & Valley Breezes:

(1) During night, air along the mountain over cools, contracts and moves down slope. These are Mountain Breezes.

(2) During day time, the air over the valleys heated by sunlight and rising up slope from the valley. These are Valley Breezes.

❖ South West Monsoon & North East Monsoon winds:

Summer Winter

❖ Variable Winds:

➢ Winds of short duration, of which the intensity or direction cannot be predicted are called variable winds.

➢ Cyclones and Anticyclones belong to this category.

Cyclones: Cyclones are low pressure systems towards which winds whirl from the surroundings. The direction of flow of air into the cyclones are anticlockwise in the Northern Hemisphere and clockwise in the Southern Hemisphere. Tropical Cyclones – e.g.,

Hurricanes, Typhoons, Willy Willies, Tornadoes etc. Temperate Cyclones – formed in temperate regions where warm and cold air masses meet.

- Anticyclones: Anticyclones are high pressure system from which winds whirl outwards. The direction of flow of winds is clockwise in the Northern Hemisphere and anticlockwise in the Southern Hemisphere.

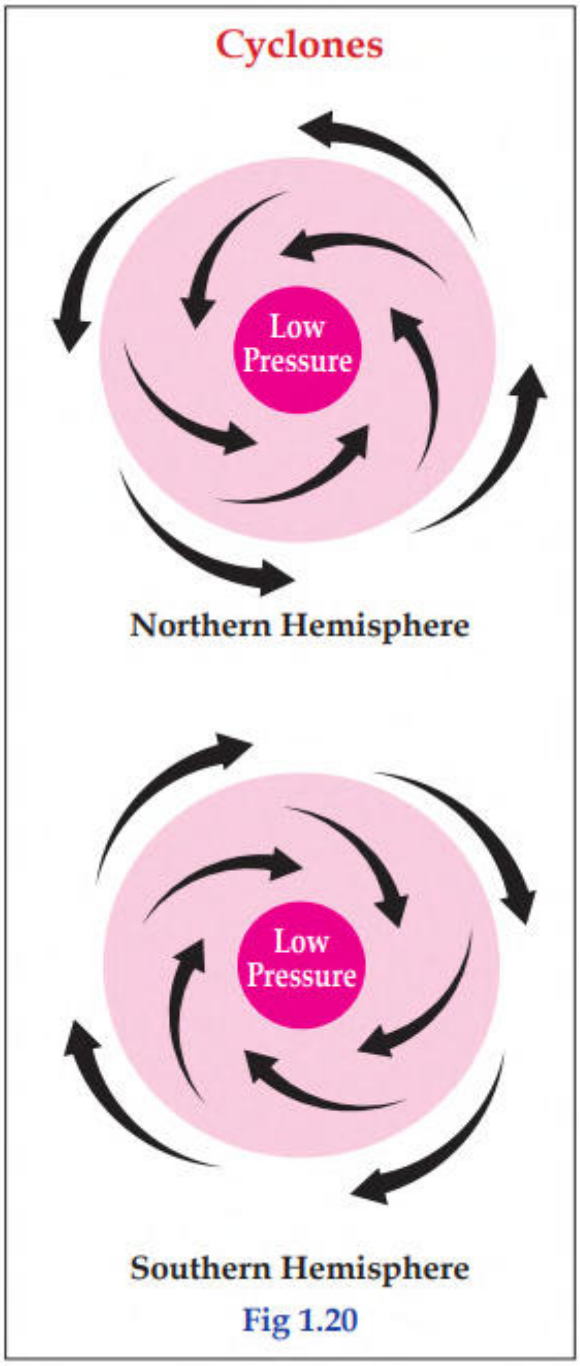

Fig 1.20

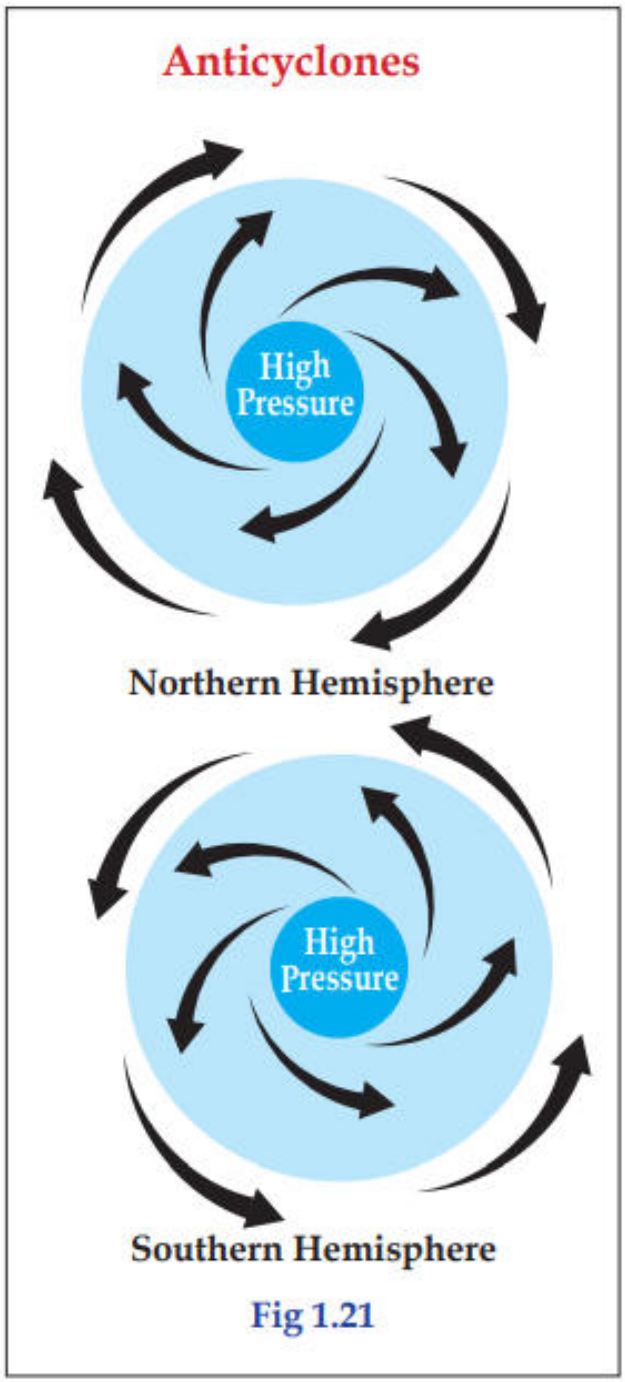

Fig 1.21

1) Absolute Humidity & Relative Humidity:

a) Absolute Humidity:

i) Actual amount of water vapour present per unit volume of air.

b) Relative Humidity:

i) The ratio between the absolute humidity and the total water holding capacity of atmosphere.

$$\text{Relative Humidity} = \frac{\text{Absolute Humidity}}{\text{Total water holding capacity of the atmosphere}} \times 100$$

❖ Saturation level and Saturation Point:

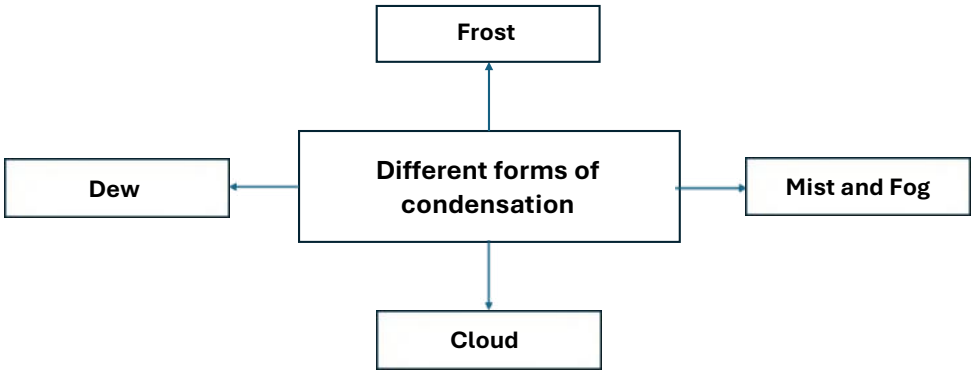

➢ Saturation level:

- The state at which the atmosphere is fully saturated with water vapour.

➢ Saturation Point:

- The critical temperature at which the atmosphere is fully saturated with water vapour.

❖ Different forms of condensation:

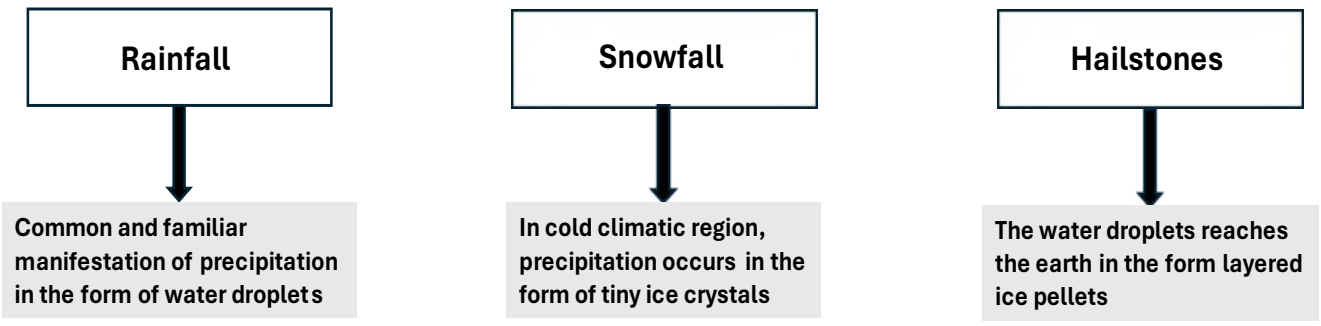

Dew	Frost	Mist and fog	Cloud
• During the night, the water vapour condenses to form **tiny droplets of water** which may clinging on to the grasses or leaves as well as other cold surfaces.	• When the atmospheric temperature falls below 0 degree Celsius, instead of dew **tiny ice crystals** are formed.	• The tiny droplets of water remains suspended in the lower atmosphere as a result of condensation of water vapour around tiny dust particles in the lower atmosphere.	* Clouds are formed as a result of condensation around the fine dust particles in the atmosphere.

- Classification of Clouds based on their form as well as the height:
  - Cirrus clouds: Thin & feather-like clouds formed at very high altitudes.
  - Stratus clouds: Thick-layered clouds, formed in the lower atmosphere.
  - Cumulus clouds: Cotton wool-like clouds, formed by intense convection currents. These clouds have great vertical development.
  - Nimbus clouds: Dark, rain-bearing clouds, formed in the lower atmosphere.

- Definition of Precipitation and different forms of precipitation:
  - As a result of continuous condensation, the size of water droplets within the clouds gradually increases. Due to the gravity of the earth, the water droplets will be released from the clouds and may fall on earth in various forms. This is termed as Precipitation.

Different forms of Precipitation

- **Types of Rainfall…**
  - Orographic Rainfall (Relief rainfall)
  - Convectional Rainfall (4 o'clock rainfall)
  - Cyclonic Rainfall (Frontal rainfall)

Moisture-laden winds from the sea enter the land and will be raised along the mountain slopes. This leads to condensation and formation of rain clouds along the windward slopes of mountains. Rainfall occurring in this manner is called **Orographic Rainfall.**
During summer season, heated air expands and rises up. Due to this convection process, rainfall occurring of afternoon. This type of rainfall is called **Convectional Rainfall.**
In cyclonic systems where warm and cold air meet, the warm air will be raised up to cause condensation and rainfall. This type of rainfall is called **Cyclonic Rainfall**.

Model Questions based on this chapter:

1. What is the term for atmospheric conditions such as temperature, pressure, wind, humidity, and precipitation for a *shorter* period of time?
    a. Climate
    b. Season
    c. Weather
    d. Atmosphere
2. The unit commonly used to record atmospheric pressure is:
    a. Degree Celsius
    b. Joule
    c. Millibars (mb) or Hectopascal (hpa)
    d. Kilometre
3. Which process of heat transfer in the atmosphere involves the horizontal movement of heat through wind?
    a. Conduction
    b. Convection
    c. Advection
    d. Radiation
4. Match the instrument with what it measures.

Thermometer	Speed of wind
Barometer	Atmospheric humidity
Anemometer	Atmospheric temperature

Wind Vane	Atmospheric pressure
Hygrometer	Direction of wind

5. Briefly differentiate between "weather" and "climate".
6. Name two factors that influence the global distribution of atmospheric temperature.
7. What is the "Normal Lapse Rate" and what value does the temperature decrease by per kilometre of altitude?
8. Explain the concept of the "Heat Budget of the Earth" and discuss its importance in maintaining Earth as a life-supporting planet, considering the processes of insolation, absorption, and re-radiation.
9. Compare and contrast "tropical cyclones" with "temperate cyclones" based on their origin, typical diameter, and level of devastative power.
10. What is the "Coriolis Force" and how does it influence the direction of winds in the Northern and Southern Hemispheres?

2. Climatic Regions and Climate Change

❖ What is Climatic Region?

➢ A climatic region is an extensive geographical area in which similar climate characteristics are observed.

❖ Some of the major climatic regions of the world:

1. Equatorial climatic region
2. Monsoon climatic region
3. Savanna climatic region
4. Hot deserts
5. Temperate grasslands
6. Mediterranean climatic region
7. Taiga region
8. Tundra region

1) Climatic regions in the tropical region:

Climatic Region	Location	Climate	Vegetation	Human Activities
• **Equatorial Climatic Region**	* 10°N and S of the equator	- High temperatures and high rainfall throughout the year.	• Evergreen forests	-
• **Monsoon Climatic Region**	* Between 10° and 30° latitudes on both the hemisphere	- Long and humid summer and short dry winter. - Regions with as little as 50 cm of rainfall to areas receiving over 1000 cm of annual rainfall can be found.	• Evergreen and deciduous trees. (deciduous trees are more common)	- It is an important agricultural region. - Tropical crops like rice, sugarcane, jute, cotton, tea and coffee are cultivated.
• **Savanna Climatic Region**	* Between 10° and 30° latitudes in both the hemisphere	- Hot and Humid Summers, and Cool and Dry Winters. - The annual average temperature is between 21°C and 32°C. - Annual rainfall of 25 cm to 125 cm.	• Deciduous trees and tall grasses are the dominant vegetation. Closer to the deserts, short bushes and thorny forests are seen.	- Animal husbandry and agriculture are the means of livelihood of the people. - Cash crops are cultivated extensively in the savanna areas of former European colonies.
• **Hot Deserts**	* Between 10° and 30° latitudes in both the hemisphere	- The hottest regions on earth. - An average annual temperature of 30°C. The highest recorded temperature is 58°C (in Al Aziziya in the Sahara desert) - Annual rainfall is generally less than 25 cm. (in some places it may not rain for several years)	• Cactus, Shrubs and Palms are mostly found here. • Oases are formed in places where water sources are found.	- Agriculture and animal husbandry are the main means of livelihood. - Gold mining in Australia, Copper in Atacama & Petroleum deposits and the Oil mining in the Sahara and Arabian deserts.

a) Tropical grasslands (Savannas) are known by different names in different regions:

i) Savanna in Africa

ii) Campos in Southern Brazil

iii) Lianos in Venezuela

b) Hot deserts:

i) North American desert

ii) Atacama Desert (in South America)

iii) Sahara Desert, Namib desert & Kalahari Desert (in Africa)

iv) Arabian Desert (in Asia)

v) Australian Desert

❖ Characteristic features of the climatic regions in the temperate zone… .

Climatic Region	Location	Climate	Vegetation	Human Activities
• **Mediterranean Climatic Region**	* Lying between 30° and 45° latitudes in both the hemisphere	- Dry Summers and Humid Winters - Temperature of around 20-25°C in Summer, During Winter is 10°C to 16°C, - Winter rainfall of 30 to 75 cm	• Tall evergreen trees such as oak and sequoia, • Evergreen conifers such as Pine and Fir, • Shrubs	- Fruits and vegetables are major produces. - Cereals and pulses are also cultivated. - The Mediterranean countries are the World's leading producers of wine. - About 70% of citrus fruit export from here.
• **Temperate Grasslands**	* Located in both the hemispheres at a latitudes between 40° and 50°	- Short Summers and Long Winters. - Average winter temperature ranges from 2° to 13°C. - Rainfall ranges from 25 cm to 60 cm.	• Varieties of grass	- Natural grazing lands - shepherds. - Grasslands are widely converted into agricultural lands. - Commercial mechanised grain farming and animal husbandry are increasing day by day.

c) Temperate Grasslands are known by different names in different regions:

i) Prairies (in North America)

ii) Pampas (in South America)

iii) Veld (in Africa)

iv) Steppes (in Asia)

v) Downs (in Australia)

❖ Climatic regions in the cold region:

Climatic Region	Location	Climate	Vegetation	Human Activities
• Taiga Region	* Between latitudes of 55 degree and 70 degree in the Northern Hemisphere	- It is a cold region - Short summers and long winters - Summer temperature is from 15 C to 20 C while winter temperature drops up to -13 C to -25 C - An annual rainfall of 50 cm to 70 cm. - Precipitation is in the form of snowfall	- Coniferous evergreen trees such as pine, fir and spruce	• Lumbering and wool industry are the main economic activities
• Tundra Region	* North of the Arctic Circle	- It is the extreme cold zone - Winter temperature ranges from -25 C to -40 C, summer temperature rises up to 10 C - Precipitation is in the form of snowfall	- Short shrubs and mosses	• Semi nomadic life

❖ 'Climate Change' definition:

- Climate change as a long-term shift in weather patterns and temperatures that is caused by human activity or natural variability.

❖ 'The mountain country of Nepal and the island nation of Maldives are among the countries most affected by the global climate change'. Justify the statement.

- It is estimated that the Himalayan glaciers are melting at a rate of 12 to 20 metres per year as a result of global climate change. The increase in global temperature is causing rapid melting of glaciers and undesirable changes in ecosystem.
- As a result of climate change, global sea level is estimated to rise by 0.42 cm per year. If the sea level rises by two and a half metres, the Maldives will be completely submerged in the sea.

❖ Classify the activities that cause climate change as natural and anthropogenic respectively....

Natural causes	Anthropogenic causes
• Volcanic eruption	• Deforestation
• Ocean currents	• Oil mining
• Plate tectonics	• Industrialization
• Natural forest fire	• Uses of fossil fuels
• Solar output changes	• Solid wastes

❖ The implications of climate change:

1) Rising sea levels
2) Desertification
3) Rising temperatures
4) Disruptions to agriculture and food security
5) Negative impacts on human health

❖ Definition of Global warming:

➢ Some human activities result in excess production of greenhouse gases. Due to this, greenhouse effect of the atmosphere becomes stronger and the temperature increases. This process is called Global warming.

➢ Some of the human interventions that lead to climate change:

1) Industrialization
2) Land use change
3) Urbanization

❖ International initiatives to protect climate and environment:

International initiatives	Interventions
• Establishment of World meteorological Organisation (in Geneva)	- Organises world climate conferences
• Stockholm Conference	- Environmental conservation and development
• Earth Summit (in Rio de Janeiro)	- Prepared UN Agenda 21 to promote environment friendly development
• Kyoto Protocol	- Reduce the amount of Green House gases in the atmosphere
• Montreal Protocol	- Reduce the production and consumption of ozone depleting substances
• Paris Agreement	- Reduce Global warming, helping world nations to cope up with the harmful effects of climate change
• G 20 Summit (in New Delhi)	- One earth, one family, one future. - Green development, climate finance, overall development

- Model Questions based on this chapter:

1. The Monsoon climatic region is characterized by:
    a. Dry summers and humid winters
    b. Consistently high temperature and abundant rainfall throughout the year
    c. Long and humid summer and short dry winter
    d. Extreme cold and snowfall throughout the year
2. In which climatic region are sub-Arctic coniferous evergreen trees like pine, fir, and spruce the main vegetation types?
    a. Savanna region
    b. Taiga region
    c. Mediterranean climatic region
    d. Tundra region
3. According to the UN, "climate change" refers to a long-term shift in weather patterns and temperatures caused by:
    a. Only natural variability
    b. Only human activity
    c. Both human activity and natural variability
    d. Short-term weather fluctuations only
4. Match the climatic region with a characteristic feature or example.

Equatorial Climatic Region	Home to Maasai tribe, 'dry farming'
Monsoon Climatic Region	Abundance of coniferous trees, lumbering industry
Savanna Climatic Region	Cultivation of tropical crops like rice and jute
Hot Deserts	Bushmen tribe, oases
Mediterranean Climatic Region	Evergreen forests, convectional rainfall daily
Taiga Region	Leading producer of wine, dry summers and humid winters

5. Define 'climate change' as described by the UN, and classify its causes into two main categories.
6. Explain the primary reason why hot deserts are predominantly found on the western margins of continents in the tropical region.
7. How is global climate change specifically affecting Nepal (a mountain country) and Maldives (an island nation)? Provide one impact for each.
8. Discuss the concepts of "Greenhouse Effect" and "Global Warming." How do human activities contribute to the strengthening of the greenhouse effect, leading to global warming and accelerating climate change?
9. Compare and contrast the "Taiga" and "Tundra" climatic regions based on their characteristic vegetation types, temperature ranges, and latitudinal extent.
10. Name two international initiatives or agreements that aim to protect the climate and environment.

3. From The Rainy Forests

To The Land of Permafrost

❖ The Equatorial Climatic Region:

- Location & Extent
  - Lies around the Equator (0°), between 5°N – 5°S (broadly up to 10°).
  - Found in Amazon Basin (S. America), Congo Basin (Africa), SE Asia (Indonesia, Malaysia).
  - Heat zone: Torrid Zone.

❖ Tundra / Polar Climatic Region:

- Location & Extent
  - North of Taiga belt: Alaska, Northern Canada, Greenland, Iceland, North Scandinavia, Siberia.
- Types:
  - Arctic Tundra (above 60–70°N)
  - Alpine Tundra (high mountains outside polar areas).

Features	Equatorial Climate	Tundra Polar Climate
Temperature	~27 °C all year; very small annual & diurnal rang	Winter –25 to –35 °C (colder inland); summer only a few weeks just above 0 °C
Seasonality	No winter or dry season	Long, severe winter; very short summer
Rainfall/Precipitation	175–250 cm annually; heavy & well distributed	<25 cm annually; mostly as snow
Rain Types	Convectional (daily), Orographic (uplands),	Snowfall; frequent blizzards (snowstorms)

	occasional Cyclonic showers in Doldrums	
Light Conditions	Day–night cycle fairly constant (≈12 h each)	6-month polar “Day” and “Night” near the poles
Humidity	Very high; oppressive heat inland, coastal breezes give relief	Very low; dry, cold air
Overall Climate	Hot, wet, humid, evergreen conditions	Cold, dry, polar desert-like

❖ Note in mind: -

- Even if two places are in same climatic region temperature may vary according to the altitude.
- Temperature decreases with height (Normal lapse rate: about 6.5 °C per 1kilometer.)
- (Example:- Kuala Lampur and Bogota is a two cities in the equatorial regions. But experiences entirely different annual average temperature.

❖ Natural Vegetation:

Aspect	Equatorial Region	Tundra / Polar Region
Dominant Type	Tropical Rainforests/Evergreen Forests	Treeless vegetation due to permafrost
Geographic Spread	Amazon (Selvas), Congo Basin, Indonesia, Malaysia, New Guinea	Alaska, Northern Canada, Greenland, Siberia, North Scandinavia
Main Plants / Trees	Ebony, Mahogany, Rosewood, Cinchona; palms, lianas, orchids, ferns	Mosses, Lichens, Sedges, Hardy grasses, Dwarf willows, Stunted birches
Structure & Layers	Multi-layered canopy (Upper, Intermediate, Lower	No canopy; low, ground-hugging plants

Seasonality	Evergreen—flowering, fruiting, leafing all year	Vegetation active only in very short summer
Biodiversity	Extremely high (~200 plant species/acre in Malaysia)	Low diversity, only hardy cold-tolerant species
Special Notes	"Lungs of the World" (massive O_2 production); Belukar (secondary forest); Mangroves in swamps	Brief flowering and berry growth during thaw; pastures for reindeer
Human Use	Timber, medicinal plants, shifting cultivation, plantations	Limited fodder for herbivores, minor subsistence gathering

❖ Wildlife in Equatorial region.

- Arboreal (tree-dwelling) animals dominate.
  - Examples: Lemur, Chimpanzee, Orangutan, Howler Monkey, Anaconda, Parrots, Toucan, Hornbill, Hippopotamus, Alligator.
- Wildlife in Tundra climatic region
- Herbivores: Reindeer (caribou), Musk-ox.
- Carnivores: Polar bear, Arctic fox, Wolves.
- Others: Arctic hare, migratory birds, fish & sea mammals.

❖ Human Life:

Aspect	Equatorial	Tundra/ Polar Region
Population Density	Sparse in forest interiors; higher in cities (Singapore, Manaus, Bogota)	Very sparse; mainly coastal settlements
Indigenous groups	Pygmies (Congo), Amazon tribes, Orang Asli (Malaysia)	Eskimos/Inuit (Greenland, Alaska, N. Canada), Lapps (Scandinavia), Samoyeds (Siberia), Yakuts (Lena Basin), Koryaks (NE Asia)

Subsistence Activities	Hunting, fishing, fruit gathering, shifting cultivation (slash-and-burn	Hunting & fishing (seals, whales, caribou, fish), reindeer herding
Agriculture	Shifting cultivation (manioc, yam, maize, banana); large-scale plantations (rubber, cocoa, oil palm, coffee)	Limited; cereals with short growing season in some southern Tundra areas
Housing	Maloca (Amazon), Kampong houses (Malaysia); materials: wood, bamboo, leaves	Igloos (winter), skin tents (summer); wooden/modern houses in developed areas
Transport	River boats, roads (where cleared), limited rail due to dense forest	Dog sledges, snowmobiles, boats in summer
Modern Influence	Major cities (Singapore, Manaus) with advanced infrastructure	Modern fishing boats, schools, mining settlements; some tribes still semi-nomadic

❖ <u>Challenges.</u>

Aspect	Equatorial Region	Tundra /Polar Region
Health	Spread of insects and pests; germs and bacteria transmitted easily through moist air; diseases like yellow fever (mosquito)	extreme cold and snow
Transport and Communication	Thick, luxuriant forest hinders development; too difficult and expensive to construct and maintain roads and railways; many	Isolation of settlements; most human life “largely confined to the coast”; travel depends on sledges or seasonal boats

	remote parts of Amazon, Congo, Borneo lack modern communication; rivers act as the only natural highways	
Agriculture / Land Use	Lalang grass and undergrowth spring up rapidly after felling trees, affecting crops; wild animals and poisonous creatures threaten those engaged in construction or farming	Short growing season; cereals only in some southern tundra; pastures limited for reindeer
Forest Exploitation	Commercial extraction is difficult; density of forest and hardwood too heavy to float hinder lumbering	Permafrost and snow-covered land limit farming and building
Human Impact	Human activities—agriculture, construction, urbanization, mining—destroy forests; forest fires reported in Amazon	Mining leads to new settlements but fragile environment easily disturbed
General Limitation	Despite rich forests, numerous rivers, scenic beauty, the region is devoid of many basic amenities due to terrain and vegetation	Extreme cold, long winters, permanent snow on plateaus/mountains make many areas uninhabitable

- ❖ Key Comparisons (Equator vs Tundra)

Feature	Equatorial	Tundra
Temperature	~27 °C year-round	<0 °C most of year
Rainfall	175–250 cm, daily	<25 cm, snow
Vegetation	Dense evergreen forest	Mosses, lichens, dwarf shrubs
Wildlife	Arboreal, high diversity	Few hardy mammals & birds
Human Life	Shifting cultivation, plantations, cities	Nomadic herding, hunting, sparse
Challenges	Disease, deforestation, transport	Permafrost, limited resources, climate change

❖ Activities for Revision:

- ➢ Mark Equatorial & Tundra regions on a world map.
- ➢ Write a travelogue comparing both regions (climate, life, problems).
- ➢ Research report forest fires in Amazon and permafrost melt in Tundra.

❖ MODEL QUESTIONS

1) The mean annual temperature of the equatorial region is approximately
   a) 10 °C
   b) 18 °C
   c) 27 °C
   d) 0 °C
2) Which of the following rain types is the most common in the equatorial belt?
   a) Frontal
   b) Convectional
   c) Cyclonic
   d) Drizzle
3) Upernavik and Longyearbyen belong to which climatic region?
   a) Equatorial
   b) Tundra

c) Taiga

d) Savanna

4) Match the tribe with its region

Column A	Column B
Pygmy	Congo Basin
Inuit	Greenland

Answer in two or more sentences.

1. Define 'climate change' as described by the UN, and classify its causes into two main categories.
2. Explain the primary reason why hot deserts are predominantly found on the western margins of continents in the tropical region.
3. How is global climate change specifically affecting Nepal (a mountain country) and Maldives (an island nation)? Provide one impact for each.
4. Discuss the concepts of "Greenhouse Effect" and "Global Warming." How do human activities contribute to the strengthening of the greenhouse effect, leading to global warming and accelerating climate change?
5. Compare and contrast the "Taiga" and "Tundra" climatic regions based on their characteristic vegetation types, temperature ranges, and latitudinal extent.
6. Name two international initiatives or agreements that aim to protect the climate and environment.

4. Consumer: Rights and Protection

- Consumption
  - Process of buying and using goods and services to fulfil ones need

- Consumer
  - Someone who buys and uses goods and services for a price or under an agreement to buy them for a price.

- Market
  - A place where the sellers and buyers establish close links

- Factors that Influence Consumption
  - Price
  - Income
  - Taste and aptitude
  - Quality of goods
  - After sale services

- Consumer satisfaction
  - Satisfaction that the consumer gets from using the good and services
  - Consumer Satisfaction is the main aim of all economic activities
  - The first person to make an attempt to quantify satisfaction was Alfred Marshall
  - It is difficult to measure mathematically as satisfaction depends on each person's mental state what

- Utility
  - Utility is the want -satisfying power of a commodity. We can measure using the unit Utils

- Cardinal Utility theory states that satisfaction of the consumer through consumption of Goods and services can be quantified using cardinal numbers.

❖ Total Utility	❖ Marginal Utility
❖ Total amount of Utility a person receives on continuously consuming several units of a same commodity	❖ The change in total utility when an additional unit of a commodity is consumed

❖ Law of diminishing marginal Utility

- Marginal Utility from consuming each additional unit of a commodity declines as it's consumption declines as it's consumption increases , while consumption of other commodities constant

❖ Assumptions Of law of diminishing Marginal Utility

- Products should be of same quality
- Consumer's income must not change
- Limitations of law of diminishing Marginal
- Consumption must be continuously
- The use of other goods must be ascertained
- Units must be of a fixed quantity and quality
- Different types of goods and services and characteristics

Types of goods	Peculiarities	Examples	
Free goods	Free goods are those which we need not pay for and are abundantly available in nature	Sunlight. Air	
Economic goods	Goods and services that purchased. They are often manufactured or collected from nature	Clothes and minerals	
Consumer goods	Consumer goods are the final goods used by the consumer to satisfy their wants and which are sold for a price and not subjected to production process again	Food , vehicles	
Capital goods	Goods that are used in the production of a product , they assist in the production process and are sometimes used as consumables	Factory , machinery	
Durable goods	Goods that last for a long time and can be reused	Table House	
Non - durable goods	Goods that can be used for a short period of time	Milk vegetables	

❖ <u>Things to be taken care of when buying goods and services form the market:</u>

- Quality of the product
- Expiry date
- Accurate weight and measure
- After sale services
- Warranty and guarantee

❖ Why is it essential to get a bill for the goods and services?

- It is the right of the consumer to get the bill
- Make sure the GST is mentioned in the bill otherwise you may be cheated.
- Collecting the bill ensures consumer rights
- Ensures social commitment

❖ Consumer Protection movement

- The consumer protection movement in India came into being with the formation of the Consumer Guidance Society of India in Mumbai in 1966.
- It is a social movement formed to protect the rights and ensure the welfare of consumers it
- It is led by various consumer organizations and individuals who work against firms or Institutions that cheat consumers

❖ Objectives of consumer protection movement

- To protect consumer rights
- To prevent frauds
- To empower consumers
- To legislate
- To ensure the credibility of advertisement
- To ensure representation Of consumers in political forums

❖ National Consumer day

- December 24

❖ Consumer Protection act 2019

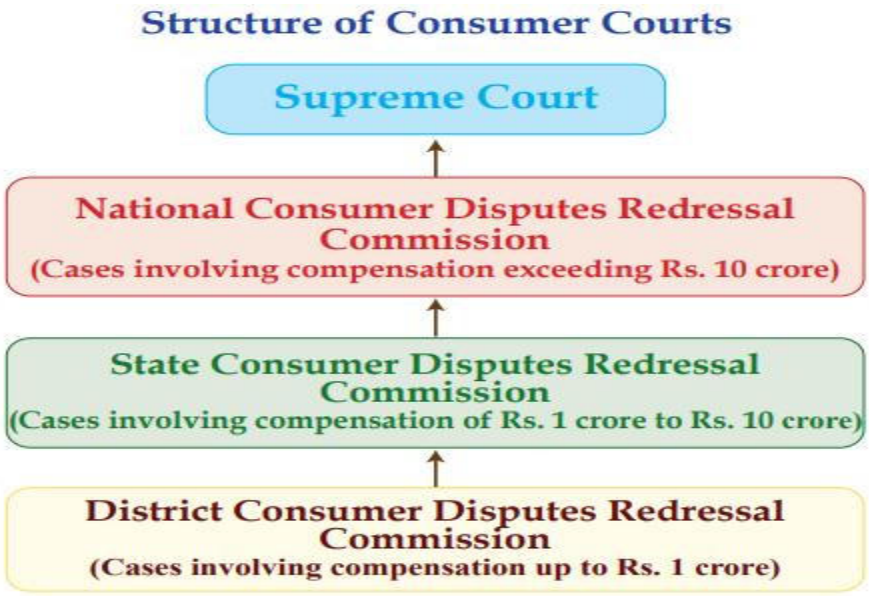

- This act came into force on 20 July 2020
- Established the Central Consumer Protection Authority (CCPA)

- Covers rules to prevent unfair trade practices by e-commerce
- Helps in simplifying the consumer dispute
- Provides punishment of those who manufacture and sell adulterated counterfeit good
- Prohibits the dissemination of misleading advertisement
- Guarantees the right to consumer education

❖ <u>What are the rights of the consumer guaranteed by consumer protection laws?</u>

- Right to safety
- Right to be protected From the sale of goods and services that are Dangerous to life and property
- Right to choose
- Right to choose goods and services at competitive prices
- Right to know
- Quality, quantity, purity, price level of goods
- Right to seek redress
- Right to seek redress against unfair trade practices and consumer exploitation
- Right to consumer education
- Right to obtain knowledge and medicine to become an informed consumer.

❖ Table showing the structure of the consumer dispute resolution system:

❖ Three-tier advisory committees other than consumer courts

- 1.District Consumer Protection Council
- 2.State Consumer Protection Council
- 3.National Consumer Protection Council

❖ What is the role of Consumer Protection Councils?

- To advise the respective governments on matters related to consumer rights

❖ How can a consumer file a complaint if he/she is cheated?

- You can file a complaint with the concerned office or consumer courts
- You can write a detailed complaint on a white paper and submit it directly to the consumer dispute redressed court
- Necessary documents should be attached as evidence along with the complaint

❖ What is consumer education?

- Consumer education is the knowledge that consumers gain about their rights, responsibilities, selection of products and services, differences in the market, consumer laws, etc.

❖ What are the objectives of consumer education?

- Protecting consumer rights
- Making consumers aware of consumer responsibilities
- Ensuring safety in trade, especially in online trade
- Identifying ethics and rules in the market
- Creating awareness about consumer protection laws
- Ensuring health safety
- Promoting consumer justice

❖ Importance of consumer education

- Ensuring awareness among consumers and raising self-safety values
- Helps to protect them from frauds and wrong transactions
- Helps to create a better consumer society
- Sustainable consumption and development
- Required Cultivate a mind-set of consuming only goods and services
- This provides an opportunity for the people who do not have access to goods and services
- This will also help achieve sustainable consumption and development

❖ Different types of frauds and Institutions that can be approached to resolve them: table

Fraud	Institutions to approach
Frauds related to educational institutions	a) Contact UGC, AICTE, State Board b) Approach Consumer Forum c) Lodge a complaint with the police d) Contact the Ministry of Education
2. Healthcare Frauds	a) File a complaint through the grievance portal of the State/National/Medical Council b) Complain with a report to the Director of Health. c) File Public Interest Litigation (PIL) in the High Court and Supreme Court for serious health frauds d) File a complaint through the Aarogya Setu app.
Fraudulent offers of jobs abroad	a) Can complain through the Protectorate of Emigrants (P0E) a) A case can be filed under IPC Section 420. b) If you were scammed after arriving at the foreign country, you can lodge a complaint with the Indian Embassy or High Commission. c) Can get in touch with at Pravasi Sahayata Kendra (PBSK) Toll No: 1800-11-3090
4. Online Fraud	a) Complain to Cyber Crime Cell at cybercrime. gov.in b) Report to the CERT - IN portal (Indian Computer Emergency Response Team) c) Submit a complaint through the National Consumer Helpline or at info@cert.in.org.in

5. Banking frauds	a) Approach the Bank Grievance Redressal Mechanism (Branch Manager) b) If the bank does not respond within 30 days, you can approach the RBI Ombudsman. c) Banking Ombudsman Toll free no: 14448, cgmbank@rbi.org.in

Some quality symbols

Symbol	Name	Related sector
	ISI mark	The Bureau of Indian Standards (BIS) issues the ISI mark to ensure that products meet certain quality standards. This mark can be found on industrial products such as cement, paper, paint, and gas cylinders.
	AGMARK	This symbol is used to ensure the quality of agricultural and forestry products.
	FSSAI	Ensures food security.

Model Questions from this chapter:

1. "Utility" is defined as the:
    a. Monetary value of a commodity
    b. Want-satisfying power of a commodity
    c. Cost of production of a commodity
    d. Social benefit of a commodity
2. What happens to "marginal utility" as the consumption of each additional unit of a commodity increases, assuming other factors are constant?
    a. It increases
    b. It remains constant

c. It declines

d. It first increases then declines

3. The Consumer Protection Act 2019 came into force on:

    a. 24 December 1986

    b. 1 July 2017

    c. 20 July 2020

    d. 8 November 2016

4. Match the quality symbol with the sector or product it ensures quality for.

ISI mark	Agricultural and forestry products
AGMARK	Ensures food security
FSSAI	Industrial products like cement and gas cylinders

5. Explain the "Law of Diminishing Marginal Utility" with a simple example.
6. Identify and briefly explain any two fundamental rights of a consumer as enshrined in Indian consumer protection laws.
7. Name the three-tier structure of Consumer Courts in India and the compensation range each tier handles.
8. Discuss how the Consumer Protection Act 2019 aims to empower consumers and protect their rights in the modern context, particularly concerning unfair trade practices by e-commerce platforms and misleading advertisements.
9. Using Nina's orange consumption example from the text, differentiate between "Total Utility" and "Marginal Utility" as she consumes multiple oranges.
10. What are two main objectives of "Consumer Education"?

5. Money and Economy

❖ The Role and Functions of Money in the Economy

- The central theme of this chapter is how money facilitates economic activities and drives the economy.
- It explains how money evolved to solve the problems of the barter system and how it serves as a medium of exchange, a measure of value, a store of value, and a means for deferred payments.
- The chapter also delves into how money's circulation, regulated by a central bank like the Reserve Bank of India (RBI), influences economic growth, inflation, and the banking system as a whole.
- It highlights that while the forms of money change, its fundamental role in influencing consumers, producers, and suppliers remains constant.

❖ The General Functions of Money

- Money performs four general functions in an economy:

1. Medium Of Exchange	❖ Goods and services can be sold for money, and the money can be used to purchase the goods and services that are needed. ❖ The same money can be used to purchase goods and services. Money is crucial for making countless transactions in the economy.
2. Measure of Value	❖ The value of all goods can be expressed in monetary terms. In the barter system, it was not easy to compare the value of one good with the value of another. ❖ Just as the value of good is measured in monetary terms, the value of money can also be expressed in terms of other goods. ❖ Changes in the purchasing power of money are keenly felt when there is inflation or deflation in the economy.
3. Store of Value	❖ When money became something that was acceptable to everyone, it had become possible to store the value of any good in the form of money.

	❖ Through this it is possible to convert the value of goods, including that of perishable items, into money or asset and it can be used in the future.
4. Means of Deferred Payments	❖ In the modern times many business activities are carried out with ease because of the advantage of settling the financial transactions at a later date. ❖ It is possible to measure the value of borrowing and lending in the form of money. This is very helpful for short and longterm business transactions.

❖ <u>How money works in an economy</u>

- It is money that moves the economy and speeds up its functioning. For eg. In an economic activity of the primary sector such as rice production , the money spent on fertilizers and machinery becomes income for the producers in the industrial sector, when they depend on transportation it becomes an income for service sectors and is pumped back into the economy.

- Velocity of circulation
  - The number of times a unit of money is exchanged in a given period of time is known as the velocity of circulation of money. An in in velocity of circulation shows increase in economic growth while decrease indicates slows down in economic growth
  - Banks and financial institutions play a major role in facilitating money transactions and regulating economic activities.

❖ <u>Reserve bank of India:</u>

1. The Reserve Bank of India is the central bank of India
2. Headed by its governor
3. Established on 1 April 1935 in Kolkata under the Reserve bank of India act of 1934
4. Nationalised in 1949

❖ The functions of the Reserve Bank of India (RBI):

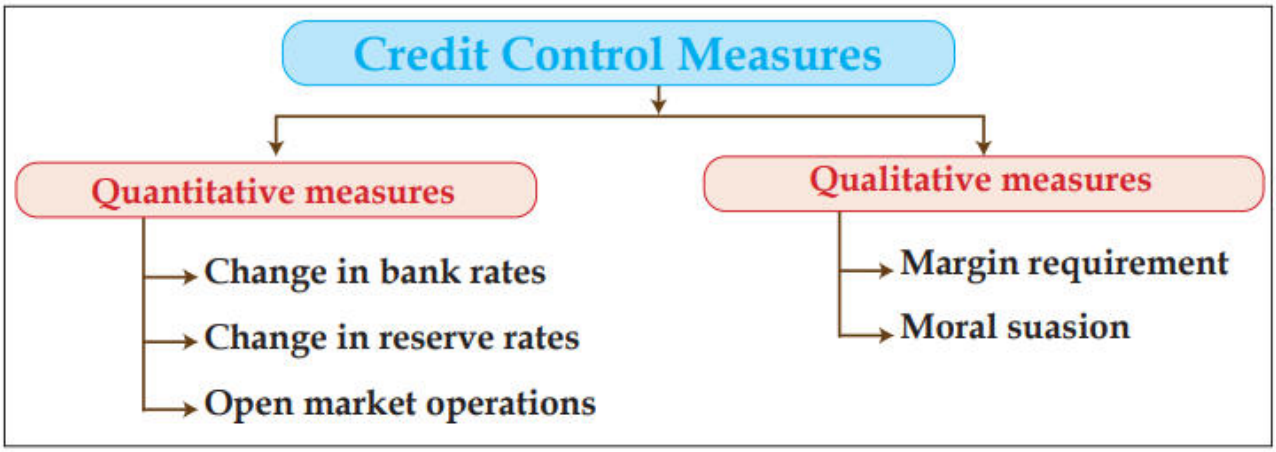

➢ The Reserve Bank of India (RBI) is the central bank of India and performs several key functions:

Printing and Issuing currency	❖ The RBI has the sole power to print and issue all currency notes in India, except for one-rupee notes and coins, which are issued by the Ministry of Finance, Government of India. ❖ The RBI is also responsible for the design, security features, printing, and distribution of currency.
Banker's Bank	❖ The RBI acts as a bank for all other commercial banks. ❖ It provides emergency loans, maintains their reserves, and helps settle transactions between them.
Controls the Supply of Money and Credit	❖ The RBI uses various measures to control the amount of money in the economy to manage inflation. When the money supply increases without a proportional increase in goods and services, it can cause prices to rise (inflation). ❖ To control this, the RBI can increase interest rates like the repo rate and reverse repo rate, which in turn reduces the money available for lending and encourages saving, thus bringing inflation under control.
Acts as the Government's Bank	❖ The RBI is responsible for managing government accounts, providing banking services, and implementing financial management. ❖ It also advises the government on fiscal and monetary policy.
Custodian Of Foreign Exchange Reserves	❖ The RBI holds and manages the foreign exchange reserves of the country, which include foreign currencies and gold.

Publication of Reports	❖ The RBI publishes various reports, such as the Banking Trends in India, Monetary Policy Reports, Consumer Surveys, and the RBI Bulletin and statistical supplements.

How does the Reserve Bank see the total amount of money in our economy?

- The RBI sees the total amount of money in the form of M1, M2, M3 and M4.
- M1 = Coins and currency notes held by the public and the savings deposits in commercial banks.
- M2 = M1 + savings deposits in post office savings banks
- M3 = M1 + net fixed deposits in commercial banks
- M4 = M3 + total deposits in post offices (excluding National Savings Certificates)
- Where M1 and M2 are known as narrow money and M3 and M4 are known as broad money.

❖ How is inflation controlled by changing bank rates and changing the reserve ratio, by RBI?

1. The important bank rates are the repo rate and the reverse repo
2. When RBI increases these rates, the commercial banks also change these rates. When these rates are increased, the money available with the commercial banks for lending fall because at a higher rate of interest the commercial banks will take less loans from RBI and deposit more in the RBI.
3. In the same way the loan taken by the public will also be less. So the money available in the economy also would be less. When the rate of interest is high, people will prefer to save more money rather than spend, because the reward for not consuming is greater.

4. The money held by the public flows to commercial banks and from there to the Reserve Bank. The amount of money in the economy decreases and the inflation comes under control.

❖ Repo Rate:

- The rate of interest charged by the Reserve Bank of India on the loans taken by commercial banks from the RBI.

❖ Reverse Repo Rate:

- The rate of interest given by the Reserve Bank of India on the deposits by the commercial banks.

❖ Cash Reserve Ratio (CRR)

- Cash Reserve Ration is the amount of money the banks must keep as reserves with the Reserve Bank from the money they receive as deposits.

❖ Banks and non- banking Financial Institutions

- They are institutions that provide financial series to individuals, organisations, and businesses in the economy
- Commercial Banks: These banks, licensed by the RBI, primarily accept deposits and provide loans. They include public sector, private sector, and other specialized banks. New generation include Axis bank , Mahindra bank, Yes bank, Indus bank.

❖ Functions of the commercial banks:

- Accepting deposits and providing loans
- Providing various services
- Credit card, debit card
- ATM service
- Locker facility

❖ Types of Bank Deposits:

- There are four main types of bank deposits:

Savings Deposits	❖ These are designed to encourage a savings habit among people. ❖ You can deposit money whenever you want and withdraw it whenever needed. ❖ These accounts earn a lower rate of interest compared to fixed deposits.
Current Deposits	❖ These are primarily for business purposes. Unlike savings accounts, there are no restrictions on the number of times you can deposit or withdraw money in a day. ❖ Banks do not pay any interest on current deposits. ❖ overdraft facilities allowed for these accounts, which allows to withdraw more money than they have in their account, up to a certain limit.
Term/Fixed Deposits (FDs):	❖ This type of deposit is for a fixed period of time, The interest rate is higher than a savings account. ❖ If the money id withdrawn before the maturity date the interest of the depositor will be reduced. ❖ The interest can be withdrawn along with the deposit at maturity
Recurring Deposits (RDs):	❖ In a recurring deposit, a fixed amount of money is deposited every month for a specific period of time. ❖ Such deposits have higher rates of interest but are lesser than the fixed deposits.

❖ Lending loans:

- Commercial banks provide various loans to individuals and institutions for various financial activities. They act as an intermediary between depositors and borrowers. Bank keeps a portion of the deposits received as reserves and lends the rest to entrepreneurs charging an interest on the various loans they provide.

- The interest rate charged to the borrower will be high than the interest paid to the depositor. This difference is the income of the bank. This is known as spread. They also receive collaterals for the loans. Gold, land documents salary certificate etc. are some of them.

❖ Banks and technology:

- Technology has helped in speeding the transactions. Mobile banking and online banking have helped customers to access various banking services using smartphones and computers. Online banking is a system where bank transactions are available through internet. Banking services are now available 365 days a year and anywhere in the world, due to the intervention of technology.

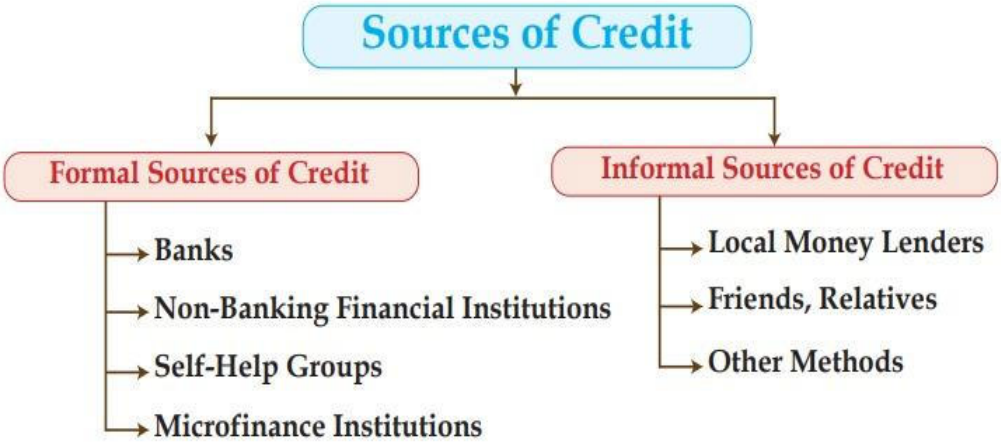

National Electronic Fund Transfer System(NEFT)	Makes bank transactions easier and faster between account holders using Indian Financial System Code (IFSC)
Real Time Gross Settlement (RTGS)	Transfers large amount of money between account holders in a very short time
Core Banking	Enables an account holder to carry out transactions form any of its branches, there is no need to go to the specific branch where the account holder has the account.
Universal Payment Interface(UPI)	Developed by the NPCI, enables real-time transfer between bank account. Users connect account using mobile application and make simple and secure transactions. Eg: Gpay, Paytm, Phone Pay etc.

❖ Non- banking financial institutions

- Financial institutions that operate in the banking sector but perform only some of the functions of a bank. They cannot accept savings and deposits from the public.
- Money cannot be withdrawn using cheques. They are regulated by institutions like Reserve Bank Of India, Securities and Exchange Board of India, Insurance regulatory and Development Authority of India and national Housing Bank
- Eg: insurance companies, mutual fund companies, and non-banking financial institutions.

❖ Sources of credit in India

- Entrepreneurs need money to start new ventures, expand existing one, and enable firms to adopt new technology. A large percentage of this comes from banks and non-banking financial institutions
- Credit is a main source for the financing of development activities. They can be classified into formal and informal sources of credit.
- Formal sources of credit are organized institutionalized and regulates systems
- Informal sources of credit are unorganized and non-institutionalized systems both are necessary for the growth of the economy.

❖ Credit Deposit Ratio

- Credit Deposit ratio measures the proportion of a bank's deposit that are used for loans. It is monitored by the RBI.

- A high credit deposit ratio indicates that banks have lent out a large portion of the deposits they have received and a low credit deposit ratio indicates that they have lent out only a small portion of the deposits that they have received.

❖ Financial Inclusion

- The steps taken by the country to bring the benefits of functioning of money and financial institutions to everyone.
- Financial inclusion and inclusive economic growth accelerate when banking services reach the common man, rural population, and the marginalized people.

❖ Steps taken by the government for financial inclusion

1. 14 banks were nationalized in 1969 and 6 banks in 1980
2. Objectives of bank nationalization:
3. To expand banking facilities in rural areas
4. To provide credit to farmers at lower rates
5. To ensure equitable distribution of credit
6. To prevent the concentration of economic power in a few people

❖ Co-operative Banking System

- Co-operative banks helps in activating the rural economy by providing banking facilities to villagers and ordinary farmers. They operate on the principles of co-operation, self- help and mutual assistance.
- The objectives are to inculcate the habit of saving among the villagers and to protect common people from private moneylenders, and to provide low-cost loans to farmers and small business men.

❖ Microfinance

- Microfinance aims to provide financial services to low-income individuals, families, and businesses that do not have access to conventional banking services

- Goals of micro- finance:
  - Poverty alleviation
  - Empowerment of women and marginalized
  - Promotion of entrepreneurship
  - Ensuring job creation
  - Improvement of quality of life

- Examples for Microfinance
  - The Grameen bank founded by professor Muhammad Yunus in Bangladesh in 1983.
  - Kudumbasree in Kerala

- Working of Kudumbasree
  - Poverty alleviation and women empowerment
  - Accepts small deposits through Neighborhood groups and self-help groups
  - Provides loans as per need

- Jan Dhan Account
  - Scheme to open an account for all those who do not have a bank account in the country. It aims to bring all people of the country under banking services. Minimum balances of such account are zero. Provides financial services to low- income groups, promote financial literacy and inculcate banking habit.

- Digital currency
  - The latest trend in financial transactions promoting Aadhar based payment, e-wallet and National Finance Switch to reduce the use of physical currencies and increase the use of digital currencies for moving towards cashless economy.

- Role of Money in enabling Economic activities:
  - Money plays a vital role in production, consumption and distribution. With digitalization, transactions have increased and new currencies are emerging. Money for consumption reaches producers, while savings become loans through banks and financial institutions. These

institutions promote growth, and technology has encouraged cashless transactions, bringing remote areas into the banking network.

❖ Model questions based on this chapter:

1) In India, which institution has the sole power to print and issue all currency notes *except* coins and one-rupee notes?
   a) Ministry of Finance, Government of India
   b) State Bank of India
   c) Reserve Bank of India
   d) Commercial Banks
2) An increase in the general price level of goods and services in the economy is known as:
   a) Deflation
   b) Recession
   c) Inflation
   d) Stagflation
3) The number of times a unit of money is exchanged in a given period of time is known as the:
   a) Money supply
   b) Fiscal policy
   c) Velocity of circulation of money
   d) Credit deposit ratio
4) Match the general function of money with its description.

Medium of Exchange	Value of goods can be stored in its form for future use
Measure of Value	Goods and services can be bought and sold using it
Store of Value	Allows financial transactions to be settled at a later date
Means of Deferred Payments	Value of all goods can be expressed in its terms

5) List two of the four general functions of money.

6) Explain how "spread" contributes to the income of commercial banks.
7) Identify two objectives behind the demonetization implemented in India on 8 November 2016.
8) Discuss how the Reserve Bank of India (RBI) uses "Repo Rate" and "Reverse Repo Rate" as quantitative measures to control the supply of money and credit in the economy, especially during times of inflation.
9) Differentiate between "Savings Deposit" and "Term Deposit (Fixed Deposit)" accounts offered by commercial banks, highlighting their key characteristics regarding withdrawals and interest rates.
10) Identify two initiatives undertaken by the Indian government to promote "financial inclusion" among the common man, rural population, and marginalized people.
